REPORT OF THE AUDITOR GENERAL

PUBLIC ACCOUNTS

Introduction

DEPARTMENT OF FINANCE,
OTTAWA, December 27, 1943.

The Honourable J. L. ILSLEY,
Minister of Finance.

SIR,—In accordance with section 38 of the Consolidated Revenue and Audit Act, I have the honour to submit to you herewith the Public Accounts of the Government of Canada for the fiscal year ended March 31, 1943.

INTRODUCTION

A. THE NEW FORM OF THE PUBLIC ACCOUNTS AND ITS BACKGROUND.

As this document is here presented for the first time in its revised form, it may be of interest to review briefly the history of the annual reports made to Parliament dealing with the accounts of the Government of Canada.

For the first few years after Confederation, the document known as the "Public Accounts" was prepared by a Board of Audit. This Board was the successor to a similar Board which had been evolved in the Province of Canada in the middle fifties as one by-product of the struggle of the Legislature to secure more effective control of expenditure and improved financial administration on the part of the executive arm of government. The Act of Union which was to bring responsible government to the province had given control of the public purse to the Legislature and placed the authorization of the audit of the public accounts within its jurisdiction but, for reasons difficult to understand, fifteen years were to elapse before an Audit Act was passed. Meanwhile, a branch of the office of the Inspector General^(a) was responsible for the audit of accounts, and the Public Accounts were issued over the signature of the Inspector General. Thanks to drastic criticism by the Public Accounts Committee of the inadequacy of existing methods, there was enacted Chapter 78 of the Statutes of 1855 which provided for the creation of a Board of Audit, responsible to the Inspector General and charged with responsibility for the audit of accounts, the preparation and review of the Public Accounts, and the submission of this document to the Inspector General for his revision and approval. The Board was to consist of the Deputy Inspector General as Chairman, the Commissioner of Customs, and a provincial auditor to be appointed by the Governor. In 1864 the Deputy Receiver General, the Deputy Postmaster General and the Deputy Commissioner of Crown Lands were added to the Board and the Auditor was named Chairman.

After Confederation, by Chapter 5 of the Statutes of 1867, the Board of Audit was continued and the Deputy Ministers of Public Works, Militia, and Marine and Fisheries and the Commissioner of Inland Revenue were added as members. The deputy ministers who were members of the Board were made responsible, in the first instance, for the audit of their departmental accounts, and the Auditor was to audit all other accounts and make a final audit and review of the accounts primarily audited by other members of the Board. The Board of Audit, as a whole, however, remained responsible for the preparation and submission to the Minister of Finance of the Public Accounts to be annually laid before Parliament. It continued to be the duty of the Deputy Inspector General "to keep the Public Accounts of the Dominion".

In 1869 the Department of Finance was formally established. It was given "supervision, control and direction of all matters relating to the Financial Affairs and Public Accounts, Revenue and Expenditure of the Dominion". The Auditor and the Deputy

(a) In 1859 this title of Inspector General or Inspector General of Public Accounts was changed to that of Minister of Finance and in 1879 the office was combined with that of the Receiver General under the designation Minister of Finance and Receiver General.

Inspector General were to be officers of the Department and the Board of Audit was to perform its duties under the supervision of the Minister of Finance. At the same time the Treasury Board was created. In the following year, 1870, the office of Deputy Inspector General was abolished and all the powers and duties of the office of the Auditor were combined with those of the Deputy Minister of Finance. Mr. John Langton, who had been Auditor since that office was established, became Deputy Minister of Finance.

An important change came in 1878 when Parliament passed a Consolidated Revenue and Audit Act, which abolished the Board of Audit, separated the offices of Auditor and Deputy Minister of Finance and made the former in effect an officer of Parliament for "the more complete examination of the public accounts of the Dominion, and the reporting thereon to the House of Commons", and placed responsibility on the Deputy Minister of Finance not only for keeping the general accounts of the Dominion but also for preparing the Public Accounts to be tabled in Parliament by the Minister of Finance. The directions as to the content of the Public Accounts were very limited but in effect they required essentially what is required by the present Consolidated Revenue and Audit Act. The relevant provision of the present Act is that the annual statement shall show for the preceding fiscal year:

- "(a) the state of the public debt;
- (b) the state of the Consolidated Revenue Fund and the various trusts and special funds under the management of the Government of Canada;
- (c) such other accounts and matters as are required to show what the liabilities and assets of Canada are at the date of such statement."

In practice the Public Accounts have always gone substantially beyond this simple and limited direction; they have always covered all the accounts on the books of the Dominion, have given supporting schedules to the balance sheet, have itemized the sources and amounts of revenue received and the amounts expended under parliamentary appropriations and have included a good deal of historical and miscellaneous data. From 1878 onwards, they have been prepared and submitted by the Deputy Minister of Finance. Up to and including the report for the fiscal year 1884-85 they included a very considerable amount of detail in regard to expenditures. Thereafter, however, the treatment of expenditures was more and more reduced to a summary presentation, as the details of expenditure had begun to be reported to Parliament by the Auditor General.

The Auditor General's report began as a report on the appropriation accounts only. It presented these accounts in such summarized form as the Auditor General considered necessary to explain the extent of his certificate, with brief statements as to the uses to which the parliamentary appropriations had been put and comments upon irregularities. Soon, however, an increasing amount of detail began to be added. In the fiscal year 1885-86 the details were greatly expanded, while only a summary appeared in the Public Accounts. This practice which was apparently arrived at by agreement between the Auditor General and the Deputy Minister of Finance has continued in effect up to the present. At that time, also, the report began to be concerned with revenues as well as expenditures. Starting with the report for the fiscal year 1923-24, the Auditor General's report began to comment upon the accounts which appear in the balance sheet (known as the "Open Accounts") and since then this report, like the Public Accounts, has covered all the accounts on the books of the Government.

Thus, for many years there have been two official reports on the accounts of the Government of Canada, differing in treatment and emphasis but overlapping to a considerable degree—one prepared by the Deputy Minister of Finance and the other by the Auditor General. This has led not only to increased cost but also to a good deal of inconvenience and confusion on the part of Members of Parliament and others who are concerned with the financial activities and position of the Government of Canada. At the same time, some abbreviation in recent years of the details formerly shown in the Auditor General's report has led to a demand from Members of Parliament for more complete information, particularly in regard to expenditures, than was being shown in either of the two official reports.

It was as a result of this situation that in the summer of 1942 you accepted the recommendation made by an informal committee consisting of the Auditor General, the Comptroller of the Treasury and myself, that beginning with the accounts for the fiscal year 1942-43 the Public Accounts and the Auditor General's report should be combined into a single document and that certain improvements in the method of presentation should be adopted. On July 31, 1942 (*vide* House of Commons Debates, Session 1942, Vol. V, p. 5082), you made the following announcement on behalf of the Government:—

"In the course of our consideration [i.e. of methods of improving the presentation of the accounts of the Government of Canada] we have studied not only the law and the historical background relating to the reports to parliament on government revenues and expenditures, assets and liabilities, et cetera, in so far as Canada is concerned, but also the practices followed by the United States, the United Kingdom, and the other British dominions. Our desire was to draw from all possible sources lessons and suggestions as to the best possible way in which to present to parliament the information necessary to enable it to exercise wisely and efficiently its control over financial matters and assure itself that the executive arm of government is properly carrying out its stewardship. As a result of the study and consideration given to the whole matter, I am glad to be able to announce that the government has decided to accept certain recommendations made jointly by the auditor general, the deputy minister of finance, and the comptroller of the treasury. The Government believes that these recommendations are sound, and, if they commend themselves to the judgment of the house, they will be implemented with respect to the accounts for the current fiscal year.

The essential feature of these recommendations is that there should be tabled under a common cover both the public accounts and the auditor general's report; that in future this single document should be called the public accounts, and that, in recording the outlays made by government departments and agencies, the 'details' of expenditures printed in the estimates should be followed, but supplemented by such other material as the Minister of Finance may consider necessary to elucidate adequately the uses to which the grants made by parliament have been applied."

The present report reflects the decision thus announced. It is intended to eliminate the overlapping and duplication inherent in the former practice of presenting two official reports, to clarify the published records of the finances of the Dominion by presenting them all as one co-ordinated whole, to make as comprehensive and illuminating a report and analysis of the government's financial activities as is practicable under present war-time conditions, and generally to facilitate the work of parliament in maintaining a wise and effective control over the activities of the executive arm of government.

The report, it will be noted, is divided into four sections, as follows:—

INTRODUCTION.—A review by the Deputy Minister of Finance, summarizing the financial transactions and outlining the debt position of the Dominion for the fiscal year under review, with certain comparative analyses.

PART I.—The Balance Sheet of the Dominion with supporting schedules prepared by the Deputy Minister of Finance and certified by the Auditor General, followed by a summary statement of revenues and expenditures and a condensed cash statement for the year; comparative tables of revenues, expenditures and indebtedness since Confederation; and various Appendices consisting of miscellaneous statements necessary to report on transactions not fully treated elsewhere.

PART II.—A report by the Comptroller of the Treasury. Prefaced by summarized statements of revenues, appropriations and expenditures which are certified by the Auditor General, it contains by departments the details of the transactions by official revenue accounts, appropriations and war allotments as well as information relative to the Trust and Special Accounts.

PART III.—The Auditor General's report to the House of Commons, containing his comments upon the information disclosed in the preceding sections and such other matters as he is required or may wish to report upon.

B. CONTENT AND PURPOSE OF INTRODUCTORY SUMMARY.

Following the historical background just given, I intend in this Introduction to summarize the financial transactions of the Dominion for the fiscal year ended March 31, 1943, in such a way as to assist the reader in grasping the significance of the voluminous details which are to be found in Parts I and II of the Report. The transactions reported in those Parts are necessarily complex and involved, for they are the reflection in dollars and cents of physical activities that are both extensive and complicated. The government to-day is by far the largest and most complicated business in Canada: it is by far the largest employer of labour; through its various agencies it carries on an exceedingly diversified range of activities, including the operation of a transcontinental railroad

and a whole series of industrial and business enterprises; its total expenditures are about half the aggregate national income and consequently its financial operations are of a most difficult, widely ramifying and highly involved character. Nevertheless I hope it will be possible to present the financial statements of the Dominion in such a way that the ordinary citizen can at least follow the broad outline and understand something of the problems which the Government has had to meet. That is the object of this introductory survey. Those who wish to pursue details will find them in Parts I and II.

The pages that follow will be devoted, first, to some comments upon the more significant aspects of the Balance Sheet; then, to a summary analysis of revenues and expenditures, classified by functional categories for the most part, and designed to show the major trends and developments; then to a discussion of the budgetary deficit and the cash deficiency; then, to an analysis of our total requirements for cash and a report upon how the cash was raised; and, finally, to some comments upon our indirect or contingent liabilities and the changes therein during the year.

To avoid meaningless complication the figures used in this Introduction have been rounded off, in most cases to the nearest hundred thousand dollars.

C. THE BALANCE SHEET AS AT MARCH 31, 1943.

The Balance Sheet of the Dominion is shown in Part I, pages 2 to 5. For the first time it is given on a comparative basis, disclosing not only the amount of various asset and liability items at the close of the fiscal year 1942-43 but also their amount at the beginning of that year and the net changes in each item that occurred during the year. To facilitate easy reference, each item is given a number and on pages 6 to 11 will be found an explanatory note in respect of each item.

It will be noted that the aggregate liabilities of the Dominion amounted to \$9,228·3 million at March 31, 1943, and had increased by \$2,579·4 million during the year. Over 85 per cent of this total is represented by funded debt (including Treasury Bills). Fortunately, however, less than 6 per cent of this funded debt is now payable in foreign currencies—the equivalent of \$13 million in London and \$439 million in New York out of a total of \$7,893·5 million. Floating debt which consists of cheques outstanding, interest due and outstanding and funded debt matured and outstanding, increased during the year by \$57·3 million to a total of \$117 million. Various trust, contingent and special funds, insurance and superannuation funds, Post Office Savings bank deposits and Government annuities account for the remainder of the liabilities.

Offsetting these liabilities on the assets side, the Balance Sheet shows a series of items which are entitled Active Assets and which consist mainly of cash, securities, loans and advances and miscellaneous current accounts. Active assets are those which are taken at their face value, less only a general reserve against possible losses on ultimate realization, to be deducted from the Gross Debt of the Dominion in order to calculate the Net Debt. Non-active Assets, on the other hand, are those which are treated as having no value so far as the calculation of Net Debt is concerned. The principal distinction between these two types of assets is that Active Assets normally return interest, whereas Non-Active Assets do not. In 1942-43, however, some Active Assets did not return interest while certain Non-Active Assets did so [*vide* notes 6 (g) on page 6 and 11 (i) on page 9]. Non-Active Assets consist mainly of the cost of those public works which have been charged to appropriations classified as "Capital" in the Estimates, and certain investments in or advances to government-owned enterprises to meet operating deficits or for capital purposes. There is a value in most cases in their continuing usefulness to the public, which distinguishes them from the expenditures that represent the Consolidated Fund (the remaining portion of the Net Debt). The Consolidated Fund is the accumulated net deficit since Confederation, including the amounts by which both Active and Non-Active Assets have been written down from time to time, but excluding capital expenditures and non-active investments. In this connection it should be noted that the practice, started in 1940-41, of building up a

reserve against possible losses on ultimate realization of Active Assets was again followed during the year under review. The charge to this reserve was again \$25 million and the reserve now stands at \$75 million.

With this explanation we may note that Active Assets totalled \$3,045·4 million at March 31, 1943, an increase of \$441·8 million during the year. This left the balancing item, the Net Debt, standing at \$6,182·8 million at the end of the year. The increase of \$2,137·6 million during the year was of course the amount of the over-all deficit for the fiscal year. The Net Debt, as already indicated, is made up of two items: (1) expenditures for capital purposes and non-active assets since Confederation, amounting to \$1,493·3 million at March 31, 1943, an increase of \$35·3 million during the year; and (2) the Consolidated Fund, representing the aggregate of the annual net deficits (exclusive of capital expenditure and non-active investments) since Confederation and amounting to \$4,689·6 million at March 31, 1943, an increase of \$2,102·3 million during the year.

It may be interesting to note that the Net Debt of Canada was \$3,152·6 million at March 31, 1939, the end of the last fiscal year before the war. The increase therefore during the subsequent four years, due almost solely to war expenditures, has been \$3,030·2 million. The table on page 49, Part I, shows the annual increase or decrease in Net Debt since Confederation.

D. SUMMARY OF EXPENDITURE AND REVENUE.

Table I gives a summary of expenditures and revenues for the fiscal year 1942-43 compared with those for 1941-42, classified by the general accounting categories used in previous years.

(a) For details of actual expenditures and revenues for 1942-43 see pages 12 to 17 of Part I; for 1941-42 see pages 6 to 13 of the Public Accounts for the fiscal year ended March 31, 1942. Note that the rows and columns do not add exactly to the totals shown in some cases; this is due to rounding off the figures to be nearest hundred thousand dollars.

(b) The distinction between "war" and "non-war" expenditure is arbitrary; "war expenditure" merely means charges to the War Appropriation Acts and "non-war" means all other.

The grand total of expenditures during the year 1942-43 was \$4,387.1 million, a sum far in excess of that for any previous year in the history of the Dominion. The net increase during the year was \$2,502.1 million, or almost 133 per cent. This increase, as well as the huge size of the total expenditures, are of course due to war expenditures which accounted for \$3,724.2 million, or approximately 85 per cent of the total, and \$2,384.6 million in excess of expenditures charged to war for the fiscal year 1941-42. As we shall see, however, most of the increase in so-called non-war expenditure was also really attributable to the war. These non-war expenditures stood at \$662.9 million, an increase of \$117.5 million over the previous year.

As just indicated, the terms "war expenditure" and "non-war expenditure" are to a considerable degree arbitrary. "War expenditure" as used in the Public Accounts, merely means the expenditures that have been charged to the various War Appropriation Acts, and "non-war expenditure" is used to mean all other expenditures. A great portion of the increase in the interest on the public debt, and in the cost of revenue collection is directly attributable to the war, but the total amounts are included in non-war expenditure. The same applies to the compensation paid to the provinces for vacating the personal income and corporation tax fields for the duration of the war, and for the loss of gasoline tax revenues. The costs of nearly all government services have been increased by the war, but these increases are not charged to the war appropriations and so are treated as non-war expenditures. On the other hand, the wartime increase in freight and passenger travel has contributed materially to the improved position of the Canadian National Railways, thus reducing the expenditures that might otherwise have been required to meet the operating deficits. Since this war activity is largely the result of expenditures from the war appropriations, it is clear that non-war expenditure has been reduced to this extent at the expense of war expenditure.

Total revenue during the year amounted to \$2,249.5 million, an increase of \$761 million over the previous fiscal year. This total is almost equal to the combined revenue receipts for the two preceding fiscal years and is in excess of the sum of the receipts for the five fiscal years immediately preceding the war. It is over twice the total of the revenues received during the whole five fiscal years during which the Great War was fought. It represents nearly \$200 for every man, woman and child in the country. It is a striking illustration of the resiliency of Canadian governmental revenues under conditions of full employment and with a comprehensive and well-balanced tax structure. The total Net Debt of the Dominion at March 31, 1943, it is interesting to note, was less than three times the total revenue received during the year.

It will be noted that 51.3 per cent of Canada's total expenditure for the year under review was covered by revenue receipts. This is a very satisfactory proportion for the fourth fiscal year of a total war. The following summary table shows the results for the four fiscal years of the war to date and the budget estimate for the fiscal year 1943-44:—

Fiscal year ended March 31	Total Expenditure	Total Revenue	Ratio of Total Revenue to Total Expenditure
	(In millions	of dollars)	%
1940.....	680.8	562.1	82.5
1941.....	1,249.6	872.1	70.0
1942.....	1,885.1	1,488.5	78.9

The contrast with the results achieved during the Great War is striking. The following table presents comparable figures for each year during which that war was being waged:—

E. BUDGETARY DEFICIT OR INCREASE IN NET DEBT.

The difference between total expenditures and total revenues for the year was \$2,137.6 million. This represents the over-all budgetary deficit for the year—or the increase in Net Debt, to which reference has already been made in commenting upon the Balance Sheet. This amount had to be provided either out of borrowing or out of other changes in the assets and liabilities of the Dominion. As will be shown in a later section, however, it does not represent the amount of the net cash requirements or cash deficiency. It is simply the amount by which the net liabilities of the Dominion have increased as a result of the financial transactions during the fiscal year, taking a long-range view so that all Active Assets may be considered realizable and after adding \$25 million to the reserve account which provides against possible losses on realization of these assets.

The deficit is represented by charges to Capital Account and Non-Active Account, on the one hand, and to the Consolidated Fund, on the other hand. Table II shows the composition of these charges:—

F. ANALYSIS OF EXPENDITURE.

(1) Ordinary Expenditure.

Expenditures classified as Ordinary Expenditure totalled \$561.3 million during 1942-43. This was an increase of \$116.5 million as compared with 1941-42.

Most of this expenditure, however, is accounted for by a few contractual and uncontrollable items. Thus, if we add the expenditures for interest and other charges on the public debt, various pension and superannuation payments, unemployment insurance, administration of the income tax division of the Department of National Revenue, the Post Office and payments to the provinces under the Dominion-Provincial taxation agreements, we get a total of \$450.4 million or 80.4 per cent of all Ordinary Expenditure. This is brought out in Table III which also shows similar expenditures in 1941-42 and in the immediate pre-war fiscal year, 1938-39.

(a) Note that the columns do not add exactly to the totals shown in some cases; this is due to rounding off the figures to the nearest hundred thousand dollars.

A classification of Ordinary Expenditure by departments will be found on page 12, Part I and details thereof under the respective departments in Part II.

The interest payable on the public debt is perhaps the most important single item of non-war expenditure, amounting as it does to \$188.6 million in the year under review. Adding the annual amortization of bond discount and commission, various service charges and loan flotation charges, we arrive at the figure of \$202.5 million for total public debt charges, shown in Table III. In relation to a total expenditure of \$4,387 million, the interest payment is not great—only 4.3 per cent. It is also only 8.4 per cent of total revenue; in the immediate pre-war year, the interest on a much lower national debt absorbed 25.5 per cent of total revenue. Compared to national income—a more significant comparison, since the interest payment is important mainly as a claim upon income—it is much smaller still. However, it is really only the interest payable abroad that forms a real drain upon the national income; apart from possible indirect effects, interest payable to Canadians only "costs" the nation as a whole the expenses incurred in

collecting the revenue from the taxpayers and paying it out to the bondholders. There is no exact information available concerning what portion of the Dominion's debt is held abroad, but the presumption is that it would approximate the debt payable in foreign currencies. Interest payable in sterling and U.S. funds amounted to only a little over \$18 million, or about one-tenth of the total in 1942-43. Table IV gives a comparison of these figures for the last ten years.

It may be noted that interest payments on the public debt in 1942-43 showed an increase of \$60.6 million as compared with the pre-war year 1938-39. However, as will be seen later, the increase in the return on the Dominion's investments (interest and dividends received) increased during the same period by \$26.7 million. Return on investments in 1942-43 amounted to \$41.2 million; this might be deducted from gross interest payments of \$188.6 million to show a net interest cost of \$147.4 million.

(a) Including interest payable optionally in Canada or New York.

The compensation paid to the provinces for vacating the personal income and the corporation tax fields, and to reimburse them for the loss of gasoline tax revenue which has resulted from rationing and other controls, was also an important item of expenditure in 1942-43. It totalled over \$94.2 million—\$86 million of this being for income and corporation taxes. More will be said of the Dominion-Provincial taxation agreements in the discussion on revenues, for without them the present income tax structure would have been impossible.

(2) Capital Expenditure.

The charges to Capital Expenditure in the normal sense amounted to only \$3.3 million during the year. The details will be found on page 14, Part I, and in the sections on the Departments of Public Works and Transport in Part II.

(3) Special Expenditure.

This is a category of expenditure adopted during the depression of the thirties to cover expenditures for unemployment and agricultural relief and various employment-creating projects. Total expenditure under this category was \$31.3 million, just under half that for the previous year.

The largest single item of expenditure, \$24.5 million, represented payments of awards to farmers under the wheat acreage reduction plan, administered by the Department of Agriculture. The cost of administration of the plan totalled \$1.3 million. Advances to the Prairie Farm Emergency Fund and the costs of administration under the Prairie Farm Assistance Act were for minor amounts (\$248,997 and \$157,013 respectively). Expenditures for Dominion relief projects and the Dominion's share of outstanding Dominion-Provincial relief projects, amounting to \$5 million, accounted for the remainder of the expenditures under this head.

(4) Government Owned Enterprises.

Under this heading are to be found expenditures made to meet operating deficits of business enterprises wholly owned by the Government of Canada and non-active loans and advances made to such enterprises. As the Canadian National Railway is now showing a substantial surplus, charges to this account during the year were of minor importance, totalling only \$1.2 million. The net income deficit of the Prince Edward Island Car Ferry and Terminals during the calendar year 1942 accounted for \$0.6 million and the remainder was made up of non-active loans and advances to the National Harbours Board. The latter are detailed in note 11 (j) to the Balance Sheet, on page 9, Part I.

(5) Other Charges, including Write-Down of Assets.

Total charges under this heading aggregated \$65.8 million. Of this total \$29.7 million constituted write-downs of active and non-active assets. The principal item was a charge of \$25 million representing an addition to the reserve, referred to in an earlier section, to meet possible losses on ultimate realization of assets treated as "active" in the Dominion balance sheet. The annual write-off from active assets of Soldier and General Land Settlement Loans and the cancellations of Canadian Farm Loan Board Capital Stock were for very minor amounts (\$50,707 and \$7,355 respectively). The remainder of the expenditure for write-downs of assets, namely, \$4.6 million is made up of two items: (a) an amount of \$4.6 million written off from the Canadian National Railways Securities Trust Stock, representing line abandonments during the calendar year 1942; and (b) a small amount (\$42,058) representing the yearly established losses on Seed Grain and Relief Accounts, administered by the Department of Mines and Resources. Both of these items, because they involve a write-down of non-active assets and, accordingly, are already included in the net debt of Canada, are offset by similar amounts shown on the other side of the ledger under Other Receipts and Credits.

The remaining debit items classified as Other Charges relate to the Canadian National Railways Securities Trust Stock. The stated value of this stock, which represents the Dominion's equity in the Canadian National Railways, was increased by \$25.1 million, due to the surplus earnings of the System for the calendar year 1942, and also by \$11.1 million due to the capital gain arising out of the repatriation of C.N.R. securities from the United Kingdom. The Canadian National Railways Securities Trust Stock is carried in the Dominion's books as a non-active asset and, therefore, as these two items necessarily appear as credits under the heading "Special Receipts and Credits", the net debt of Canada is not thereby altered.

(6) Total Non-War Expenditure.

If we add together amounts shown under the various categories of expenditure in the preceding five sections, we get the total of our so-called non-war expenditures. Table V shows a comparison of the totals of non-war expenditures during the last five fiscal years.

(a) The classification of expenditures as between war and non-war is arbitrary; "war expenditures" means charges to the War Appropriation Acts, and "non-war expenditure" means all other expenditures.

(b) The government's contribution plus the cost of administration.

(c) In return for vacating the personal income and corporation tax fields for the duration of the war and for the reduction in gasoline tax revenue.

(d) Contra items appear on the revenue side.

This table is purposely divided into two sections. First, a series of special items are shown separately and totalled; then, all other non-war expenditures are included under a single item. The latter really represents the normal expenditures of government and it is interesting to note that they have declined substantially since the war began. In 1942-43 they were \$253 million, or \$37 million less than in 1938-39 and only \$5.9 million higher than the low level of 1941-42. It is therefore the net effect of the exceptional items (allowing, it will be noted, for the elimination of C.N.R. deficits and the substantial decline in special relief expenditures) that has caused the over-all increase of \$109.8 million in total non-war expenditures. The special payments to the Provinces, amounting to \$94.2 million in 1942-43, are wholly a result of the war—and are of course more than compensated for in the Dominion's revenue receipts. The increase of \$69.4 million in interest and other charges on the public debt is also solely due to the war and is substantially offset by the increase of \$26.7 million in the revenue returned by investments as shown in Table XII, page xxxi. The addition of \$25 million to the reserve for possible losses on realization of active assets is merely a conservative bookkeeping device and really relates to operations of previous fiscal years when the assets in question were acquired rather than to the year under review. Finally, as already indicated, there are numerous other increases in particular items of expenditure which are really due to the war and might well be charged to war expenditures. On the other hand, ordinary Defence Department expenditures included in other non-war expenditures are substantially higher at \$34 million in the fiscal year 1938-39 than in the later years.

(7) War Expenditure.

Total expenditures charged to the various War Appropriation Acts amounted to what for Canada the huge sum of \$3,724 million. This is not only about five and a half times the total of non-war expenditure but is substantially over twice the estimated total of the war and demobilization expenses incurred by Canada during

the whole of the Great War and is not far from three times the total of our expenditures charged to war during the fiscal year 1941-42. (See later discussion of the comparison on page xxv.)

A breakdown of these expenditures by the various services and major spending departments is given in Table VI.

(b) Including departmental administration for Air Services, which is classed as part of Air Services in Part II of this Report.

It will be noted that the three Defence Services and their procurement agency, the Department of Munitions and Supply, accounted for \$2,544·3 million or over 68 per cent of the total, while war supplies furnished to our Allies took another \$1,000 million or nearly 27 per cent. Army services cost \$1,021·9 million and Air services \$617·1 million, while Canada's growing Navy expended \$210·2 million. Of the expenditures by the Department of Munitions and Supply, totalling \$679·1 million, \$408·5 million were invested in plant and equipment and another \$245 million went for the purchase of production assets. War expenditures of all other Departments amounted to \$179·9 million. Of this total \$77·5 million went to pay administrative costs and subsidy activities of the Wartime Prices and Trade Board.

Table VII compares war expenditures in 1942-43 with those in 1941-42. In order to make a proper comparison the expenditures for 1942-43 should be adjusted by deducting (from the expenditures by the Department of Munitions and Supply) the \$200 million paid to the United Kingdom for the purchase of its fixed capital investment in Canadian munitions plants and also by deducting the billion dollar expenditure under The War Appropriation (United Kingdom Financing) Act, 1942. This is because the principal effect of both these transactions was to provide the United Kingdom with Canadian exchange for the purchase of munitions, whereas in 1941-42 and earlier years assistance for this purpose was given through the accumulation of sterling balances and the repatriation of Dominion and C.N.R. securities held in the United Kingdom, which are not technically "expenditure", even though they require the outlay of cash. (Most of the fixed capital investment repurchased in 1942-43 from the United Kingdom was made in previous fiscal years).

(a) Charges to the war appropriations. The distinction between "war" and "non-war" expenditures is arbitrary; see page xviii. Note that the columns do not add exactly to the totals shown in some cases; this is due to rounding off the figures to the nearest hundred thousand dollars.

(b) Excluding \$200 million paid the United Kingdom for the purchase of their fixed capital investments in munitions plants.

(c) The billion dollar contribution to Britain and the repurchase of the British fixed capital investment in munitions plants.

The table shows that expenditure on Army Services has increased by about 103 per cent, Naval Services by 62 per cent, and Air Services by 67 per cent—or an increase of nearly 85 per cent for the Defence Services as a whole (including administrative and general expenses). The Department of Munitions and Supply expenditures are up 90 per cent and the total of the comparable items (that is, excluding from 1942-43 the \$1,200 million as explained in the preceding paragraph) has increased by over 88 per cent. Since the war expenditures in 1941-42 were themselves substantial—they exceeded by several million dollars the total war and demobilization expenditures of the last war from the beginning of hostilities up to March 31, 1919, as can be verified from the table on page 46 of Part I of this Report—this achievement is greatly to the credit of Canadian productive ability. The more so in that the figures are not inflated by any significant price rise such as occurred during the Great War.

Probably the most interesting single item included in these figures is that relating to the air training plan. While expenditures on the R.C.A.F. Home War Establishment

and its overseas activities have been rapidly growing, Table VI shows that the cost of this plan was still in 1942-43 much the most important factor in the expenditures of the Air Services. Early in the war Canada's advantages as a base for training aircrews were realized, and on December 17, 1939, a formal agreement was reached which introduced the British Commonwealth Air Training Plan. This seemed a tremendous undertaking at the time, but now, though the actual rate of graduation cannot be disclosed, it can be said that the original objective is being far exceeded despite the fact that the participation by Australia was reduced as a result of Japan's entry into the war. The need for aircrews for the European theatre continued to mount nevertheless, so that the air training plan had to be revised. The new arrangement, which became effective on July 1, 1942, was known as the Combined Training Organization because it included the special schools of the Royal Air Force, which the United Kingdom had been operating in Canada, with the consent of the Canadian government. Canada pays half the cost, Australia and New Zealand a minor share based on the number of graduates they provide, and Great Britain the remainder. The total expenditure by Canada has been \$740 million from the inception of the original plan to March 31, 1943, though some of this may prove to be recoverable when the shares of each participating government are finally determined.

A very important part of Canada's war expenditure in 1942-43 was the contribution made to the United Kingdom to enable it to meet the sterling area's shortage of Canadian dollars for the purchase of war supplies, without creating large-scale international war debts. Although the contribution was to the United Kingdom in the first instance, the benefits extended to the remainder of the British Empire and to others of Canada's Allies, including Russia, as a result of the re-transfer by the United Kingdom of Canadian war supplies to those nations. The entire sterling area had already established a single pool of its dollar resources; from that pool each member could obtain the dollars it required to purchase the munitions approved by the allocation authorities, and for other necessary supplies and services. Canada's contribution was added to this pool, available for all in accordance with strategic needs.

The contribution was in the form of funds deposited in the banking accounts of the United Kingdom in Canada along with dollars received by the United Kingdom from the sale of British goods and services to Canada; it is therefore impossible strictly to say that it was used for some one payment rather than another. Nevertheless, the real assistance provided was actually in the form of Canadian goods and services, as the money was of no other use than to purchase these; and it is not difficult to establish that it was used for the purposes intended by Parliament. According to the terms of the Act, known as The War Appropriation (United Kingdom Financing) Act, 1942, the funds were granted to His Majesty towards defraying the expenditures that might be incurred during the present war for the purpose of enabling the government of the United Kingdom "to purchase in Canada, aircraft, tanks, mechanical transport vehicles, guns, ammunition, and other munitions of war, foodstuffs, raw materials, and other commodities and supplies essential to the conduct of the war and the maintenance of the people of the United Kingdom, and to defray other expenses incurred in Canada arising out of the war." In order to meet these conditions it was necessary to establish a procedure for making advances out of the appropriation which when carried out throughout the period, would ensure, firstly, that the United Kingdom would spend at least \$1,000 million during the period in which she received the contribution, for purchases eligible under the terms of the Act, and, secondly, that this sum was required in addition to the sterling area's other sources of Canadian dollars in order to make necessary purchases in Canada. That these requirements were met is demonstrated by Tables VIII and IX. (Preliminary figures for both of these tables were presented to Parliament on May 11, 1943).

Table VIII shows the total payments made by the sterling area in Canada during the period in which the contribution was used. It is divided into two parts, the first showing the portion which has been attributed to the contribution, and the second showing the portion that has been attributed to the sterling area's other sources of Canadian dollars.

This allocation is purely arbitrary, of course, for the reasons given above. Part A is simply a list of purchases of eligible goods, made by the sterling area in Canada during the period in question, totalling \$1,000 million; Part B is the remainder of the sterling area's payments to Canada during the same period. The significant point revealed by the table is that the sterling area purchased eligible goods substantially in excess of the amount contributed by Canada.

Table IX presents a statement of the balance of payments between Canada and the sterling area, for the calendar year 1942 and for the fiscal year 1942-43. Its significance is this—it demonstrates the necessity of the Canadian contribution, if the sterling area was to get the munitions and other materials and services it

required from Canada. Canadian farmers, lumbermen, miners and manufacturers could only produce and deliver these essential war supplies if they got paid in Canadian dollars. On the other hand, the sterling area which had to make payments in Canadian dollars for Canadian goods and services of, say \$1,892 million during the calendar year 1942, had available only, say \$887 million of such dollars from the sale of goods, services and securities to Canada during the period.

C. Balancing Item (apparent errors and omissions).....	5	22

(a) \$200 million, paid to the United Kingdom by Canada for the purchase of munitions plants was charged to the fiscal year 1942-43, but only \$40 million had actually reached the hands of the United Kingdom authorities at the close of business on March 31, 1943.

(b) This is the net decrease in sterling balances held by Canada, exclusive of the \$700 million worth of sterling transferred to the United Kingdom in exchange for a note payable in Canadian dollars and not bearing interest during the war period. Note that this loan did not provide the United Kingdom with dollars, since it was made in sterling from amounts held by Canada with British banks; Britain received the dollars earlier, when Canada purchased the sterling.

(8) Comparison of Expenditure with Estimates.

(d) The sum of \$0.1 million was transferred from expenditure to loans and advances in the Department of Transport.

G. ANALYSIS OF REVENUE

(1) Comparison with Earlier Fiscal Years.

Revenue receipts in the fiscal year 1942-43 reached an unprecedented level. The rapid development of the war production program, the accompanying rise in employment and incomes, and the high level of taxation imposed under the budget of June, 1942, were the principal causes contributing to the attainment of a revenue total never before reached.

Revenue for the year, classified by major categories, is presented in Table XI, with corresponding figures for the previous fiscal year, the last pre-war fiscal year and the aggregate of the six years of the war and rehabilitation period beginning April 1, 1914 and ending March 31, 1920.

TABLE XI

¹After deducting \$70.0 millions of refundable taxes.

It will be observed that total revenue in the fiscal year 1942-43, after deducting taxes refundable after the war under the Income and Excess Profits Tax Acts, was over four times as large as the revenue of the pre-war fiscal year 1938-39 and exceeded by more than one-half the revenue of the whole of the period encompassed by the fiscal years 1914-15 to 1919-20 inclusive.

It is also a noteworthy feature of this comparison that tax revenues show an increasing emphasis on direct taxation and a decreasing proportion from indirect taxation. The significance of this tendency will be more fully discussed in later paragraphs.

(2) Detailed Statement of Revenue, 1942-43.

In Table XII revenue receipts of the year under review are compared in detail with those of the previous fiscal year and the fiscal year 1938-39. Because it is desired to itemize the sources of revenue in considerable detail, the figures given in this table are to the nearest thousand dollars.

(3) Direct Taxes on Incomes.

During the war period primary emphasis has been placed on the direct taxation of incomes, both individual and corporate. Taxation of individuals through income tax is recognized as being the most equitable type of taxation, as it takes into account the ability to pay as indicated by the amount of income and the family responsibilities of the taxpayer. The wartime fiscal program has also placed strong emphasis on taxation of corporate incomes, both through the excess profits tax and the normal corporation income tax, in order to assure that no abnormal or unreasonable profits should be derived from production for the war effort.

In the fiscal year 1942-43 revenue from direct taxes represented about two-thirds of the total tax revenue, as compared with about one-third in the last pre-war year. In amount, such revenue had increased to a figure over nine times as large as that of the fiscal year 1938-39 and double that of the fiscal year 1941-42.

(4) Taxes on Personal Incomes.

Revenue from the income tax on personal incomes, including the national defence tax, amounted to \$484.1 million after deducting the refundable savings portion. This yield was 64 per cent in excess of the corresponding revenue of the previous fiscal year. This increase was the result of the rising level of national income under the stimulus of the war production program, and the payment of taxes on 1941 incomes at relatively high rates and also partial payment of taxes at the higher rates applicable to 1942 incomes. In addition to the annual payments of tax received after April 30, 1942, in respect of 1941 incomes, a flow of funds to the Treasury commenced in September, 1942, with the institution of the system of withholding taxes at the source, which represented revenue normally not received by the Treasury until the following fiscal year. Thus the 1942-43 revenue from the income tax on personal incomes was the result of a combination of an increasing level of incomes and tax rates and also some overlapping of revenues ordinarily collected in the succeeding fiscal year due to the change to the system of deduction at the source.

The level of personal income taxes reached in the budget of June, 1942, was to a large extent made possible by the withdrawal of the provinces from this taxation field by formal agreement with the Dominion Government. The last year in respect of which personal income tax was levied by the provinces was 1940, and corporation taxes have been withdrawn for roughly the same period. The provinces were offered reimbursement on two alternative bases, to be selected by themselves to their best advantage. One basis provided for annual payments during the term of the agreements of an amount equal to the collections made by the province and its municipalities during the fiscal year ended nearest to December 31, 1940, from the taxes foregone under the agreements, while the second basis provided for payment of an amount equal to the net debt service actually paid by the province in its fiscal year ended nearest to December 31, 1940, less the revenue obtained from provincial succession duties during that period. Five of the provinces, British Columbia, Alberta, Manitoba, Ontario and Quebec, opted to be reimbursed under the first option, while the other four provinces, Saskatchewan, New Brunswick, Nova Scotia and Prince Edward Island, chose the second option. In addition, fiscal need subsidies were granted to Saskatchewan, Manitoba, New Brunswick, Prince Edward Island and Nova Scotia on the basis of demonstrated need. The Dominion Government also agreed to compensate the provinces for losses in their revenue from gasoline taxes to the extent of any decrease below 1940 revenues.

It is not too much to say that these tax agreements have enabled the Dominion to develop its wartime fiscal policy on the basis of equity and efficiency. Had they not been consummated, it would not have been possible for the Dominion to raise anything like half its requirements out of current revenue. Furthermore, even a somewhat lower level of taxation could only have been imposed at the cost of an unfair and inequitable

distribution of the burden of war expenditures as between different sections and groups in the country. The tax agreements, in other words, were a *sine qua non* of to-day's highly productive and reasonably equitable tax structure.

A portion of the personal income tax collected in the fiscal year 1942-43 will be refunded after the war. Receipts from this refundable savings portion, estimated to amount to \$50 million in the fiscal year 1942-43 have been excluded from the revenue totals given in the above table in order to show only tax revenue which will ultimately be retained in full by the Government.

(5) Taxes on Interest, Dividends, Rents and Royalties.

Revenue shown under the headings "Tax on Interest and Dividends" and "Tax on Rents and Royalties" represents the yield of the special taxes imposed on certain incomes under Section 9B of the Income War Tax Act. The greater part of this revenue in the fiscal year 1942-43 was derived from the 15 per cent tax levied on dividends and interest paid to non-residents of Canada.

(6) Corporation Income Tax and Excess Profits Tax.

Throughout the war period corporation profits have been subject to the corporation income tax, which was a part of the pre-war tax system, and in addition to the Excess Profits Tax, which was introduced after the outbreak of war. The rate of corporation income tax has been 18 per cent during the war years, compared with the immediate pre-war rate of 15 per cent.

The Excess Profits Tax rates have been revised upward by successive steps during the war period and the revenue of the year under review reflects the revisions made by the 1941 budget and in part also the changes introduced in the budget of 1942. In the early part of the fiscal year under review, following April 30, 1942, corporations in general made payment of their full annual tax liability in respect of the year 1941 at the rates applicable to profits of that year. The budget of June, 1942, however, not only increased the rate of excess profits tax (basically the increase was from a 75 per cent rate to a rate of 100 per cent) to be effective from July 1, 1942, but also provided for compulsory monthly instalment payments of both corporation income tax and excess profits tax to commence on the same date. Whereas under the previous system of one annual payment of tax there would have been only a small amount of additional revenue during the latter part of the fiscal year the instalment plan introduced in July, 1942, had the effect of bringing a substantial amount of additional revenue into the fiscal year 1942-43. As in the case of the personal income tax, therefore, because of some overlapping the corporation and excess profits tax revenues of this year are higher than would otherwise have been the case.

The effect of the excess profits tax provisions introduced as from July, 1942, taken in combination with the corporation income tax, is that every corporation which has earned profits not exceeding an amount equal to $116\frac{2}{3}$ per cent of its standard profits (basically, average profits of the years 1936 to 1939 inclusive) pays a tax rate of 40 per cent on such profits, while every corporation whose profits exceed $116\frac{2}{3}$ per cent of its standard profits pays a rate of 30 per cent on an amount of profits equal to its standard profit and 100 per cent of profits in excess of standard profit. Stated in other terms, no corporation is allowed to retain more than 70 per cent of its pre-war standard profit before tax.

Where the 100 per cent rate is effective, however, a post-war tax refund will be given equal to 20 per cent of the amount by which current profits exceed $116\frac{2}{3}$ per cent of standard profits. In respect of the fiscal year 1942-43 it is estimated that an amount of \$20 million of excess profits tax collections will be refundable after the war.

(7) Succession Duties.

In 1941 the Dominion Government entered the field of succession duties for the first time. The rates under the Dominion Act were formulated in the light of the existing provincial rates and taken in combination with the latter result in a total tax of about the same general severity as the British death duties.

Revenue from this source had not reached by the end of the fiscal year 1942-43 the amount which had been anticipated. It is thought, however, that the amortization of payments over a number of years has resulted in lower initial revenues than expected, and that over a period of years there will be a gradually increasing revenue from this source.

(8) Indirect Taxes.

(a) Customs Duties.

Customs revenue declined during the fiscal year to an amount about 16 per cent less than the revenue of the previous year, although remaining considerably above the level of the last immediate pre-war year. A reduction in imports of goods for civilian use, on the one hand, and remission of duties and drawbacks paid on materials, equipment and supplies imported for war purposes by or on behalf of the United Kingdom and other Allied governments, on the other hand, were largely responsible for this decline.

(b) Excise Duties.

Excise duties are levied exclusively on tobacco products and alcoholic beverages. The revenue of the fiscal year 1942-43, which exceeded that of the previous year by about 26 per cent, was the result of the increased rates of tax imposed following the budget of June, 1942, which were in effect for three-quarters of the fiscal year, combined with record levels of consumption. The largest single source of excise duties revenue is the cigarette tax, which yielded almost half the total, while the tax on malt used in brewing beer contributed about one-quarter of the total. The remainder of the revenue from excise duties was derived largely from the tax on spirits and on manufactured tobacco, with several other less important sources contributing small amounts.

The excise duty on cigarettes in effect during the fiscal year was, in general, \$6 a thousand, compared with a pre-war rate of \$4 a thousand (there are additional taxes on cigarettes under the Special War Revenue Act); the duty on malt was 16c a pound compared with a pre-war rate of 6c a pound; and the basic duty on spirits was \$9 a gallon compared with a pre-war rate of \$4 a gallon.

(c) Excise Taxes.

The term "excise taxes" refers in general to the list of some fifty or more taxes collected under the Special War Revenue Act. Many of the taxes in effect in the year under review were levied prior to the war, although for the most part at lower rates. On the other hand several new taxes have been introduced, designed principally to discourage spending either as a part of the anti-inflation program or to conserve materials and services in short supply.

The most important single source of excise tax revenue was the sales tax, which has remained fixed in rate at 8 per cent during the war period. The gross revenue of \$250.5 million was only slightly higher than that of the previous year, however, and there was a substantial increase in refunds due to the remission of tax on materials and plant equipment imported into or purchased in Canada for war purposes by or on behalf of the United Kingdom and other allied governments. It is not possible to segregate the exact amount of such refunds attributable to the sales tax, but it is likely that on balance the net revenue during the year was somewhat below that of the previous year.

The next most productive source of revenue in this group was the War Exchange Tax, which is levied at the rate of 10 per cent on most imports into Canada from hard currency countries. This tax was designed principally to conserve United States dollar exchange but has had the incidental effect of yielding a revenue amounting in the fiscal year 1942-43 to \$94.6 million.

Of the many other excise tax sources a few showed decreases from the previous year, due to restricted consumption of the commodities in question, but most taxes showed increases and there was revenue for the first time from many new taxes introduced by the budget of June, 1942. Taxes showing decreases were those on automobiles, rubber tires and tubes, sugar, electric and gas appliances and phonographs, radios and tubes.

The list of new taxes first imposed during the fiscal year 1942-43 includes taxes on chewing gum, candy and confectionery, photographic supplies, ash trays, pipes and smoking accessories, cigarettes and tobacco (in addition to the excise duties), fountain pens and pencils, trunks, suitcases, bags, etc., expenditures in cabarets and night clubs, domestic telephone extensions, and taxes imposed at the retail level on clocks and watches, jewellery and plated ware, and ornaments, vases, cut glass, etc. A considerable number of existing taxes were also increased in rate, including those levied on beverages (soft drinks), carbonic acid gas, cigarette papers and tubes, cigars, furs, playing cards, wines, long distance telephone calls, telegrams and cables, sleeping berths, parlour car chairs and transportation tickets. Revenue from these various taxes is given in some detail in Table XII.

It is also worth noting that considerable revenue was derived from certain taxes not mentioned above, such, for example, as the gasoline tax and the tax on admissions to theatres and other forms of amusements. Because of the fact that certain of these taxes are payable through the purchase of stamps it has not been possible to segregate the revenue by individual sources. Such revenue is included under the item "stamps", etc., in Table XII.

(9) Other Taxes.

The tax on the note circulation of the chartered banks is relatively unimportant and is declining from year to year with the reduction in the outstanding amount of chartered bank notes. The tax on insurance companies is based on net premium income. Revenue from this source increased substantially during the fiscal year, due in part to increased rates imposed by the budget of June, 1942, and also due to arrangements made under the Dominion-Provincial Tax Agreements which had the effect of bringing collections for two years into revenue for the fiscal year 1942-43.

(10) Non-tax Revenue.

(a) General.

In addition to receipts from taxes, there are other revenues which are included in Ordinary Revenue in the Dominion's accounts. These non-tax revenues totalled \$116.1 million in 1942-43 as compared with \$102.9 million in the previous year and with \$62 million in the immediate pre-war year.

The two main revenue producers in this category are the Post Office and the Dominion's portfolio of investments. With expanding business activity and incomes, gross Post Office receipts have risen from \$35.3 million in the pre-war year to almost \$49 million in the year under review, although as will be evident from the details given in Part II of this Report, Post Office expenditures have also shown a steady increase. Return on investments, that is to say, interest and dividends received in respect of loans, advances and securities included amongst the Dominion's assets, increased from \$14.5 million in 1938-39 and \$25.8 million in 1941-42 to \$41.2 million in 1942-43. Details in regard to these and other items of Non-tax Revenue will be found under the appropriate departments in Part II.

(b) Bullion and Coinage—Royal Canadian Mint.

In Table XII the revenue from bullion and coinage is shown as \$5.9 million for 1942-43. This represents the revenue receipts, as shown by the Dominion's books, derived from the bullion and coinage operations of the Royal Canadian Mint and of the Dominion

Assay Office, a branch of the Mint maintained at Vancouver for the receipt and assaying of deposits of gold produced in the Western provinces, Yukon and the Northwest Territories.

The breakdown of these receipts will be found in the Department of Finance Section of Part II of this Report and may be summarized as follows:

In Appendix 12 of Part I of this Report, there will be found a statement of coinage issued during the year with the accumulated total up to March 31, 1943, while Appendix 11 shows the amount of coin withdrawn from circulation for recoinage, the amount recoined and the loss or gain on recoinage.

There are complications regarding the valuation of gold which make it more difficult to follow transactions in the gold bullion account. Following the practice originally required by the Currency Act, the transactions of the Royal Canadian Mint on gold account are recorded in the Dominion balance sheet at the old statutory value of 23.22 grains fine gold per dollar, which is equivalent to a price of \$20.6718+ the fine ounce. However, producers of gold who ship their gold to the Mint are and must be paid this statutory price plus a "premium" equal to the difference between this price and the current market price of gold, less, of course, the Mint's normal melting, assaying and refining charges and a handling charge of 35 cents an ounce. The market price of gold under the Mint Regulations is the market price in the country to which Canada is currently exporting gold, converted into Canadian funds at prevailing exchange rates—or \$38.50 per fine ounce under to-day's conditions. When the gold which has been deposited with the Mint has been refined, it is normally exported by the Government which receives payment at the market price less appropriate handling charges. In the Dominion's books, however, for the reason already indicated, the Mint's accounts reflect the operations in gold only on the basis of the old statutory valuation, while the so-called "premiums" paid or received on the purchase and sale of gold are included in the Premium, Discount and Exchange Account. Total transactions in this latter account may be found in the Department of Finance section of Part II of this report, page CC-72, although for reasons to be explained later, it is necessary to lump together premiums received arising out of gold and those arising out of U.S. dollar transactions.

It may be possible to make the situation clearer if we explain more fully the Mint's transactions in gold during the year. The Mint began the year with 121,993.734 fine ounces of gold on hand, which gold was carried in the Mint's books at the statutory valuation, namely, \$2,521,834.22, although at the market price of \$38.50 Canadian funds the value would be \$4,696,758.76. Gold purchased from depositors during the year amounted to 4,410,460.276 fine ounces which had a statutory valuation of \$91,172,302.54 and a market valuation (as defined above) of \$169,802,720.63. The gain on stock-taking (arising from differences between assay values and final out-turns) as shown by the Mint's books was \$89,204.32, but if calculations were made on the basis of market price, it would be \$166,136.43. The refined gold sold directly to jewellers and other users or delivered to the Bank of Canada for credit of the Minister of Finance and ultimate sale abroad during the year amounted to 4,388,167.145 fine ounces. On the Mint's books this gold was valued at \$90,711,463.20, but at \$38.50 per fine ounce was worth \$168,944,435.08. At the end of the year, the Mint had on hand (exclusive of the Dominion Assay Office balance) gold in the amount of 148,602.097 fine ounces, valued on the Mint's books at \$3,071,877.88 (as shown in Schedule I to the Balance Sheet, Part I, page 21) but which at \$38.50 per fine ounce had a market valuation of \$5,721,180.74. These transactions are summarized in the following table which shows not only valuations as per the Mint books but also valuations on the basis of \$38.50 per fine ounce.

	Ounces fine	Value at \$20.6718+ the fine ounce (as in Mint's books)	Value at \$38.50 the ounce fine

When the gold delivered to the Bank of Canada is sold in the United States, the Department of Finance receives payment in United States dollars at \$35.00 (U.S.) per fine ounce, less of course transportation and handling charges which amount to approximately 15 cents per fine ounce. These dollars become part of the Dominion's

normal holdings of U.S. dollar balances and, like other foreign exchange (and, also, debt payable in foreign currencies), are carried on the Dominion's books at the nominal parity of exchange—\$1 U.S. = \$1 Can. However, when the Dominion sells or uses any of its balances of U.S. dollars or other foreign exchange, or when transactions affect the Dominion's obligations payable in foreign currency, such transactions are reflected in the books at current market values, and the difference is adjusted by charging or crediting Premium, Discount and Exchange Account, except in the case of retirement of bonded debt where funds are available in the currency required and where the obligations are carried in the Dominion's books at the nominal parity of exchange and accordingly do not involve premium transactions. As already indicated, U.S. dollar receipts from the sale of gold in the United States are not segregated but merely pooled with the Dominion's other holdings of U.S. dollars which are drawn upon from time to time as required for governmental purposes and consequently it is impossible to segregate the credits to Premium, Discount and Exchange Account arising out of the sale of gold.

It will now be apparent that in respect of its gold operations, the Mint is to-day really a manufacturing or servicing establishment receiving deposits of gold ore or concentrates and paying for the fine gold content thereof on the basis of an assay test at the rate of \$38.50 Can. per fine ounce, less handling and other charges; assaying, melting and refining the gold ore or concentrates; and producing fine gold bars which are sold on behalf of the Minister of Finance at a price equivalent to \$38.50 Can. less any transportation and handling charges amounting usually to about 15 cents per ounce. Its revenue receipts are therefore essentially in the nature of service charges. They consist chiefly of the standard fees charged for assaying, melting and refining gold as per the Mint Regulations, a minor profit on stock-taking due to differences between the assay values and the final out-turns, and the charge for handling gold referred to above after deducting handling or other charges incurred on the sale of gold. These charges plus a small gain in operations at the Dominion Assay Office are reported as revenue from Bullion and Coinage and amount, as shown earlier in this section, to \$1.4 million. This when added to revenue from coinage operations gives a total bullion and coinage revenue of \$5.9 million.

There are, however, certain additional revenues from other services performed by the Mint, including fees charged for making assays upon request of third parties, for making metal dies, for coinage work done for other Governments, etc. These amounted to \$14,260.81 during 1942-43 and are reported as revenue of the Mint under Services and Service Fees in the Department of Finance Section of Part II, page CC-4.

It will be noted in the same section of Part II, pages CC-14 and 15, that the total expenditures of the Mint (including the Dominion Assay Office) amounted to \$451,028.97 during 1942-43.

(11) Capital Refunds: Special Receipts and Credits.

Refunds of previous years' expenditures which were of very minor amount are given on page 15, Part I. Special Receipts and Credits for the year, as shown on page 15 of Part I and more fully dealt with under the departments in Part II of this Report, amounted to \$62 million.

The main items making up this total are: Special Receipts, War Appropriation Acts, \$18.7 million; reduction in the Reserve Account of the Canadian Wheat Board, \$6.7 million; special credit equal to the net income surplus of the Canadian National Railways for the calendar year 1942, \$25.1 million; and the capital gain on repatriation of Canadian National Railways Securities, \$11.1 million. These last two items increase the book valuation of the Canadian National Railways Securities Trust Stock, and accordingly are offset by contra amounts appearing on the expenditure side under the heading "Other Charges". The item of \$6.7 million represents a reduction in the Reserve Account established in 1940-41 to meet the deficits of the Canadian Wheat Board not previously provided for. This adjustment was occasioned by an improvement in the Board's Balance Sheet between July 31, 1941, and July 31, 1942, with respect to 1939 and 1940 Wheat Crop Accounts. During 1941-42 it was necessary on the basis of

calculations made as at July 31, 1941, to provide on the expenditure side for an increase in the reserve account of \$12·6 million. During 1942-43, the reserve account was reduced by the said amount of \$6·7 million on the basis of calculations made as at July 31, 1942.

H. PERCENTAGE DISTRIBUTION OF REVENUE AND EXPENDITURE, 1942-43.

The following table, Table XIII, shows the percentage distribution of revenue and expenditure for a number of important items. Receipts from various taxes and other sources are shown as percentages both of total revenue and of total expenditure. Similarly, several of the main items of expenditure or groups of such items are shown as percentages both of total expenditure and of total revenue.

The purpose of this table is to enable broad conclusions to be drawn as to the relative burdens imposed on the public treasury by the war and the several important services or obligations of government. For example, a glance at the table will show that expenditures charged directly to war accounted for almost 85 per cent of all expenditures and amounted to about one and two-third times total revenue. Also, all ordinary expenditure accounted for 12·8 per cent of total expenditure and absorbed almost 25 per cent of total revenue. Again it took nearly all the receipts from the income tax on persons and corporations to pay for the expenditures of the Air Force and the Navy.

I. TOTAL REQUIREMENTS FOR AND SOURCES OF CASH.

(1) "Payments and Receipts" versus "Expenditure and Revenue".

In an earlier section it was observed that the increase in net debt is not a measure of the net cash requirements of the Dominion. The distinction stems from that between "Expenditure and Revenue", on the one hand, and "Payments and Receipts", on the other hand, when these terms are used in their formal accounting senses. The expenditure and revenue account of the Dominion for any given year, like that of a business organization, includes charges to expenditure that did not involve the outlay of cash during that year: examples are the apportionment of a share of cash outlays made in previous years where these outlays yield services over several years, the writing-off of accounts receivable when the debt is uncollectible or has been cancelled, and the provision of a reserve for possible losses on the liquidation of loans or investments. Conversely, many cash outlays cannot be considered as expenditure in the year in which they are made: for example, loans and investments, or the acquisition of inventories of materials which will be used in the future. Similarly, "revenue" may contain non-cash credits, such as entries reversing reserves previously set up out of expenditure, and "receipts" may include non-revenue items such as the repayment of loans.

In Part I of this Report, following the presentation of the Balance Sheet, will be found what is called a "Condensed Cash Statement" for the year, including supporting schedules. This is a table which has appeared in the Public Accounts for over twenty years and is continued this year, although its usefulness in explaining the net effect of operations in the various accounts during the year has been diminished by the improvement made this year in presenting the Balance Sheet on a comparative basis. It will be noted that it is not a "cash" statement in the sense which would be significant for the purposes of this section on "Total Requirements for and Sources of Cash" because it includes a great number of non-cash items such as write-down and adjustments of active and non-active assets, and additions to Insurance and Superannuation funds by way of government contributions and interest, all of which are charged to Consolidated Fund. In addition, as the footnote to the statement explains, it shows only the net amount where there have been both receipts and disbursements in the account during the year.

(2) Summary of Cash Requirements and Sources of Cash.

Table XIV shows the net requirements for cash for all the transactions in the Dominion's books, and how these requirements were met. The cash requirements totalled \$5,111·4 million; cash revenues provided \$2,203·8 million, and other cash receipts \$127·4 million, leaving \$2,780·1 million to be financed in other ways. This may be called the "cash deficiency", in contrast to the "deficit" or "budgetary deficit".

FOOTNOTES TO TABLE XIV

(a) The distinction between "cash" and "non-cash" transactions is necessarily arbitrary to some extent. Those treated as non-cash are adjustments to the valuation of assets and liabilities, and the amortization of loan flotation charges.

Note that the columns do not add to the totals shown in some cases; this is due to rounding off the figures to the nearest hundred thousand dollars.

(b) The distinction between "war" and "non-war" requirements like that between "cash" and "non-cash", is somewhat arbitrary. "War requirements" are those charged to the appropriations, and such other accounts as obviously relate to the war; "non-war" are all other requirements.

(c) As in the Expenditure and Revenue Account, except where otherwise indicated. Excludes "Other Charges" and "Other Receipts and Credits"; but note that the latter includes a small cash repayment (\$15,000.00) by the National Harbours Board.

(d) Excludes the amortization of bond discounts and commissions, \$8.6 million.

(u) Due to the short term and fluidity of treasury bills it is not possible to classify their purchasers even as at the time of issue.

(v) Borrowing from the Bank of Canada was confined to one transaction, in June of 1942, at the time the accumulated sterling balances were cleared off. See the text, page liv; note particularly the offsetting elimination of a liability of the Foreign Exchange Control Board to the Bank of Canada for the repurchase of foreign exchange amounting to \$275.9 million.

(w) Deposit certificates, issued for a term of twenty-six weeks at $\frac{1}{2}$ of 1%.

(z) Third Victory Loan, \$991.4 million, and the net receipts from War Savings Stamps and Certificates and Non-Interest-Bearing Certificates, \$59.0 million.

(y) Mostly outstanding cheques. Includes interest due and outstanding payable in U.S. and sterling funds.

(z) Consolidating the transactions of the Dominion, the Canadian National Railways, and the Foreign Exchange Control Board would reduce the total requirements for cash, the net increase in funded debt, and the total sources of cash by \$87.5 million with respect to the reduction of C.N.R. debt in the hands of the public, and \$275.9 million with respect to the elimination of an obligation of the F.E.C.B. to repurchase exchange from the Bank of Canada—see the text, pages xlv, xlix and liv.

The distinction between these two terms is important, for it is easy to confuse them and to use them interchangeably. The "deficit" for a given year is the difference between the *outlays attributable to expenditure for that year* and the *receipts attributable to revenue for that year*; it is based on a long-range viewpoint in which the given year's transactions are related to those that have occurred in the past and to those that are expected to occur in the future. The "cash deficiency", as the term is here used, is the difference between the *total cash outlay for the year* and the *total cash receipts for the year* (excluding borrowing); it is based on a short-range or immediate point of view, and is concerned only with the cash outlay that is required in the given year and the sources from which the money is derived. Thus in the fiscal year 1942-43 the deficit was \$2,137.6 million, but the cash deficiency was \$2,780.1 million. It was the latter sum that had to be raised by borrowing, to the extent that the cash balances at the beginning of the year were inadequate. The net increase in funded debt provided \$2,050.9 million, the increase in floating debt a further \$41.4 million, and the remainder of the requirement was met by a reduction of \$687.7 million in cash balances.

This presentation has an additional advantage in that it approaches the matter in the same way as it has to be met by the Government day by day. The controlling factor in financial matters has been the demands imposed by the war and by the essential normal activities of government. Outlays have not been limited by questions of finance; rather, the physical burden of war production and mobilization has determined the financial burden that had to be met. The fiscal problem has been to choose and apply the best and most equitable methods of apportioning this financial burden among the people of Canada: to choose the level of taxation and the types of levy, to choose the types and terms of securities issued, to conduct campaigns to sell these securities, and to apply or co-operate in the application of direct controls over consumption where necessary. In order to comply with the logic of the situation, the requirements for cash outlays are shown first, then the tax and other revenues raised to meet them, and finally the amount of borrowing required to make up the difference.

(3) Analysis of Cash Requirements.

As Table XIV indicates, it has again been found convenient to use the terms "war" and "non-war" in classifying requirements for cash. For cash requirements that relate to expenditure, the same distinction as before will hold—war requirements being those charged to the War Appropriation Acts, and non-war being all others. Other cash requirements have been classified as war requirements where they are shown in the Expenditure and Revenue Account as deductions from war appropriations, chargeable to active assets, and where they obviously relate to war activities; otherwise they have been treated as non-war requirements. The qualifications noted above in the use of these terms therefore apply equally in the following paragraphs.

In point of fact also it has sometimes been difficult to define "cash" and "non-cash" items. For example, interest payments to insurance, superannuation, and trust funds, and the Government's contribution to the superannuation and the unemployment insurance funds have been treated both as cash outlays charged to Consolidated Fund and as cash receipts in certain trust and special accounts even though they remain on deposit with the Receiver General. The transactions treated as non-cash are adjustments to the valuation of assets, and the amortization of loan flotation charges. They are all noted in the comments which follow.

(a) Non-War Cash Requirements.

Table XIV shows that non-war cash requirements are composed of expenditure items, active loans and investments, loan flotation charges, the reduction in New York indebtedness, and the increase in holdings of gold and U.S. dollars. Each of these will be discussed in turn.

The cash expenditures consist of all expenditures except the following:

The annual amortization of bond discounts and commissions.....	\$ 8.6 million
The reduction in stated values of active and non-active assets.....	29.7 "
The increase in the Dominion's equity in the Canadian National Railways due to the net income surplus and the capital gain..	36.1 "

The first of these items is an entry charging 1942-43 with a pro-rata share of certain costs of floating the various loan issues since 1930, proportionate to the terms of the respective issues; the cash outlay for similar purposes during 1942-43 will be found in item 8 of Table XIV. The second item is composed of the amount by which the values of active and non-active assets have been reduced, as being uncollectible, or as being forgiven according to statutory provisions, or otherwise, and the addition of \$25 million to the reserve for losses on the realization of active assets; it is a revaluation of assets previously acquired. The third is an entry by which the amount of the Canadian National Railways Securities Trust Stock account (a non-active account) is written up in order to agree with the value of the same account on the books of the railway, and has a contra entry in Revenue; it is the amount by which the Dominion's equity is increased by reason of the (undistributed) net income surplus of \$25.1 million and the capital gain of \$11.1 million previously referred to.

The details of the net change in active loans, advances, investments, etc., are shown in Table XV. Aside from advances to the Canadian National Railways and a small increase in Dominion housing loans, they are all net repayments of advances made in previous years. The non-cash items that have been excluded are the \$25 million added to the reserve for possible losses on the realization of active assets, and specific write-offs of minor amounts of Canadian Farm Loan Board capital stock and land settlement loans. The C.N.R. received advances totalling \$94.1 million, and repaid advances amounting to \$25.6 million. Most of the advances (\$87.5 million) were required for the retirement of older issues—\$59.3 million to meet maturities, and \$28.2 million to repurchase certain issues from Canadian holders in cases where the majority of the issue had been held in the United Kingdom and was now repatriated. The repayments consisted of half a million dollars with respect to equipment purchased by the Dominion and turned over to the railway under a hire-purchase agreement in the fiscal years: 1935-36 and 1936-37, and the application of the net income surplus of the railway for the calendar year 1942 to the retirement of certain advances made by the Dominion. The latter transaction is of interest chiefly because it shows up the dual position of the Dominion with respect to the C.N.R.—as bondholder or creditor on the one hand, and as stockholder or equity-owner on the other. In the preceding paragraph the effect of the net income surplus on the Dominion's equity as stockholder was recorded as a non-cash transaction; here its effect in permitting the C.N.R. to retire its bonded debt appears, for in fact the surplus was used to repay the Dominion in the latter's role of creditor. From the point of view of the Dominion as stockholder, of course, the retirement of an interest-bearing liability of the C.N.R. is equivalent to the investment of the same sum in earning assets.

It should be noted that, since the Canadian National Railways is a government-owned enterprise, the advances made to it by the Dominion for the purpose of retiring securities held by the public are analogous to the retirement of Dominion issues. The net result of the complete transaction is to replace C.N.R. securities with Dominion securities in the hands of the public; consolidating the accounts of the railway and the Dominion, as if they were subsidiary and parent corporations respectively, the consolidated debt would be unchanged. The advances shown at items 2 and 3 of Table XV, totalling \$87.5 million, may thus be classed with item 45 of Table XIV (maturities of domestic security issues) as an offset to the Dominion's borrowing during the fiscal year.

Total Non-War Accounts—Cash Transactions..... 19..... 59.4

(a) The distinction between "War" and "Non-War" is arbitrary. War accounts are active loans made from the war appropriations, and those other accounts that obviously relate to the war; non-war accounts are all others. Note that the columns do not add exactly to the totals shown in some cases; this is due to rounding off the figures to the nearest hundred thousand dollars.

The cash outlay for loan flotations to be amortized over the life of the issues, as distinct from that charged directly to annual expenditure when incurred, amounted to \$11.4 million, as shown in item 8 of Table XIV. This does not include commissions paid on the three refunding loans issued in New York on January 15, 1943, amounting to a little over a million dollars. These commissions (the exact amount of which will be found in Part I, Appendix 3, page 55, of this Report, expressed in U.S. dollars) were taken by the dealers in the form of deductions from the proceeds of the issues, and have been included as part of item 9 in Table XIV—the net cost in Canadian funds of the reduction in New York debt. They could equally well have been included as cash outlay for loan flotations.

The amount shown in item 9 of Table XIV is the sum in Canadian dollars needed to purchase the net amount of U.S. dollars required for the retirement of debt payable in New York funds. New York securities totalling \$110 million matured or were called for redemption during the year, and new issues totalling \$90 million were floated to

refund a part of the amount at the lower interest rates currently prevailing. Discounts and commissions on issue reduced the net proceeds by \$1.4 million, but on the other hand substantial blocks of the old issues were not presented for redemption before March 31, 1943. The result was that floating debt payable in New York funds (matured outstanding issues) increased by \$15.9 million, so on balance only \$5.5 million in U.S. funds was required for debt retirement in 1942-43. Adding the exchange premium brings the total to \$6 million in Canadian funds.

Item 10 of Table XIV shows that \$43.9 million in Canadian funds were required to purchase the increased holdings of gold and U.S. dollars necessary to meet future requirements in the United States, including the redemption of the \$16 million of matured funded debt outstanding at March 31, 1943. This increase excludes changes in the funds held for special purposes.

(b) War Requirements.

The cash outlays for war purposes consist of the expenditures out of the war appropriations (without modification), loans and advances for purposes relating to the war, the reduction of the Dominion's sterling indebtedness, and the increase in cash holdings of sterling less certain adjustments. These may be summarized as follows:—

War Appropriation expenditures.....	\$3,724.2 million
Loans, advances, investments, etc.....	673.3 "
Reduction of sterling indebtedness.....	2.6 "
Purchase of sterling.....	33.0 "
Less adjustments.....	—30.8 "

The reduction in sterling debt is included as a war outlay because it was undertaken primarily to provide the United Kingdom with Canadian dollar exchange, and the increase in holdings of sterling because it was in anticipation of substantial payments by the armed forces overseas.

Table XVI gives an analysis of the advances made during the year on war account, net after deducting repayments against either 1942-43 or earlier advances. The accounts may be divided into advances of \$758 million to other governments, \$168.3 million to special war agencies of the Crown, \$74 million (net) to the Canadian National Railways, and \$7.2 million with respect to the export of food products to the United Kingdom. Repayments included the sum of \$325 million (net) from the Foreign Exchange Control Board, and \$9.3 million from the Canadian Pacific Railway on account of equipment purchased through the Dominion in previous years under a hire-purchase agreement.

The principal loan to another government was the \$700 million loan to the United Kingdom, as provided for in The War Appropriation (United Kingdom Financing) Act, 1942.⁽¹⁾ The remainder of the loans in this category are mainly made up of Department of National Defence for Air Services recoverable advances relating to air training.

(1) Some confusion may arise in assessing the amount of aid made available to the United Kingdom during the fiscal year 1942-43, due to the fact that this loan appears on the Dominion's books in addition to the billion dollar contribution. The explanation is that, since the British note was accepted in exchange for an equivalent amount of sterling previously accumulated by Canada, it did not provide the United Kingdom with Canadian dollars; the dollars were made available earlier, when the sterling balances were accumulated. Making a formal loan to the United Kingdom government was merely replacing one form of debt by certain British corporations (balances payable on demand by British banks) with a different form of debt by the Government of the United Kingdom. In fact the difference is even less than this, for a substantial portion of the sterling balances had been invested in the treasury bills of the United Kingdom. These transactions did not appear on the Dominion's books, but on those of its agency, the Foreign Exchange Control Board; thus in reality, these entries in 1942-43 only record the net effect of transactions that relate to previous fiscal years.

Similar considerations apply to other payments made out of the sterling balances held at March 31, 1942. For example, \$76.4 million of the charge to the billion dollar contribution was transferred in sterling, as provided for by subsection 3 of section 3 of The War Appropriation (United Kingdom Financing) Act, 1942; in effect this made the contribution retroactive to include this amount of expenditure by Great Britain during most of March, 1942. Footnote (b) and item 13 of Table IX refer to the same factor. Sterling balances held by the Foreign Exchange Control Board and the Bank of Canada fell by the equivalent of approximately \$850 million (at \$4.45 to the pound) during the fiscal year 1942-43; \$700 million of this decline was due to the loan to the United Kingdom, and the remainder was used for miscellaneous sterling payments—including the portion of the billion dollar contribution transferred in sterling, and the repatriation of securities.

Advances to the United Kingdom for equipment and for Royal Air Force special schools amounted to \$38.3 million, and those to Australia and New Zealand in connection with the British Commonwealth Air Training Plan totalled \$18 million. Further details will be found in schedule "KK", on page 41 of Part I of this Report, which shows the receipts and payments on certain current accounts.

Net advances totalling \$119.6 million were made to the government-owned corporation, War Supplies Limited, to finance contracts for the production of war supplies for sale to the United States entered into in accordance with the terms of the Hyde Park Declaration. Net advances of \$21.1 million were also made to the Commodity Prices Stabilization Corporation, \$10 million to the Canadian Wool Board, and \$17.2 million to other Crown companies and agencies; these advances are held mainly as working balances or as inventories.

(a) The distinction between "War" and "Non-War" is arbitrary. War accounts are active loans made from the war appropriations, and those other accounts that obviously relate to the war; non-war accounts are all others. Note that the columns do not add exactly to the totals shown in some cases; this is due to rounding off the figures to the nearest hundred thousand dollars.

In addition to advances of \$61.8 million for the repatriation of sterling securities, the Canadian National Railways received an advance of \$16.4 million for the purchase of equipment and a further advance of a relatively small sum (\$35,000.00) for an oil drilling campaign. A repayment of nearly one million dollars was made on equipment purchased through the Dominion on a hire-purchase agreement in previous years, and a repayment of \$3.2 million against a previous temporary loan.

The outlays described so far are offset to some extent by the increases in the balances in certain revolving funds. These revolving funds were set up during 1942-43 in order to provide continuous working capital to private contractors and government-owned plants producing munitions. The necessary working balances remaining unexpended in these accounts at the close of the year may therefore be described as deferred expenditure; they are negative adjustments to the year's cash requirements for war purposes. Table XVII lists the net credits to the accounts during 1942-43.

(a) These are working capital accounts, fed from the war appropriations and from other sources. A net credit during the year represents an excess of funds supplied to the account over funds paid out of it, which means in effect that payments to that amount have been deferred. Note that the column does not add exactly to the total shown; this is due to rounding off the figures to the nearest hundred thousand dollars.

There is another consideration which substantially offsets certain of the outlays just described, and is explained by the fact that not all of the accumulation of sterling balances made in previous years and disposed of in 1942-43 was made out of funds advanced directly by the Dominion. As described below in connection with the government's borrowing program, where its significance will become apparent, these balances were held by the Foreign Exchange Control Board, which financed the transaction in part by the sale of some of its holdings of exchange to the Bank of Canada under a repurchase agreement. This financing amounted to \$275.9 million on March 31, 1942, but was completely repaid by March 31, 1943. The net effect of clearing off the sterling balances was as if the Dominion had purchased them from the Foreign Exchange Control Board and used them for the loan to Britain, for the repatriation of securities, and for other purposes, while the Board used the net proceeds after repurchasing the exchange held by the Bank of Canada to repay the advances from the Dominion. (See also the footnote on page xlvii, which deals with other aspects of the same matter.) Had the accumulation of sterling been financed solely by advances from the Dominion, the net effect on the accounts for 1942-43 would have been nil, for the advances repaid by the Board would have just equalled the sterling balances purchased from the Board; since in fact the sterling equivalent of \$275.9 million had been financed by the Bank of Canada, the 1942-43 accounts reflect the assumption of cash outlay to this amount which really pertains to previous fiscal years. Thus the loans and advances for 1942-43, as given in Table XVI, and the total cash outlay, as given in Table XIV, are inflated by the sum of \$275.9 million, which was required (and raised) in earlier years but did not appear on the Dominion's books until the fiscal year under review.

(c) Increase in Active Investments (Loans, Advances, and Securities, whether on War Account or on Non-War Account).

In the preceding subsections of this Section I have discussed primarily the cash transactions in all the accounts on the Dominion's books. Both the cash and the non-cash transactions in respect of expenditure and revenue have been summarized in sections D to H above. It has been customary also to include in the Public Accounts a table bringing together all changes in certain asset accounts. The net aggregate effect of these changes has been called the increase in active investments. Tables XVIII and

XIX give such an analysis for the fiscal year 1942-43. Briefly, the accounts included involve loans, advances, and securities; the active asset accounts excluded are Cash, Special Deposits, Unamortized Discount and Commission on Loans, and Miscellaneous Current Accounts—see the Balance Sheet, page 2 of Part I of this Report.

(b) Application of the net income surplus for the calendar year 1942 to the repayment of advances.

(c) Including an advance of \$35,000.00 for an oil drilling campaign, which does not appear as an item in the table because of its size.

(4) ANALYSIS OF SOURCE OF CASH.

(a) Revenue Received in Cash.

The revenue items in Table XIV total \$2,203.8 million, or \$45.7 million less than the total revenues shown in Table I. This is explained by the omission of non-cash credits totalling \$47.4 million, and by the fact that charges amounting to \$1.8 million against Premium, Discount, and Exchange account have been added to the relevant items in the cash outlay columns instead of being deducted from revenue.

The non-cash credits omitted are the following:—

Reduction in reserve account for deficits of the Canadian Wheat Board.	\$ 6.7 million
The increase in the Dominion's equity in the Canadian National Railway due to the net income surplus and the capital gain.....	36.1 "
The credit entries relating to the write-down to Consolidated Fund from Non-Active Assets	4.6 "

The first is an entry reversing a charge previously made to Consolidated Fund, when reserves were set aside to meet the deficits that would have been incurred if the Wheat Board had had to liquidate its holdings of certain crops at the then prevailing prices; the reserve is now reduced. The second entry is the contra to that which writes up the value of the Canadian National Railways Securities Trust Stock, as described on

page xxxix. The revenue item shows that the increase in value has accrued to the Dominion as the equity owner, and the debit (expenditure) item shows that this value has been received in the form of an increase in the value of the equity stock (a non-active asset)—somewhat as if a dividend had been received by the Dominion and re-invested in the railway. The third item is made up of contra items to the write-down to Consolidated Fund of certain non-active assets. These expenditures were already written off and became a part of net debt when they were classed as non-active assets; now that they are written off from Non-Active Assets to Consolidated Fund, an off-setting item must therefore appear in revenue, otherwise the net debt would be increased a second time as a result of the one expenditure.

The adjustment in Premium, Discount, and Exchange revenue is the result of the fact that in Table XIV, foreign exchange and debt payable in foreign currency have been valued at current exchange rates for all purposes.

(b) Other Receipts (except borrowing).

Other receipts, as listed at items 36 to 40 of Table XIV, are the estimated refundable portion of the personal income and the excess profits taxes (deducted from revenues at item 33), amounting to \$70 million, the net proceeds of the sale of miscellaneous securities held by the Dominion (including certain of the issues repatriated from the United Kingdom), totalling \$7.6 million, a net receipt of \$38.3 million in certain trust and special accounts, and miscellaneous receipts of \$11.5 million. Further information concerning the last two items follows.

Table XX shows the net receipts in certain trust and special accounts. The items are self-explanatory. In general, note that there is a certain arbitrariness about the classification of the accounts included in the category of "certain trust and special accounts"; on the one hand, many of them relate to the war and might have been classed with "miscellaneous accounts relating to the war", and on the other hand many of the small accounts classed as "Contingent and Special" on the Dominion's books could be said to be held in trust.

The government's contribution to certain of these funds, in the form of interest or otherwise, is included as a receipt, and the contra item is included in expenditures.

(b) Includes the net receipts on miscellaneous pension plans, totalling \$41,775.92; see Schedule "GG", on page 37 of Part I of this Report.

The accounts grouped as "miscellaneous receipts and credits on war account" are detailed in Table XXI. The only item that is not self-explanatory is number 7, United Kingdom Ministry of Supply account. This is the net payment during the year by the Canadian Department of Munitions and Supply, acting as agent for the United Kingdom Ministry of Supply, out of funds deposited by the latter with the Receiver General; these funds are for making payments on British munitions contracts.

Item 40 of Table XIV is the net change in the accounts not elsewhere detailed. It is made up as follows:—

Decrease in Special Deposits.....	\$0.2 million
Net credits in sundry debtor accounts in Miscellaneous Current Accounts.....	0.5 "
Net credits to sundry creditor accounts in Contingent and Special Accounts	0.1 "

Some minor debit balances are netted out, and a few accounts relating to war but showing a net change of less than fifty thousand dollars during the year are included.

(c) Reduction of a credit balance.

(c) Borrowed Funds and Borrowing Operations.

(i) Operations in Foreign Markets.

Except for the refunding of a maturing issue in New York, the Dominion borrowed nothing in foreign markets during the fiscal year, and in fact reduced its indebtedness in both London and New York. The cash effect of these transactions are noted at items 9 and 18 of Table XIV where the amounts have been converted at the current rates of exchange in order to show the net requirements for this purpose in Canadian funds. Their effects can also be seen in the Balance Sheet and Schedule R thereto, at pages 3 and 27 respectively of Part I, where they are shown at parity of exchange.

The New York refunding operation arose out of the call, as of March 15, 1943, of a \$100 million issue of Dominion 5 per cent bonds due May 1, 1952, but callable on or after May 1, 1942. To provide cash for the major part of this redemption, a new issue of Dominion bonds was sold in January, 1943, to an underwriting syndicate of 134 investment firms headed by Morgan Stanley & Co. There were three tranches to the issue: \$30 million five-year 2½ per cent bonds due January 15, 1948; \$30 million ten-year 3 per cent bonds due January 15, 1953; and \$30 million fifteen-year 3 per cent bonds due January 15, 1958. These tranches were sold to the underwriters at 99.25, 99.125 and 96.875 respectively, and the flotation proved highly successful.

(ii) Borrowing within Canada.

Repayments of foreign debt referred to in the preceding subsection constitute of course a requirement for cash and they have been so treated in Table XIV. However to deduct these figures from the net proceeds of borrowing within Canada in order to show an over-all figure for net borrowing would understate the Dominion's cash requirements during the year, and would obscure the real total of funds provided by Canadian investors.

It is borrowing *within Canada* that was significant in meeting the cash deficiency during 1942-43. The principal sources of borrowed money are shown at items 41 to 47 of Table XIV.

The increase of \$30 million in outstanding three months Treasury Bills to a total of \$300 million needs little comment. It is significant, however, that the net effective rate of interest declined steadily throughout the year and was at the near-record low level of .498 per cent on the last issue made during the year. This compares with the following effective rates on the closing issue made in each of the last five fiscal years:—

1938-39.....	·643%
1939-40.....	·747
1940-41.....	·609
1941-42.....	·552
1942-43.....	·498

It is not possible to classify the purchasers of Treasury Bills, in view of the short term and fluidity of these securities, but other new issues of funded debt during 1942-43 have been classified according to whether at the time of issue they were purchased by the Bank of Canada, the chartered banks, or the general public. These are shown at items 42, 43, and 44, respectively, of Table XIV (excluding the refunding of maturing issues).

The issues sold to the Bank of Canada to provide new cash consisted of two-year notes for \$100 million, bearing interest at 1½ per cent and dated April 15, 1942, and about \$92·8 million (\$92,831,000.00) of two and one-half year Second Victory Loan bonds dated March 1, 1942, also bearing interest at 1½ per cent. These were issued in June of 1942, at par and accrued interest, at the time that the accumulated balances of sterling were disposed of; in reality, therefore, this borrowing relates to transactions in previous fiscal years, just as do the measures taken to dispose of the accumulated sterling, as already described (see page xlix). The Foreign Exchange Control Board had financed this accumulation in part by selling some of its holdings of foreign exchange to the Bank of Canada under agreement to repurchase it; exchange to the value of \$275·9 million was so held by the Bank at March 31, 1942, but none was held at March 31, 1943, for it was repurchased by the Board and sold to the Dominion Government when the accumulated balances were disposed of. Consolidating the position of the Dominion with that of its agent, the Foreign Exchange Control Board, it can thus be seen that an obligation of \$275·9 million to the Bank of Canada has been replaced by an obligation of only \$192·8 million during 1942-43. In fact, if it is desired to consider only those transactions that properly relate to the fiscal year 1942-43, it follows that this sum of \$275·9 million must be deducted from the net increase of \$2,050·9 million in funded debt during 1942-43; for this amount represents cash requirements in previous fiscal years, which the Dominion did not finance directly until after March 31, 1942.

An issue of \$250 million of one year 1 per cent notes, dated April 15, 1942, was sold to the Bank of Canada at par and accrued interest, but this was to refund a similar issue maturing on May 1, 1942.

The borrowing from chartered banks during 1942-43 was confined to Deposit Certificates, a new type of security in Canada but similar to the Treasury "deposit receipts" in the United Kingdom. They are issued for a term of twenty-six weeks and bear interest at $\frac{3}{4}$ of 1 per cent. During the year \$1,330 million were issued but \$510 million were redeemed, leaving \$820 million outstanding at March 31, 1943.

As Table XIV shows, the general public purchased over \$1,050.4 million of new issues of securities during 1942-43—\$991.4 million of the Third Victory Loan, and \$59 million (net after redemptions) of War Savings Stamps and Certificates and Non-Interest-Bearing Certificates. The Third Victory Loan was the great public operation of the year. It was offered in two maturities: a $1\frac{1}{2}$ per cent issue maturing May 1, 1946, redeemable at par and non-callable to maturity; and a 3 per cent issue maturing November 1, 1956, at 101 and callable at 101 on or after November 1, 1953. Both issues were offered at par. In a three weeks' campaign in October and November, 1942, 2,041,610 subscribers bought \$144.3 million of the short term bonds and \$847.1 million of the long term bonds.

The National War Finance Committee has prepared an estimate of the derivation of the subscriptions to the Third Victory Loan at the time of issue, which is given in Table XXII. For comparison, similar data in respect of the First and Second Victory Loans are also given.

⁽¹⁾ Includes small commercial and small non-profit bodies, the aggregate subscriptions from which would be relatively a small part of total.⁽²⁾ Not separately calculated, included under Sub-section (d) (iv).⁽³⁾ Individuals believed capable of buying \$25,000 or more par value of bonds at the time of issue.⁽⁴⁾ Excluding the \$92.8 million issued to the Bank of Canada in June 1942, in connection with clearing off the accumulated balances of sterling.

The total face value of War Savings Certificates outstanding at March 31, 1943, was \$187 million, and of War Savings Stamps \$5.9 million. The corresponding figure for Non-Interest-Bearing Certificates was \$9.1 million.

On July 1, 1942, the 4 per cent School Lands Debentures amounting to \$33.3 million held by the governments of the three prairie provinces, were renewed for a further period of one year.

Total receipts from the new domestic loans issued for cash during the year were \$2,093.3 million. From this must be deducted \$42.3 million representing issues which matured and were paid off in cash during the year, to give a net increase of \$2,050.9 million in domestic funded debt outstanding.

Item 47 of Table XIV represents what might be called involuntary borrowing; it is the increase in the floating debt during 1942-43, amounting to \$41.4 million. Except for a small amount of stock payable on demand (\$15,527.40 as at March 31, 1943), the floating debt is composed of funded debt matured and outstanding, interest due and outstanding, and cheques outstanding. The changes in these items during the year were:—

Increase in outstanding cheques.....	\$38.0 million
Increase in interest outstanding.....	5.5 "
Less decrease in funded debt matured and outstanding.....	-2.1 "

Note that the changes in funded debt matured and outstanding payable in New York funds or in sterling are not included in item 47, but in items 9 and 18, of Table XIV. The change in outstanding interest payable in these currencies is included in item 47 however.

Before leaving this subject of the sources of borrowing, some comments are in order concerning the portion of the new issues that was purchased by the general public. Out of \$2,093.3 million derived from new security issues (as distinct from conversions or renewals of previous issues), just over half—50.2 per cent—was subscribed by the general public, 39.2 per cent by the chartered banks, 9.2 per cent by the Bank of Canada, and 1.4 per cent by the unclassified purchasers of Treasury Bills. In view of all the circumstances, including the enormous increase in expenditure during this fiscal year, as described above on page xviii, this may be regarded as a satisfactory showing. The Third Victory Loan was raised in the last part of October and the first part of November, 1942, when expenditures were still far from their peak, and consequently the monthly rate of national income out of which the subscriptions were pledged was well below the level reached by the end of the fiscal year. Furthermore, it should be noted that the Second Victory Loan Campaign had closed as late as March 7, 1942, hardly more than three weeks before the beginning of the fiscal year 1942-43, and the Fourth Victory Loan drive opened on April 26, 1943, or less than four weeks after the close of the fiscal year. Thus, although only \$991.4 million appears as receipts from Victory Loans during the year ended March 31, 1943, nevertheless in the fifteen months from February 16, 1942, to May 15, 1943, over \$3,143 million in cash was subscribed by the general public in three loan campaigns. Finally, as stated in the preceding paragraphs, the borrowings of the Dominion were offset to a considerable extent by the elimination of the \$275.9 million obligation of the Foreign Exchange Control Board to the Bank of Canada for the repurchase of foreign exchange.

In order to assess the results of the borrowing program properly, it is necessary to consider the period from the start of the war to the close of the fiscal year 1942-43, so that accidental factors like the timing of loan campaigns and other transactions will be less important. This is done in Table XXIII, which shows that from September 1, 1939, to March 31, 1943, \$3,266.8 million out of total new borrowings (that is, excluding the conversion or renewal of previous issues) amounting to \$5,124.6 million were subscribed by the general public, or 63.7 per cent.

(a) Not including renewals or the conversion of maturing issues. The source of the loan (whether banks, the general public, etc.), indicated refers to the time of issue only, and not to current holdings. Note that the columns do not add exactly to the totals shown in some cases; this is due to rounding off the figures to the nearest hundred thousand dollars.

(b) From September 1, 1939, only.

(c) These two issues, totalling \$325 million, were sold to the Bank of Canada to provide funds for the Foreign Exchange Control Board.

(d) These loans were issued in clearing off the F.E.C.B.'s accumulation of sterling balances.

(e) The total for War Savings Certificates in each year includes the addition of accrued interest on all outstanding certificates.

(f) Some small portion of these amounts was subscribed by the Bank of Canada and the chartered banks, estimated at less than \$30 million for the three loans (including \$6.7 million of the First Victory Loan, as shown in Table XXII).

Table XXIV presents another interesting comparison, namely the average coupon rates of interest payable on the Dominion's funded debt. This Table shows two significant features—firstly, throughout the period, a steady decline in coupon rates, and secondly, in the last three fiscal years, a decisive narrowing of the spread between the average rate on domestic funded debt and that on total funded debt. The first feature is epitomised by the fall of the average rate on total debt from 4.63 per cent as at March 31, 1934, to 2.60 per cent as at March 31, 1943. The average domestic rate

fell even more precipitately, from 4.83 per cent to 2.57 per cent. This fall is due, in part, to a larger use of short-term borrowing, but the rates for long-term securities are also down substantially, as is shown by the last column—the effective yield of the last domestic issue in each fiscal year having a term of ten or more years. The decline in these long-term rates is, of course, less regular and less precipitate over the period, but the effective rate on the fourteen-year bonds of the Third Victory Loan, at 3.06 per cent, shows as the lowest in the period, and less than three-quarters of that of the twelve-year Refunding Loan of 1933. It should also be noted that the term of the longer term loans issued during the war has been steadily increasing, so that this column does not fully reflect the decline that has taken place in the war years.

TABLE XXIV

AVERAGE COUPON INTEREST RATES ON THE FUNDED DEBT OF THE DOMINION 1933-34 TO 1942-43 (a)
(As at the close of each fiscal year)

1942-43.....	2.57	3.44	3.08	2.60	3.06	14 "

(a) Years prior to 1938-39 have been adjusted to a basis comparable with that of later years by the omission of securities payable on demand from the totals shown in Appendix I to the Public Accounts for the respective years. The year 1933-34 has been further adjusted by the addition of interest at the effective rate of 2.85% and 3.12% respectively on the three months and the eight months treasury bills outstanding at the close of the year.

(b) Debt in foreign currency is converted at par of exchange—£1 at \$4.86½, and \$1.00 U.S. at \$1.00 Canadian.

(c) Includes debt payable optionally in Canada or New York.

The increasing correlation between the average of the domestic coupon rates and the average of all coupon rates is of course the result of the greatly increased relative importance of domestic debt. At March 31, 1934, 72.9 per cent of the Dominion's debt was payable in Canada, 13.4 per cent in London, 10.5 per cent in New York, and 3.2 per cent optionally in Canada or New York; in 1940, these corresponding ratios were 78.6 per cent in Canada, 8.7 per cent in London, and 12.7 per cent in New York, and at March 31, 1943, 94.3 per cent, 0.1 per cent, and 5.6 per cent, respectively. Since the declaration of war, debt payable in New York has been reduced somewhat, and debt payable in London almost wiped out, while debt payable in Canada has nearly tripled.

(d) Decrease in Cash Balances.

The Dominion's holdings of domestic cash balances decreased by \$687.7 million during 1942-43, reflecting the two facts, first, that the Second Victory Loan campaign had closed just before the start of the fiscal year, so that initial cash balances were unusually high, and, secondly, that the Fourth Victory Loan drive opened shortly after the end of the year, so that closing cash balances were at a low level in anticipation of the new loan.

Incidentally, the negative balance of domestic cash carried into the fiscal year 1943-44, shown in the Condensed Cash Statement at page 19 of Part I of this Report, deserves some explanation. In point of fact the Dominion's bank accounts were never overdrawn. Payments made out of 1942-43 appropriations during the thirty days following March 31, 1943, as provided by subsection 1 of section 32 of the Consolidated Revenue and Audit Act, exceeded the balances on hand at the close of business on March 31, but the April revenues and other receipts for the fiscal year 1943-44 were more than enough to cover the difference.

(e) The Cash Deficiency.

The cash deficiency for 1942-43 was \$2,780.1 million. The significance of this figure and its relation to the year's budgetary deficit of \$2,137.6 million, were explained above on page xlv. They may be reconciled as follows:—

	Millions of dollars
Deficit, as at item 18 of Table I, page xvii.....	2,137.6
<i>Add:</i>	
Cash Outlay that increased assets or decreased liabilities:	
On non-war account, items 7 to 10 of Table XIV, page xlii.....	120.7
On war account, items 17 to 19 of Table XIV.....	708.8
Non-cash credits included in revenue, as noted, page li.....	47.4
<i>Deduct:</i>	
Non-cash debits included in expenditure, as noted, page xlv.....	—74.4
Miscellaneous receipts, as at items 36 to 40 of Table XIV.....	—127.4
<i>Adjustments:</i>	
Credits to Revolving Funds, as at item 21 of Table XIV.....	—30.8
Transfer of certain charges against Premium, Discount and Exchange Revenue to other items in Table XIV, as noted on page li.....	—1.8
Net of the above, or cash deficiency.....	<u>2,780.1</u>

It will now be clear that this year's huge cash requirements were financed in four main ways:—

1. Cash revenue receipts.....	\$2,203.8 million
2. Other cash receipts (Items 36-40, Table XIV).....	127.4 "
3. Net cash proceeds of domestic borrowing.....	2,092.3 "
4. Reduction in cash balances.....	687.7 "
Total	<u>\$5,111.4 "</u>

J. INDIRECT OR CONTINGENT LIABILITIES: GUARANTEED OBLIGATIONS.

This review would not be complete without a discussion of the indirect liabilities of the Dominion and the changes therein during the year under review. A footnote to the Balance Sheet calls attention to these indirect liabilities and they are listed in Schedule V, on page 33-4 of Part I of this Report.

(1) Guaranteed Securities of Government-Owned Enterprises.

The total amount of securities of the Canadian National Railway System guaranteed by the Dominion as to the payment of principal and interest outstanding in the hands of the public was \$676 million as at March 31, 1943, a decrease during the year of \$79.2 million. Similar securities guaranteed by the Dominion as to the payment of interest only, were outstanding on the same date in the amount of \$10.5 million, a decrease of \$22.6 million. These reductions were due mainly to the purchase, under the provisions of The War Appropriation (United Kingdom Financing) Act, 1942, of securities owned by British investors but vested by the Government of the United Kingdom, and the purchase of securities from Canadian holders under the provisions of the Canadian National Railways Financing and Guarantee Act, 1941, and the Canadian National Railways Financing and Guarantee Act, 1942.

Other securities, representing obligations of the Canadian National (West Indies) Steamships Limited and various Harbour Commissions, which carry the guarantee of

the Dominion, both as to principal and interest, were outstanding in the amount of \$30.4 million as at March 31, 1943. This represented a decrease of \$0.1 million during the year.

(2) Guaranteed Bank Loans for Grain Marketing Purposes.

Under the authority of The Canadian Wheat Board Act, 1935, as amended, a price of 90 cents per bushel, basis No. 1, Northern, Fort William, was fixed as the basic price at which the Canadian Wheat Board was willing to pay for wheat of the 1942 crop delivered to the Board on a quota basis by producers thereof. The Board's operations were financed by loans obtained from a group of chartered banks under guarantee of the Dominion Government. The amount of the guaranteed bank loans outstanding as at March 31, 1943, which related to the purchase of the 1939, 1940, 1941 and 1942 wheat crops, was \$67 million.

By Orders in Council passed in 1942 the Canadian Wheat Board was empowered to deal in flaxseed, soybeans, oats and barley. In order to finance these operations, guaranteed bank advances were obtained from certain chartered banks. The amounts of these guaranteed advances outstanding as at March 31, 1943, were as follows: in respect of flaxseed \$7.7 million; in respect of soybeans, an insignificant amount (\$1,153.02); and in respect of oats and barley \$0.2 million.

The guarantee of the Dominion to the Winnipeg Grain and Produce Clearing Association, Limited, arising out of transactions and trades made by the Canadian Wheat Board, continued during the year. No liability in connection with this guarantee accrued from day to day, as margin deposits were made by the Board to the Association daily.

(3) Guarantee of Seed Grain Loans.

Under the terms of The Seed Grain Loans Guarantee Act, 1938, the Dominion provided seed grain assistance to farmers in the provinces of Saskatchewan and Alberta for the crop year 1938. This assistance took the form of a Dominion guarantee to chartered banks for loans made to municipalities which in the first instance were guaranteed by the Provincial Government. The principal amount authorized by the Act to be guaranteed by the Dominion was \$14,500,000 in the case of Saskatchewan, and \$1,900,000 in the case of Alberta. The Government of Alberta during the fiscal year 1941-42, paid to the interested banks all outstanding 1938 seed grain loans and accordingly the Dominion's liability with respect thereto was cancelled. In the case of Saskatchewan, a general guarantee was given for an amount not exceeding the maximum amount authorized. This guarantee is still outstanding.

(4) Commitments in respect of National Housing Act Loans.

Under the Dominion Housing Act, 1935, and its successor Act, the National Housing Act, 1938, the Dominion has accepted and is accepting certain obligations arising out of its contracts with approved lending institutions which, while not expressed in the form of a guarantee, may nevertheless be regarded as contingent or indirect liabilities.

The manner in which losses in respect of any loan are to be shared by the Dominion and the lending institution is fixed by the contract. The general principle is that the Dominion bears two-thirds of the loss, if at the time the loss is sustained the principal amount of the loan repaid, less any other amounts due, is equal to or less than the amount advanced by the Dominion and one-third of the loss if at the time the loss is sustained the principal amount repaid, less any other amounts due, is more than the amount advanced by the Dominion. In the case of small loans (that is, loans not in excess of \$4,000 in the case of a single family dwelling or not in excess of \$700 per habitable room in the case of a multiple family dwelling), the share of the loss to be borne by the Dominion is not more than 80 per cent and not less than 50 per cent of the loss. The above provisions apply to loans made under both the National Housing Act, and its predecessor Act, the Dominion Housing Act. Under the National Housing Act, a new provision was added to encourage the making of small loans in such small or remote communities and in such districts of other communities as may be designated

by the Minister of Finance in any contract. In respect of such loans, the Dominion has agreed in contracts with certain lending institutions to pay losses sustained by any such lending institution up to certain amounts determined by the contract which are not less than 7 per cent and do not exceed 25 per cent of the total amount of such loans made in such areas by each such lending institution.

The total amount of loans approved as at March 31, 1943, under the Dominion Housing Act, 1935, and the National Housing Act, 1938, was \$78.8 million. The increase in such loans during the year was \$2.0 million. Net losses realized by the Dominion as of that date amounted to the very small sum of \$2,644.78.

(5) Guaranteed Home Improvement Loans.

Under the terms of The Home Improvement Loans Guarantee Act, 1937, almost \$50 million (\$49,959,055.31, to be exact) had been loaned up to March 31, 1943, to home owners by chartered banks and other approved lending institutions. The contingent liability of the Dominion with respect to these loans was limited to 15 per cent of the aggregate of such loans made by each lending institution. As at October 30, 1940, after four years of operation, the \$50 million loan authorization having been substantially exhausted, the Government's undertaking to provide a guarantee for this type of loan was terminated. After this date, loans made by lending institutions were not accepted for guarantee by the Dominion. As at March 31, 1943, 95.3 per cent of the total amount of all loans made had been repaid and as 1,081 claims for losses in the amount of \$380,894.46 had been paid up to March 31, 1943, of which \$26,317.54 (including \$5,064.94 interest) had been recovered, the contingent liability of the Government at the close of the fiscal year under review was the entire balance owing on all loans, i.e. \$2,341,278.94. It will be noted that the total of claims paid amounted to only .762 per cent of the total amount of loans made.

(6) Guarantees of Bank Loans under Home Extension Plan.

By the provisions of the Appropriation Act, No. 5, 1942, provision was made for the Governor General in Council to guarantee loans made by chartered banks for the conversion of already existing dwellings into multiple housing units under regulations similar to those under The Home Improvement Loans Guarantee Act. The maximum amount of loans which may be guaranteed is \$2 million, and the Government's guarantee is limited to fifteen per cent of the total amount of loans made.

As of March 31, 1943, 28 loans had been approved for a total amount of \$57,035.28 to provide for 55 new units. There have been no claims for losses.

(7) Guarantees of Bank Loans by Commodity Prices Stabilization Corporation.

Under the terms of an Order in Council dated July 10, 1942, the Commodity Prices Stabilization Corporation, a Government-owned Corporation, was authorized to guarantee certain advances and interest thereon obtained by any person from a chartered bank in order to purchase coal, coke or briquettes for residential heating, during the summer of 1942. The liability of the Corporation is limited to twenty per cent of the aggregate amount of advances made by each bank, but not exceeding in the aggregate \$5 million. The amount of the contingent liability of the Corporation at March 31, 1943, was \$87,395.04.

Under the terms of an Order in Council dated October 9, 1942, the Commodity Prices Stabilization Corporation was authorized to guarantee certain advances, obtained by any person engaged in the production of logs or lumber, from any chartered bank. The liability of the Corporation is limited to fifteen per cent of the aggregate amount of advances made by each bank, but not exceeding in the aggregate \$2.5 million. The amount of the contingent liability of the Corporation at March 31, 1943, was \$67,543.05.

(8) Guarantees of Bank Loans to Finance Munitions Contracts.

The Government guaranteed the repayment of bank loans together with interest thereon obtained by certain contractors in connection with contracts placed by the Department of Munitions and Supply. As at March 31, 1943, the amount of such guaranteed bank loans authorized was \$4.3 million, and the amount actually outstanding was \$1.9 million.

(9) Guarantee of Provincial Receipts from Gasoline Taxes under Dominion-Provincial Taxation Agreements.

Under the terms of the Dominion-Provincial taxation agreements, and pursuant to Section 5 of the Dominion-Provincial Taxation Agreement Act, 1942, provision is made for the payment to each province of the amount by which the net receipts from the tax imposed by the Province on gasoline sales are less than the net receipts from this source during the fiscal year of the province ended nearest to December 31, 1940. The gasoline tax revenues that have been thus guaranteed aggregate \$56·7 million.

(10) Total Guaranteed Obligations Outstanding as at March 31, 1943.

For the details of the above and a number of other indirect or contingent liabilities, some of which are indeterminate as to amount, see Schedule V on pages 33-4 of Part I.

Total outstanding guarantees of the Dominion of Canada as at March 31, 1943, were as follows:—

	Millions of dollars
Railway and other securities in hands of public—	
Guaranteed as to principal and interest.....	\$ 706·4
Guaranteed as to interest only.....	10·5
Deposits maintained by the chartered banks in the Bank of Canada.....	261·0
Other guarantees (excluding amounts not yet determined or indeterminate).	90·6

K. ASSISTANCE TO RAILWAYS SINCE CONFEDERATION.

Section 24 of the Canadian National Railways Capital Revision Act, 1937, requires that a detailed statement showing the total assistance granted by the Dominion in various forms to all Canadian railways should be published annually as an appendix to the Public Accounts.

This voluminous statement was first published in the Public Accounts for the fiscal year 1937-38. It has been revised and brought up to date as at March 31, 1943, and is included in this Report as Appendix No. 13, pages 63 to 105 inclusive of Part I.

I hope that Ministers, Members of Parliament and others who have to use the Public Accounts will find the Report in its new form more illuminating as well as more convenient. In the short time available, it has not been easy to complete the enormous volume of detailed work and the meticulous checking necessary to produce the Report in time, and great credit is due to the accounting staff of the Government, particularly the Comptroller of the Treasury, for what has been accomplished.

All those associated with the undertaking, however, would agree, I believe, that there is still room for further improvement. Plans for other modifications and additions which we had in mind for this volume have had to be postponed because of lack of time and shortage of staff. These and other improvements we hope to make in succeeding Reports.

Respectfully submitted,

W. C. CLARK,
Deputy Minister of Finance.

COMMENTS ON THE BALANCE SHEET

1. Cash represents the total of the balances at credit of the Receiver General of Canada in the several banks in Canada, London and New York, at the close of the relative fiscal years.
2. Special deposits consist of cash balances in the hands of the fiscal agents of the Government for purchase or redemption of Dominion of Canada securities and for payment of interest.
3. This amount represents the cost of the Government's investment in the entire capital stock of the central bank of Canada acquired under the authority of The Bank of Canada Act Amendment Act, 1938.
4. Under the Central Mortgage Bank Act, a Central Mortgage Bank was created with an authorized capital stock of \$10,000,000 all of which was subscribed for by the Dominion Government. The \$250,000 represents the amount of stock issued and paid for at the rate of \$2.50 in respect of each \$100 share. Due to the war the bank remained inoperative.
5. To enable the Foreign Exchange Control Board to finance the purchases of gold and foreign exchange an amount of \$725,000,000 had been advanced as at March 31, 1942. These advances were made under the provisions of The Exchange Fund Order, 1940, and Section 3 of The War Appropriation Act, 1941. During the fiscal year 1942-43, the Board repaid \$325,000,000 of these advances together with interest due on the full amount advanced.

6. (a) The outstanding balance on March 31, 1942, of loans made to the Canadian Broadcasting Corporation for capital purposes was repaid by the Corporation during 1942-43 with interest in full.
6. (b) This account represents the principal outstanding of amounts furnished the Canadian Farm Loan Board to be loaned on farm property and fishermen's land. During the fiscal year 1942-43 the Canadian Farm Loan Board repurchased from the Government \$2,500,000 of its 3½ per cent bonds due January 2, 1960, thereby reducing the amount of its bonds held by the Government to \$26,700,000. There were no initial capital advances nor purchases of capital stock during the year under the Canadian Fisherman's Loan Act.

As at March 31, 1943, the Board reported outstanding loans to farmers totalling \$33,984,700.71, secured by first mortgages in the amount of \$32,667,179.80 and by second mortgages in the amount of \$1,317,520.91. Real estate held by the Board amounted to \$339,581.97 and agreements for sale were carried at \$554,829.43. The Board also reported loans to fishermen outstanding as at March 31, 1943, in the amount of \$19,598.02.

Interest in full is being currently paid by the Board on its bonds and on initial capital advances.

6. (c) This amount represents the net outstanding advances made for capital expenditures, purchase of railway equipment and for debt retirement. Interest is being currently paid by the Railway Company on these advances.
6. (d) This advance was made to the Company in 1937 (Vote 362, Appropriation Act No. 3, 1937), to provide working capital requirements. Interest is paid at the rate of 3 per cent per annum.
6. (e) The amount of \$12,814,210.85 representing the outstanding portion of the cost of railway equipment purchased for resale to the Canadian Pacific Railway Company under hire-purchase agreements, was repaid with interest during 1942-43 by the Company in advance of due dates.
6. (f) To the close of the fiscal year on March 31, 1943, 19,184 loans, aggregating \$78,785,472, had been approved under the National Housing Act and under its predecessor Act, the Dominion Housing Act. Of this amount, the Dominion's share was \$19,695,484, of which \$19,405,765 had actually been disbursed.

Total receipts in respect of such loans to March 31, 1943, amounted to \$4,459,527.58, of which \$1,546,754.53 represented interest and \$2,912,773.05 repayment of principal, leaving a net capital investment by the Dominion as at March 31, 1943, of \$16,492,991.95.

6. (g) The increase in this account during 1942-43 of \$917,159.16 represents an advance to the Union of Soviet Socialist Republics to be applied as a credit for the purchase by that country of Canadian wheat and flour, pursuant to an agreement with Canada. The loan bears interest at the rate of 3 per cent per annum, and is repayable in four equal semi-annual instalments commencing six months after the end of three years from the date of the agreement.

No payments, either on account of interest or principal were received during the fiscal year on behalf of the Governments of Roumania or Greece.

6. (h) Under authority of The War Appropriation (United Kingdom Financing) Act, 1942, sterling balances in an amount equivalent to \$700,000,000 (at the exchange rate of \$4.45 to the pound) were converted into a Canadian dollar obligation of the Government of the United Kingdom, which, under the provisions of the Act, is non-interest bearing until after the termination of the war.
6. (i) The figure of \$5,740,716.44 represents the net amount of loans outstanding as at March 31, 1943, which were made to certain municipalities under the Municipal Improvements Assistance Act, 1938, to enable them to finance the construction of municipal self-liquidating projects. These loans which are guaranteed by the Province concerned, bear interest at the rate of 2 per cent per annum, and are amortized over a period not longer than the estimated useful life of the project. No new loans were authorized in 1942-43. Advances of loans previously authorized were made to the extent of \$296,299.50. Repayments on account of principal were received to the amount of \$531,843.71, leaving the net reduction for the year at \$235,544.21.
6. (j) During the year, advances for harbour developments treated in the public accounts as active assets, were made to the National Harbours Board as follows: Churchill Harbour, \$90,000; Montreal Harbour, \$370,161.69; Vancouver Harbour, \$42,272.76, and Prescott Elevator, \$5,000, making a total of \$507,434.45. In the same period, loans were reduced by \$773,943.33 as follows: Churchill Harbour, \$90,000; Montreal Harbour, \$605,357.43; Vancouver Harbour, \$73,585.90, and Prescott Elevator, \$5,000. All these transactions resulted in a net credit for the year of \$266,508.88.
- Interest, which is derived from port dues and collections, was paid on account as follows: Montreal Harbour, \$500,000; Vancouver Harbour, \$700,000; Churchill Harbour, \$1,640.40, and Prescott Elevator, \$2.05.
6. (k) This amount represents advances made for development of New Westminster Harbour, and for assistance generally to the New Westminster Harbour Commission. No interest has been received since July 1, 1941.
6. (l) During the fiscal year the provincial government of Prince Edward Island repaid the last of its indebtedness to the Dominion on account of housing loans made at the close of the last war (1914-18), amounting to \$23,500, and the provincial government of Nova Scotia reduced its indebtedness by an amount of \$70,000. The outstanding balance of \$37,000 owing by the Province of Nova Scotia has since been paid. During the life of these housing loans, interest at the rate of 5 per cent per annum was paid in full.
6. (m) During the period, 1931 to 1941, financial assistance was given to the four Western Provinces by way of loans under authority of the Relief Acts for the purposes of meeting the provincial and municipal share of relief, the retirement of maturing provincial obligations, and, to a limited extent, ordinary provincial government expenditures. The amount of \$156,775,604.70 represents the net amount outstanding as of March 31, 1943, divided by Provinces as shown in Schedule "F" to the Balance Sheet, page 21. Repayments received from the Provinces during 1942-43 were as follows:

Manitoba	\$ 288,674 09
Saskatchewan	50,986 87
Alberta	38,500 00
British Columbia	121,255 83
	<hr/>
	\$ 499,416 79
	<hr/>

6. (n) Under authority of an Order in Council passed in October, 1932, the Dominion accepted from the Government of Alberta a treasury bill of the Province for \$468,750, representing an over-payment of subsidies made by the Dominion during the years 1914, 1915 and 1916. The repayment during 1942-43 of \$68,750 reduced this indebtedness to \$400,000.
6. (o) The annual principal instalment of \$3,840 was paid by the Province of Saskatchewan on a loan made to them in 1940-41 to enable the Saskatchewan Power Commission to extend its electrical transmission system to the bombing and gunnery school at Dafoe, Saskatchewan. This payment reduces this indebtedness to \$49,920.
6. (p) This account represents the principal amount outstanding of loans made to soldier settlers and in connection with general land settlement. The account was reduced during the year by \$1,691,503.40 of which total, \$50,706.81 was by means of a write-off of loans to Consolidated Fund under authority of The Soldier Settlement and Farmers' Creditors Arrangement Acts. The amount of interest received on account during the year was \$913,847.87.

6. (g) In the fiscal years 1940-41 and 1941-42, annual amounts of \$25,000,000 were charged to Consolidated Fund to provide a reserve for possible losses on ultimate realization of active loans and advances. A further amount of \$25,000,000 was added to this reserve during the current year. This total of \$75,000,000 is deducted on the Dominion's balance sheet from the total of Loans and Advances.
7. This amount resulted from financial adjustments with certain provinces at the time they entered the Dominion. Interest is paid half-yearly by the provinces.
8. This account consists of discounts, commissions, redemption bonuses and conversion premiums on loan flotations since 1930 remaining to be charged off annually to expenditures in proportion to the term of the respective loans. The amortization of these costs is shown in detail by loan issues in Appendix No. 3, page 55. The increase in the account of \$19,383,368.05 is due to new loan flotation costs to be amortized, less the annual write-off, as follows:

9. This account, consisting of a number of miscellaneous assets, includes such items as unliquidated advances to the Royal Canadian Mint for the purchase of gold, silver and copper bullion; bond holding investments at cost chiefly in Dominion of Canada direct and guaranteed securities, and certain assets amounting to \$509,514,078.18, which are contra accounts to certain special deposits included in the liability accounts, Contingent and Insurance Funds. The remaining items consist of miscellaneous stores on hand, recoverable advances made under Section 3 of the War Appropriation Acts, and sundry advances for special purposes, all of which are dealt with individually in Part II of this Report.
10. If the total active assets of the Dominion, consisting chiefly of cash on hand, expenditures treated as investments, and sundry recoverable advances and accounts receivable, are deducted from the gross debt or total liabilities of the Dominion, the resulting figure is the Net Debt of Canada.
- The Net Debt is divided into two parts, namely, Consolidated Fund and Expenditures for Capital purposes and other Non-active Assets. Comments on these two accounts will be found under their respective numbers, 11 and 12. The increase in the net debt for the fiscal year 1942-43 was \$2,137,627,940.30, of which \$2,102,294,540.49 was charged to Consolidated Fund and the remainder, \$35,333,399.81, to certain capital and other non-active assets.
11. The portion of the Net Debt of Canada representing expenditures for capital purposes and non-active assets, consists mainly of certain expenditures made on public works and on other capital investments regarded as a continuing asset to Canada, although treated as expenditures for debt purposes.
11. (a) There were no capital expenditures on Dominion-owned canals during 1942-43. The reduction in capital cost of \$42,164.00 consisted of miscellaneous refunds of expenditures made in former years.

11. (b) and (c) The largest single items of expenditure on these capital assets during 1942-43 were \$1,701,440.62 incurred for dredging in the St. Lawrence river ship channel, and \$1,480,971.61 for construction and development of civilian airways and airports. The capital cost of these public works may be found in Schedules K and L to the Balance Sheet and details of the year's operations in Schedules LL and MM to the Condensed Cash Statement, page 42.
11. (d) The amount of this account represents the capital investment of the Dominion in respect of certain old properties and stores under the jurisdiction of the Department of National Defence.
11. (e) This amount represents the Government's investment in the acquisition and organization of the Northwest Territories.

Moneys received from sale or rental of Dominion Lands in that region to March 31, 1911, have been deducted from the capital cost.

11. (f) This amount represents assistance to the Canadian Pacific Railway, and to other companies now comprised in that system, for capital and construction expenditures.
11. (g) This account represents the initial stated value of the capital stock of the Canadian National Railways Securities Trust which was equal to the total of loans made by the Government to the Canadian National Railways for capital purposes prior to January 1, 1937, with adjustments since that date for line abandonments, capital gain on the repatriation of securities and cash surpluses.

The Dominion's equity in the Canadian National Railways system as reflected in the Securities Trust Stock increased during the year by \$31,559,862.85. This was accounted for by an increase in the value of the stock equal to the net income surplus of the system for the calendar year 1942, amounting to \$25,063,268.32, and by an increase of \$11,072,592.96 representing the net capital gain on repatriation of the system's securities. From this total increase the value of the line abandonments during 1942 amounting to \$4,575,998.43 was deducted resulting in a net increase as shown.

11. (h) This amount represents the initial stated value of 1,000,000 no par value shares of the capital stock of the Canadian National Railways. (Appendix No. 13 I, page 96).
11. (i) This amount represents advances made for capital and deficits of the Canadian Government Merchant Marine and Canadian National (West Indies) Steamships, Ltd. The surplus of the Canadian National (West Indies) Steamships, Ltd. for the calendar year 1942 amounting to \$781,214.88 and received during the fiscal year 1942-43 was credited to interest account.
11. (j) Non-active loans and advances during 1942-43 to the National Harbours Board, a government-owned enterprise, of \$657,525.77 were made for the following purposes: For reconstruction and capital expenditures—Three Rivers Harbour, \$473.61; Quebec Harbour, \$3,463.59; Saint John Harbour, \$157,935.51; Halifax Harbour, \$19,307.08 and Chicoutimi Harbour, \$145.98. Advances for retirement of maturing debentures were made to Saint John Harbour amounting to \$96,500.00 and to Montreal Harbour (Jacques Cartier Bridge) for payment of guaranteed interest amounting to \$379,700.00. Offset against this total advance of \$657,525.77 was an amount of \$15,000.00 applied as a reduction in indebtedness of the Quebec Harbour, leaving a net increase in non-active advances to the Board during 1942-43 of \$642,525.77. The amount received during the year on account of interest totalled \$1,400,000, and is made up as follows: From Halifax Harbour, \$850,000; Saint John Harbour, \$500,000 and Three Rivers, \$50,000.
11. (k) In the fiscal years, 1927-28 and 1928-29, a total of \$24 million was deducted from the total of active loans to soldier settlers and set up as a non-active asset to provide for revaluation of land and losses and concessions granted to soldier settlers. In 1937-38, this reserve was increased by an amount of \$139,360.88 which was transferred from general land settlement loans.

The amount of \$16,525,917.49 represents the balance of this account after write-offs, under legislation, of \$7,613,443.39 to Consolidated Fund.

11. (l) and (m) Under the authority of the two Acts mentioned, the Dominion guaranteed the principal and interest of loans made by chartered banks to certain municipalities in the Province of Saskatchewan for purchasing seed grain and providing other assistance to farmers in connection with seeding operations during the Spring of 1936 and 1937 respectively. These loans were guaranteed in the first instance by the Provincial Government. The Province being unable to fulfil its guarantee at the due dates, the Dominion was called upon to pay the amounts mentioned. These amounts which are secured by Provincial Treasury Bills are carried in the Dominion's books as owing by the Province of Saskatchewan.
11. (n) This account consists of a number of miscellaneous items treated as non-active assets detailed in Schedule Q to the Balance Sheet, page 25. The only activity during the year was the write-off to Consolidated Fund of the yearly established losses in Seed Grain and Relief Accounts administered by the Department of Mines and Resources.

12. Consolidated Fund is the account to which the excess of expenditures over revenues or revenues over expenditures is transferred annually, exclusive of capital expenditure and non-active investments as mentioned in Comment 11. The term "Consolidated Fund" is distinct from "Consolidated Revenue Fund" as defined by Section 3 of the Consolidated Revenue and Audit Act, 1931.

The excess of expenditures over revenues during 1942-43 carried to Consolidated Fund was \$2,102,294,540.49. This amount added to the net increase in expenditures on Capital and non-active accounts of \$35,333,399.81 gives the total deficit, or increase in the net debt for the year of \$2,137,627,940.30.

13. Obligations both due and outstanding payable in sterling and U.S. dollars are recorded in the balance sheet at par of exchange. Similarly on the asset side of the balance sheet cash and special deposits held in London and New York are shown at \$4.86½ to the pound sterling and \$1 to the U.S. dollar.

Details of the unmatured funded debt of Canada may be found on page 26. The increase during 1942-43 of \$2,028,214,129.54 is accounted for as follows:

Net Increase 1942-43.....\$ 2,028,214,129 54

14. Details of outstanding matured bonds may be found on page 26. The increase is chiefly due to the 5 per cent New York bonds of 1922-52 having been called for redemption on March 15, 1943, only sixteen days before the close of the fiscal year.
15. An amount equal to five per cent of their average outstanding note circulation is maintained by each chartered bank with the Receiver General of Canada, as required by section 64 of the Bank Act, 1934, to secure redemption of their outstanding notes in the event of the suspension by a bank of payment in specie or Bank of Canada notes. The amount is adjusted annually on June 30th and interest at the rate of three per cent per annum is allowed to each bank on the deposit required.
16. This account represents mainly the value of money orders, postal notes, etc., issued by Post Offices which have not been presented for payment up to March 31, 1943.
17. Deposits in the Post Office Savings Bank during 1942-43 exceeded the withdrawals by \$2,263,667.68. Accrued interest at the rate of two per cent per annum was added in the amount of \$438,910.42, bringing the total amount credited to depositors' accounts on March 31, 1943, to \$24,373,991.48. Gold held on March 31, 1943, as required by Section 47 of the Savings Bank Act amounted to \$2,437,399.15 valued on the basis of \$20.671834 per fine ounce.

18. The value of all outstanding annuities at March 31, 1943, stood at \$190,298,479.00. Interest credited to the fund at the rate of four per cent per annum amounted to \$7,026,976.79 for 1942-43, and the amount credited to the fund to maintain the reserve during the year was \$497,790.26. This account is more fully dealt with under Part II of this report.
19. This account represents the recorded liability of the Dominion to the several superannuation, retirement and insurance funds, including the Unemployment Insurance Fund (cash, bonds and accrued interest). Details regarding these accounts may be found in Part II of this report under the several Government Departments administering the funds. The Unemployment Insurance Fund, in addition to cash on hand includes \$108,372,078.18, representing investments in, and accrued interest on, Dominion of Canada bonds, which amount is included as an asset in the Dominion Balance Sheet under Miscellaneous Current Accounts.
20. This account records the liability of the Dominion with respect to moneys received and held in trust for others. Details regarding the individual accounts as recorded in Schedule T may be found in Part II under the departments administering the several funds.
21. This liability account is made up of certain special deposits and reserve accounts as well as miscellaneous suspense accounts in process of payment as at the close of the fiscal years. These several accounts are dealt with in Part II of this report under the relative Government departments.
22. This account represents the difference, with subsequence adjustments, between the actual and the established debt of the provinces on entering the Dominion. Interest is paid to the provinces half-yearly on their relative debt allowance.

NOTE.—The above table is based on the classification of accounts for the fiscal year 1935-36. In that year the following expenditures formerly classified as Special Expenditures were charged to Ordinary Expenditures: Cost of Loan Flotations, Adjustment of War Claims, Expenditures under Railway Grade Crossing Act, Government contribution to Superannuation Fund, and payment required to maintain reserve in Government Annuities Fund. A new category of expenditures entitled Government Owned Enterprises was also set up to include operating deficits of and non-active advances to Government Enterprises operated as separate corporations. To enable comparisons to be made on a comparable basis with earlier years, appropriate adjustments have been made, for the purpose of this table, in the figures shown under the various headings beginning with the fiscal year 1929-30.

It will be noted that total disbursements include non-active loans and write-down of assets, in addition to all other expenditures.

† Includes \$25,000,000 as reserve against possible losses on assets.

This appendix shows a calculation of interest that would have been due on loans made to the Canadian National Railway System and Predecessor Companies for capital expenditures and deficits, had such interest been accrued on the books of the Dominion. The interest, however, was never taken into the accounts of the Dominion but interest amounting to \$530,832,597.67 was shown on the books of the Railway. The total amount of interest calculated up to December 31, 1936 was \$574,781,637.01. Any claim the Dominion may have for such interest was transferred to the Canadian National Railways Securities Trust as provided for by the Canadian National Railways Capital Revision Act of 1937.

(a) Amount paid by Dominion in acquiring 600,000 shares of the capital stock of the Canadian Northern Railway Company.

(b) Initial stated value of 1,000,000 no par value shares of the capital stock of the Canadian National Railway Company (See detailed explanation in Appendix 13I).

(c) Of this amount \$7,380,912 was not used for capital expenditures but represented the balance due by the Company under agreement made in 1883 for the creation of a fund to be held by the Government to guarantee a dividend of 3 per cent per annum for ten years on the Company's outstanding stock in an endeavour to assist in financing construction through the sale of additional stock. The amount on deposit with the Government was, at all times, more than sufficient to meet the payments which, under the agreement, the Government undertook to make. The obligation of the Company was fully discharged in 1886, some years in advance of its due date (See Note E to Appendix 13E, Page 91).

(a) Difference between conversion of pound sterling at \$4.86 and at \$4.86 charged to Consolidated Fund of Canada.

(b) Adjustments to loans under authority of the Canadian National Railways Capital Revision Act of 1937—Capital expenditures on wharves (\$1,006,527.61) transferred to Department of Public Works and expenditures on account of the Hudson Bay Railway (\$660,369.96) transferred to the Department of Transport.

(c) This amount represents losses in operation of \$373,823,120.38; losses amounting to \$15,474,546.66 during years 1937 to 1942 due to line abandonments in respect of which the Government has not made cash reimbursements to the railway and net capital loss of \$1,474,971.24 on sale of S.S. "Prince David" and S.S. "Prince Robert" less the capital gain of \$16,675,367.13 on repatriation of Canadian National Railway securities and increase in Dominion's Equity in Canadian National Railways due to surplus earnings of the system for the calendar years 1941 and 1942—\$29,979,595.06.

(d) Value of 5,000,000 shares of no par value capital stock of the Canadian National Railways Securities Trust now held by the Government—Appears in Net Debt—Canadian National Railways Securities Trust Stock.

(e) Of this amount \$2,853,912 was originally due February 1st, 1884, and \$4,527,000 on November 7th, 1888. Later, the aggregate of these two amounts, \$7,380,912 was consolidated with the construction loan of \$21,650,700; the security was rearranged and the whole was made payable on May 1st, 1891. All of this liability was discharged by July 1, 1886.

(f) The Canadian Pacific Railway in partial payment of these loans relinquished 6,793,014 acres of a land grant valued at \$1.50 per acre, amounting to \$10,189,521.33. This amount included interest of \$308,609.33 the balance being applied against the loans.

(g) Amount in aid of construction now shown in the Balance Sheet of the Public Accounts of Canada under assets, Miscellaneous Current Accounts, Schedule "I".

APPENDIX No. 13M

CALCULATION OF ACCRUED INTEREST ON LOANS

NOTE.—This appendix shows a calculation of interest that would have been due on loans made to the Canadian National Railway System and Predecessor Companies for capital expenditures and deficits, had such interest been accrued on the books of the Dominion. The interest however was never taken into the accounts of the Dominion, but interest amounting to \$530,832,597.67 was shown on the books of the Railway. Total amount of interest calculated up to December 31, 1936 was \$374,781,687.01. Any claim the Dominion may have for such interest was transferred to the Canadian National Railway Securities Trust as provided for by the Canadian National Railways Capital Revision Act of 1937.

PUBLIC ACCOUNTS

Part II

OFFICE OF THE
COMPTROLLER OF THE TREASURY

OTTAWA, December 27, 1943.

Dr. W. C. CLARK,
Deputy Minister of Finance.

SIR,—I have the honour to submit to you Part II of the Public Accounts of the Government of the Dominion of Canada for the fiscal year ended March 31, 1943.

The following is the form of presentation of the details of revenues, expenditures and other fiscal transactions for each department included herein:

- (1) General summary by Dominion Balance Sheet Accounts,
 - (a) Revenues and Expenditures,
 - (b) Receipts and Disbursements under Trust and Special Accounts,
- (2) Revenues,
- (3) Appropriations and Expenditures,
- (4) Summaries of Expenditures for other Departments (where relative),
- (5) Trust and Special Accounts.

The general summary by Dominion Balance Sheet Accounts, a new feature, is introduced in order that the reader may see at a glance how the financial transactions of each department affect the general accounts of the Dominion. The numbers appearing in square brackets opposite the account titles are the numbers of similar accounts in the Dominion Balance Sheet (see Part I hereof).

On April 1, 1942, a revised classification of ordinary revenues as authorized by P.C. 1/1956 of March 12, 1942, became effective, and, as the departmental summaries of revenues herein are comparative, it became necessary to reclassify, as far as possible, the 1941-42 revenues under the new headings. Under Special Receipts a new class called "War Appropriation Acts" was created this year to include refunds of previous years' war expenditures and certain types of revenue arising out of war expenditures.

On the left-hand margin of the summaries of appropriations and war allotments, there is a column headed "Page". The numbers in this column refer the reader to the pages in the section where details of the items are set out. This year the details of war expenditures and revenues have been included in the relative departmental sections instead of having, as was the case last year, a special section dealing with all war expenditures and revenues. The summaries of war expenditures which immediately precede the details of such expenditures include the total war expenditures to date. A summary by departments of these cumulative expenditures will be found on page 10. In certain cases comparative statements of expenditures by operating units of departments or services

have been included. Examples are the Canals and Marine Agencies under the Department of Transport and the Experimental Farms under the Department of Agriculture. Further studies are being made in this regard, and it is hoped that additional statements of this nature will be available for inclusion in the 1943-44 Report.

The summaries of expenditures for other departments have been introduced to accord recognition not otherwise given to those departments which carry out works, mostly of a construction nature, on behalf of other departments.

A series of accounts designated as Trust and Special Accounts has been included. Generally speaking, these accounts reflect the financial transactions of the Government other than those pertaining to revenues and expenditures. It is felt that their inclusion is necessary to complete the picture of activities of each of the departments involved.

While on July 1, 1942, the Minister of Finance brought to the attention of the House the decision of the Government to adopt, in principle, certain recommendations which resulted in this Office assuming responsibility for the compilation of this Part of the Public Accounts, it was not possible, due to lack of staff and accommodation, to complete the arrangements for the transfer of these duties from the Office of the Auditor General until January, 1943. As a result, the time available for the planning and obtaining of the information to be published herein was severely curtailed, otherwise it would have been possible to include additional features, such as schedules showing the amounts due the various departments at the close of the fiscal year, as well as a subject index. These, and other matters, are being considered for inclusion in the 1943-44 Report.

Respectfully submitted,

B. G. McINTYRE,

Comptroller of the Treasury.

COMMENTS

The above departmental totals represent the cumulative War expenditures after applying (a) refunds of previous years' war expenditure received to the close of 1942-43, and (b) items classified as War Revenues in 1940-41 and 1941-42. They do not include outstanding loans and advances made under authority of the various War Appropriation Acts and the War Appropriation (United Kingdom Financing) Act, 1942, to Government-owned companies, private companies and Allied Governments.

A distribution by projects of the amount shown for each department precedes the details of War expenditures in each departmental section hereof. Details of previous years' expenditures and credits by fiscal years will be found in the Annual Reports of the Auditor General for 1940 to 1942 inclusive.

Deputy Minister.

COMMENTS

- B Registration and Licence Fees are collected under authority of various Acts administered by the Department.

Community pastures are operated under the Prairie Farm Rehabilitation Act to provide pasturage and other incidental services for live stock. Fees are collected by ministerial authority.

Rentals are derived chiefly from employees occupying dwellings on Experimental Farms and from land settlement projects under the Prairie Farm Rehabilitation Program. The Rosthern Experimental Station, formerly operated by the Department, is now rented at \$500 per annum.

Prairie Farm Rehabilitation is the source of revenue from water charges, grazing fees and hay permits.

- C Experimental Farms sales of live stock and produce amounted to \$273,416.63. Proceeds from sales of live stock originally purchased under policies administered by the Production Service amounted to \$31,057.22.

Sales of equipment include \$2,300 for nine used cars.

Land sales were effected chiefly under agreements respecting land settlement projects under the administration of the Prairie Farm Rehabilitation Act.

Tags and seals were supplied through the Plant Products Division in connection with corn inspection.

D Race Track Supervision: Section 235 of the Criminal Code provides for the appointment by the Minister of Agriculture of an officer to approve of the type of pari-mutuel machines used, to supervise the operations of the machines, and to enforce the provisions of the Code relating to race-track betting; the expense incident to such supervision to be borne by the sponsoring racing association. Expenses are provided for by daily fees levied against race-track meetings. From the revenue so obtained, costs of supervision are paid. In the Province of Quebec civilian supervisors are employed, while in other provinces officers of the Royal Canadian Mounted Police perform this function. Payments to the Royal Canadian Mounted Police, with the exception of out-of-pocket expenses arising in connection with this activity, are deposited to the Royal Canadian Mounted Police Benefit Trust Fund under authority of Section 21 of the Royal Canadian Mounted Police Act.

Inspection Fees: Fruit car grading and inspection fees are collected under authority of the Fruit, Vegetables and Honey Act; egg inspection fees, dressed poultry inspection fees, fur grading and inspection fees, under the Live Stock and Live Stock Products Act; field inspection fees, seed testing and inspection fees, etc., under the Seeds Act. Inspections are required to be made under the Animal Contagious Diseases Act and the Meat and Canned Foods Act.

Fumigation Fees: All charges in connection with the treatment of nursery stock entering Canada, which is found to be infected, are recovered from the importer under authority of the Destructive Insect and Pest Act. Under the Animal Contagious Diseases Act, merchandise imported in hay, straw, or other raw product of the soil must be disinfected before entry. When fumigated at a Canadian fumigation station, fees are collected by ministerial authority.

Record of Performance Fees: Under regulations issued by the Department, tests are conducted to determine the butter fat content of milk and the total milk production of individual pure-bred cows; an annual fee of \$5 per herd is charged. Regulations also exist governing the recording of egg production under the supervision of departmental officers; fees are levied according to the number of birds entered under the plan.

E This item includes \$7,852.83 unexpended balance of \$100,000 placed at the disposal of the Finnish Government to purchase foodstuffs for relief purposes (P.C. 220½ of January 18, 1940).

F Fines and Forfeitures consist of penalties imposed for infractions of various acts administered by the Department. Livery charges represent refunds from the several provinces to cover transportation costs of veterinary inspectors engaged in bovine tuberculosis tests.

G Wheat Acreage Reduction receipts represent, for the most part, recoveries of overpayments on information received subsequent to date of payment.

H These amounts represent proceeds from sales resulting from the various programs pertaining to the War activities of the Department, and refunds of previous years' War expenditure.

COMMENTS

The annual contributions agreed upon by the 1936 conference expired with the fiscal year ended March 31, 1942. The conference recommended that, should it be proved impracticable to assemble the next conference before the autumn of 1941, the existing

scale of contributions would be maintained, pending the calling of a conference when circumstances permit. The payments, therefore, represent Canada's usual contributions as follows: Farnham House Laboratory, £1,250; Imperial Agricultural Bureaux, £3,875, plus £816 additional for potato research; Imperial Bureau of Entomology, £1,100; Imperial Bureau of Mycology, £600.

The differences between the amounts voted and those expended are due to the fact that the Estimates were based on the par rate of exchange, viz. \$4.86½. The established rate is \$4.47.

Wages of labourers and casual employees amounted to \$4,265.12.

D Payments amounting to \$24,004.82 were made to the Canadian Fairbanks-Morse Co., Limited, for 2,210 hog scales to be re-sold to producers of hogs, at cost, by authority of P.C. 1444 of February 27, 1941, and P.C. 5/2814 of April 7, 1943. Expenses for freight, etc., amounted to \$85.66. Proceeds from sales amounted to \$21,647.03 and were credited to this allotment.

H Consists of the following groups of payments:—

Horse Breeders' Clubs, \$30,477.21 (Manitoba, \$8,990.66; Saskatchewan, \$16,498.42; Alberta, \$4,988.13). The Department pays 75 cents for every mare bred plus 25 per cent of the service fee on such mares as prove to be in foal, plus \$1 for each registered pure bred mare in foal.

Premiums to owners of pure bred stallions, \$37,480.50 (Nova Scotia, \$1,237.50; Prince Edward Island, \$663.75; New Brunswick, \$1,740; Quebec, \$27,959.25; Ontario, \$5,302.50; British Columbia, \$577.50). These premiums, which are shared jointly with the provinces, are based on the class of stallion and the number of mares left in foal, according to a schedule for each province, prepared by a Dominion-Provincial Board. The amounts shown represent the Dominion's share.

Grants to Horse Breeding Stations, \$3,975. A proprietor of a Breeding Station must own or control three or more stallions. The basis of the grant is \$187.50 per stallion.

Premiums under Ram Club Policy, \$9,426.30. Under this policy, ram clubs deposit with the Department stated amounts for rams. The Department purchases the animals and absorbs the differences in costs. Purchases amounted to \$20,051.80, deposits, \$10,625.50.

Club Work (Prize Money, etc.), \$18,703.66 (shared jointly with the provinces)—Calf Feeding Competitions, \$13,408.53; Boys' and Girls' Swine Clubs, \$2,151.28; Poultry Fairs, Sheep Fairs, Boys' and Girls' Lamb Clubs, Bacon Litter Competitions, etc., \$3,143.85.

Many departmental live stock policies entail payments in the nature of grants to clubs and the absorption of losses in free or partially free distribution of live stock. All are made on ministerial authority by virtue of the item included in the vote and approved by Parliament for this class of assistance.

J Represents payments for the purchase of live stock and expenses of distribution under the following policies:—

Sire Loan Policy, \$65,294.19 (bulls, \$60,946.47; rams, \$340.75; boars, \$4,006.97).

Sow Distribution Policy, \$12,091.07. Payments for purchase of sows and expenses of distribution amounted to \$75,330.54; receipts from sales amounted to \$63,239.47 and were credited to this allotment.

Payment of \$7,530.51 was made from this vote to Ketchum Manufacturing Co., Limited.

Subsidies for cold storages are paid on the following basis:—

- On completion of building, 15 per cent of the amount expended in construction refrigeration, etc.;
- At the end of the first year thereafter, 7 per cent of the said amount;
- At the end of the second year thereafter, 4 per cent of the said amount;
- At the end of the two next succeeding years, 2 per cent of the said amount.

With the exception of the Winnipeg Cold Storage Co., Ltd., the cost of which has not been established, future commitments for subsidies and grants amount to \$12,770.

It is understood that the Trenton Cold Storage Limited did not proceed with their construction program, therefore the sum provided was not paid; the amount has been re-voted for 1943-44.

Payment to the Winnipeg Cold Storage Co., Ltd., represents an interim advance, pending final decision as to cost.

Grants: Payments under this heading are made in instalments as in the case of subsidies. The companies listed did not conform at the outset with the provisions of the Cold Storage Act, therefore payment by way of grant was authorized by the Appropriation Act.

A Provision is made in the Act for appointment by the Minister of the necessary temporary officials and employees at rates approved by the Governor in Council. As of March 31, 1943, there were 281 employees paid from this vote whose positions had been specifically approved by Order in Council. The following were receiving annual salaries of \$2,400 or over on that date, or at date of separation (shown in brackets): S. F. Arthur, \$3,780; H. R. Carscallen, \$2,760; W. P. Cheney, \$2,700; A. B. Cook, \$2,700; H. J. De Savigny, \$2,700; W. Dickson, \$2,500; R. F. B. Donald, \$2,520; J. L. Doughty, \$2,820; W. L. Foss, \$2,700; O. Freer, \$4,180; S. H. Hawkins, \$3,060; W. L. Jacobson, \$3,000; G. L. MacKenzie, \$2,760; H. M. Mann, \$2,940; C. M. Moore, \$2,700; J. I. Mutchler, \$3,060; H. G. Riesen, \$2,700; B. L. Russell, \$4,020; S. F. Shields, \$2,400; G. Spence, \$6,000; E. J. Stephen, \$2,700 (May 23); A. L. Stevenson, \$3,000; J. E. Switzer, \$2,700; V. E. Thierman, \$2,700; J. C. Todd, \$2,700; J. Vallance, \$4,500; W. Wotherspoon, \$2,700. In addition to employees appointed by Order in Council, whose salaries totalled \$347,322.61, casual labourers employed at prevailing rates under the various activities received wages amounting to \$350,419.72.

F Lands to the value of \$48,521.15 were purchased during the year, including \$13,881.79 in connection with the Swift Current Irrigation Project and \$24,107.50 in connection with the Cypress Lake Storage Project. Sundry small buildings for community pasture purposes cost \$3,000. Payments were made to the extent of \$139,518.86 for dugouts, small stock-watering dams, irrigation and community projects. Several large projects under contract were initiated, proceeded with or completed. Following is a statement of these projects, the contractors and the amounts expended during the year. Battle Creek Canal Enlargement (Gibbs Bros., Lumsden, Sask.), \$15,358.66; Caron Water Storage Project (Bird Construction Co., Regina, Sask.), \$24,460.01; Duncairn Dam (W. B. Ramsay, Regina, Sask.), \$104,275.75; Echo Lake Dam (Mameczasz and Rollack, Prince Albert, Sask.), \$22,780.80; Gap Creek Weir-Maple Creek Flats Irrigation Project (F. R. Gibbs, Regina, Sask.), \$6,113.57; Gladstone Dam (Wm. Newman, St. Boniface, Man.), \$8,119.80; Jackfish River Project (K. R. Tracey, Moose Jaw, Sask.), \$2,940.74; Rush Lake Drainage Canal (Gibbs Bros., Lumsden, Sask.), \$5,347.35; Seven Persons Creek Reservoir (F. R. Gibbs, Regina, Sask.), \$5,142.06; test drilling at Spring Coulee-St. Mary River (O. D. Bush, Calgary, Alta.), \$4,333.50.

F These expenditures consist chiefly of purchases of numerous small pieces of equipment and repairs to equipment. Included, however, is \$9,594.60, representing the purchase price of 5 combines; 2 trucks and 5 cars were purchased at a net cost of \$7,773.01, after deducting allowances amounting to \$1,875 on 6 used motor vehicles. Payments for the rental of machinery and equipment amounted to \$15,525.35. Live stock for community pastures was purchased to the extent of: bulls, \$20,705; rams, \$1,970.

I Expenditures hereunder include payments to 10 operators of experimental sub-stations amounting to \$5,461.50; for the same purpose 51 operators received \$27,556 and this amount was charged to Miscellaneous.

For office rentals the amount paid was \$4,428.18.

J The larger items of expenditures hereunder were \$33,549.22 for fence posts for use in connection with community pastures and \$7,200 for concrete pipe for the West Val Marie Irrigation Project.

Prairie Farm Assistance Act, c. 50, 1939—Amount transferred to meet the deficit in the Prairie Farm Emergency Fund\$ 248,997 31

COMMENTS

On March 24, 1942, this Act was amended providing the Governor in Council with power to declare any crop year an emergency year; as no such declaration was issued and as there were not sufficient townships in any of the three Prairie Provinces with an average yield of five bushels or less per acre, no awards were payable for the 1942 crop year.

Payments made during the fiscal year were in settlement of claims covering previous years for such reasons as:—

- (1) 22 townships were declared eligible subsequent to the last fiscal year;
- (2) the eligibility of 59 part townships was approved under section 7 (b); and,
- (3) a higher category was approved for 18 townships.

The levy on grain sales produced the sum of \$2,044,432.10; refunds amounted to \$44,877.88; and a transfer of \$248,997.31 from the Consolidated Revenue Fund completed the amount required to take care of disbursements.

The following statement shows the distribution of expenditure by provinces and by crop years:—

The amount of the above vote was not subdivided in the Estimates; the allotments were authorized by Treasury Board.

A Under the Act, authority for appointments and rates of pay are vested in the Governor in Council.

As of March 31, 1943, there were 34 salaried employees paid from this vote. The following were receiving annual salaries of \$2,400 or over on that date, or at date of separation (shown in brackets): W. C. Barrie, \$3,200; E. L. Gray, \$4,500; R. F. McGregor, \$3,200; J. C. Riddell, \$3,200; S. Sinclair, \$3,200 (Jan. 3). In addition to the salaried employees, payments to whom totalled \$22,223.83, fieldmen and office assistants received wages amounting to \$93,597.69; the sum of \$11,613.86, representing cost of living bonus payments, is included in these figures.

H Due to the interlocking nature of the administration of this Act with the Wheat Acreage Reduction Program, and to the fact that the major portion of the travelling expenses were chargeable thereto, details of these expenditures are included with those under Vote 31.

A The Wheat Acreage Reduction Act, c. 10, 1942, as amended, superseded the Regulations formerly employed as authority for this program which was designed to encourage a reduction in the number of acres sown to wheat in the Prairie Provinces and in the Creston and Peace River Districts of British Columbia and to compensate farmers who effected such reduction.

Appointments and remuneration of administrative and technical officers and employees receive the approval of the Governor in Council; field, clerical or other assistance may be engaged by the Minister, but at rates of pay approved by the Governor in Council.

As of March 31, 1943, there were 212 salaried employees paid from this vote. No employee was receiving an annual salary of \$2,400 or over on that date. In addition to the salaried employees, payments to whom totalled \$207,555.51, fieldmen and office assistants received wages amounting to \$598,456.33; the sum of \$95,288.80, representing cost of living bonus payments, is included in these figures.

E Represents payments, authorized by the Governor in Council, to Rural Municipalities for assistance rendered in connection with the handling of application forms.

G This item represents office rentals paid through the Public Works Department.

K Charges hereunder consist of:

(1) payment of \$2 per acre, authorized by the Act, for each acre by which the wheat acreage in 1942 was less than that for the basic year 1940: on farms that had no wheat in 1940 the basic year used was 1939;

(2) payment of \$2 per acre authorized by the 1941 Regulations in respect of wheat acreage reduction in 1941 on lands seeded to grass or rye in 1941 and which were still in grass or rye on July 1, 1942;

(3) final settlement of 17,569 claims on which only partial payments were made during 1941-42, due to difficulties in establishing acreages for the basic period under the 1941 Regulations.

Due to heavy fall rains and late harvest, it was not possible for some farmers to file their claims in time for a fall inspection in 1942. Largely as a result of this, 8,924 claims in the area had not been finally disposed of at the end of the fiscal year.

A summary of the payments made during the year follows:—

COMMENTS

Payments under this vote are authorized by the Cheese and Cheese Factory Improvement Act, c. 13, 1939.

A Payments amounting to \$215,065.38 were made to the extent of 50 per cent of expenditures for enlarging, insulating and/or refrigerating existing factories. On the same basis, standardization of cheese presses amounted to \$2,750.77.

B Payments of one cent per pound on cheese scoring 93 points and two cents on cheese scoring 94 or more points.

The following is a distribution of the expenditure by provinces, the number of factories participating being shown in brackets:

Enlarging, insulating and/or refrigerating: Quebec (144), \$177,020.03; Ontario (41), \$26,171.74; Alberta (2), \$2,032.43; British Columbia (1), \$981.85; supplementary payments for 1941-42, not included in the foregoing, amounted to \$8,859.33 (Quebec, \$8,165.16, Ontario, \$694.17).

Standardization of cheese presses: Prince Edward Island (2), \$252.75; New Brunswick (2), \$113.33; Ontario (28), \$2,335.12; supplementary payments for 1941-42, \$49.57 (Ontario).

Premiums: Prince Edward Island (10), \$2,064.20; New Brunswick (15), \$6,786.30; Quebec (529), \$440,099.68; Ontario (605), \$1,253,863.68; Manitoba (21), \$15,463.16; Saskatchewan (7), \$1,670.42; Alberta (15), \$15,599.36; British Columbia (3), \$9,121.04.

Vote 33	Assistance for the replacement of maple production equipment	50,000 00
	Expenditures	nil
	Lapsed	<u>\$ 50,000 00</u>

COMMENTS

In January, 1940, an agreement was executed between the Dominion Government and the Quebec Provincial Government whereby they mutually undertook to assist producers of maple products in the Province of Quebec to replace lead-contaminating sap buckets with others of approved material. The Dominion contributed the sum of \$118,775.20 to the Province in the fiscal years 1940-41 and 1941-42.

It is understood that, as materials became scarce, the Province was compelled to discontinue the program; consequently no claims were made on the Dominion during 1942-43.

This represents the balance of an advance of \$20,000 to Appletine Products Ltd. of Vernon, B.C., the initial payment being made in 1941-42.

Under an agreement made on December 12, 1941, the Dominion renders financial assistance to the Company for the purchase of machinery and equipment to enable it to commence production of dehydrated apple products.

In consideration of this assistance, the Company undertook to make available to the Minister of Agriculture such quantities of dehydrated apple products as have a market value of \$20,000 as follows: \$5,000 worth by December 31, 1942, and \$7,500 worth not later than December 31 in each of the years 1943 and 1944.

The Company also agreed to pay interest at 5 per cent per annum on the full amount of \$20,000 from the date of the agreement until the full obligation of \$20,000 is liquidated, the first payment to become due on July 1, 1942; deliveries of processed product to the Minister were to be considered as a reduction in the Company's obligation.

At the close of the fiscal year, no interest payments had been received and none of the product had been made available to the Minister.

F Nova Scotia Apple Marketing Board re- imbursement	7,438 30	7,438 30	

COMMENTS

A Expenditures represent final payments under this agreement as follows: sales tax on canned applesauce manufactured by Berwick Fruit Products Ltd. for the department, \$12,434.53; interest and penalties, \$1,530.75; freight and trucking, \$10,463.26; labelling, \$3,096.91; processing charges, \$1,413.79; storage, loading, handling and wharfage, \$1,356.74; overprinting labels and certificates, \$1,071.70; applesauce returned, \$14.40.

The following receipts are included in Special Receipts, War Appropriation Acts: sale of processed apples, 1939 and 1940 crops, \$162,409.96; refunds of freight charges, \$130.23.

B The following expenditures were incurred under this agreement: balance of allowance at \$1.30 per barrel on the deficiency in the number of barrels of 1941 crop apples disposed of by the Nova Scotia Apple Marketing Board, \$126,179.14; additional payment for purchase of apples processed for the Minister's account, \$10,280.42; storage and labelling, \$7,154.27; freight, etc., \$3,238.88; adjustment in trucking charges, \$890.30.

Receipts from the sale of evaporated apple amounting to \$64,546.43 appear under Special Receipts, War Appropriation Acts. Further credits allowed by the Board, when presenting claims for payment, resulted in the following items being credited to this allotment: sales of evaporated apple, \$22,536.78; refund of payment made in 1941-42 as an allowance on fresh apples, \$1,489; refund of overpayment of processing charges, 1941-42, \$849.75.

C To assist in disposing of the 1942 crop of Nova Scotia apples, an agreement was entered into between the Department and the Nova Scotia Apple Marketing Board whereby the Board agreed to market apples grown in the Annapolis Valley, diverting for evaporation and purchase by the Minister only quantities found to be surplus to the possibilities of marketing apples for fresh consumption. The Minister agreed (a) to purchase from the Board a maximum of 1,640,000 pounds of evaporated apple at specified prices, (b) to pay to the Board the amount of \$1.30 per barrel for any quantity by which the total of purchases of evaporated apple by the Minister from the Board and of sales of fresh apples by the Board might be less than 1,250,000 barrels (13.7 pounds of evaporated apple being the equivalent of one barrel of fresh apples), the amount payable to be reduced by \$1.30 for each tree for which compensation would be paid as below and (c) to pay a storage allowance on evaporated apple remaining on hand beyond thirty days.

The Minister further agreed to assist with the Provincial Government in a program for the removal of aged and undesirable trees by paying to the Board the amount of \$2 for each tree of this condition removed, the total sum payable not to exceed \$200,000.

The following expenditures were incurred: purchase of evaporated apple, \$2,622,662.50; freight on evaporated apple sold, \$12,753.44; storage, \$1,298.87; compensation for trees removed, \$156,050.

Receipts from the sale of evaporated apple amounted to \$789,119.78, of which \$473,913.87 appears under Special Receipts, War Appropriation Acts, and \$315,205.91 was credited to this allotment.

D Represents demurrage charges at New York on apples shipped to the British Ministry of Food.

E To assist the growers of apples in the Okanagan Valley to market their 1942 crop, an agreement was entered into between the Department and the British Columbia Fruit Board. The provisions under which payments were made were as follows: the Board agreed that all sales of apples in Canada for fresh consumption should be at prices authorized by the Minister; the Minister agreed to pay to the Board the amount by which the f.o.b. value of sales of fresh apples should total less than \$1.25 per box of wrapped pack, \$1.15 per box of unwrapped pack, and 90c. for each forty pounds (the equivalent of a box) of bulk apples, for a total of 4,500,000 boxes, less any quantity sold by the Board outside of Canada.

The expenditure of \$261,414.06, plus an additional payment of \$6,931.75 to be made in 1943-44, represents the amount by which the Department's guarantee exceeded the proceeds from the sale of fresh apples.

F Represents the difference between the selling price of 21,252½ barrels of apples, 1941 crop, to the Nova Scotia Apple Marketing Board at \$1.25 per barrel (deducted from payments to the Board in 1941-42 for the purchase of apples) and the revised selling price of 90c. per barrel authorized by P.C. 3/4171 of May 18, 1943.

COMMENTS

Under P.C. 9588 of December 16, 1941, authority was provided for the payment of a bonus on certain quantities of eggs ordered by the British Ministry of Food, to be shipped or placed in storage between January 1 and May 31, 1942. The total expenditure in this connection was \$925,367.05, of which \$304,656 was paid to exporters in 1941-42.

The amount paid from this allotment represents payments of the bonus on 20,529,780 dozen at the rate of three cents per dozen, and on 963,530 dozen at one-half cent per dozen for oil-dipping.

Authority for the continuance of payment of freight assistance on the movement of certain western grains used for livestock feeding purposes was provided under P.C. 4781, June 5, 1942.

Allotment: Payment of eight cents per bushel in respect of Western wheat	875,000 00
Expenditures	836,233 65
Lapsed	\$ 38,766 35

COMMENTS

To maintain a reasonable relationship between the cost of western wheat to feeders, and the price of livestock products, payments at the rate of 8 cents per bushel were authorized by P.C. 8175, September 11, 1942, in respect of western wheat purchased on or after August 1, 1942, from a dealer licensed by the Canadian Wheat Board or directly from the Board, for use exclusively as feed for livestock and poultry, such payments being made in accordance with certain terms and conditions.

Allotment: Fertilizer Subventions and Freight Allowances.....	1,075,000 00
Expenditures	1,035,874 66
Lapsed	\$ 39,125 34

COMMENTS

To encourage the wider use of chemical fertilizers throughout Ontario, Quebec, New Brunswick, Nova Scotia, Prince Edward Island and British Columbia, on certain crops essential to the production of the livestock products required to meet Canadian commitments to the United Kingdom and domestic requirements, authority was granted for the payment of subsidies to reduce the net cost of fertilizers purchased by farmers in Eastern Canada for use on the approved crops, and of subsidies to reduce freight costs on chemicals shipped, when necessary, from supply points in Canada to points of fertilizer manufacture or distribution points, and the reimbursement of necessary expenses of provincial authorities assisting in administration.

Expenditures represent the following payments: subventions on fertilizers and freight subsidies, \$1,026,038.33; reimbursement of expenses to the provincial governments, \$9,836.33 (Ontario, \$5,067.08; Quebec, \$2,228.26; New Brunswick, \$610, Nova Scotia, \$1,810.99, and Prince Edward Island, \$120).

Allotment: To increase income of farmers in the Spring Wheat Area of Western Canada	2,800,000 00
Expenditures	2,677,511 72
Lapsed	\$ 122,488 28

COMMENTS

In view of the prospective inadequacy of returns from wheat and other grains produced in the spring wheat area of Western Canada in the crop year 1941, the Prairie Farm Income Plan was put into effect to augment the income of the farmers by approximately \$20,000,000.

Regulations governing the distribution of these funds were established by P.C. 8126 dated October 22, 1941, wherein provision was made for the payment of seventy-five cents per acre on one-half of the cultivated acreage of each farm with a maximum payment of \$150 per farm, the crop yield having no bearing on the award.

Expenditures for the year represent outstanding claims relating to the 1941 crop year and were distributed by provinces as follows:—

	No. of Claims	Amount
Manitoba	1,815	129,105 62
Saskatchewan	14,642	1,099,509 10
Alberta	16,641	1,448,897 00
	<u>33,098</u>	<u>\$2,677,511 72</u>

The regulations further provide that the administrative work in connection with this plan be carried out by the organization established for Prairie Farm Assistance and Wheat Acreage Reduction and that all administrative expenses be paid out of moneys provided for one or both of these activities. Administrative costs amounting to \$49,921.03 were therefore charged to Vote 31, Wheat Acreage Reduction Payments.

Allotment: Subsidy on concentrated milk	150,000 00
Expenditures	nil
Lapsed	<u>\$ 150,000 00</u>

COMMENTS

By P.C. 1/2590 of March 31, 1943, authority was obtained by the Agricultural Food Board to pay subsidies on milk purchased during March and April, 1943, for concentration into whole milk products. The absence of any charges under this allotment is due to the fact that no claims were presented before the close of the fiscal year.

Expenditures will appear in the accounts for 1943-44.

The above accounts are identical in purpose, viz., the recording of financial transactions between the British Ministry of Food and other purchasers, and Canadian suppliers of agricultural products. The balances shown in these accounts represent overdrafts incurred because of the desirability of making prompt settlement with the suppliers.

The value of all commodities furnished is recovered in full from the purchasers, and authority to incur these overdrafts is provided by P.C. 3/8785 of September 26, 1942, as authorized under Sec. 3 of the War Appropriations Act No. 2, 1942.

COMMENTS

A This account is for the purpose of recording the transactions of the Superintendent of Farnham House Laboratory (a scientific institution with headquarters in England), who was transferred to Canada for the duration of the war to continue his work on the biological control of harmful insects.

The organization is supported by annual contributions from several Empire countries, including Canada (see Vote 4), and from this fund expenses are met.

B In 1940 a Governor General's Warrant was issued for \$100,000 to provide funds to be placed at the disposal of the Consul General of Finland to be used for the purchase of foodstuffs for shipment to Finland. This sum was placed to the credit of this account, and disbursements were made therefrom, under the provisions of Section 22 of the Consolidated Revenue and Audit Act. The amount shown above as disbursements represents the unused balance which has been transferred to Revenue.

C A policy was adopted in 1937 for the removal of cattle from the drought areas of Western Canada, due to a feed shortage, payments to the farmers being made by warrant. At the termination of the scheme, the value of the outstanding warrants was charged against the appropriation provided for relief purposes and credited to this account to provide for their subsequent redemption.

D The Prairie Farm Assistance Act, c. 50, 1939, provides for a levy of one per cent to be deducted by all licensed purchasers of grain, the amount so deducted to be transferred to the Board of Grain Commissioners for deposit in a special account known as the Prairie Farm Emergency Fund. Awards are made under the provisions of the Act to farmers in the spring wheat area and are payable from this fund; if, at any time, the fund is insufficient to pay these awards, the Act provides that the Minister of Finance, with the approval of the Governor in Council, may make an advance to the fund of the amount required to meet the deficit. An amount of \$248,997.31 was transferred this year, see page A-40.

E To this account are credited deductions from the salaries or wages of employees, not paid by Central Pay Office; cheques are drawn against it in favour of the Receiver General.

F Deductions from the salaries or wages of employees, not paid by Central Pay Office, are deposited in this account and cheques are drawn against it in favour of the Bank of Canada as subscriptions are fully paid. The above balance represents the incomplete subscriptions at the close of 1942-43.

G H Funds are provided by Parliament annually for payments to Western farmers under the Wheat Acreage Reduction Program. Payment is made by warrant and, at the close of each fiscal year, the value of the outstanding warrants is charged against the appropriation and credited to this account to provide for their subsequent redemption.

I All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.

Expenses of Dominion Plebiscite Act, c. 1, 1942.....\$1,358,508 43

COMMENTS

Section 10 of the Dominion Plebiscite Act, 1942, provides that the expenses of and incidental to the carrying out of the provisions of the Act should be paid out of unappropriated moneys in the Consolidated Revenue Fund. In the regulations, as passed by the Governor in Council pursuant to Section 9 of the Act, it was provided that the Auditor General should tax and pay all plebiscite expense accounts.

Administration expenses of the Act during the fiscal year 1942-43 amounted to \$87,722.17. This amount was distributed as follows: salaries, \$20,750.35; legal fees, \$3,750; printing and stationery, \$61,479.98, postage, express and freight, \$443.14; sundries, \$1,298.70.

Legal fees of \$3,750 were paid to C. E. Bothwell.

Following is a statement of expenditures made on account of the Plebiscite 1942, covering payments of \$1,358,508.43 in 1942-43 and \$72,815.18 in 1941-42 for which details were not given in the annual report of that year:—

COMMENTS

This account is operated by the Chief Electoral Officer to record the receipts and disbursements of election deposits. Each candidate for election is required to deposit \$200 with the Receiver General at the time he announces his candidature. If he is successful or obtains half as many votes as the successful candidate, this election deposit is refunded, otherwise it is forfeited to the Crown. Forfeited deposits are transferred to Revenue.

COMMENTS

A P.C. 995 of February 13, 1941, cancelled all previous regulations and stipulated that passports would be valid for two years and renewable for four further periods of two years, and that the fees would be \$3 upon issue and \$1 for each renewal, effective April 1, 1941. To cope with the great demand for passports, as the result of regulations of the United States Government requiring every Canadian citizen to present one before being allowed to enter the United States, branch offices were maintained at Moncton, N.B., Windsor, Ont., and Vancouver, B.C. Effective February 15, 1943, the United States and the Canadian Governments agreed on a plan to exempt Canadian citizens and British subjects, legally resident in Canada, from the necessity of obtaining passports, for visits to the United States of not more than 29 days. In place of passport, a border crossing card is issued free of charge by United States Consular Offices in Canada. The branch passport offices were closed February 15, 1943, as they were no longer necessary under the new regulations. These new regulations and the fact that passports are valid for two years accounted for the decrease of \$290,243.94 in the amount collected for passport fees in 1942-43.

The \$2 visa fee is authorized by P.C. 1460 of April 30, 1921. No fees are collected in connection with persons passing through Canada from the United States.

W. C. CLARK,
Deputy Minister of Finance.

COMMENTS

- A The Chartered Bank Note Circulation Tax is collected under the authority of Part 1 of the Special War Revenue Act, c. 179, R.S. and amendments, at the rate of one-fourth of one per cent upon the average quarterly amount of the notes of each bank in circulation.
- B Part III of the Special War Revenue Act, c. 179, R.S., as amended, levies a tax on net insurance premiums received by companies authorized under the laws of the Dominion or any Province thereof of (a) 2 per cent on net premiums of companies, other than a mutual company, not carrying on the business of life insurance, an exchange, or an association of persons formed on the plan known as Lloyds; (b) 3 per cent on net premiums received by every association of persons formed on the plan known as Lloyds, and every mutual company not carrying on the business of life insurance and not carrying on business on the premium deposit plan; (c) 4 per cent upon net premiums received by every mutual company carrying on insurance business on the premium deposit plan and by every

exchange. The tax does not apply to marine insurance. Under the same authority, a tax of 10 per cent is levied on net premiums paid by any resident of Canada for insurance on property with companies not authorized under the laws of the Dominion or any Province thereof. For the fiscal year 1942-43, taxes on premiums of licensed companies amounted to \$10,878,858.83, and taxes on unauthorized insurance to \$14,606.32. The increase in revenue from this source for the year 1942-43 over that for 1941-42 is due to increase in tax percentages effective for the calendar year 1941 and each calendar year thereafter by amendment to the Special War Revenue Act, c. 32, 1942-43, which was enacted consequent upon the Provinces vacating certain tax fields under the provisions of the Dominion-Provincial Taxation Agreement Act, 1942.

G Bank Act fees are collected pursuant to Section 88 of the Bank Act, c. 24, 1934.

N Reduction in Reserve Account (see Contingent and Special Funds under Trust and Special Accounts further on in this section) consequent upon an improvement in the balance sheet position of the Canadian Wheat Board based on calculations as at July 31, 1942, over calculations made as at July 31, 1941.

Section 6 of the Act provides that "The Minister may make advances and pay losses, salaries and other necessary expenses out of unappropriated moneys in the Consolidated Revenue Fund to the amount of twenty million dollars, less the advances made under the authority of the Dominion Housing Act, 1935". As the Dominion's share of loans approved under this authority as at March 31, 1942, totalled \$19,196,036, additional authority was provided under the above appropriation. The Dominion's share of loans approved to the close of the present fiscal year totalled \$19,695,484, of which \$19,405,765 had actually been disbursed.

Vote 453 To enable the Minister of Finance, subject to regulations approved by the Governor in Council which shall in general be similar to the relevant provisions of the Home Improvements Loans Guarantee Act, 1937, and the regulations made thereunder, to guarantee approved lending institutions against losses which they may sustain as a result of loans or advances made by them for the purpose of financing the conversion of existing houses into multiple family houses in order to increase the supply of housing accommodation in congested urban areas, provided that in no case shall the liability of the Government of Canada in respect of guarantees given under this authority to any approved lending institution exceed fifteen per cent of the aggregate amount of such loans made by the said approved

lending institution, and provided further that the aggregate amount of such loans which may be guaranteed under this authority shall not exceed two million dollars, and provided further that any payments necessary to fulfil the guarantees given under this authority shall be paid out of any unappropriated moneys in the Consolidated Revenue Fund.

Fees for making loans in remote localities—National Housing Act, c. 49, 1938	\$ 18,481 66
---------------------------------------------------------------------------------------	--------------

COMMENTS

Section 4 (h) of the National Housing Act authorizes the Minister of Finance, in order to encourage the making of loans in small or remote communities, to enter into contracts with approved lending institutions providing for the payment by the Dominion of inspection fees not exceeding \$20 and expenses for each necessary inspection trip, in connection with loans not exceeding four thousand dollars. Pursuant to this authority, provisions have been incorporated in the agreements between the Minister and the lending institutions for the payment of fees as follows: (1) \$10 plus travelling expenses for each loan for the construction of a home in any locality which is not part of a city of 50,000 inhabitants or more (1931 census), nor part of, nor contiguous to, a metropolitan area in which the lending company has either its head office or an established lending office; (2) \$20 for each loan where the house to be constructed is situated more than 25 miles from the centre of the main business district of a city of 50,000 inhabitants or more (as reported in the 1931 census) and more than 25 miles from the head office and each established lending office of the company; (3) \$20 for each loan where the home to be constructed is situated more than 50 miles from the centre of the main business district of a city of 50,000 inhabitants or more (1931 census) and more than 50 miles from the head office and each established lending office of the Company, together with an allowance of six cents per mile for each necessary inspection trip.

The following amounts (fees, \$15,970; mileage allowances, \$2,511.66) were paid to lending institutions in accordance with the above: Canada Life Assurance Company, \$1,370; Canada Permanent Mortgage Corporation, \$415; Confederation Life Association, \$10; The Equitable Life Insurance Company of Canada, \$670; The London Life Insurance Company, \$1,746.62; The London and Western Trusts Company, Limited, \$216.40; The Manufacturers Life Insurance Company, \$307.80; The Mutual Life Assurance Company of Canada, \$3,448.34; The Ontario Loan and Debenture Company, \$146.24; The Sun Life Assurance Company of Canada, \$10,151.26.

To provide for tax payments—National Housing Act, c. 49, 1938	\$ 83,871 23
---------------------------------------------------------------------	--------------

COMMENTS

Section 22, Part III, of the National Housing Act, authorizes the Minister of Finance to pay the municipal taxes on houses valued at not more than four thousand dollars which

were constructed during the period commencing June 1, 1938, and ending on December 31, 1940, or on such earlier date as might be set by the Governor in Council, on the following basis:

(i) One hundred per cent of municipal taxes in respect of such houses for the first tax year in which the municipality levies municipal taxes in respect of such houses;

(ii) fifty per cent of municipal taxes in respect of such houses for the second tax year in which the municipality levies municipal taxes in respect of such houses;

(iii) twenty-five per cent of municipal taxes in respect of such houses for the third tax year in which the municipality levies municipal taxes in respect of such houses.

By P.C. 4021 of December 5, 1939, payments were restricted to taxes on houses, the construction of which was commenced before May 31, 1940.

Tax payments, summarized by provinces, were as follows: Alberta, \$2,150.16; British Columbia, \$30,459.45; Manitoba, \$742.38; New Brunswick, \$143.60; Nova Scotia, \$1,819.66; Ontario, \$48,264.82; Quebec, \$439.57. Refunds: Saskatchewan, \$148.41.

Losses on Loans—National Housing Act, c. 49, 1938.....\$ 1,425 17

COMMENTS

Section 6 of the National Housing Act provides for the reimbursement of approved lending institutions for losses sustained on defaulted loans. In accordance with provisions of the Act, total payments to lending institutions amounted to \$1,634.50, as follows: Mutual Life Assurance Company of Canada, \$1,198.73; Sun Life Assurance Company of Canada, \$435.77. Refunds of \$209.33 by defaulters reduced expenditures to \$1,425.17.

Home Improvement Loans—Losses—Home Improvement Loans Guarantee Act, c. 11, 1937.....\$ 108,644 38

COMMENTS

The Home Improvement Loans Guarantee Act provides for the reimbursement of approved lending institutions for losses sustained on defaulted home improvement loans, on condition that such reimbursement shall not exceed 15 per cent of the aggregate amount of home improvement loans made by any such approved lending institution. In accordance with the provisions of this Act, payments were made to the following lending institutions: Canadian Bank of Commerce, \$20,197.51; Heating and Plumbing Finance Co., Ltd., \$20,520.76; Imperial Bank of Canada, \$18,838.17; Bank of Montreal, \$16,758.20; Bank of Nova Scotia, \$8,541.40; The Dominion Bank, \$5,595.98; Banque Canadienne Nationale, \$8,506.52; Royal Bank of Canada, \$16,113.17; Bank of Toronto, \$1,824.42; Bank Provinciale du Canada, \$773.42; Gurney Finance Ltd., \$3,962.89; sundry, \$191.49.

Gross expenditure amounted to \$121,823.93, but \$13,179.55 was received from defaulting debtors and credited to this appropriation. A further amount of \$2,927.31 representing interest on past due balances was received and credited to Revenue—Return on Investments.

COMMENTS

A B C D Expenses in connection with the Second Victory Loan, Third Victory Loan, Fourth Victory Loan and War Savings Certificates and stamps were incurred by the National War Finance Committee under the provisions of P.C. 45, January 7, 1942, as amended by P.C. 176, January 9, 1942. A further breakdown of these expenditures is shown in Appendix No. 4 to this section, page CC—83.

At the close of the fiscal year, only a small portion of expenses in connection with the Fourth Victory Loan had been paid.

An amount of \$7,473.90, representing profits on Bond Trading Account, was credited against these expenditures on account of the Third Victory Loan.

Additional expenditures on account of the Second Victory Loan, Third Victory Loan and New York 1943-58 Loan \$90,000,000, totalling \$27,947,591.83, were charged to Discount Amortization Account (see under Trust and Special Accounts further on in this section) to be written off annually over the life of the loans. Of the total, \$1,711,927.73 was paid to canvassers for commissions on bonds sold to persons whose names were not included in a pool or special names list; \$4,626,666.40 to Banks, Trust and Loan Companies; and \$5,013,805 to dealers and brokers as authorized by P.C. 672, January 27, 1942, and P.C. 9375, October 13, 1942. The balance of \$16,595,192.70 consisted of premiums and discounts allowed on the issue and maturity prices of the loans.

The following table exhibits details of sales and expenses (excluding premiums and discounts) of the First, Second and Third Victory Loans, with the cost of the various expense items being expressed as a percentage of the total sales.

--------------------------------------------------------------------------------------	----------------------

COMMENTS

On March 30, 1920, the Government and the Corporation of the City of Ottawa entered into an agreement providing for the payment to the Corporation of the sum of \$75,000 annually for a period of 5 years from July 1, 1919, in full satisfaction and discharge of all claims on the Government for water supplied for street sprinkling, for fire protection by the Corporation to any of the buildings or premises owned or occupied by the Government and for use in Major's Hill Park and in other parks and driveways owned or maintained by the Ottawa Improvement Commission (now the Federal District Commission).

The agreement was ratified by c. 15, 1920, and was renewed for a period of one year by c. 59, 1924. By c. 21, 1925, the annual payment was increased to \$100,000 and the agreement was extended for 5 years. In 1931 and annually thereafter the agreement was extended for a further year, the present extension being authorized by c. 15, 1942-43.

COMMENTS

This vote was provided for the expenses of administering the Tariff Board Act, c. 55, 1931, under which, in respect to goods produced in or imported into Canada, inquiries into costs of raw materials, production, transportation, labour and prices are made and findings reported to the Minister of Finance. The Act also empowers the Board to hear and give decision on appeals from tariff rulings of the Department of National Revenue. The Dominion Trade and Industry Commission Act, c. 29, 1935, provides for the establishment of commodity standards and investigation into complaints respecting unfair trade practices.

Expenditures in respect of the administration of the Farmers' Creditors Arrangement Act, 1934, and the Municipal Improvements Assistance Act, 1938, totalled \$130,086.86 in 1942-43. The following is a summary of the expenditure classified by provinces: Head Office (including all costs of administering the Municipal Improvements Assistance Act), \$13,073.92; Quebec, \$3; Ontario, \$3; Manitoba, \$2,012.12; Saskatchewan, \$73,829.15; Alberta, \$38,271.45; British Columbia, \$2,894.22.

A As of March 31, 1943, there were 27 employees paid from this allotment. The following were receiving annual salaries of \$2,400 or over on that date: C. W. Hoffman, \$3,600; C. I. Keith, \$3,000; H. Millican, \$3,600; J. G. Olding, \$3,000; C. A. Port, \$3,000.

C D By P.C. 1574 of April 19, 1940, a schedule of fees and allowances was authorized as of May 1, 1940, for members of the Board of Review under the Farmers' Creditors Arrangement Act. Chief Commissioners to whom no remuneration is payable under the Act were granted a living allowance of \$15 per day and actual railway expenses while away from their homes. Commissioners representing debtors and creditors were allowed remuneration for their services at the rate of \$15 per day for each full day in which they were engaged on, or travelling in connection with, duties pursuant to their appointment and, in addition, an expense allowance of \$7 per day and actual railway expenses while away from home.

C Fees to Commissioners totalled \$16,494.72 during the year. The following Commissioners received fees in excess of \$1,000: F. M. Borland, \$2,932.50; Wm. Hall, \$3,015; F. H. Holmes, \$2,475; T. A. McCusker, \$2,490; Wm. Rea, \$1,507.50; Chas. Wilson, \$2,955.

Fees to Official Receivers amounted to \$22,875 and were computed on the following basis as approved by the Governor in Council: (a) for composition completed without appeal to Board of Review, \$30; (b) for composition determined by Board of Review, \$15; (c) for services as trustee of farmer's estate made under the Bankruptcy Act, \$30; (d) for duties assumed pertaining to cases referred to the Board by predecessor, \$10; (e) for services on application of debtor for discharge where administration completed by farmer trustee, \$10. The following Official Receivers received fees in excess of \$1,000: A. Brehaut, \$1,020; J. M. Bright, \$1,155; M. Denis, \$1,110; H. MacKay, \$1,395; J. Decore, \$1,500; J. C. Marshall, \$1,810.

D Expenditures charged to this allotment included living allowances of \$15 per day and actual railway expenses as authorized by P.C. 1574 of April 19, 1940, to the following judges while acting as Chief Commissioners: Mr. Justice P. M. Anderson, \$1,749.88; Mr. Justice J. T. Brown, \$1,867.07; Mr. Justice S. J. Shepherd, \$1,254.15.

Travelling expenses and living allowances in excess of \$300 were paid to the following commissioners and registrars: F. M. Borland, \$1,744.75; H. B. Fraser, \$398.60; Wm. Hall, \$908.22; F. H. Holmes, \$1,724.59; H. Millican, \$404.56; T. A. McCusker, \$727.25; Wm. Rea, \$746.55; Chas. Wilson, \$1,730.55.

J Administrative costs of land appraisals made by the Canadian Farm Loan Board, distributed by provinces, were as follows: Manitoba, \$10; Saskatchewan, \$9,502; Alberta, \$4,284.

Vote 417	To provide, subject to allocation by the Treasury Board, for Cost of Living Bonus, further amount required.....		745,000 00	
	Less transferred	686,615 86		
				58,384 14
	Expenditures			nil
	Lapsed		\$	58,384 14

COMMENTS

Provision was made in departmental votes for the bonus, but, due to a further rise in the cost of living index and consequent larger bonus payments, the amounts provided in a number of votes were insufficient.

Amounts transferred with the approval of Treasury Board to supplement the salary allotments of departmental votes were as follows: Agriculture, Vote 26, \$6,000; Finance, Vote 52, \$3,964.50; Labour, Vote 100, \$960.80, Vote 101, \$156.48; Legislation (House of Commons), Vote 116, \$3,655.24, Vote 117, \$10,244.13, Vote 119 (General), \$59.04; National Revenue, Vote 196, \$9,091.93, Vote 198, \$125,286.36; National War Services, Vote 201, \$1,500; Post Office, Vote 244, \$503,123.64; Public Printing and Stationery, Vote 257, \$998.80; Trade and Commerce, Vote 353, \$21,574.94.

Redemption of Previous Years' cheques—Consolidated Revenue and Audit Act, c. 27, 1931	\$ 388 82
------------------------------------------------------------------------------------------------	-----------

COMMENTS

This amount represents payment, or provision for payment, of outstanding cheques received during the year, the amounts of which had previously been transferred to Revenue.

War Risk Insurance Act, 1942, c. 35, 1942-43.....	\$ 100,000 00
---------------------------------------------------	---------------

COMMENTS

Section 21 of this Act authorized: (1) a special account to be called "The War Damage Insurance Special Account" to which shall be credited all moneys received under the provisions of the Act, and (2) a credit out of unappropriated moneys in the Consolidated Revenue Fund of \$5,000,000 to be paid into the account in such instalments and at such times as the Governor in Council may direct.

In accordance with (2) above, P.C. 7391, August 18, 1942, authorized initial payment of \$100,000 from unappropriated moneys in the Consolidated Revenue Fund for credit to the "War Damage Insurance Special Account", which account will be found under Contingent and Special Funds in the Trust and Special Accounts further on in this section.

As a measure for strengthening the financial position of the United Kingdom, the Treasury of the United Kingdom on August 16, 1941, issued an order vesting in it, *inter alia*, certain securities of the Dominion of Canada held by residents of the United Kingdom at the following prices payable on October 6, 1941: 3½ per cent 1950-55 stock, £104-2-5; 3¼ per cent 1958-63 stock, £104-2-5; 4 per cent 1953-58 stock, £110-12-11. P.C. 7766 of October 8, 1941, authorized the Minister of Finance to purchase all or any of these vested securities of the Government of Canada at the prices stated, together, in the case of securities delivered after October 6, 1941, with interest at such rates not exceeding one per cent per annum as might be approved by the Minister. P.C. 8492, October 31, 1941, provided that holders of such securities which were not subject to United Kingdom vesting orders might surrender their holdings for redemption at the quotations on the London Stock Exchange, exclusive of accrued interest, on August 15, 1941, as follows: 3½ per cent 1950-55 stock, £102.81; 3¼ per cent 1958-63 stock, £103.35; 4 per cent 1953-58 stock, £110.44 together with accrued interest thereon at the coupon rate from the last interest payment date.

The latter Order in Council also provided that moneys required for the purchase of securities under that authority or under P.C. 7766 to the extent of the principal amount thereof, but excluding any premiums on the purchase prices, be made available out of any unappropriated moneys in the Consolidated Revenue Fund and charged to Redemption of Debt, and the annual interest charges forming part of the purchase price be charged to Interest on Public Debt.

Payments from this allotment were for premiums, computed at \$4.45 to the pound sterling, on securities redeemed at the above stated sterling quotations. The following table shows the value of securities redeemed and the amount of premiums paid thereon:

The Wartime Prices and Trade Board was constituted by P.C. 2516, September 3, 1939, under authority of the War Measures Act of 1914 "to provide safeguards under war conditions against any undue enhancement in the prices of food, fuel and other necessities of life, and to ensure an adequate supply and equitable distribution of such commodities." From September 3, 1939, to December 1, 1941, the Board's activities were confined to selective controls of supplies and prices. The overall price ceiling became effective December 1, 1941, under authority of P.C. 8527, November 1, 1941, establishing the "Maximum Prices Regulations", and the powers of the Board to administer the ceiling were broadened by P.C. 8528, November 1, 1941. The "Maximum Rentals Regulations" were authorized by P.C. 8965, and the "Wartime Leasehold Regulations" by P.C. 9029, both dated November 21, 1941. The terms of the "Maximum Prices Regulations" stipulate that the highest price at which any person may sell any goods, or services defined in the regulations, is the highest lawful price at which he sold those goods or services during what is known as the "basic period"—September 15 to October 11, 1941—unless the Wartime Prices and Trade Board has ordered otherwise. To maintain equitable and orderly distribution of goods in short supply, the Board has issued a number of orders to regulate distribution, and administers coupon rationing of sugar, tea, coffee, butter and meat. To assist the Board in controlling prices and maintaining supply, four companies, wholly owned by the Crown, have been incorporated: Commodity Prices Stabilization Corporation Limited, Wartime Food Corporation Limited, Canadian Wool Board Limited and Wartime Salvage Limited. Assistance is given through payment of subsidies, modification or remission of duties and taxes, and government bulk purchasing when the "squeeze" cannot be absorbed or offset by trade and industry.

A B As at March 31, 1943, there were 4,769 employees paid from salary allotment, from which persons on loan from commercial firms and other government departments were also paid. P.C. 9870, December 17, 1941, as amended by P.C. 5863, July 7, 1942, authorized the Minister of Finance to cause the incorporation and organization of the Commodity Prices Stabilization Corporation Limited as a Crown company under the Companies Act 1934, and to execute an agreement with the Corporation authorizing it to perform such duties and to enter into such transactions as the Minister or the Wartime Prices and Trade Board may authorize or direct it to perform for the purpose of assisting the Wartime Prices and Trade Board in controlling prices and maintaining supply of food, fuel and other necessities of life by the payment of subsidies and bulk purchasing in accordance with principles formulated by the Wartime Prices and Trade Board and approved by the Minister. Under the same authority, the Corporation was empowered to carry on its duties and responsibilities through the incorporation and organization of subsidiary companies, and under this provision a subsidiary, Wartime Food Corporation Limited, was established. The Order in Council authorized the Minister, with the approval of Treasury Board, to advance funds for administrative and other expenses of the Corporation. The advances are recorded in a Miscellaneous Current Account (shown under Trust and Special Accounts further on in this section); expenses of the Corporation are met from these advances and, periodically throughout the year, the account is credited and the War allotment debited with such expenses. In the present fiscal year, \$88,771,129.87 was advanced of which \$21,055,901.51 remains as a debit balance in the account while the sum of \$67,715,228.36 was charged to the War allotment. The latter amount was expended as follows:

In order to prevent curtailment of supply required for war purposes, P.C. 17/1006, December 24, 1941, as amended by P.C. 3591, April 30, 1942, authorized payment of compensation to Canadian Furnace Limited for the increased cost of coke used in the production of pig iron. Payments were subject to limitations and conditions and not to exceed \$85,000 in respect of the coke consumed during any one of the three quarterly periods April 1 to June 30, July 1 to September 30 and October 1 to December 31, all dates inclusive, in the year 1942. Payments for each quarter period were as follows: June 30, \$85,000; September 30, \$72,156.16; December 31, \$85,000.

Allotment: To provide for payments, by the Minister of Finance, to

COMMENTS

Due to re-allocation of the Canadian supply of metallurgical coke to the blast furnaces in Canada, it was necessary that Canadian Furnace Limited requirements be supplied by the Lasalle Coke Company. P.C. 4832, June 9, 1942, authorized the Minister of Finance to reimburse Canadian Furnace Limited for freight paid on shipments of coke from Montreal to Port Colborne, and payments amounted to \$191,646.65. P.C. 1690, March 4, 1943, provides "that the payments to be made to the Company in respect of the period up to April 1, 1943, shall be made out of the funds advanced or made available to the Department of Munitions and Supply out of the special war appropriation and all payments thereafter shall be made out of the funds to be similarly advanced or made available for the fiscal year in which such payments are to be made." A payment of \$49,374.49 for the last quarter of the fiscal year 1942-43 was made by the Department of Munitions and Supply under the above authority and appears under Expansion of Industry—Miscellaneous War Expenses in the section of this report pertaining to that Department.

COMMENTS

This account represents the investment of the Dominion Government in the Central Mortgage Bank. Under the provision of section 13 of the Central Mortgage Bank Act, 1939, the Minister of Finance was empowered to subscribe for one hundred thousand shares of the capital stock of the bank at par at such times and in such amounts as the Governor in Council might determine. P.C. 1984 of July 27, 1939, authorized the payment by the Minister of two dollars and fifty cents in respect of each one hundred dollar share. Due to the state of war and to the uncertainties regarding the effects which the war might have on its proposed business, the bank remained inoperative during 1941 and 1942. The net surplus for the calendar year 1942 consisting of earnings on the investment of the capital subscriptions, less expenses incurred, amounted to \$3,408.87 and was credited to Revenue—Return on Investments.

A No advances were made to the Canadian Farm Loan Board during the year and amounts totalling \$2,507,355 were credited to these accounts. Capital stock amounting to \$7,355 was written off to Consolidated Fund leaving a debit balance of \$2,249,408 in the capital stock subscription account on March 31, 1943. Canadian Farm Loan Board Bonds amounting to \$2,500,000 were redeemed during the year. Interest amounting to \$1,196,462.54

was received during the year and credited to Revenue—Return on Investments. Of the total, \$175,000 represented interest on initial capital advances and \$1,020,777.40 interest at 3½ per cent on Farm Loan Bonds. Initial capital advances are free of interest for a period of three years.

No advances for initial capital or subscriptions for capital stock were made under authority of the Canadian Fisherman's Loan Act, c. 52, 1935. Interest of \$685.14 included in the above total was received on Initial Capital Advances and credited to Revenue—Return on Investments.

B Disbursements are the Dominion's share of loans made under the National Housing Act, c. 49, 1938, while receipts are repayments of loans under this Act and its predecessor, the Dominion Housing Act, c. 58, 1935. The Government's share of losses on the realization of defaulted loans amounting to \$1,634.50 was reduced by its share of profits of \$209.33, leaving a net loss of \$1,425.17 which is shown under the ordinary expenditures of this Department.

C No payments of principal or interest were received during the year on account of advances made to the Governments of Greece and Roumania in 1919-20 and 1920-21.

Under authority of Section 3 of the War Appropriation Act, 1942, and pursuant to an agreement between Canada and the Union of Socialist Soviet Republics approved by P.C. 7822 of September 1, 1942, a credit of \$10,000,000 was established for the purchase by Russia of Canadian wheat and flour; advances totalling \$917,159.16, bearing interest at 3 per cent per annum, were made.

D The disbursements represent advances under authority of the Municipal Improvements Assistance Act, c. 33, 1938, while the receipts represent repayments. No further loans were authorized during the fiscal year. Interest at a rate of 2 per cent, amounting to \$117,437.34, was credited to Revenue—Return on Investments.

F Housing loans made to provinces during the years 1919 to 1924 under the authority of P.C. 2997 of December 3, 1918, and amendments, were repaid as shown. Interest at 5 per cent to a total of \$5,516.27 was credited to Revenue—Return on Investments.

G No further loans were made to the provinces during the year for unemployment or agricultural assistance. Repayments as shown were received from the Provinces of Manitoba and Saskatchewan while the receipts and disbursements in the case of Alberta represent renewals of \$25,972,000 and repayments of \$38,500. The Province of British Columbia repaid \$121,255.83 and the renewals totalled \$34,623,131.53. Interest amounting to \$2,786,324.19 was received and credited to Revenue—Return on Investments.

H Subsidy overpayment to the Province of Alberta secured by a Treasury Bill of the Government of Alberta was reduced during the year by a repayment of \$68,750. The balance of the loan, amounting to \$400,000, was renewed under authority of P.C. 7901 of September 3, 1942. Interest at 3 per cent, amounting to \$13,031.25, was received and credited to Revenue—Return on Investments.

I The loan of \$57,600 to the Province of Saskatchewan authorized by P.C. 4891 of September 17, 1940, to enable the Saskatchewan Power Commission to extend its system to the Bombing and Gunnery School at Dafoe, Saskatchewan, bears interest at 3½ per cent and is repayable in thirty half-year instalments, beginning May 15, 1941. Repayment of principal totalling \$3,840 was received during the year while interest amounting to \$1,848 was credited to Revenue—Return on Investments.

J Under authority of the War Appropriation (United Kingdom) Financing Act, 1942, sterling balances in an amount equivalent to \$700,000,000 at the exchange rate of \$4.45 were converted into a Canadian dollar obligation of the Government of the United Kingdom which, under the provisions of the Act, is non-interest-bearing until after the termination of the war.

K During the year this reserve was increased by a further \$25,000,000, the offsetting entry being a charge to Consolidated Fund in the expenditures of this Department.

- A This account was opened in 1941 to record the purchase of \$10,000 Second Victory Loan Bonds due March 1, 1954, to be sold to government officials, etc., in the Northwest Territories and northern Quebec. Bonds for the full amount advanced were sold, the amount of \$184.58, being profit on bond sales, was deposited to Revenue—Miscellaneous.
- B The amount shown as receipts is from the transfer of gold bullion to the Bank of Canada and sales of fine gold to the public, while disbursements represent payments made by the Royal Canadian Mint for newly-mined gold, old jewellery, dental scrap, etc. The closing balance represents the statutory value equivalent to \$20.67+ the ounce fine of the gold on hand at that date, the net operating profit for the year being transferred to Revenue—Bullion and Coinage.
- C Receipts in these accounts represent the face value of all coin issued to the Bank of Canada and in the case of the Silver Purchase Account, the sale of fine silver to the public. Disbursements are the value of all metals purchased for coinage purposes as well as the net value of mutilated coin withdrawn from circulation. The closing balances represent the cost value of the metals on hand at that date, the net operating profit for the year being transferred to Revenue—Bullion and Coinage.
- E This account represents the liability of the Bank of Montreal for the redemption of provincial notes stolen from its branch at St. Catharines in 1869, at the time the Bank was agent for the issue and redemption of these notes for the Receiver General. The original liability was \$46,000. As the stolen notes are presented for payment, the Minister of Finance redeems them at face value and is recouped by the Bank.
- F This account reflects the operations in Bond Holding investments and consists mainly of Dominion of Canada, direct and guaranteed securities.
- G This account records the sale of United States and Sterling funds to the Canadian National Railways. The government is reimbursed monthly by the railway.
- H Under authority of P.C. 1835, March 10, 1942, this Government-owned company was incorporated under the Companies Act for the purpose of buying and selling foreign and domestic wools, fabrics, fibres and commodities. The agreement with the company provides that the Minister of Finance is to advance \$10,000,000 and further advances are made as required under authority of the War Appropriation Act. Administrative expenses and losses in trading are charged to the War Appropriation and credited to the advances made. The balance in this account at the end of the fiscal year is the amount of advances to be accounted for by the Company.
- I Under authority of P.C. 9870, December 17, 1941, this Government-owned corporation was incorporated under the Companies Act and placed under the control of the Wartime Prices and Trade Board. The Corporation buys and sells commodities and subsidizes firms and individuals for the purpose of controlling the prices of goods, ware and merchandise in Canada, and in this connection, the Minister of Finance is authorized to advance \$10,000,000, further advances being obtained as required under authority of the War Appropriation Act. Each month an adjustment is made, crediting this account and charging the War Appropriation with the subsidies paid, losses on commodity trading and administrative expenses. The balance at the end of the fiscal year is the amount of advances to be accounted for by the Corporation.
- J This account relates to the transactions in gold at the Dominion of Canada Assay Office in Vancouver. Gold is purchased from mining companies and individuals for shipment to the Royal Canadian Mint. The closing balance represents the statutory value of the gold on hand in the Dominion Assay Office on that date.
- K This is a suspense account with the entries representing the statutory value of gold transferred from the Royal Canadian Mint to the Bank of Canada.
- M Temporary investment of surplus funds in United States short term Treasury bills and sundry purchases in advance of call date of 5 per cent Dominion of Canada bonds of the 1922-52 issue.
- O The transactions in this account represent the purchase of securities, at the prices at which they were vested by the United Kingdom, pending distribution to the respective accounts.
- Q Advances were made by the Dominion Government to the Province of Saskatchewan for the purchase of seed grain. The receipts represent repayments, while the balance is the amount outstanding at the close of the year.

- S This is a suspense account to which the cost of repatriated securities purchased is charged pending their distribution to the Bond Holding Account or the accounts of the Canadian National Railways under Loans and Advances.
- T After the books for the respective loans are closed, unpaid instalments are charged to these accounts. The balance for the Third Victory Loan represents the amount of unpaid instalments at the close of the year.
- V Under authority of P.C. 2530, March 30, 1942, this Government-owned company was incorporated under the Companies Act and operates under the direction of the Wartime Prices and Trade Board. The Company buys, processes, stores and sells goods such as waste paper, metal, etc., and, in this connection, the Minister of Finance is authorized to advance \$5,000,000, further advances being obtained as required under authority of the War Appropriation Act. An adjustment is made monthly by charging the War Appropriation and crediting this account with operating deficits and administrative expenses. The balance in this account at the end of the fiscal year is the amount of advances to be accounted for by the company.

COMMENTS

- A The credit balances of these accounts are the amounts deposited with the Government to meet matured bonds and interest coupons which for the convenience of investors have been made payable at the offices of the Assistant Receivers General (and now at the agencies of the Bank of Canada). The receipts represent cash received from the Canadian National Railways while the disbursements were for interest coupons redeemed by the Bank of Canada.
- C This account records the cash deposits received from contractors as security for the satisfactory execution of contracts, as required under Section 16 of the Public Works Act,

etc., and also the releases from time to time. Interest at 2 per cent per annum compounded yearly, amounting in 1942-43 to \$152,962.90, is added to the deposits and paid to contractors when releases are made.

D Receipts credited to this fund during the year consisted of premiums, at the rate of 20 cents per \$100 of security, amounting to \$46,112.32 and interest at 2½ per cent, \$5,674.77. Disbursements were made to various departments to cover defalcations amounting to \$12,964.26 and \$248.90 overpayment of premiums.

E This account was established under authority of P.C. 144 of January 18, 1936, by which the amount to be paid into Consolidated Revenue Fund is limited to \$500,000, made up of a Government grant of \$100,000 and deposits by the Trustees of public contributions. Interest on this fund, at 3 per cent per annum, is paid to the Trustees from Interest on Public Debt under the above-mentioned authority. The receipt of \$5,000 in the present fiscal year represents a deposit by the Trustees.

G These accounts were established to facilitate the purchase of Victory Loan bonds by employees of the Dominion Government, Government-owned plants and other organizations (at the close of the year the balances in the individual organization accounts for the Second Victory Loan, 1942, were transferred to the General Account). Receipts are cash instalments on bonds while disbursements are payments to the Bank of Canada for bonds purchased. The closing balances represent incomplete subscriptions.

COMMENTS

A Transactions in this account relate to charges in connection with the transfer and exchange of bonds. Receipts consist of fees, while disbursements are for the printing of replacement bonds. The amount received during the year in excess of the expenses was \$50,145.36 which was transferred to Revenue—Services and Service Fees.

C This reserve is to cover losses in connection with the wheat marketing operations of the Canadian Wheat Board. The amount of \$6,660,143.33 represents a reduction in the reserve, a corresponding credit being shown in Special Receipts and Credits—Consolidated Fund. The action results from an improvement in the balance sheet position of the Board in the period ended July 31, 1942, with respect to the 1939 and 1940 crop accounts.

- D This is a suspense account to record certain remittances pending their proper allocation.
- E These accounts reflect the balances of amounts remitted by the liquidators of certain defunct trust and insurance companies representing unclaimed dividends due the ordinary creditors. No claims were presented during the present fiscal year.
- F These accounts reflect the balances of amounts remitted by the liquidators of defunct banks to redeem bank notes still in circulation and unclaimed dividends of the bank assets due to depositors. The current disbursements represent the redemption of notes.
- G To this account are credited the income tax deductions from employees paid through the Central Pay Office; such deductions are subsequently paid to the Department of National Revenue.
- H Donations received from various sources and designated as non-war contributions are credited to this account and, at the close of the fiscal year, the balance is transferred to Revenue—Special Receipts.
- I The will of the late Ernest Davis, who died on May 12, 1936, provided that the residue of his estate should be paid to the Dominion Government. Receipts during the fiscal year represent further proceeds from this estate. When it is finally wound up, the amount will be transferred to Revenue.
- J Amounts deducted from the payments for gold deposited with the Royal Canadian Mint and the Dominion of Canada Assay Office, Vancouver, to cover the costs of packing, insurance, express, etc., on shipments of fine gold out of Canada, are credited to this account, while certain of the actual expenses are debited hereto. For this fiscal year, the total deductions exceeded the expenses charged to this account by \$1,084,227.73 which was transferred to Revenue—Bullion and Coinage account at the close of the year.
- L Accrued interest collected from those purchasing bonds after the issue date is credited to these accounts and, on first due date, is transferred to Interest on Public Debt.
- M Unclaimed matured bonds which cannot be delivered are cancelled and the value, including that of any interest coupons, is credited to this account. Disbursements are payments to the owners of such bonds.
- O To this account are credited the amounts collected by payroll deductions in connection with two housing loans. This money is being held pending a decision as to its disposal.
- P This is a bond trading account in connection with the furtherance of the sale of Victory Loan bonds generally.
- Q Obligations payable in other than Canadian currency, such as those portions of the Funded and Floating Debt payable in London and New York are recorded in the Balance Sheet at par of exchange. Similarly assets held in London and New York such as cash, special deposits, and bond holding account investments are shown at \$4.86% to the pound sterling and \$1 to the American dollar. In all other transactions the current market values are used, and the difference is adjusted by charging or crediting Premium, Discount and Exchange account as required.

The following table shows the transactions, apart from certain adjusting entries, in this account for 1942-43:

The net revenue was transferred to Revenue—Premium, Discount and Exchange at the close of the year.

- R During the year some coinage was minted for the Government of Newfoundland. The transactions in this account represent unpaid brokerage charges received and subsequently disbursed.
- S A subsidiary of Cash Suspense, dealing with funds relating to salvage, and operated separately for accounting convenience.
- U All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue are credited to these accounts. The balances represent the liability in respect of this Department at the close of 1942-43.
- V To this account is credited the value of War Savings Certificates and Stamps which are returned to the Bank of Canada, War Savings Division, for various reasons. When owners are located or identified, disbursements are made.
- W Deductions from the salaries and wages of Dominion Government employees paid through Central Pay Office are deposited in this account pending payment to the Unemployment Insurance Commission.
- Y This account has to do with incomplete subscriptions to the 1917, 1918 or 1919 Victory Loans. On November 29, 1930, the Governor in Council approved the principle of refunding, on application by the subscriber, the amount of any instalment paid. The closing balance represents the total amount of unclaimed instalments.
- Z These accounts are similar in purpose to the one described in "Y" above.
- AA The maturity values of the indicated bond issues are greater than the face values. The amounts to cover the differences have been charged to Unamortized Discount and Commissions on Loans and credited to these accounts, which will be cleared upon redemption of such issues.
- CC This account is credited with all premiums received under the War Risk Insurance Scheme (War Risk Insurance Act, 1942) together with instalments (of the \$5,000,000 referred to on page CC-35) out of the unappropriated moneys in the Consolidated Revenue Fund as provided for in said Act. The receipts comprise the net premiums received and an instalment of \$100,000 as above to provide for administration expenses, compensation and indemnities. The disbursements for the year were for administration expenses.
- DD P.C. 2/8917 of September 30, 1942, authorizes that, under the War Risk Insurance Act, 1942, c. 35, 1942, and the War Measures Act, c. 206, R.S. 1927, and notwithstanding anything contained in any other Act or Regulation, all property of His Majesty in right of the Dominion of Canada be insured against war damage. The receipts represent premiums. Should damages arise, the cost will be charged to this account.
- EE To this account are credited donations towards the Canadian war effort. At the close of the fiscal year, the credit balance is transferred to Special Receipts.
- FF Deductions from the salaries of Dominion Government employees paid by Central Pay Office are deposited in this account and cheques are drawn against it in favour of the Bank of Canada as the certificates are fully paid. The balance represents the incomplete subscriptions at the close of 1942-43.
- GG Deductions from the salaries of employees of the Commission are deposited in this account and cheques are drawn against it in favour of the Bank of Canada as the certificates are fully paid. The balance represents the incomplete subscriptions at the close of 1942-43.

Wartime Salvage Ltd.

They were all incorporated under Part I of the Companies Act, 1934, as companies with share capital. The only shares issued—other than in the name of the Minister (of Finance) in trust for His Majesty the King in right of Canada—are directors' qualifying shares, all directors having made assignments in blank of such qualifying shares.

Agreements between the Minister and each of these companies provide, in substance, for:—(1) the performance by the company of such transactions as may be delegated to it by the Minister or the Wartime Prices and Trade Board; (2) the setting up of branch offices or the incorporation and organization of subsidiary companies; (3) the keeping of proper accounts of operations and the rendering of financial statements for each monthly period and for the fiscal year; (4) the Minister to be kept advised of the principles followed in the operation of the business; (5) express consent in writing of the Minister to be obtained for operations other than those necessary or incidental to the carrying out of the agreements; (6) amendments or supplements to the agreements to be approved by the Minister.

The Commodity Prices Stabilization Corporation Ltd., has to do with the control of prices of goods, ware and merchandise in Canada, and the payment of subventions, subsidies, bonuses, etc., in accordance with principles formulated by the Wartime Prices and Trade Board and approved by the Minister. The Canadian Wool Board Ltd. was formed to regulate the acquisition, conservation and distribution of domestic and foreign wool and related products, and to increase the production of wool in Canada by assuring sheep growers a stable market at known prices for all production of wool during the present war and one producing year thereafter. Wartime Salvage Ltd. was organized for the purpose, in co-operation with Dominion Government departments and agencies, of acquiring and disposing of waste or used matter of all kinds. It operates independently of salvage work conducted by the Army Salvage and Disposal Board, the Scrap Disposal Branch (Department of Munitions and Supply), the Salvage Officer (Treasury), and the National War Services Department.

Round sum advances to the companies are made at intervals under the authority of the War Appropriation Act. The accounts of the companies are audited by the Auditor General and the balance sheets and operating statements included herein were furnished, and certified, by him.

COMMENTS

- A Fishing licences, ranging from 25 cents for lobster fishing to \$75 for lobster pound licences, were issued in various provinces under the authority of the Fisheries Act, the proceeds of which by provinces were: Nova Scotia, \$4,296; Prince Edward Island, \$692.75; New Brunswick, \$8,456.25; Quebec, \$151.50; British Columbia, \$21,227; Yukon Territory, \$455; North West Territories, \$20; Hudson Bay District, \$1.90. A fishing lease was issued to the Dark Harbour Co., Ltd., covering fishing privileges in the area of Dark Harbour, N.B., at a yearly rental of \$25.
- B "Modus Vivendi" licences were issued to United States fishing vessels at a charge of \$1 per licence as follows: East Coast, \$23 and West Coast, \$176.
- C Oyster leases were issued in the provinces of Prince Edward Island and Nova Scotia, the proceeds therefrom being respectively, \$1,835.34 and \$444.57.
- D Trawler licences at a fee of \$500 each were issued to the following: Maritime National Fish Ltd., Halifax, \$1,500; Norwegian Shipping and Trade Mission, Halifax, \$1,000; F. Paturel of France Libre, Halifax, \$500.
- F Under the terms of the Pelagic Sealing Treaty of 1911, Canada is to receive from the United States 15 per cent of the total number of sealskins taken annually upon the Pribilof Islands; from Japan 10 per cent of the total number of sealskins taken upon Robben Island; and from Russia 15 per cent of the total number of sealskins taken upon the

Commander Islands. Canada has received, during the fiscal year 1942-43, proceeds from sales of skins as follows: U.S.A. Pribilof Islands rookeries, 5,427 skins marketed in Montreal, \$202,699.37; Canada's share of proceeds from sale of 8,080 skins sold in St. Louis, U.S.A., \$9,326.04; amount received from C. M. Lampson & Co., London, England, for 5 skins unaccounted for and overcharge for dressing and dyeing on 7 skins over number sold, \$105.94.

The cost of dressing and dyeing, including freight, customs and excise duties, warehouse expenses, etc., amounting to \$74,477.56, was charged to Vote 82.

No statement of take or of proceeds from sales, if any, has been received from Russia or Japan.

H Represents sales of marketable oysters from the Department's experimental areas in Prince Edward Island and sales of small oysters for stocking areas in outlying districts.

I This revenue represents the proceeds from the sales of diesel engine, generating sets and used trucks, \$1,480; booklets and bounty list, \$229.21; sundries, \$353.59.

J K Inspection fees were collected at the rate of one-half cent per case of forty-eight one-pound cans, or the equivalent thereof, covering certificates for all salmon and herring packed in British Columbia.

L Fees for the inspection of lobster packed in the Maritime Provinces were charged at the rate of 10 cents per case of ninety-six one-half pound cans or the equivalent thereof.

N Includes fishing bounty cheques returned, \$106.50; refund of previous year's advances, \$19.26; British Columbia Government's share of divisible expenses for February and March, 1942 (Nanaimo Station), \$332.50; sundries, \$76.21.

O Fines imposed and sales of confiscations under the following Acts:—Fisheries Act: Nova Scotia, \$718.50; Prince Edward Island, \$1,096.60; New Brunswick, \$1,245.50; British Columbia, \$20,677.95; Northern Pacific Halibut Fishery Act: British Columbia, \$3,514.19.

Q Under the War Measures Act, by P.C. 987 of February 9, 1942, the Committee appointed for the disposal of impounded Japanese fishing vessels was authorized to impose and collect a charge of one per cent on all moneys involved in transactions for the sales of such vessels.

R In cases where it was found necessary to make a detailed survey of immobilized Japanese fishing vessels, a fee of \$2.50 per vessel was authorized by the Committee and levied against the owners of the vessels.

The Fisheries Research Board Act of 1937 provided for the constitution of a Board of fifteen members as follows: two from the Department, two representing the fishing industry on the Atlantic Coast, two representing the fishing industry on the Pacific Coast and nine scientists selected from a list including nominations which may be made by any Canadian University the staff of which embraces scientists engaged in research work in any way bearing upon fishery problems. The duration of office and subsequent appointments are provided for in the Act.

Under Section 6 of the Act, it is provided that the Board shall have charge of all Dominion fishery research stations in Canada and shall have the conduct and control of investigations of practical and economic problems connected with marine and fresh water fisheries, flora and fauna, and such other work as may be assigned to it by the Minister.

It is provided in Section 11 of the Act that the Board may expend such sums as are necessary for its work from moneys appropriated by Parliament for the work of the Board or from funds received as bequests, donations, etc.

The Board received \$6,863.08 from the following sources: contributions from the Province of British Columbia, \$4,348.32; rent of properties, sales of publications, etc., \$2,514.76.

An amount of \$3,141.42, due at the close of the fiscal year 1942-43 by the Province of British Columbia, was transferred to the Province of British Columbia Fisheries Research Board of Canada Account under Miscellaneous Current Accounts.

The total amount was credited to the vote as shown in the following summarized statement of expenditures:

COMMENTS

The Treaty between the United States and Canada is designed to enable international control for the preservation of the Sockeye Salmon Fishery of the Fraser River and waters contiguous thereto. The Commission is required to make all necessary study and investigation in relation to such Fishery for the purpose of regulating fishing.

The Treaty provides that each country appoint three commissioners and pay the salaries and expenses of its own appointees, and one-half the joint expenses incurred by the Commission.

The total disbursements for the year amounted to \$83,347.63, divided as follows: Canada, \$41,607; United States, \$41,740.63. A refund of gasoline tax amounting to \$193.62, credited to the appropriation after the final account for the year had been submitted to the United States Government, accounts for the larger share of the joint expenses shown for that Government. This will be adjusted in 1943-44.

Canada's portion of the expenditure includes an amount of \$60 covering non-divisible expenses incurred by the Canadian Commissioner.

The United States portion had not been repaid at the close of the year and was transferred to the recoverable Pacific Salmon Treaty Special Account under Miscellaneous Current Accounts.

Vote 83 Payment of a bounty for the destruction of Harbour Seals.... 15,000 00

Expenditures 7,767 50

Lapsed\$ 7,232 50

COMMENTS

P.C. 6839 of August 4, 1942, authorized the Minister to establish the rate of bounty to be paid for any fiscal year for the destruction of harbour seals, which are a source of serious loss and inconvenience, particularly to salmon fishermen, on both coasts. During the present fiscal year, a bounty of \$2.50 per head was paid as follows: East Coast, \$4,847.50; West Coast, \$2,920.

Fishing Bounty, c. 74, R.S.\$ 159,930 60

COMMENTS

Under authority of the Deep Sea Fisheries Act, the Governor in Council may authorize the payment, out of the Consolidated Revenue Fund of Canada, of an annual grant not exceeding one hundred and sixty thousand dollars, to aid in the development of the sea fisheries of Canada, and the encouragement of the building and fitting out of improved fishing vessels, and the improvement of the condition of the fishermen.

Provision was made under the authority of P.C. 1385, dated February 22, 1943, that the sum of \$160,000 be distributed for the year 1942-43 upon the following basis:—

Vessels: The owners of the vessels entitled to receive bounty shall be paid \$1 per registered ton, provided, however, that the payment to the owner of any one vessel shall not exceed the sum of \$80, and all vessel fishermen entitled to receive bounty shall be paid the sum of \$8 each.

Boats: Fishermen engaged in fishing boats, who shall also have complied with the regulations entitling them to receive bounty, shall be paid the sum of \$7.50 each, and the owners of fishing boats shall be paid the sum of \$1 per boat.

The bounty was distributed as shown in the following statement which includes a number of late claims of 1941-42:—

COMMENTS

Assessments on insurance companies, including \$2.28 premium on exchange, were \$158,947.44; on loan companies, \$4,377.76; on trust companies, \$4,821.93; and on small loans companies, \$3,251.63. Total revenue from assessment was therefore \$171,398.76. Net penalties collected during the current year amounted to \$780 making the total revenue from all sources \$172,178.76.

Under the provisions of the Department of Insurance Act, c. 45, 1932, the expenditure incurred by the Dominion during each fiscal year in connection with the administration of the Canadian and British Insurance Companies Act, c. 46, 1932, the Foreign Insurance Companies Act, c. 47, 1932, the Loan Companies Act, c. 28, R.S., the Trust Companies Act, c. 29, R.S., the Small Loans Act, c. 23, 1939, and amendments, is assessed against the companies transacting business thereunder, in the proportion which the net premiums in Canada or income of each bear to the total amount of such premiums or income received during the preceding calendar year.

Expenditures for the fiscal year 1941-42 were \$170,889.92. Added to this was \$11,635.91 for estimated rent, char service, lighting and sundries charged to Public Works Department, Vote 261, thereby increasing the total expenditure to \$182,525.83. Credited against this were: salaries on account of Civil Service Insurance administration, etc., \$4,858.10; work done for other departments, \$5,000; revenue from sale of publications, \$231.25; net penalties received, \$1,040. These credits totalled \$11,129.35 and reduce the total amount of expenditure to be assessed against the companies to \$171,396.48, which amount, together with the \$2.28 premium on exchange, equals the total revenue from assessment as above.

Gross penalties amounting to \$4,180 were received during 1942-43 from companies which did not file the business statements called for under the terms of the Acts in the required time. Rebates totalling \$3,400 were subsequently made by the Governor in Council under the provisions of section 33 of the Consolidated Revenue and Audit Act, c. 27, 1931, leaving net penalties of \$780 referred to above.

COMMENTS

B Proceeds from Sales: Produce of the penitentiary farms was valued at \$131,685 (including vegetables valued at \$27,762, potatoes valued at \$19,009, pork valued at \$32,800, milk valued at \$10,471, eggs valued at \$4,543, hay, straw, etc., valued at \$16,301, grain valued at \$18,899, and sundry other items valued at \$1,900) and the difference between this amount and that of \$101,459.43 in the above table is the value of the vegetables, grain, hay and straw on hand.

Vegetables valued at \$13,277 were transferred without cost to other Government Departments—National Defence (Army), National Defence (Air), Royal Canadian Mounted Police, and Mines and Resources. Seed grain valued at \$860 was transferred without cost to the Department of Agriculture.

E Miscellaneous: The sum of \$266.21 represents old balances in the bank, in connection with various court cases in the Yukon Territorial Court, which were transferred from Dawson City, Y.T., to Ottawa in September, 1936, as it was considered unlikely that they would ever be claimed. At the close of the present fiscal year, the amount was transferred from the Trust and Special Account (Department of Justice—Suspense) to Revenue.

British Columbia: Chief Justice of the Court of Appeal and Chief Justice of the Supreme Court, each, \$10,000; 4 Justices of Appeal and 5 puisne Judges of the Supreme Court, each, \$9,000; 14 Judges and Junior Judges of the County Courts, each, \$5,000.

Section 21 of the Judges Act provides for, in addition to his moving or transportation expenses, a per diem allowance of \$10 in cities and \$6 elsewhere, to a Judge of the Exchequer, Superior and County Courts during periods he is attending at any place other than that at which he is, by law, obligated to reside. The per diem allowance is paid for each day or part of a day a judge is absent from his lawful place of residence. Travelling expenses of Judges of the Exchequer Court of Canada, amounting to \$1,531.47, were charged to Vote 94.

Each Judge of a District Court in Ontario by Section 22, subsection 4 of the Judges Act receives \$500 per annum as a travelling allowance, and such payments in 1942-43 were made to 12 Judges.

Although Section 21 of the Judges Act states that the travel allowance to a Superior Court Judge shall be "in addition to his moving or transportation expenses", this was not applied to Judges travelling between Quebec and Montreal who were paid on a basis of \$25 for transportation expenses, nor to Judges travelling between Vancouver and Victoria who were paid on a basis of \$15.

A. MACNAMARA,
Deputy Minister of Labour.

COMMENTS

A Rent of buildings, both owned and leased by the British Columbia Security Commission, to Japanese self-supporting communities and occidental storekeepers in project areas.

C Proceeds from subscriptions to and sales of the *Labour Gazette* amounted to \$1,607.37; other publications, \$232.90.

Hospitalization was supplied through the British Columbia Security Commission to occidental Workmen's Compensation cases, Japanese old-age pensioners and local residents (in emergency). Drugs and medical supplies are sold at points where there are no local drug stores.

Produce, \$3,353.24, represents proceeds from sales of vegetables and livestock supplied by Commission farm projects to Commission operated store at Tashme, B.C., Commission's institutions and local merchants; also sales to Japanese from the fish-packing project at Kaslo. Trucking is done by Commission trucks for the Commission operated store at Tashme.

Board is collected from the Commission staff resident in the various establishment staff houses, and cost of meals provided in Commission messes is deducted from the Japanese pay-rolls.

Miscellaneous items include revenue from the Commission's shoe-shops maintained at Sandon, B.C., and Slocan, B.C.; sales of empty containers and kitchen waste.

- D Refunds of outstanding advances, \$180.36. This represents refund of an accountable advance which was outstanding at the end of the fiscal year 1941-42 to an employee who died during that year. (See Auditor General's Report, 1942, p. 148, Section K.)
- F These amounts were received from the Provinces on account of refunds of expenditures irregularly included in Provincial certificates of claim, collections made on account of seed grain expenditures, refunds by recipients of direct relief and adjustments in relief settlement accounts.
- G Represents refunds received from the Provinces for the adjustment of items irregularly included in claims against the Dominion applicable to previous years' Youth Training Program.
- H This item includes amounts refunded by the Provinces relating to the War Emergency Training Program for items of expenditure irregularly included in claims under previous years' Dominion-Provincial agreements and the proceeds from the sale of machine tools and equipment applicable to previous years' War Appropriation.

COMMENTS

During the fiscal year 1942-43, the Unemployment Insurance Commission administered certain phases of the National Selective Service program. This necessitated the opening of over seventy new offices and the employment of additional staffs to man them. Although the additional expenses incurred for salaries, travel, printing, stationery, communications, etc., were properly a charge against an allotment from the War Appropriation, it was found impossible to segregate expense under Unemployment Insurance and National Selective Service activities because—(i) a considerable part of the National Selective Service work would have been undertaken in the ordinary placement of workers; (ii) staff members were engaged on both classes of work and did not devote their time exclusively to one or the other; and (iii) many of the new National Selective Service offices were operated by trained staff of the Unemployment Insurance Commission. In view of these circumstances, Treasury Board approved an arrangement whereby the administrative vote of the Unemployment Insurance Commission was utilized, as far as possible, to meet all ordinary administrative expenditures. After these moneys were exhausted, all further expenditures of a general nature were to be met out of funds allotted from the War Appropriation. Under this arrangement all salaries paid after January 15, 1943, were charged against the War Allotment. The same situation applied to a lesser degree in connection with other charges of a general nature, but because of administrative difficulties, these arrangements were sometimes effected before the primary allotments in the administrative vote were wholly exhausted. In connection with the amount of \$342,605.71 which lapsed in Vote 106, it

might be mentioned that this vote was augmented in the closing days of the fiscal year by refunds of travelling advances, also that \$53,960.15 was required to be held against unpaid commitments.

A L As of March 31, 1943, there were 4,080 employees paid from this vote and from the war allotment for National Selective Service. The following table shows those who were paid annual salaries of \$2,400 or over on that date, or at date of separation (shown in brackets), as well as travelling expenses where the amount was in excess of \$300.

*These employees received war duties supplements (see list).

†\$900 of this salary was transferred during the year to Vote 111—War Emergency and Youth Training and Relief.

During the fiscal year, minor overpayments of salaries occurred, due, in practically all cases, to the fact that the necessary information did not reach Treasury in time for the adjustments to be made. The administration is endeavouring to secure repayment.

The following employees, whose salary rates were under \$2,400 on that date, were paid travelling expenses in excess of \$300: W. J. Abel, \$334.74; F. T. Armstrong, \$476.70; R. E. Balfour, \$428.55; W. B. Batsford, \$909.94; R. M. Beck, \$405.80; C. Bellemare, \$689.54; F. Belliveau, \$666.44; A. Boivin, \$1,453.42; R. R. J. Bourque, \$507.75; A. A. Brittain, \$792.47; H. A. COMMENTS

The amount of the above vote was not subdivided in the Estimates details; the allotments were authorized by the Treasury Board.

A Under the provisions of the Relief Act, 1932, agreements were entered into with the Provinces for the purpose of providing a measure of self-sustaining relief to families by placing them on the land. Further agreements under the Relief Acts of 1934, 1935, 1936 and 1940 provided for continuity of settlement and also for additional placements of families. In organized municipalities the Dominion contribution amounts to one-third of the non-recoverable expenditures, the Provinces and municipalities contributing the balance; in unorganized municipalities, the Dominion and Province share such expenditures equally.

The following amounts were paid: Quebec, \$125,809.81; Manitoba, \$15,031.07; Alberta, \$2,764.36.

B The following amounts were paid the Provinces: Ontario, \$2,767.33; Manitoba, \$1,195.02; Alberta, \$16.

C Payments were made the Provinces as follows: Manitoba, \$78.19; Alberta, \$32,474.77.

D Under agreement dated October 31, 1940, with the Province of Quebec, the Dominion contributes toward the cost of constructing an intercepting sewer system in Quebec City. The amount was paid to the Province.

COMMENTS

The amount of the above vote was not subdivided in the Estimates details; the allotments were authorized by P.C. 7193, August 14, 1942.

The Vocational Training Co-ordination Act, c. 34, 1942, provides for entering into agreements with the Provinces for the provision of financial assistance for vocational training to fit persons for employment in agriculture, forestry, commerce or in any other primary or secondary industry in Canada for the purpose of contributing to the efficient prosecution of the war, and for the continuation of approved projects formerly carried on under the Youth Training Act, 1939. No agreement shall provide for payment to the Province of a percentage of the cost of any vocational training in excess of the percentage of such cost contributed by the Province.

The Act authorizes the formation of the Vocational Training Advisory Council, the members of which serve without salary but receive actual travelling expenses and a per diem allowance of \$10 for each day absent from home in connection with work of the Advisory Council.

Under the terms of P.C. 10/6172, August 13, 1941, P.C. 7595, August 26, 1942, and P.C. 246, January 19, 1943, the Dominion assumed the cost of moving workers needed to meet the demands of war industries and agriculture in cases where a sufficient supply of labour was not available locally. Expenditures made under the first two Orders in Council were on a non-recoverable basis.

Under the terms of P.C. 246, the cost of transportation of workers, their dependents and effects was advanced by the Dominion subject to repayment, provided that workers were deemed to have repaid to the Crown in respect of such advances five dollars for each week during which they remained in the new employment. Advances of this nature have been recorded as recoverable expenditures, but, as no administrative arrangements were made for reporting time worked in new employments, the accounts have not been credited with the relative money equivalents.

Payments for transportation of workers were also advanced on behalf of several large employers; such of these advances as were outstanding at March 31, 1943, are included in the amount of \$25,096.03 referred to below.

Recoverable expenditures amounting to \$25,344.78 were as follows: Transportation of workers, \$25,096.03; allowance for meals in transit, \$228.75; loans to workers, \$20.

Non-recoverable expenditures amounting to \$85,009.49 were as follows: Transportation of workers in war industries, \$61,473.10; transportation of workers in agriculture, \$455.93; transportation of workers' families, \$1,869.40; allowance for meals in transit, \$1,147.50; moving workers' household effects, \$7,185.58; separation allowances for workers' families, \$4,594.05; supplementary wage allowances, \$8,283.93.

Under P.C. 1665, March 4, 1942, and P.C. 946, February 5, 1943, the British Columbia Security Commission was created and assigned duties and powers to plan, supervise and direct the evacuation from protected areas in British Columbia of all persons of the Japanese race, and provide for housing, feeding, care, employment and protection of such persons.

At the commencement of the fiscal year, details of estimates of expenditures totalling \$3,000,000 were approved by Treasury Board; these details were according to the titles of primary allotments outlined below. Supplementary allotments for \$1,575,000 were subsequently approved in total. During the year, however, the amounts shown in the estimates details could not be adhered to and transfers between several of the primaries were approved by the Minister.

COMMENTS

A The tax on furs exported from the Northwest Territories is collected under authority of an ordinance established by the Commissioner in Council in accordance with section 10 of the Northwest Territories Act.

B Revenue of \$2,060.25 was derived from the issue of permits for the importation of explosives, magazine and factory licences collected in accordance with regulations established by the Governor in Council under authority of section 5 of the Explosives Act; royalty of \$2,721.34 was received in accordance with the terms of licence issued under Patent as authorized by the Commissioner of Patents under section 46 of the Patent Act.

The various charges for licences and permits in the National Parks, totalling \$135,436, are established by the Governor in Council, or the Minister, under authority of the National Parks Act. The charges for licences, etc., in the Northwest Territories amounted to \$62,290.86 and in the Yukon Territory, \$89,009.40, and are established under the authorities of the Dominion Lands Act, The Northwest Territories Act, The Yukon Quartz Mining Act, The Yukon Placer Mining Act, The Quartz Mining Claim and other regulations. In the Forest Service, timber permits and dues totalled \$57,496.67.

The revenue from water power leases of \$12,513.45 is derived from licences for water power developments issued under authority of the Dominion Water Power Act.

C Included under this heading are the proceeds of the sale of the power plant at Banff at a price of \$247,849.57. Sales of ordnance and public lands are made under authority of departmental regulations established by the Governor in Council in accordance with the provisions of the Dominion Lands Act, The Public Lands Grants Act, or the Ordnance and Admiralty Lands Act.

The price scale for maps and plans, the sales of which totalled \$22,227.19, are set by the Governor in Council under authority of the Dominion Land Surveys Act, section 6, and in some cases of map sales, by Ministerial ruling. Fees for hydrographic charts amounting to \$14,530.16 are set by departmental authority; distribution is also made by the Department and not by the King's Printer.

D Revenue collected from assays, analyses and various treatments of ore, etc. These fees are set by departmental authority.

Service charges and service fees for the National Parks totalled \$129,536.66 and are established under authority of the National Parks Act. They relate primarily to municipal and public utility services in the park townsites. The fees for tests in the Forest Service are approved by the Minister.

The Dominion receives contributions from the Provinces towards the cost of water power investigations; the amounts received during this fiscal year are as follows: Alberta, \$2,000; British Columbia, \$5,000; Manitoba, \$2,000; Nova Scotia, \$3,340; Ontario, \$8,500; Quebec, \$7,500; Saskatchewan, \$2,000.

Fees collected from white patients in Indian hospitals and from white children attending Indian day schools totalled \$1,169.23.

E The refunds with respect to transfer of water power developments to the Province of Manitoba are classified as follows: Capital charges due January 1, 1943: Lac Seul, \$22,766.93; Lake of the Woods, \$43,420.63. Operating charges for calendar year 1942: Lac Seul, \$17,387.49; Lake of the Woods, \$6,146.46. These refunds are collected under the authority of the Manitoba Resources Act, chapter 29 of the Statutes of 1930, and represent the amortization of, and interest upon, the capital outlay by the Dominion in securing water storage in the Lake of the Woods and Lac Seul and the portion of the expense of this storage paid yearly from the Departmental votes which are chargeable to water power in Manitoba.

G According to the terms of agreements, repayments of loans were received from the following companies: Chromite Limited, Montreal, Quebec, \$4,898.98; R. T. Gilman, Madoc, Ontario, \$5,028.06; Orford Mining Company Limited, Sherbrooke, Quebec, \$771.58; Reliance Fluorspar Mining Syndicate Limited, Madoc, Ontario, \$1,287.12. These companies have received loans from the Dominion to assist them in the production of strategic minerals. For standing of loans see Mines and Geology Branch War expenditures under details of item for Strategic Minerals—Exploration and Development Work.

A grant of \$20,000 was made in 1941-42 to the Yukon Council for construction of a road and bridge in the Haggart Creek-Dublin Gulch area of Mayo District, Y.T., and the amount of \$1,346.30 was not required and therefore returned to the Receiver General.

Practically all of the amount of \$57,787.29 shown under Immigration Branch consists of repayments of advances made to Canadian Nationals outside of Canada.

E The expenditures consist of: coal, \$2,053; coal oil, \$668.17; dog food, \$1,244.91; electrical supplies, \$304.92; fuel oil, \$309.22; gasoline and oil, \$4,947.64; hunting and fishing supplies, \$994.34; medical supplies, \$1,300.19; photographic supplies, \$329.51; provisions, \$16,077.24; sundry supplies, \$3,262.68.

F This expenditure is as follows: travelling expenses of employees, \$5,810.46; of others, \$2,521.67. Employees whose expenses were in excess of \$300: J. A. Bildfell, removal expenses, \$670.90; W. N. McKee, removal expenses, \$598; M. Meikle, \$522.83.

The increase in this allotment was due to expenses of transferring the Eskimos involved in the Belcher Islands murders, unforeseen expenses in connection with the removal of medical officers and families, also unusual expenses in the transportation of destitutes.

H The increase in this allotment was due to purchase of fire fighting equipment which had not been anticipated when the estimates were prepared.

I Assistance in the maintenance of hospitals and schools accounts for the greater part of the expenditure. Under authority of ordinances, payment at the rate of \$2.50 per day is made for the treatment and maintenance of indigent patients in hospitals. Grants are made to the Church of England and Roman Catholic authorities toward the maintenance of day and boarding schools. Maintenance in hospitals and institutions amounting to \$40,774.15 was paid to the following: Aklavik, All Saints Mission, \$5,561.93; Roman Catholic Mission, \$1,552.50; Brandon, Man., Mental, \$724.05; Calgary, Alta., Central Alberta Sanatorium, \$769.76; Chesterfield, Ste. Theresa's Hospital and Industrial Home, \$9,809.05; Dartmouth, Nova Scotia General, \$651.85; Edmonton, Alta., Convent of Our Lady of Charity, \$412.50; Fort Resolution, St. Joseph's, \$2,217; Fort Simpson, Ste. Marguerite's, \$1,097.50; Fort Smith, Roman Catholic General, \$1,654; Hay River, St. Peter's, \$522.50; Pangnirtung, St. Luke's Hospital and Industrial Home, \$13,232.49; Ponoka, Alta., Provincial Mental, \$2,365.27; sundry, \$203.75. Grants to day schools amounting to \$3,812.50 were as follows: Church of England Missions, Aklavik, \$400, Baker Lake, \$250, Eskimo Point, \$62.50, Fort Simpson, \$125, Pangnirtung, \$125; Roman Catholic Missions, Aklavik, \$400, Fort Providence, \$400, Fort Resolution, \$400, Fort Simpson, \$150, Fort Smith, \$500; Fort Smith Public, \$500; Yellowknife Public, \$500. COMMENTS

This vote provides for the operation of Forest Products Laboratories of which there are three units, namely: the main laboratories at Ottawa; a pulp and paper division at Montreal, in the operation of which the Canadian Pulp and Paper Association and McGill University participate; and a branch laboratory in Vancouver, housed in the buildings provided by the British Columbia Government.

The amounts expended at these laboratories were as follows: Ottawa, \$67,892.33; Montreal, \$37,808.09; Vancouver, \$29,527.81.

- A As of March 31, 1943, there were 57 employees paid from this allotment. The following were receiving annual salaries of \$2,400 or over on that date: J. B. Alexander, \$2,880; M. J. Brophy, \$3,480; R. M. Brown, \$4,320; H. W. Eades, \$2,700; E. S. Fellows, \$3,000; C. W. Fritz, \$2,880; C. Greaves, \$3,300; J. D. Hale, \$3,240; J. F. Harkom, \$3,480; T. A. COMMENTS

Treasury Board authorized the change in the Primary Allotments from the form set out in the Estimates Details, as in the opinion of the Department, circumstances rendered it desirable that the vote should be administered and controlled by the specific services indicated by the Special Committee of Parliament at the time the vote was first provided.

During the Session of 1926-27, a Special Committee of the Senate and House of Commons dealt with matters pertaining to Indians, more particularly the policy adopted in the early days of paying annuities to individual Indians. Upon consideration of the changed conditions throughout the country, the Committee found that the need and usefulness of such per capita payments to Indians in British Columbia would be negligible, and recommended that, in lieu of payments to them such as allowed in other provinces, a sum of \$100,000 should be expended annually on technical education, provision of hospitals and medical attendance, and in the promotion of agriculture, stock-raising and fruit culture, and in the development of irrigation projects. The said purposes would seem to be far more applicable to the Indians in their present condition than the payment of any per capita amount.

The recommendation of the Committee was approved by Parliament at the 1926-27 Session.

J As of March 31, 1943, 2 employees were paid from this allotment. A. L. McQuarrie received \$4,620 and H. E. Gerry \$1,800. Payment of \$41,029.90 was made to various hospitals for care and maintenance of patients. St. Paul's, Vancouver, received \$8,727.85 of this amount. Travelling expenses were: H. E. Gerry, \$629.50; A. L. McQuarrie, \$891.92; sundry, \$590.58.

K The expenditure is classified as follows: farm equipment maintenance and live-stock, \$7,091.11; improvements, clearing land, etc., \$4,434.28; seed and fertilizer, \$12,341.75; sundry, \$2,947.

L Expenditures on projects in the various agencies follow: Kamloops, \$6,002.84; Kootenay, \$1,121.16; Nicola, \$651.97; Okanagan, \$999.75; generally, \$2,140.31. Salary of engineer W. C. Warren was \$2,700, less \$700 paid from Vote 148.

M Ten residential schools received a total of \$6,694 for the services of manual training instructors. The remainder was expended in the purchase of equipment and educational supplies.

C The following emigration officers, resident in the United States, were paid a living allowance authorized by the Civil Service Commission, salary rate is shown in brackets: Boston, W. E. Bernhardt, \$399 (\$1,920); Seattle, W. F. S. Creery, \$285 (\$2,100), R. E. Fitzgerald, \$285 (\$1,800).

D Overtime was paid to immigration officers in accordance with Section 86 of the Civil Service Regulations approved under Section 16 of the Civil Service Act. Officers entitled to overtime are those in receipt of an annual salary of less than \$2,100.

H The expenditure for uniforms is in accordance with Section 75 of the Immigration Act which directs that uniforms shall be supplied officers and one-third of the cost shall be paid by them. The expenditure shown under this allotment is the two-thirds of the cost of the uniforms.

J To this allotment is charged the cost of catering service and canteen provisions supplied at the following ports (receipts from the sale of meals and from the per diem fee for the care of detained immigrants, etc., credited to this allotment are shown in brackets): Halifax, \$26,140.43 (\$48,274.69); Montreal, \$5,134.88 (\$7,679.32); Winnipeg, \$55.88 (\$44.40); Vancouver, \$7,689.95 (\$12,382.50); Victoria, \$53.45 (\$69.25); sundry ports, \$9.60. Therefore expenditures totalled \$39,084.19, while receipts were \$68,450.16, resulting in a credit balance of \$29,365.97. This result does not include the salaries of cooks, waitresses, etc., which are charged to Allotment A. The following received payments of \$5,000 or over for provisions: H. E. Burgess & Co., \$7,347.39; Howards Limited, \$5,320.58.

L Included are legal expenses of \$675.15; also a grant of \$500 paid to David C. Lamb of the Salvation Army while engaged in preparing reports in connection with settlement of immigrants in Canada.

Vote 472 Payment to Indian Trust Funds of the amount of expenditures incurred on account of the Agency House at Fort Frances, Ontario		18,691 00
Expenditures		18,690 75
Lapsed	\$	25

COMMENTS

An Order in Council was passed in March, 1925, authorizing the purchase of a house and land for agency purposes from Trust Account number 77. As this land was confirmed as an Indian Reserve in 1915, it was decided that the expenditure incurred was not a proper charge against this account and the above item was inserted in the 1942-43 Estimates.

The expenditure from 1925-26 to 1941-42 amounts to \$18,690.75, including an amount of \$8,390.43 simple interest at 5 per cent.

- A This is the active account. The balance represents the amount of principal outstanding after crediting the amounts collected for principal on account of seed grain loans issued up to 1926 under authority of the several Seed Grain and Relief Acts and amounts written off to the non-active account. Interest amounting to \$8,408.58 was collected during the fiscal year and credited to Department of Finance Revenue—Return on Investments. The non-active account is exhibited on a preceding page hereof.
- B This account is operated under the authority of section 94b of the Indian Act. Under the Act, the Superintendent General is empowered to make loans to Indian Bands, groups of Indians or individual Indians, under regulations established by the Governor in Council. The purpose is to render assistance in agricultural and handicraft pursuits. The loans outstanding may at no time exceed \$350,000.
- C This account represents the outstanding balance of Canadian Government share of passage loans furnished to migrants under the Empire Settlement Act 1922, on a shareable basis with the United Kingdom. As the scheme is now terminated, the 1942-43 transactions consist only of repayments by the individuals to the Dominion Government and reimbursement of the Government of the United Kingdom of its share of these repayments.

COMMENTS

- A This account is maintained for W. M. Cory, Solicitor in the Department, who is Public Administrator and Official Guardian for the Districts of Franklin and Keewatin, Northwest Territories. Deposits represent moneys received for estates in the hands of the Administrator and withdrawals are made under his direction.
- B The Indian Trust Fund represents the funds belonging to the Indian Bands throughout Canada. Receipts were derived from: earned interest, land sales, land rentals, mining dues, timber royalties, oil land rentals and fines. Expenditures comprised: capital and interest distributions, relief expenditures, band loans, agricultural assistance, road construction and repair and enfranchisement payments.
- C This account represents fines, cash bonds, deposits, etc., collected under the Immigration and Chinese Immigration Acts and held in suspense pending final disposal either by refund to the original depositors or forfeiture to the Government.

GENERAL COMMENTS

The Department of Munitions and Supply Act, proclaimed on April 9, 1940, created a department to replace the War Supply Board. The Act empowers the Minister:

- (a) exclusively to acquire or produce munitions of war and supplies and carry out defence projects required by the Department of National Defence, with certain exceptions having to do with defence projects constructed in Canada by persons in the employ of His Majesty, or supplies and defence projects which the Department of National Defence may, at the request of the Minister of Munitions and Supply, purchase or carry out itself;
- (b) to mobilize, control, restrict or regulate to the extent deemed necessary any branch of trade or industry in Canada or any munitions of war or supplies;
- (c) to examine into, organize, mobilize, co-ordinate and conserve the resources of Canada contributory to, and the sources of supply of, munitions of war and supplies and the agencies and facilities available for their supply and for the construction and carrying out of defence projects, and to explore, estimate, and provide for the fulfilment of the needs, present and prospective, of the Government and the community.

If authorized by the Governor in Council, the Minister is empowered to act for the Governments of the United Kingdom and of any allied or associated power, in much the same manner as for the Department of National Defence. To date the Minister has been empowered to act for fourteen such allied or associated powers.

The above functions have resulted in the incorporation of a number of government-owned companies and in the construction, equipping and operation of plants in Canada under private management either to increase existing production facilities or to create new facilities.

As one means of carrying out the functions of mobilizing, co-ordinating and conserving Canada's resources, controllers have been appointed for aircraft, chemicals, coal, construction, machine tools, metals, motor vehicles, oil, power, rubber, ship repairs, steel, supplies, timber, transit, transport and wood fuel.

As originally enacted, the Department of Munitions and Supply Act provided that, in cases in which the amount involved in any proposed contract exceeded five thousand dollars, the proposed contract could not be entered into by the Minister until authority to do so had been granted by the Governor in Council and, if a lesser amount was involved, the Minister might enter into such proposed contract without authority from the Governor in Council. In the event of an alteration of a contract resulting in the total amount of expenditure involved exceeding that of the original contract by five thousand dollars, the authority of the Governor in Council for such alteration was to be sought.

This provision of the Act was amended by P.C. 6036, August 19, 1941, so that the Minister might enter into any contract involving up to but not exceeding fifteen thousand dollars without authority from the Governor in Council. The Minister is required to report to the Governor in Council all such contracts entered into, which involve amounts in excess of five thousand dollars, but not exceeding fifteen thousand dollars, as soon after their execution as practicable.

Where contracts are let by the Department for the United Kingdom Government, a special staff is maintained to handle the accounts and records of all transactions along the lines prescribed by that Government. Treasury maintains a current audit of the accounts and, in addition, disburses funds provided to meet such expenditures. In addition, the Auditor General makes an independent examination and reports direct to the United Kingdom Government.

CONTRACTS

Section 13 of the Munitions and Supply Act, as amended, reads in part as follows:—

- (2) Every person who has entered into a munitions contract shall keep detailed accounts and records of the cost of carrying out the same and shall, on demand, produce to any person thereunto authorized by the Minister, every account, record or document of any description in respect to such contract required by such person and shall permit him to examine, audit and take copies of or extracts from the same.
- (3) If the Minister is satisfied that the accounts or records kept by a person who has entered into a munitions contract are insufficient to enable the cost of carrying out the same to be determined, the Minister may by order reduce the total amount paid and payable to such person under the contract to an amount which, in the opinion of the Minister, represents the fair and reasonable cost of carrying out the contract plus a fair and reasonable profit and the Minister may direct such person to pay to the Receiver General of Canada forthwith any amount which such person has received under the contract in excess of the amount fixed by the Minister.
- (4) If the Minister is satisfied, upon an examination of the accounts and records of a person who has entered into a munitions contract, that the contract price paid and payable to such person contains an unreasonable profit, he may direct such person to re-negotiate the contract price and may direct that there be withheld from such person any amount of the contract price which in the opinion of the Minister represents an unreasonable profit, and may direct such person to pay to the Receiver General of Canada forthwith any amount which such person has received which, in the opinion of the Minister, represents an unreasonable profit.
- (5) Where a person has entered into a munitions contract on or after the ninth day of April, nineteen hundred and forty, which provides in effect that such person shall be paid the cost of carrying out the contract or any part thereof with or without a profit or fee, or that the price or prices specified in the contract may be adjusted or reduced to an amount which represents the cost of the work or service to be carried out or rendered under the contract plus a fair and reasonable profit and any part of the work or service is carried out or rendered by any other person (in this subsection called a "Subcontractor"), the Minister may, if he is satisfied either before or after the performance of the contract that the total amount paid and payable to the subcontractor for the work carried out or the service rendered by the subcontractor is in excess of the fair and reasonable cost thereof plus a fair and reasonable profit, by order reduce the total amount paid and payable to the subcontractor for such work or service to an amount which the Minister may fix as the fair and reasonable cost of the work or service plus a fair and reasonable profit, and he may direct the subcontractor to pay to the Receiver General of Canada forthwith any amount which he has received for the work or service in excess of the amount so fixed.

Firm Price Contracts.—In this type of contract, which is employed where practicable by the Department of Munitions and Supply, fixed prices are furnished the Department by the contractor.

As these contracts are let by competitive tender, the effect of competition is presumed to provide a check against excessive profits.

For certain kinds of equipment not previously manufactured in this country, or technical in character, and where the department was unable to obtain accurate knowledge of the contractor's costs, the establishing of various types of contracts, hereinafter described, became necessary.

Ceiling Price Contracts.—Contracts quoting ceiling prices subject to limitation of profit clauses are divided into three main classes: percentage profit, fair and reasonable profit and self audit. The majority of contracts quoting ceiling prices are of the percentage profit type and provide for an audit of the contractor's books by the Chief Cost Accountant if so desired by the Department of Munitions and Supply. Contracts containing fair and reasonable profit clauses provide for a similar audit if desired but no limitation of profit is stated. Self audit contracts require the contractor to submit statements of cost in accordance with Costing Memorandum Form, M & S 433 (P.C. 6284, 20/7/42), to the Department of Munitions and Supply on completion of contract. While 5 per cent profit on cost was the most frequent ratio noted, contracts for certain types of equipment provided for $7\frac{1}{2}$ per cent or 10 per cent profit.

Some contracts limiting the contractors to specified rates of profit provide for the declaration of profits by the contractor and the rebate of any in excess of stated rate, but where it is decided to provide contingently for a Government examination of the contractor's books, the following audit clause (effective February 18, 1942, by amendment of Instruction Letter No. 29, Department of Munitions and Supply) is employed:

"It is understood and agreed that the price quoted in this order is a 'ceiling price' and is subject to adjustment as hereinafter provided.

You agree to keep such records with respect to this order as are required by Costing Memorandum Form, M & S 433 attached hereto, and that such records may be audited by a Government Auditor if the Minister of Munitions and Supply shall deem it advisable that such audit be made.

It is understood and agreed that if such an audit should be made and should disclose that the profit accruing to you on this order is in excess of per cent on your actual cost determined as aforesaid, the price herein quoted shall be adjusted downward so that the profit on this order shall be not more than per cent on such actual cost, and that if any payment shall have been made hereunder before the making of such audit and any price adjustment based thereon, the amount (if any) overpaid to you will be repaid by you upon demand, or, at the option of the Minister, may be deducted from any amounts thereafter becoming payable to you under this order or from any other moneys payable to you by His Majesty."

Other ceiling price contracts limit the contractors to fair and reasonable profits, and audit reports submitted by the Treasury Cost Accounting Division merely set out the costs and the profits realized, since the determination of what is fair and reasonable is an administrative function and not one resting on the Treasury Cost Accounting Division.

Some contracts in this class provide that the profits determined as a result of cost audits are subject to the approval of the Governor General in Council. Others provide for the determination of a fair and reasonable profit by the Minister of Munitions and Supply, in which case either of the following two audit clauses (effective February 18, 1942, by amendment of Instruction Letter No. 29, Department of Munitions and Supply) is employed:

- (1) "It is understood and agreed that the price quoted in this order is a 'ceiling price' and is subject to adjustment as hereinafter provided.

You agree to keep such records with respect to this order as are required by Costing Memorandum Form, M & S 433 attached hereto, and that such records may be audited by a Government Auditor if the Minister of Munitions and Supply shall deem it advisable that such audit be made.

It is understood and agreed that if such an audit should be made and should disclose that the profit accruing to you on this order is in excess of a fair and reasonable profit, the price herein quoted shall be adjusted downward so that the profit on this order shall be such as is, in the opinion of the Minister, a fair and reasonable profit,"

- (2) "It is understood and agreed that the price quoted in your tender of which this document is an acceptance is a 'ceiling price' and that such 'ceiling price' is estimated by you to contain not more than a fair and reasonable profit. You agree that you will keep sufficient and adequate records of the cost of this work so that such cost may from time to time be determined in accordance with the provisions of the Department of Munitions and Supply Form M & S 433 entitled 'Costing Memorandum' and that such records may at any time and from time to time be audited by a Government Auditor to ascertain the actual cost of the work then performed for this order. Such audit or audits shall be made at any time or times at the discretion of the Minister, but not later than four (4) months after the Company has notified the Minister that the said

records of the work then completed are sufficiently complete to enable the cost of the said work to be determined. Provided that if the said records are complete as aforesaid and any such audit be not made within four (4) months after notification as aforesaid, the Minister agrees to accept the certificate of the auditors of the Company as to the actual cost; determined as aforesaid, of any such completed work.

It is further understood and agreed that the right to make the audit hereinbefore referred to shall be in addition to any rights of His Majesty and does not limit and shall not be taken to be a limitation of any right of His Majesty to make an audit of the Company's books which may now or hereafter exist otherwise than hereunder nor shall the acceptance of the certificate of the auditors of the Company as above provided in any way limit the right of His Majesty to make an audit of the Company's books under any authority other than this provision.

It is further understood and agreed that, if such audit should establish that the profit accruing to you on this order is in the opinion of the Minister in excess of a fair and reasonable profit, the said quoted price shall be adjusted downward so that the said profit shall be, in the opinion of the Minister, fair and reasonable."

This audit clause then continues with provision for arbitration if the Company should not consider the profit, as so determined by the Minister, fair and reasonable.

In self audit contracts, the following audit clause (effective February 5, 1943, by amendment of Instruction Letter No. 29, Department of Munitions and Supply) is employed:

"It is understood and agreed that the price quoted in this contract is a 'ceiling price', and that such 'ceiling price' is estimated by you to contain a profit of not more than per cent on the actual cost (excluding special depreciation) related to this contract, determined, in so far as your established costing methods permit, in accordance with Costing Memorandum Form M & S 433 and does not include any item of cost (including overhead charges) which would not be admissible under the Costing Memorandum.

It is further understood and agreed that you will keep cost records with respect to this contract, as above set forth, and when this contract has been completed you will send to this Department a statement of your costs, determined as aforesaid, certified by one of your responsible officials, on M. & S. 1050, and of the percentage of profit realized with respect to this contract. If the profit realized is in excess of per cent, it is understood and agreed that you will refund the excess to this Department."

"Cost Plus" Contracts.—The "cost plus" contract is employed occasionally in construction projects where problems of labour, transportation and difficulties attendant on locality and nature of terrain preclude an accurate estimate of requirements and have a resultant effect on cost. The standard form of this type of contract provides for payment of a fixed fee on the original estimate of cost, with a percentage allowed on excess over that amount. In major projects, charges are verified by a resident representative of the Treasury Chief Cost Accountant attached to the Department of Munitions and Supply.

To some extent "cost plus" contracts are negotiated for production of specialized equipment not standardized as to cost and where it is anticipated that changes in specifications or revision of production schedules may be required. There is, in most instances, a provisional billing price for deliveries negotiated which is subsequently adjusted as related costs become known and are verified by Government audit.

In the majority of construction contracts where the contractor is to receive the cost of performing the work plus a profit, the elements of cost are defined and a fee is usually fixed "to cover the entire profit of the Contractor and the necessary services of all executive officers of the Contractor, and also all overhead expenses of the Contractor at its head office and at any regularly established branch office, including, but without limiting the generality of the foregoing, services of the purchasing, accounting, estimating and contract departments at such head office or regularly established branch office." The cost of the work as defined usually includes provision for "such other items of cost as shall be properly and reasonably incurred by the contractor solely for the purposes of the work, provided that any such item must be approved by the Director of Construction of the Department of Munitions and Supply."

Target Price Contracts.—The target price contract is sometimes used where a fixed price cannot be established at the time the contract is let. Under this arrangement, the target price set is accepted by the contractor for the first five or ten per cent of the amount of his contract. When, after an audit, the actual costs are found to be equal to, less than or more than the target price, varying amounts of profit are allowable on the target quantity only. The Treasury Cost Accounting Division reports to the negotiating officers the actual cost in accordance with Costing Memorandum Form, M. & S. 433

for the target period, and also the estimated cost for the balance of the contract. The negotiating officers then arrive at a fixed price for the remainder quantity and to this extent it then becomes a fixed price contract.

Arms and Ammunition Contracts.—Due to the diversified nature of the manufacturing program for arms and ammunition, it is necessary for the Department of Munitions and Supply to develop a production program on a component basis supplying processed components to each successive processor as a "free issue".

Difficulties in billing the Department of National Defence have been experienced due to the delay in arriving at fixed prices for certain components and due also to the fact that some contracts are entered into jointly with the United Kingdom.

In order to co-ordinate the extensive production program and to provide interim financial assistance to government-owned, partly government-owned, and private companies, Munitions Production Revolving Funds were created under the provisions of P.C. 1/2064 and P.C. 36/84 dated March 17, 1942, and January 6, 1943, respectively, which are administered by the Department of Munitions and Supply.

Due to the assistance provided by the Revolving Funds and to progress made in pricing components and assemblies, a marked improvement in billing the Department of National Defence was noted in the last quarter of the fiscal year.

The foregoing applies also to tank contracts, and contracts for other fighting vehicles.

Automotive Equipment Contracts.—A large portion of automotive equipment, including spare parts and accessories, is supplied by Chrysler Corporation of Canada, Ltd., Ford Motor Company of Canada, Ltd., and General Motors Products of Canada, Ltd.

Purchases from these companies are made under master agreements, dated August 20, 1941. These agreements were entered into in order to standardize the contract terms under which automotive equipment is produced.

Contracts are placed at ceiling prices but the contractors have, under date of January 11, 1941, entered into agreements with the Crown, whereby their profits on government contracts are restricted to a maximum of 5 per cent of cost.

These agreements covered the calendar year ending December 31, 1941, and are to continue from year to year thereafter unless terminated by mutual agreement.

A continuous audit of the costs of each contractor is being conducted by the Cost Accounting Division of the Office of the Comptroller of the Treasury and when costs of production in accordance with Costing Memorandum Form, M. & S. 433, and the profits realized are determined, any profit in excess of 5 per cent is refunded.

Contracts for Chemicals and Explosives.—Due to the fact that many of the chemical plants are wholly government-owned or in receipt of financial assistance, a government-owned company known as Allied War Supplies Corporation was created to manage the entire chemical output. Contracts are let to Allied War Supplies Corporation by the Department of Munitions and Supply and in turn are allocated to the various filling or chemical plants. In common with other production pool products, payment of purchases by the Department of National Defence is made in two ways. Prior to January 1, 1943, shipments were billed by the Department of Munitions and Supply which in turn credited the payment to financial assistance previously supplied to individual plants. Subsequent to January 1, 1943, payment is made directly to the plants as and when each has been placed in a position to do its own billing and collecting. Prices are set by the Pricing Committee of the Department of Munitions and Supply. These contracts are for the purchase of chemicals and explosives separately and do not include the filling of ammunition.

Contracts for Tire Assemblies.—Contracts for the purchase of tires are let at a ceiling price but vary considerably from ordinary audit contracts. These contracts call for an 80 per cent advance payment on a monthly production basis. This advance payment is made in accordance with the provisions of P.C. 2274, dated April 4, 1941. The 20 per cent balance is paid on delivery. Refund of all payments in excess of 5 per cent profit on cost is required. Some difficulty was experienced due to cancellation of certain contracts after payment of production advances, but all necessary adjustments were made on the receipt of refunds from companies concerned.

Examination of Contractor's Records.—P.C. 153 of January 9, 1942, provides "that in the case of any contract heretofore or hereafter entered into by the Minister of Munitions and Supply, in the name of or on behalf of His Majesty, in which a price is specified for the work or material to be performed or supplied thereunder (whether or not such price is referred to as a 'ceiling' price) but which contains provisions to the effect that an audit may be made of the contractor's records as to the

costs incurred in carrying out the contract, and that based upon the facts disclosed by such an audit as to the amount of the contractor's profit under such contract the price may be adjusted downwards, the said Minister shall not be obligated or required to cause such an audit to be made unless he shall determine that in view of the particular circumstances, the making of such audit is necessary or is required in the public interest." The Order in Council provides further that this "shall not extend or be applicable to a contract under which the contractor is entitled to payment on the basis of the costs incurred in carrying out such contract plus a specified fee or rate of profit (hereinafter in this paragraph called a 'cost plus' contract) or to a contract the terms of which expressly require that an audit be made; provided, however, that a contract shall not be deemed to be a cost plus contract or to require an audit to be made by reason only of the fact that such contract may provide that an audit may be made and that, if so made, the price specified in such contract may be reduced or otherwise adjusted."

The cost audits referred to in the preceding paragraphs, other than "self-audits", are carried out by or under the direction of a special branch of the Office of the Comptroller of the Treasury, known as the Treasury Cost Accounting Division, created in May, 1940, by mutual agreement between the Department of Munitions and Supply, the Comptroller of the Treasury and the Auditor General of Canada.

The Chief Cost Accountant is not required to audit contracts subject to cost audit, unless and until he is requested to do so by the Department of Munitions and Supply when such audit is mandatory by the terms of the contract.

In addition to Headquarters staff, branch offices have been established at Halifax, Saint John, Montreal, Toronto, Winnipeg, Calgary, Vancouver and Victoria. Also, Resident Cost Accountants and assisting staff are provided at projects as required at various points in Canada, Newfoundland and Labrador.

Under the provisions of P.C. 455, dated January 21, 1942, certain audits of sub-contractors are carried out by public accounting firms, in accordance with audit procedure and instructions issued by the Chief Cost Accountant.

As at March 31, 1943, the Division had completed 6,465 specific audits of various types and was carrying out 481 continuous audits of various classes. In addition, 5,347 audit requests were either in progress, awaiting assignment of staff or awaiting completion of work by contractor and submission of costs.

Most of the work is on continuous audits of pre-financed projects, construction jobs, investigation of target and remainder costs, emergency ship repair agreements, escalator clause claims and so on. On the relatively minor portion of cost audits involved in ceiling price contracts, substantial refunds have been obtained.

Reports on audits of ceiling price and target contracts enable the negotiating officers of Munitions and Supply to place subsequent contracts at favourable fixed prices, and the experience of the senior cost accounting officers is continuously availed of by such negotiating officers during pre-contract negotiations and also re-negotiations. The services of the Division are also utilized by other departments of the Government involved in war work.

During the year, arrangements were made with the United Kingdom Government for the acquisition of its investment in war plants in Canada.

P.C. 1752, March 5, 1943, transferred to the Minister of Munitions and Supply the administration of the Domestic Fuel Act and the "Act to place Canadian coal used in the manufacture of iron and steel on a basis of equality with imported coal" (20-21 Geo. V, c. 6), and the regulations pursuant to such Acts and the several Orders in Council authorizing assistance to the movements of coal, together with the appropriations granted under Votes 69 and 70 of the Main Estimates, 1942-43. The appropriations and continuing statutory provisions transferred under the above authority were \$4,527,415 and \$439,168.59 respectively.

The above order further provided for the administration by the Minister of Munitions and Supply of the Emergency Coal Production Board (established by P.C. 10674, November 23, 1942). In conformity with this provision, the estimated cash requirement for the Board, which was included in the war allotment of the Department of Finance, to an amount of \$450,000, together with expenditures, was also transferred to this Department. An additional allotment for the Board was required for the fiscal year in an amount of \$800,000.

In reporting expenditures chargeable to this department, consideration has been given to agreements between the Minister of Munitions and Supply and the Governments of the United Kingdom and of the United States with respect to refraining from the publication of information which might be of value to the enemy.

Because of the nature of the expenditures made from year to year, it is felt that the cumulative picture is of equal, and perhaps of more, importance than the current one. Since the appropriation and allotment accounts deal only with the current situation, a balance sheet presentation has been included (see page K-30) which summarizes the expenditures from commencement of the war to March 31, 1943. It will be noted, though, that certain aspects of the information contained in the supporting schedules thereto supplement the details given in the appropriation and allotment accounts.

There are two appendices to this report. The first, commencing at page K-71, deals with the total cost of plants, the construction of which was financed jointly by the governments of the United Kingdom and Canada. These plants are also listed in various schedules in the report proper (items indicated by an asterisk), but the expenditure shown therein for such items is the Canadian portion only. The second appendix, commencing at page K-74, contains the operating statements and balance sheets, certified by the Auditor General of Canada, of Government-owned (Munitions) Companies.

Sub-Allotment: Acquisition of United Kingdom Assets	200,000,000 00
Expenditures	\$200,000,000 00

COMMENTS

This expenditure represents a payment on account made to the United Kingdom Government, authorized by P.C. 1569, March 1, 1943, and based upon a preliminary audit of a claim amounting to \$206,359,705.99. It is anticipated that final settlement will be made during the fiscal year 1943-44 and that Public Accounts for that year will contain full details of the various projects concerned.

For details of the claim see Schedule 6 to the Department of Munitions and Supply balance sheet, page K-50.

INVESTMENT IN PRODUCTION ASSETS

Expenditures under this heading have to do with the provision of working capital to government-owned and pre-financed companies to enable them to manufacture munitions, weapons and other war supplies including airplanes and ships, and also for the acquisition of special stores required for war purposes. Such expenditures are carried on the Department of Munitions and Supply balance sheet under a similar heading, see page K-30.

Originally, payments were made to the companies and to suppliers directly from, and receipts were credited to, the allotments provided, but the nature of the transactions involved seemed to indicate that it would be more practical to handle them through revolving funds.

Accordingly, the Munitions Production Revolving Fund was created by P.C. 1/2064 of March 17, 1942, and came into effect on April 1, 1942, being amended by P.C. 16/3017 of April 15, 1942. It has to do chiefly with plants in which the governments of the United Kingdom and Canada have a joint interest, and is generally referred to as the "Joint Production Pool". Under the provisions of P.C. 36/84, of January 6, 1943, four additional revolving funds were created: General (Munitions) Revolving Fund; Aircraft Production Revolving Fund; Ship Production Revolving Fund; and Miscellaneous Stores Revolving Fund. They came into effect on March 6, 1943. The first one is to take care of munition plants not covered by the operation of the Munitions Production Revolving Fund, while the purpose of the others seems clearly indicated by their titles.

As required, transfers of moneys are made from the allotments provided to these revolving funds, (which are carried in the Dominion Government accounts under the category of Contingent and Special Funds) and, conversely, any surplus moneys in such funds are returned to the allotments.

COMMENTS

The above covers government-owned companies whose operations have required the investment of fixed capital. Other Crown companies require no plant, their functions being either trading or supervising. The balance sheets and operating statements of all government-owned companies are included in Appendix 2, page K-74.

A This Company acquires and supplies machine tools to munitions plants. The credit for the current fiscal year represents the difference between the credits received covering the value of machine tools supplied to plants and the payments covering the value of inventories acquired by the Company over the same period.

B The amount shown as "estimated cost" is the amount approved to date by Treasury Board. The amount authorized by the Governor-in-Council is \$45,000,000.

C Represents remittances by Citadel Merchandising Co., Ltd., covering the amount realized on disposal of surplus Machine Tools which were transferred to the Company from various government-owned companies, etc., on instruction of the Department of Munitions and Supply.

COMMENTS

Some agreements provide for the payment of a fee, usually a fixed amount, during the construction period as full compensation for services rendered by the company. The amounts of such fees, where applicable, are shown in brackets below:

- A (\$3,000).
- B (\$50,000). The current credit balance represents recovery of previous year's expenditure.

- HH The current credit balance represents recovery of previous year's expenditure.

GENERAL

There are a number of cases where construction of Crown plants involved extensions or alterations to contractors' existing buildings. Such changes were financed by the Government but title remained with contractors, the total estimated amount involved being \$9,057,186. As the details of such expenditures become available, the relative amounts will be eliminated from the figures included in this schedule and charged to Profit and Loss account.

COMMENTS

A Under authority of P.C. 5279, dated July 2, 1943, title to that part of the plant which is not integrated in the Company's plant and is susceptible of segregation therefrom shall remain in the Government and upon the expiration of 5 years after the cessation of hostilities (being the term of the present operating contract) the Government will either lease the said plant to the Company upon terms to be agreed upon, or will enter into a mutually satisfactory agreement with respect to the maintenance thereof.

B A fee of \$19,080 has been authorized under this contract, to cover services and expenses not included in direct cost of plant extension for the manufacture of fire control units. A fee of 5 per cent profit has been authorized on the cost of the plant equipment made by the Company to produce Wireless Sets No. 19.

GENERAL

In a number of instances, title to the assets provided by capital assistance remains with the contractor, usually where the expenditures cover extensions to building or other immovables. The estimated amount involved is \$1,465,533.94, and when the details of actual expenditures become available, same will be eliminated from this schedule and charged to Profit and Loss account.

A i Government-owned Companies—

Atlas Plant Extension Limited:

This company acts as agent of the Department and makes loans to Atlas Steels Ltd. (Contractor) for two purposes: (1) plant extension; and (2) working capital. The plant extension loan is interest free; while the working capital loan bears interest at 4 per cent per annum. Additional interest may be collected in certain circumstances. The plant extension loan will be liquidated within a maximum period of five years. Annual instalments are made, the amounts of which depend on operating results. The working capital loan is to be repaid within one year after cessation of hostilities or termination of agreement.

Fairmont Company Limited,

Melbourne Merchandising Limited,

Plateau Company Limited:

The advances to the above companies are provided for the purchase, storage and disposal of various commodities. The administration and handling expenses of the respective companies are absorbed in sales. There is no charge for interest on such advances.

A ii Other Contractors—

Algoma Steel Corporation, Limited:

This loan is to be repaid by January 1, 1962. Annual instalments are to be made, the amounts of which are based on operating results. Extra payments may be made if desired.

John Bertram and Sons Company, Limited:

This loan was repaid during the current year.

Dominion Steel and Coal Corporation, Limited:

This loan is to be repaid by November 30, 1952. The company is to make quarterly instalments commencing November 30, 1942. Interest at 5 per cent per annum is assessed on arrears. No payments were received to the close of 1942-43.

English Electric Co. of Canada, Limited:

This loan is to be repaid by April 1, 1946. Annual instalments of 25 per cent of the loan are to be made. Interest at 6 per cent per annum is assessed on arrears.

Marine Industries Limited:

This loan is to be repaid in annual instalments, the amounts of which are based on operating results. If not fully repaid within six months after cessation of hostilities, there is provision for adjustment.

Steel Company of Canada Limited:

This loan is to be repaid by December 31, 1943. Annual instalments are to be made based on percentages of the loan. If it is not fully repaid when hostilities cease, there is provision for adjustment.

Union Drawn Steel Company Limited:

This loan is to be repaid on the basis of a fixed amount per ton of cold drawn steel produced, commencing January 1, 1942. If it is not fully refunded when hostilities cease, there is provision for adjustment.

A. C. Wickman (Canada) Limited:

This loan was repaid during the year.

B This account is in connection with the procurement of supplies for the United States Government in accordance with the terms of the Hyde Park Agreement.

COMMENTS

A In the early period of the war, both the Canadian and United Kingdom Governments provided their respective plants with working capital. However, due to the fact that munitions of war are, in large degree, manufactured as components in various plants—some of which might be owned by either one Government or the other, or jointly—it soon became a practical impossibility to follow each Government's equity in the production of munitions to the point of assembly.

Agreement was therefore reached between the two Governments to pool the financing of these plants, and P.C. 1/2064 of March 17, 1942, established this Fund for that purpose. Parenthetically, the arrangement is generally referred to as the Joint Production Pool.

The Pool commenced operation on April 1, 1942, with funds provided by way of advances from both Governments. The Pool also took over liability for outstanding working capital advances on that date. On the Dominion's account, these totalled \$61,700,748.41; but, for a number of reasons, the United Kingdom's equity in this regard had not been definitely determined at the close of the year. Hence, the standing of advances to individual plants as of March 31, 1943, is not given.

Details of expenditures in excess of \$5,000 during the fiscal year are as follows:

Net advances for working capital to prefinanced plants: Alberta Nitrogen Products, Ltd., \$1,419,960.60; Algoma Steel Corp., Ltd., \$1,611,000; Allied War Supplies Corp., \$14,100; Border Cities Industries Ltd., \$2,999,204.22; Canada Cement Co., Ltd., \$2,828,440.58; Canadian Car Munitions Ltd., \$24,457,962.56; Canadian Pacific Railway Co., \$31,140,935.89; Consolidated Mining & Smelting Co., Ltd., \$1,920,000; Defence Industries Ltd., Beloeil, \$126,800; Defence Industries Ltd., Bouchard, \$14,120,896.88; Defence Industries Ltd., De Salaberry, \$11,056,587.10; Defence Industries Ltd., Montreal, \$210,000; Defence Industries Ltd., Nobel, \$10,396,787.47; Defence Industries Ltd., Pickering, \$19,042,235.31; Defence Industries Ltd., Verdun and Brownsburg, \$24,499,117; Defence Industries Ltd., Villeray, \$1,720,000; Defence Industries Ltd., Westmount, \$1,020,000; Defence Industries Ltd., Windsor, \$433,900; Defence Industries Ltd., Winnipeg, \$7,908,000; Dominion Bridge Co., Ltd., \$3,002,247.14; Dominion Engineering Works Ltd., \$8,167,778.28; Dominion Magnesium Ltd., \$820,000; Electric Reduction Co. XXVIII Wood Pilings: Represents recovery of previous year's expenditure.

F This covers accruals of semi-annual deposits by Sorel Industries Limited for net depreciation charges assessed against that portion of the plant owned by the Governments of Canada and the United Kingdom. Under the contract, the Company is allowed to charge special depreciation rates on its portion of the plant, and similar rates are also required to be assessed on the Crown investment.

When the value of actual replacements in the Crown plant do not equal the amount of depreciation assessed, the unused balance is remitted and deposited in this account. The Company is permitted to draw upon this fund when the situation is reversed.

G H I J This account is credited with advances by other Governments for the purchase of war supplies, and debited with the value of the relative shipments.

K Deductions for Victory Bonds instalments from the weekly wages of prevailing rates employees at the Dominion Arsenals are deposited in this account, and cheques are drawn against it periodically in favour of the Receiver General and forwarded to the Department of Finance. The balance represents the instalments not yet remitted.

L Deductions from the salaries of employees of the Department, not paid by Central Pay Office, are deposited in this account, and cheques are drawn against it in favour of the Bank of Canada as the Certificates are fully paid. The balance represents the incomplete subscriptions at the close of the year.

M All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue, are credited to this account. The balance represents the liability in respect of this Department at the close of 1942-43.

N When cash is received from contractors and others without sufficient information for proper application of the credit, the funds are deposited in this account pending clearance.

DEPARTMENT OF MUNITIONS AND SUPPLY

APPENDIX I

JOINT PROJECTS WITH THE UNITED KINGDOM

At the commencement of the war, expansion programs for the production of munitions and supplies were undertaken in Canada both by the Canadian and United Kingdom Governments, through the medium of the Department of Munitions and Supply. The plants constructed by the United Kingdom Government were mainly concerned with the production of chemicals and explosives. However, it was not long before the requirements of both Governments necessitated the construction of plants whose output could be mutually shared, and there followed a program of joint projects.

As the requirements expanded and became more diversified, this method of joint investment extended into plants that were originally constructed by one Government or the other, with the result that it grew increasingly difficult to determine the individual interests.

However, it has been decided that the Canadian Government will purchase from the United Kingdom Government, their capital investment in munition plants in Canada as at March 31, 1943, and a preliminary payment of \$200,000,000 has been made.

The task of clarifying the accounts and determining the investment of the United Kingdom in these plants is well under way, and it is anticipated that final adjustment will be effected in the accounts of the coming fiscal year.

The acquisition covers plants wholly financed by the United Kingdom as well as those jointly financed with Canada; the following table however deals only with the latter:

APPENDIX 2

GOVERNMENT-OWNED (MUNITIONS) COMPANIES

In accordance with the powers contained in Section 6 (3) (a) of the Department of Munitions and Supply Act, the companies listed below were operating under agreements with the Minister as at March 31, 1943. The agreements provide in general that the Minister shall at all times have the right to exercise such control over the affairs and operations of the Company as he may in his absolute discretion think fit, and that the Company shall do or refrain from doing, as the case may be, all such things as the Minister may from time to time direct, and that all obligations of His Majesty under this agreement are conditional upon the Company acting accordingly.

In accordance with Section 6 (3) (c) of the above mentioned Act, the Auditor General is appointed as Auditor of such Companies, and the balance sheets and operating statements submitted herewith were furnished, and certified to, by him. Statements were not furnished for Veneer Log Supply Ltd. (its current fiscal year-end being August 31, 1943), or for North West Purchasing Ltd. (incorporated in February, 1943). The balance sheet of Fairmont Company Ltd. has been withheld for security reasons.

The assets referred to in the footnote on the balance sheets included in this appendix represent the Government's investment in plant and equipment, and were acquired from advances set out in Schedule 1 to the Department of Munitions and Supply balance sheet, see page K-32.

On Exhibit "B" to Wartime Housing Limited's balance sheet, there is shown expenditure of \$160,294.83 for additions and alterations, training school for merchant seamen, Hubbards Cove, N.S., and expenditure of \$293,155.23 for construction and equipping manning pool for merchant seamen, Halifax, N.S. The Department of Munitions and Supply authorized the amounts of \$135,000 and \$279,500 respectively for these projects.

On the balance sheet of Wartime Merchant Shipping Ltd., an amount of \$184,926,337.89 has been deducted from the liability to the Department of Munitions and Supply. Treasury records show this deduction as \$182,522,548.78 and this difference will be cleared on receipt of further advice.

The following is a list of the companies, together with a précis outlining the principal activities of each.

\$ 6,876,986 88

I have examined the accounts of National Railways Munitions Limited for the year ended March 31, 1943, and have obtained all the information and explanations I have required.

The amount of \$1,432,894.67 shown for the cost of the completed contract, not yet billed, includes a total of \$40,092.03 for management fees paid or payable to the Canadian National Railways, being \$9,971.20 in excess of the amount payable under the contract dated November 21, 1941, between the Minister of Munitions and Supply, the Canadian National Railways and the Company.

The amount of \$2,951,496.32 shown for Inventory of Work in Process, does not include additional charges, totalling \$94,344.50, applicable to materials and components transferred to the Company from the Montreal Locomotive Works Limited at the direction of the Department of Munitions and Supply.

Included in the amount shown for Inventory of Work in Process, is a capital loss of \$2,302.46, resulting from the transfer of certain Crown-owned capital assets to other munitions plants.

In my opinion, subject to the foregoing observations, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs as at March 31, 1943, according to the best of my information and the explanations given to me and as shown by the books of the Company.

NOTE: The amounts shown for the several classes of assets in the above statement, include the cost valuations carried in the records of the National Steel Car Corporation Limited, in respect of the assets acquired by the Crown for the use of the Company, at its inception. The amount shown for Donated Surplus, represents the excess of the cost valuations of the assets so acquired, over the actual cost thereof to the Crown, and largely corresponds to the relative special depreciation amounts allowed to the predecessor company by the Special War Contracts Depreciation Board. The amount shown for Machinery and Equipment should be regarded as subject to adjustment (with the amount of the Donated Surplus to be adjusted correspondingly) on the completion of an inventory of the machinery and equipment, presently in course of preparation.

Director.

I have examined the accounts of Wartime Metals Corporation for the period from March 17, 1942, the date of incorporation, to March 31, 1943, and have obtained all the information and explanations I have required.

The stores records maintained for general supplies, at the several mining projects, were inadequate. Physical inventories of such supplies, taken by two of the projects, revealed comparatively large variations from the relative book values in each case; and if similar variations are found when physical inventories are taken at other projects, further adjustments of the accounts maintained for Capital Expenditures and/or Development and Pre-Production Expenses will become necessary.

In my opinion, subject to the foregoing observation, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs as at March 31, 1943, according to the best of my information and the explanations given to me and as shown by the books of the Company.

WATSON SELLAR,
Auditor General.

COMMENTS

These grants are mainly for the purpose of encouraging and promoting interest in rifle shooting, assisting rifle associations in defraying expenses of annual prize meetings and assisting military associations.

Payments were made to associations and institutes as indicated in the expenditure column above. The comparatively large lapse of funds in this vote is due chiefly to the suspension of activities for the duration of the war of some of the Rifle Associations and Military and United Services Institutes.

(a) Expenditures incurred on behalf of Directorate of Public Relations and those of Experimental Station were included under Army Services prior to 1942-43.

(b) Prior to the fiscal year 1942-43 expenditures on internment operations were divided between the Department of the Secretary of State and the Department of National Defence. Pursuant to the provisions of P.C. 36/500, dated January 20, 1943, the appropriations allotted to and expenditures incurred by the Department of the Secretary of State in connection with these operations for the present fiscal year were transferred to this Department.

(c) P.C. 4012 of May 13, 1942, directed that all aspects of censorship be co-ordinated under the Department of National War Services. Accordingly the 1942-43 allotments both for commitments and cash purposes provided for this service were transferred to that department by T.226417B, dated June 26, 1942.

(d) Provided for under Army Services allotment commencing with the present fiscal year.

(e) Prior to April 1, 1943, records were not maintained by war allotments of refunds of previous years' war expenditure.

GENERAL COMMENTS

Sundry Services.—Included under the heading of Sundry Services in the following details of expenditures are the costs of services of a special nature and services which do not pertain entirely to one of the three main services, i.e., Army, Naval or Air Services.

Purchase of Material.—Aside from local purchase authority granted to various National Defence officials, the Department of Munitions and Supply purchases all material.

Contracts.—An outline of the various types of contracts utilized by the Department of Munitions and Supply in its purchasing transactions and in carrying out defence projects will be found in the section of this report pertaining to that Department.

List of Suppliers.—A list of amounts totalling \$10,000 or over paid to contractors and suppliers is given further on in this section.

Surcharges on Petroleum Products.—P.C. 3 of January 5, 1943, provides "that since April, 1942, in order to maintain established ceiling prices for petroleum products in the Province

of Quebec and the Maritime Provinces, the Wartime Prices and Trade Board, through the Commodity Prices Stabilization Corporation, Ltd., has paid subsidies to Imperial Oil Limited, Shell Oil Company of Canada, Limited, McColl-Frontenac Oil Co., Limited, and British American Oil Company, Limited, to compensate for surcharges imposed by the War Shipping Administration in the United States on tanker movements of crude oil and other petroleum products to Atlantic Seaboard Ports;

"That the prices for petroleum products under contracts placed by the Department for delivery to points in the Province of Quebec and the Maritime Provinces and for export from Atlantic Seaboard Ports were established prior to April, 1942, and have not been increased to compensate for the aforesaid surcharges but have been maintained at the level so established by reason of the subsidies paid by the Corporation;

"That purchases made by the Department are not subject to the price regulations administered by the Wartime Prices and Trade Board and, accordingly, arrangements have been made to relieve the Corporation from the payment of subsidies on petroleum products purchased by the Department by payment of surcharges thereon at rates established from time to time by the Corporation;

"That it is considered to be in the public interest that provisions be made for the payment of surcharges to the aforesaid companies for petroleum products delivered to points in the Province of Quebec and the Maritime Provinces or exported from Atlantic Seaboard Ports, supplied under contracts placed by the Department where such contracts do not anticipate or provide for such payment at the rates established from time to time by the Corporation in effect at the time of such delivery or export."

These surcharges became effective on April 1, 1942, and are subject to revision from time to time. Under this arrangement a payment was made to the Commodity Prices Stabilization Corporation, Ltd., in the amount of \$205,498.96 on contracts awarded by the Department of Munitions and Supply for deliveries of petroleum products to the Department of National Defence-Army from April 1 to November 30 inclusive in the Province of Quebec, the Maritime Provinces and also for certain deliveries in the Province of Ontario for petroleum products refined within the Atlantic Seaboard area. No surcharges were paid to the Commodity Prices Stabilization Corporation, Ltd., for exported products. Any contracts awarded by the Department of Munitions and Supply on and after December 1, 1942, for these products for delivery as noted above were to provide that the surcharge would be billed as a separate item on the invoices rendered by the suppliers.

Purchases in the United States.—Materials were procured from supplies in the United States through three main channels: private American contractors, the Government of the United States, and the British Ministry of Supply Mission.

Payment for purchases from private firms was made in advance of shipment by means of requisition for cheque submitted through the Department of Munitions and Supply. This prepayment plan developed from the provisions of the Neutrality Act which terminated with the entry of the United States into the war. With few exceptions, this plan is still being used and has developed considerable unliquidated advances which are retired by receipt of suppliers' invoices certified as to receipt of materials by officials of the Department of National Defence. Some difficulty was experienced during the fiscal year in obtaining certified invoices which caused a sharp increase in unliquidated advances. During the last two months of the fiscal year, a marked improvement was noted which reduced the advances to a more reasonable figure. Though a number of outstanding balances carried over from 1940-41 and 1941-42 were retired, some items for both years are still outstanding.

Certain supplies, by reason of priority, were obtained from the Government of the United States through the Office of Lend Lease Administration. Purchases of this nature are known as Canpay Requisitions and payment is to be made to the Treasurer of the United States. Prior to June, 1942, these items were handled on a prepayment basis similar to the plan developed for payment to private suppliers. This proved impractical due to difficulties experienced in the distribution of materials many of which were unavailable for long periods and large refunds of advances became necessary. The prepayment plan was abandoned in June, 1942 in favour of a monthly payment plan against actual shipments supported by certified vouchers (known as Shipping Tickets). No payments were made under the proposed new plan due to delays in setting up machinery to provide proper documentation and because the United States Government did not issue monthly accounts. An interim advance of \$18,000,000 in American funds was made in April, 1943, which is to be liquidated by certified shipping tickets during the fiscal year 1943-44.

Certain supplies not procurable from other sources were obtained from the British Ministry of Supply Mission in the United States. These items known as Canex Requisitions are to be paid against certified shipping tickets in Canadian funds. Due to the fact that arrangements in connection therewith were made late in the fiscal year, only a few transactions of this nature were completed.

Financial Adjustments with the United Kingdom Government.—Complete agreement for the settlement of costs incurred by the United Kingdom Government in respect of the Canadian Army in the United Kingdom and for the apportionment of costs of joint projects in Canada had not been reached at the close of the fiscal year. Arrangements in respect of some services are clearly established, however, and progress towards the establishment of satisfactory bases for the assessment of costs of others was made during the year.

Negotiations are at present being carried out between the Canadian and the United Kingdom governments in connection with capitulation rates to be used as a basis of settlement for payments to the United Kingdom government for supplies and stores other than initial equipment supplied to the Canadian Army. The former comprises rations, fuel, light, accommodation, medical supplies, use and maintenance of vehicles, petrol and lubricants, general stores, etc.

A schedule of rates concurred in by the administrative officials at Canadian headquarters, London, and tentatively agreed to by the British officials as a basis of settlement was submitted in March, 1943, to the National Defence headquarters, Ottawa, for consideration. At the end of the fiscal year the matter was still under advisement.

Generally, the financial arrangements in respect of the Canadian Army Overseas require all costs in connection therewith to be borne by Canada. Originally, it had been agreed that financial adjustment in respect of expenditure incurred by the United Kingdom Government on behalf of Canadian troops before such troops embarked from the United Kingdom for the field, would be on a basis of actual expenditure wherever possible. Payments on account to the United Kingdom Government have been made periodically, towards the maintenance of Canadian Army Forces in the United Kingdom. At the end of the fiscal year 1942-43, balances outstanding on such payments made since the beginning of the war totalled \$85,756,952.01.

Initial equipment supplied from British sources to Canadian Army in the United Kingdom.—These stocks comprise engineer stores, signal stores, certain types of vehicles, artillery equipment, small arms, artillery ammunition, small arms ammunition, medical stores, clothing and personal equipment, etc., supplied to the Canadian Army in the United Kingdom from time to time from British stocks.

For several months negotiations have been carried on between the two governments in connection with settlements for these supplies.

In March, 1943, a satisfactory conclusion was reached as to the basis of settlement and an amount of nine million, two hundred thousand pounds sterling was paid to the United Kingdom Government for initial equipment and supplies covering the period from the time the Canadian Army arrived in England to September, 1942.

Canadian Ancillary Troops in the United Kingdom: The division of costs in respect of these troops as from September 1, 1940, is shown below.

Canada is responsible for: pay and allowances, rations, barrack accommodation, barrack stores, barrack services, transportation to the United Kingdom, initial issues of clothing and personal equipment, hospitalization, postage and miscellaneous expenses, unit equipment in possession September 1, 1940, at a value agreed upon.

The United Kingdom is responsible for (until the units revert to the Canadian Higher Command): official transportation in the United Kingdom, replacements of clothing and personal equipment, fuel, gasoline, oil and ammunition. Canada is not prevented from supplying replacements of arms and equipment, and in the case of an exchange of articles (article for article or their equivalent in different kinds) the United Kingdom cost governs, except in respect of Canadian manufactures not produced in the United Kingdom.

Canadian Forestry Units in the United Kingdom: By mutual agreement, the Canadian Government is charged with the expenditures for pay and allowances, pensions, transportation to and from the United Kingdom, initial personal equipment, stationery, postage and telephones. The United Kingdom absorbs all other costs connected with equipment, work or maintenance.

Joint United Kingdom and Canada Ordnance Depot: This depot, situated in Canada, is a joint undertaking for the purpose of receiving, assembling, issuing and shipping to the

United Kingdom or any theatre of war, technical stores and vehicles manufactured in Canada and in the United States, for Canadian account, United Kingdom account or other accounts.

A basis for the division of capital costs had not been agreed upon at the close of the fiscal year but it is proposed that operating costs be pro-rated on the basis of tonnage shipped

COMMENTS

A B Salaries and wages of civilians employed by Army Services, including: surveyors and engineers employed by the Engineer Services; clerks and stenographers in Army offices and Ordnance depots; caretakers, firemen and others employed at Army properties. Wages of employees on day labour projects performed by Engineer Services are included in the item "Construction and Repairs".

Wages of personnel employed at Ordnance Depots as packers, helpers, etc., are not included in this figure but are shown separately under "G"—Casual Labour.

Employees in receipt of salaries of \$2,400 or over during the fiscal year are reported further on in this section.

C This is broken down hereunder, to show amounts expended for pay and allowances on behalf of (1) Active Army; (2) Reserve Army; (3) Recruits called out under the National Resources Mobilization Act.

It does not include, however, expenditures of this nature in respect of Departmental Administration, the Dependents' Allowance Board, Internment Operations and other divisions shown under the heading, Sundry Services.

Active Army pay and allowances (\$349,746,970.20): These are in respect of all formations and units on active service or which have been embodied for continuous military service, including the Canadian Women's Army Corps and home defence members of the Army taken on strength after training, pursuant to the provisions of the National Resources Mobilization Act, 1940. Particulars of the rates of pay and of the main allowances for the Active Army are given hereunder.

Reserve Army pay and allowances (\$3,609,563.80): This amount includes the pay and allowances for personnel of the Reserve Forces for local headquarters training and at camps of instruction but does not include any expenditure for authorized cadet corps or authorized rifle associations which supplement the Army. Expenditures in connection with such cadet corps and associations are classified as "ordinary" expenditures and are reported under Votes 180 and 181 herein.

Standard rates of pay for the Reserve Army are the same as the minimum permanent force rates ranging from 60 cents per day for a boy to \$9.20 per day for a colonel. No allowances are paid to dependents.

Extra pay rates are: Adjutants, 50 cents per day; tradesmen, 25 cents to 35 cents per day. In certain circumstances, trained personnel may be paid a special rate of extra pay not exceeding \$1.50 per day. Field allowances range from \$3 per day for Camp Commandants to 10 cents per day for rank and file. Subsistence allowances (where rations are not provided during the period prior to arrival or following the departure of troops) are \$1.70 per day for officers and 85 cents per day for other ranks.

Pay and allowances of Reserve Recruits called out under the provisions of the National Resources Mobilization Act, 1940 (\$13,139,868.78): These recruits receive the same rate of pay and allowances as personnel of the Active Army, and on completion of their basic training, are transferred to the Active Army Home Defence.

Active Army Rates of Pay: Staff rates of pay for classified appointments of officers range from \$6 to \$24 per day. In addition, subsistence allowance in lieu of quarters and rations was payable at \$1 per day to September 30, 1942 and at \$1.70 per day thereafter. Per diem rates of standard pay, tradesmen's pay and medical officers' pay are set out below.

Rank	Standard pay	Tradesmen's pay	Medical officers

In addition to these rates, officers in command of units of 500 or more men receive \$1 per day extra and officers appointed as adjutants within the establishment of a unit are entitled to 50 cents per day extra.

Officers, warrant officers, non-commissioned officers, and men who are ordered to fly in the course of military duty or training are entitled to additional pay for every day on which they fly pursuant to such orders, as follows: officers \$2 per day; other ranks, 75 cents per day.

An officer or soldier posted to a Parachute Unit as a parachute jumper within the authorized War Establishment, or an officer or soldier attached to a Parachute Training Unit where parachute jumping is an essential part of his duty or training, in addition to his regular pay, tradesmen's rates or any other additional pay to which he is entitled (with the exception of flying pay) is granted extra pay as follows: officers, \$2 per day; other ranks, 75 cents per day.

A cadet, while attending an Officers' Training Centre, shall, until he is gazetted to commissioned rank or removed from the Course for any reason, receive the Regimental rates of pay of his substantive rank provided, however, that he shall not receive a lower rate of pay than \$3 per diem.

Personnel of the Permanent Force who were serving at the outbreak of war have the option of remaining on Permanent Force (pre-war) rates of pay and allowances, but as Active Service rates are in the main higher than those of the Permanent Force, there are only a few isolated cases where these latter rates are being paid.

Canadian Women's Army Corps: Per diem rates of pay are:

Rank	Standard pay	Tradesmen's pay

Subsistence Allowance: When quarters and rations are not provided in kind, a subsistence allowance is paid as follows: \$1.70 per day to officers; \$1.25 per day to other ranks. The latter rate was increased from \$1 to \$1.25 per day effective October 1, 1942.

* Assigned Pay (\$88,511,007.81): A soldier on whose account dependents' allowance is issuable, must assign a portion of his pay each month, as set out hereunder for the benefit of his dependents. An officer is not required to assign pay to his wife or children, but must assign five days' pay of rank if dependents' allowance is issuable to a parent, brother or sister. In addition to these assignments, an officer or soldier may assign pay for certain specified purposes. The maximum amount assignable each month by a soldier is twenty days' pay of rank and twenty days' tradesmen's pay.

The following amounts are deemed to be fifteen days' pay of rank, which is required to be assigned each month for the benefit of a wife or of children, or, if a soldier has no wife or children, for the benefit of a dependent parent, brother or sister to whom a dependents' allowance is issuable: Warrant Officer, Class 1, \$60; Warrant Officer, Class 2, \$45; Warrant Officer, Class 3, \$40; Staff Sergeant and Sergeant, \$35; Ranks below Sergeant who are in receipt of regimental pay exceeding \$1.40 per diem, \$23; Ranks below Sergeant who are in receipt of regimental pay not exceeding \$1.40 per diem, \$20; Boy, \$10. If dependents' allowance is issuable to a parent, brother or sister, as well as to a wife or to children, an additional five days' pay of rank must be assigned.

Canadian Prisoners of War: Under the terms of the Geneva Convention, officer prisoners are advanced monthly payments by the detaining Power equivalent to amounts paid officers of corresponding rank of that Power.

Amounts so advanced in accordance with the scale laid down by the Convention as well as any other recurring debits such as assigned pay, etc., are charged to the officer's pay account monthly, which continues to be credited with pay during his detention. The balances then remaining are either deposited to the officers' bank accounts or held to their credit. In one instance, very small advances of pay to other ranks are being made by a detaining Power. Such amounts are charged to the pay accounts concerned in the same manner as outlined above.

Accumulated balances of pay held which are not deposited to personal bank accounts, are credited semi-annually with interest at the rate of 3 per cent per annum.

* **Dependents' Allowances (\$95,222,796.29):** These include only the allowances administered by the Dependents' Allowance Board. Supplementary Allowances paid from the Dependents' Supplementary Grants Fund are shown under Sundry Services.

Prior to January 1, 1943, an Officer or Warrant Officer, Class 1, was entitled to allowances for not more than two dependent children while a soldier below the rank of Warrant Officer, Class 1, was entitled to allowances for not more than four such dependents. By an amendment to the regulations, effective January 1, 1943, authority was granted to provide for payments of allowances to all officers and other ranks on behalf of dependent children not exceeding six at the rates detailed hereunder.

Awards by the Dependents' Allowance Board are in such amounts as the Board decides, not exceeding the following maximum monthly allowances:

(a) For a wife or a dependent female relative responsible for the care of the dependent children of: An officer above the rank of Major, \$60; Major, \$55; Captain, \$50; Lieutenant and 2nd Lieutenant, \$45; Warrant Officer, Class 1, \$40; all other ranks, \$35.

(b) For dependent children falling within either of the undermentioned classes, \$12 for each of the first two such dependents; \$10 for the third and \$8 for each of the fourth, fifth and sixth such children: (1) A dependent son under 16 years and a dependent daughter under 17 years of age. However, if such child is following and is making satisfactory progress in a course of instruction approved by the Board, an allowance may be paid until such child reaches his or her nineteenth birthday. (2) A dependent son or daughter of any age when such child is unable, owing to physical or mental infirmity, to provide for his or her own maintenance.

It is further provided that, where there is no wife, nor a dependent female relative responsible for the care of the children, the Board may award up to \$20 for each such child not exceeding in total, \$50 for three, \$60 for four, \$70 for five, or \$80 for six, such children.

(c) For a dependent parent or foster parent, a dependent brother under sixteen years of age or sister under seventeen years of age, a dependent brother or sister who prior to the applicant's enlistment was a member of his household and owing to physical or mental infirmity is unable to provide his or her own maintenance and is solely supported by the applicant, a divorced wife, if the applicant is under a legal obligation to contribute to her support: \$30 in respect of such dependents of officers above the rank of Major, \$25 in respect of such dependents of all other commissioned officers, Warrant Officers, Class 1, and all other ranks.

In addition to the allowances provided above, a cost of living bonus was authorized effective January 1, 1943, to dependents in the following amounts: \$1.40 per month to wives: \$2.60 per month to wives and children.

* Outfit Allowances (\$1,852,406.61): Each Officer, Nursing Sister and Warrant Officer, Class 1, is entitled to receive an allowance for the purchase of uniform and equipment when placed on active service.

In the case of an Officer or Nursing Sister, the amount of such allowance is \$150; for a Warrant Officer, Class 1, \$100. Lesser amounts for Officers, Nursing Sisters and Warrant Officers may be granted when their length of service is less than one year. On transfer to or from a Highland unit, an Officer is entitled to receive an additional allowance ranging from \$60 to \$75 according to specified circumstances.

* Rehabilitation Grants (\$1,172,110.22): Members of the Military Forces of Canada who have served continuously on active service during the present war for a period of not less than one hundred and eighty-three days, are entitled to, with certain exceptions, a rehabilitation grant equal to thirty days' pay plus married and/or dependents' allowance, upon discharge, retirement or ceasing to serve. The governing authority is P.C. 7521 of December, 1940, and amendments thereto.

* Clothing Allowances on Discharge (\$656,078.31): These allowances are paid to personnel upon discharge to provide them with civilian clothing. This allowance is \$35 if the member has served for six months, or, if less than that time, \$27 or \$17, depending upon the time of year discharge takes place.

* Included in the amounts shown as pay and allowances on page KK-13.

D This amount is the total of transportation expenses in connection with the movement of personnel, stores and supplies at home and abroad. Transportation expenses of the Reserve Army and of Reserve Recruits called out under the provisions of the National Resources Mobilization Act amounted to \$419,826.52 and \$503,627.61, respectively.

E The main items in this expenditure are: fuel, \$5,907,196.19; light, power and water, \$2,103,108.20; rents, \$1,560,695.06; sanitary services, \$210,240.79; telephone exchange service, \$354,905.21.

F These expenditures are in connection with the designing, construction and maintenance of works and buildings.

Q The main items included in this amount are: telephone tolls, telegraph, postage, \$1,008,373.92; recruiting campaign expenses and advertising, \$357,511.53.

R Due to the delay in submission of accounts for purchases from the United States Government an advance payment was made to the Treasurer United States, in the amount of \$18,000,000 (U.S. Funds) (\$19,980,000 Canadian Funds). This advance is to be accounted for during the fiscal year 1943-44 by invoices supplied through the Washington office of the United States Purchases Branch, Department of Munitions and Supply. Deliveries, made during the fiscal years 1941-42 and 1942-43, exceed in value the advance made.

COMMENTS

By P.C. 18 of January 2, 1942, there was established a Dependents' Board of Trustees to deal with the question of providing supplementary grants or special assistance to dependents of members of the armed forces of Canada, supplementary to allowances provided for under the ordinary dependents' allowance regulations administered by the Dependents' Allowance Board and other divisions of the Department of National Defence.

Grants and special assistance may be paid from this fund only to, or on behalf of, the dependents of ratings in the Navy and to soldiers and airmen below the rank of warrant officer Class 1, to prevent hardships arising because of unusual circumstances or to relieve misfortune and meet domestic emergencies, including serious illness of a member of the family, or to assist a mother whose dependents' allowance has been reduced by reason of the prior claim of more immediate dependents of the son.

P.C. 58/11348 of December 15, 1942, provided that the provisions of P.C. 18 referred to above be extended to the dependents resident in Canada of all Royal Air Force, Royal Australian Air Force and Royal New Zealand Air Force personnel serving with the Royal Canadian Air Force.

As provided by P.C. 1/4526 of May 29, 1942, the membership of the Dependents' Board of Trustees, was increased from a Chairman and eight members to a Chairman and nine members.

Local and regional advisory committees advise the Board of Trustees on local conditions, receive applications for assistance, arrange for investigation, and, in cases of emergency, authorize the issue of temporary grants or special assistance.

All members of the Dependents' Board of Trustees other than the Chairman and all members of the local or regional dependents' advisory committees serve without remuneration. Disbursements from the Dependents' Supplementary Grants Fund are detailed under two headings: (1) Administrative Expenses and (2) Grants and Assistance.

Administrative expenses include payments for the Chairman's services, the out-of-pocket expenses of members of the Board and advisory committees, staff salaries, investigation and general operating expenses of the Fund.

Under Grants and Assistance are shown the amounts of relief disbursed on behalf of Naval, Army and Air Force service personnel. A distinction is made above between recurring and non-recurring payments. Recurring payments are continuous supplementary grants, an example of the use of which would be the education of a dependent, while non-recurring payments consist of grants to meet exigencies such as illness, accident, death, loss by fire or other necessitous conditions. Authorization of the former type of grant is made only by the Board of Trustees at Ottawa.

Under the direction of the Minister of National Defence, the Directorate of Public Relations for the Army was set up in May, 1941, for the purpose of ensuring that the requisite amount of publicity be given to the Canadian Army. This directorate has a

civilian and military staff at National Defence Headquarters. In each Command and Military District there is a Public Relations Officer and a Photographic Officer, appointed to maintain constant touch with the sources of news and pictures concerning the various army activities.

The chief duties of this directorate are (a) to obtain news of the army for distribution to the Canadian press, and to stimulate recruiting by extensive publicity; (b) to arrange visits to army camps for radio and press groups; and (c) to advise newsmen what may be printed under security regulations.

Expenditure in connection with this directorate was included under Army Services in the fiscal year 1941-42.

P.C. 36/500 dated January 20, 1943, provides: "Pursuant to the regulations made by Order in Council of 25th June, 1941, P.C. 4568, and in the manner thereby provided responsibility for the internment of prisoners of war, enemy aliens and other persons interned in Canada was divided between the Department of the Secretary of State and the Department of National Defence.

"By Order in Council of 19th November, 1942, P.C. 10571, responsibility for the internment of prisoners of war interned in Canada is vested exclusively in the Department of National Defence, but responsibility for the internment and custody of enemy aliens, other interned persons and refugees is still divided between the Department of the Secretary of State and the Department of National Defence, as provided for under the said regulations made by Order in Council of 25th June, 1941, P.C. 4568.

"The Department of External Affairs is responsible for dealing with matters relating to internment in their external aspects.

"It is necessary that the Department of External Affairs should continue to deal with internment matters in their external aspects, but it would make for greater efficiency and economy if the services now performed by the Department of the Secretary of State in connection with internment operations should be performed by the Department of National Defence, thus centralizing all such matters in one department.

"The Deputy Minister of National Defence (Army) therefore recommends that responsibility for the internment and custody of prisoners of war, enemy aliens, other interned persons and refugees in Canada be transferred to the Department of National Defence."

Consequent on the foregoing, the appropriations for the fiscal year 1942-43 and the expenditures for the period April 1, 1942, to January 31, 1943, were transferred from the Department of the Secretary of State to the Department of National Defence, and the administration and responsibility for these activities taken over by officials of the latter department.

The above expenditures represent the Canadian costs, as those in connection with United Kingdom refugees and prisoners of war from the United Kingdom are charged to United Kingdom-Army account under Trust and Special Accounts further on in this section.

By agreement, Canada bears the cost of all military guards posted to internment camps.

Lapsed	\$ 1,554,133 86

COMMENTS

Payments made covering Canada's share of the expenses in connection with the Inspection Board have, to date, been given provisional approval. The agreed method of arriving at a division of costs was to take as a basis the value of production in Canada for United Kingdom and Canadian account, respectively, less such classes of output as are not inspected by the Board. Canada's proportion of the costs on this basis, as computed by the Economics and Statistics Branch of the Department of Munitions and Supply, was initially determined to be 30.9 per cent. Included in Canada's proportion were estimated costs for inspection of goods sold by War Supplies Limited for delivery to and use by the United States Government.

The total expenditure for the fiscal year 1942-43 includes a provisional payment of \$6,426,528.63 covering the Canadian Government's portion of the inspection costs for the period April 1 to December 31, 1942, based on the proportion referred to above.

At the end of the present fiscal year the division of Inspection Board costs was revised and Canada's share for the period January 1, 1941, to March 31, 1943, divided between the Department of National Defence and War Supplies Limited. The amount charged to the latter is paid by the Department of National Defence and subsequently recovered from the Department of Munitions and Supply. On the basis of the revised distribution of expenditure, a further provisional payment of \$6,194,340.64 was made adjusting previous provisional settlements for the period January 1, 1941, to March 31, 1943.

Included in this payment is an amount of \$5,493,716.45 representing War Supplies Limited share of the total costs, and of this amount the Department of Munitions and Supply has refunded \$1,703,052.10.

In addition to the provisional settlements mentioned above, direct payments totalling \$28,048.97, in connection with inspection costs, were made by the Department of National Defence during the year.

- B Entry fees at the rate of 4 cents per contestant of Cadet Corps interested in the Miniature Rifle Matches for Youth of the Empire are credited to this account. Entrance fees are accepted up to October 31st each year and are forwarded to the office of the High Commissioner for Canada, for transmission to the Secretary, National Rifle Association of Great Britain.
- D The balance in this account represents the amount deposited by the Department of National Defence covering allowances due men who were in relief camps and left without collecting the amounts due them.
- E All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.
- F Cheques representing deductions from pay for the purchase of War Savings Certificates are deposited as received. This account is debited with the monthly cheque issued in payment of the certificates purchased and with cheques representing refund to the subscribers of the balances of their discontinued War Savings Accounts. The closing balance represents incomplete subscriptions at that date.

COMMENTS •

- A Fifty per cent of the daily rate of pay is withheld from those soldiers stationed overseas who have not made assignments. From those whose assignments are less than fifty per cent, the difference between such assignments and fifty per cent of their pay is withheld. The deferments commence from the first of the month following the date of departure from Canada and are held in trust, to be paid to the soldiers upon discharge or upon appointment to commissioned rank. In exceptional circumstances on the recommendation of the Commanding Officer, authority may be given by the Minister permitting an advance of deferred pay, where the request arises out of a situation beyond the control of the soldier, such as illness of relatives, etc., or where a soldier is permitted to proceed to Canada on furlough at his own expense. Interest at 3 per cent per annum is allowed on deferred pay, calculated on minimum monthly balances semi-annually. Receipts represent transfers from the war allotment for Army Services, while disbursements are authorized releases of individual balances.
- B Money found in effects of deceased Army personnel, balances of their pay and allowances, their bank balances when not exceeding \$1,000 in Canada or \$2,000 Overseas are credited to this account and distributed to the legal heirs through the Estates Branch, National Defence Headquarters.
- C Moneys held in trust for Canadian Internees are credited to this account.
- D Profits of canteens operated for the benefit of personnel of the armed forces are credited to this account. The main organizations contributing to this fund are the Canadian Legion War Services Incorporated, Young Men's Christian Association, Salvation Army, and Knights of Columbus. By P.C. 7/3183 dated April 21, 1942, it was provided that the money be deposited and held in trust for the benefit and welfare of members and ex-members of the Forces and their dependents. Interest at the rate of two and one-half per cent per annum on the minimum monthly balances is credited semi-annually.
- E This account pertains to the estates of all military personnel deceased during the War of 1914-18.
- Money found in effects of such personnel, credits in personal bank accounts, or money due on account of pension, as well as balance of pay and allowances, are placed to the credit of this account until heirs are located.
- F This account, similar to Military Estates No. 1, is used only when heirs to the estate are minors. Interest is credited on deposits at the rate of 5 per cent simple interest per annum.
- G This account was first set up in 1926. It consists of the amounts required by the regulations of the College to be deposited by the Cadets to cover the cost of their outfits on entering the College as well as an annual deposit to pay for the cost of supplies and articles furnished by the College on a repayment basis. No interest is allowed and balances are refundable.
- Due to the necessity of utilizing the college training facilities for special officer and other military courses, the college closed to Gentlemen Cadets on June 20, 1942, for the duration of the war.
- H Responsibility for the internment of prisoners of war interned in Canada was vested exclusively in the Department of National Defence by P.C. 10571 of November 19, 1942.
- All money received for prisoners of war from the Swiss Consul General is credited to this account. Cheques are then issued to the Internment Camp Trust Accounts as requested by Directorate of Prisoners of War.

A list of suppliers immediately precedes the Trust and Special Accounts at the end of this section. An outline of the various types of contracts utilized by the Department of Munitions and Supply in its purchasing transactions and in carrying out defence projects will be found in the section of this report pertaining to that Department.

A Salaries consist of (a) \$4,239,594.14 for the Minister's office staff, for the Deputy Minister and his staff, employees at Naval Service Headquarters, dockyards, bases and depots, as well as those employees of the Radio Branch, Department of Transport, performing special part-time duties; (b) \$62,924.30 in daily or hourly wages for casual labour employed

at dockyards and other establishments (exclusive of construction and repair work labour); less (c) a credit of \$167,120.29 from overhead percentages added to the labour cost of work performed for other governments, private firms, persons and other departments. Civilian employees receiving salaries of \$2,400 or over at March 31, 1943, are listed further on in this section.

- B Total basic pay, extra pay and the various allowances to officers and ratings of the Royal Canadian Navy, including: the Royal Canadian Navy (permanent force); the Royal Canadian Naval Reserve (men of the Merchant Marine automatically called up for duty in time of war); the Royal Canadian Navy Volunteer Reserve; the Fishermen's Reserve, West Coast, (members of fishing crews enrolled for training and liable to call in times of emergency); Nursing Sisters (registered nurses at base hospitals). Rates of pay and details of the main allowances are set out below.

Daily Rates of Pay and Allowances: The following are the daily minimum and maximum rates of pay for Naval personnel. Length of service, qualifications and type of ship served in, have a bearing on rates of pay, except in those cases where one rate of pay only is shown.

Officers—Pay: Commodore, \$17; Captain, \$13.75-\$18.75; Commander, \$10-\$14.25; Lieutenant Commander, \$7.50-\$9.50; Lieutenant, \$6-\$7.50; Commissioned Officer from Warrant Rank, \$5.75-\$6.75; Mate, \$5.75; Sub-Lieutenant, \$5.00; Probationary Sub-Lieutenant, \$4.25; Warrant Officer, \$4.75-\$5.75; Midshipman, \$2; Cadet, 25c-\$1.50.

Ratings—Pay: Seaman, 50c-\$3.25; Photographer, \$2-\$3.50; Signalman, 50c-\$3.50; Telegraphist, 50c-\$3.50; Coder, \$1.25-\$3.50; Sailmaker, \$2.05-\$3.50; Stoker, \$1.35-\$3.50; Mechanician, \$3.05-\$4.05; Engine Room, Electrical and Ordnance Artificer, 50c-\$4.05; Shipwright, 50c-\$4.05; Blacksmith, Plumber, Painter, Joiner, 50c-\$3.60; Sick Berth Rating, \$1.35-\$3.45; Writer, 60c-\$3.45; Victualling Rating, 60c-\$3.45; Regulating Branch, \$2.65-\$3.55; Cook (S), \$1.35-\$3.45; Cook (O) and Steward, 50c-\$3.45.

Nursing Service—Pay: Matron-in-Chief, \$10-\$10.50; Principal Matron, \$7.75-\$8.25; Matron, \$6.50; Nursing Sister in Charge, \$5.50; Nursing Sister, \$4.25-\$5; Dietitian, \$4.25-\$5; Physiotherapy aid, \$4.25-\$5; Technician, \$4.25-\$5; Home Sister, \$4.25.

Women's Royal Canadian Naval Service—Pay: The substantive per diem pay of officers and ratings of the Women's Royal Canadian Navy Service is as follows: Chief Officer, \$6.70; First Officer, \$5.20; Second Officer, \$4.35; Third Officer, \$3.35; Probationary Third Officer, \$2.85; Chief Wren, \$2.10; Petty Officer Wren, \$1.50; Leading Wren, \$1.15; Wren, 95c; Probationary Wren, 90c.

Officers' Allowances: Marriage Allowances, \$1-\$2.80; Dependents' Allowances, 65c; Allowance in lieu of rations and quarters, 85c-\$4.10; Command Money, 50c-\$2.50; First Lieutenant's Allowance, 35c-60c; Navigating Allowance, 25c-\$1.25; Specialist's Duties, 25c-60c; Secretarial, 25c-\$2.25; Staff Pay, \$1-\$2.25; Charge Allowance, \$1.

Ratings' Allowances: Marriage Allowance, 75c-\$2.45; Dependents' Allowance, 65c; Allowance in lieu of quarters and rations, \$1.10-\$1.60; Allowance in lieu of quarters and rations in Newfoundland, \$1.75; Non-substantive pay, 5c-60c.

Nursing Sisters' Allowances: Subsistence allowances of \$1.70 a day may be paid to Nursing Sisters, all ranks.

Extra Pay: In addition to the above rates, extra pay, from 5c to 60c a day is granted to officers and ratings performing extra duties or incurring extra responsibilities not ordinarily applying to their particular ranks and also for service under difficult circumstances.

Non-substantive Pay: Paid to ratings who qualify in special subjects. Payment continues as long as they remain proficient in those subjects.

Marriage and Dependents' Allowances: Expenditure for these purposes totalled \$8,469,464.01. Marriage allowance, at rates shown above, is issued to officers and ratings to assist them in providing and maintaining homes for their wives and children. In the case of an officer, it is not issued unless full assignment of the allowance is made. A rating is required to assign his allowance plus 15 days' pay for a wife or guardian, 5 days' pay for a motherless child, 10 days' pay for two motherless children, or 15 days' pay for three motherless children. Dependents' allowance is issued, at rates shown above, to assist in the maintenance of a dependent mother, father, brother, sister or separated wife. This allowance is awarded by the Dependents' Allowance Board and may be paid in respect of one dependent only. Assignment of the allowance must be made to the dependent,

together with fifteen days' pay each month in the case of a rating (five days' pay if marriage allowance has also been granted) or five days' pay of rank, exclusive of other allowances, in the case of an officer.

Allowances in Lieu of Quarters and Rations: An amount of \$8,508,624.36 was paid to compensate officers and ratings for outside board and lodgings.

Uniform Allowances: To outfit themselves with uniforms, Officers and Warrant Officers and Cadets on promotion to Midshipman, Midshipman (E) or Paymaster Midshipman are paid cash allowances of \$150, except Medical Officers of the Royal Canadian Navy (permanent force), who receive allowances of \$300. Expenditures for this purpose totalled \$334,017.75.

Clothing Gratuity (Kit Upkeep Allowances): Annual allowances are paid to ratings, on completion of one year's service, for the upkeep of kit at the following rates:

Chief Petty Officers and Confirmed Petty Officers.....	\$60 00
Petty Officers and men dressed as seamen.....	40 00
Petty Officers not confirmed and men not dressed as seamen.....	56 00
Submarine Kit Allowance	7 00

Expenditures for this purpose totalled \$948,637.83.

Rehabilitation Grants: Members of the Naval Forces of Canada who have served continuously on active service therein during the present war, for a period of not less than one hundred and eighty-three days, are entitled to, with certain exceptions, a rehabilitation grant equal to thirty days' pay plus marriage and/or dependents' allowance, upon discharge, retirement or ceasing to serve; the governing authority is P.C. 7521 of December 19, 1940, and amendments thereto. Expenditures for this purpose totalled \$54,904.79.

Civilian Clothing on Discharge: Expenditure for the purpose of providing personnel with civilian clothing on discharge totalled \$33,265.95.

- C Transportation and travelling expenses of Naval personnel and civilian employees of the Department of National Defence, Naval Service. A list of civilian travelling expenses is shown further on in this section.
- D Sundry expenses such as light, heat, power and water, maintenance of grounds, snow and garbage removal, cleaning of offices and other miscellaneous expenses incurred in the operation of dockyards, barracks, armament and supply depots, signal stations, bases and R.C.N.V.R. divisions.

Allotment: Naval Services, Equipment Division	2,877,709 00
Expenditures	nil
Lapsed	\$2,877,709 00

COMMENTS

The Equipment Division was established by P.C. 6094 dated October 29, 1940, under the direction of the Department of National Defence—Naval Services, for the purpose of procuring the production of the necessary component parts of anti-submarine equipment and of assembling these components into sets.

The sets were sold to the Royal Canadian Navy and to the Royal Navy on the basis of actual cost so far as it was possible to determine this cost, and for the period from October 29, 1940, to April 30, 1942, the selling prices were based on the amounts paid for components used in the assembling of the sets, plus an overhead charge of 20 per cent to cover pay and allowances, civil salaries and wages, rent, telephone and other operating expenses, provided for in the Naval Services allotment. This overhead charge of 20 per cent was discontinued on April 30, 1942, as the operations of the Equipment Division to that date showed a substantial credit balance, which, together with the additional credit anticipated as a result of the net total of downward adjustments of purchase prices of components resulting from Treasury cost audits of suppliers' accounts, was deemed adequate to cover all future overhead charges applicable to this project.

The production, assembly and installation of anti-submarine equipment being completely organized by July 10, 1942, authority was obtained to dissolve this Division after the completion of the programs which it had in hand at that date.

When this Division was set up in October, 1940, a revolving fund of \$4,000,000 was authorized by P.C. 36/7723 of December 31, 1940, but was not established. Gross expenditures in 1941-42 were \$4,448,794.83 and sales, which were credited to the allotment, amounting to \$3,398,495.95, resulted in a net expenditure of \$1,050,298.88. In the present fiscal year the gross expenditures were \$5,365,946.54 and sales \$9,587,698.38, resulting in a net credit of \$4,221,751.84 which appears in the revenue section of this Department under Special Receipts—War Appropriation Acts. The above credit for 1942-43 does not take into account the value of equipment on hand at the beginning or the close of the fiscal year.

COMMENTS

The construction of this building now occupied by Naval Service Headquarters, Ottawa, was authorized by P.C. 9477 of December 5, 1941, and was under the supervision of the Director of Works and Buildings, Department of National Defence, Air Services. Expenditures in the previous fiscal year were \$37,730.70.

Payments, made by the National Defence, Air Services, were: Campbell Steel and Iron Works, Ltd., \$8,662.14; Hill-Clarke-Francis Ltd., \$755,250.82; Johnson Bros., Co., Ltd., \$37,820.70; Volcano Limited, \$3,282.25; and Federal District Commission, \$10,500.

Salary Rates and Travelling Expenses

As of March 31, 1943, there were 3,621 civilian employees paid from the War allotments of this Department. The following table shows those who were paid annual salaries of \$2,400 or over on that date, or at date of separation (shown in brackets), annual local allowances, as well as travelling expenses (exclusive of transportation warrants) where the amount was in excess of \$300.

COMMENTS

- A Deductions from the pay of Naval Officers on account of National Defence Tax subsequently remitted to the Department of National Revenue.
- B All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue, are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.
- C Deductions from the salaries of employees of the Department, not paid by Central Pay Office, are credited to this account and cheques are drawn against it, in favour of the Bank of Canada, as the Certificates are fully paid. The above balance represents the incomplete subscriptions at the close of 1942-43.
- In connection with an amount of \$15,164 noted in the 1942 Report of the Auditor General as charged in error to War Appropriation—Naval Services instead of this account, the necessary adjustment was effected in July, 1942, by crediting Special Receipts—War Appropriation Acts and debiting this account.
- D Sums recovered from the pay of ratings of the Royal Navy who are on loan to Canada are credited to this account and are paid quarterly to the British Admiralty under loan agreement.
- E A fund originally raised by subscription in Canada, for providing gunnery prizes for H.M.S. *Dominion*, has been transferred to the Department for the purpose of providing prizes for efficiency in gunnery, etc., in the Royal Canadian Navy.
- F This fund comprised Canada's share of the undistributed residue of the Naval Prize Fund of the British Navy (1914-1918) and was transferred to Canada by the Admiralty for the purpose of assisting members and dependents of members of the Naval Forces of the Dominion. The credit balance was transferred to the Royal Canadian Navy Benevolent Fund under authority of P.C. 133/1950 of March 13, 1943.
- G All receipts from, and payments in connection with, the canteen are made through this account.
- H The establishment of the above fund was authorized by P.C. 42/10672 of November 23, 1942, for the purpose of providing assistance to personnel of the Royal Canadian Navy in distress both before and after discharge and to the needy dependents of all deceased ex-members of the Naval Services. The fund is made up of donations from the canteens and messes of Royal Canadian Naval Ships and Establishments and other sources, and includes the residue of the Naval Prize Fund (1914-1918) which was transferred under the authority of P.C. 133/1950 of March 13, 1943.

Certified Correct.

B. G. McINTYRE,
Comptroller of the Treasury.

COMMENTS

B Revenue under this heading was derived chiefly from rentals of accommodation to civilian tradesmen, rentals of married quarters to service personnel and a contribution of \$25,000 by the United Kingdom towards the operating expenses of the Newfoundland Airport.

C An amount of \$125,000 was obtained from the sale of aircraft to civilian air lines.

D Civilian air lines which are permitted to use the facilities of R.C.A.F. aerodromes are charged landing fees and hangar rentals. Laundry service at established rates is furnished to civilian and service personnel at certain isolated units. Hospitalization fees are charged civilian employees for the use of R.C.A.F. hospitals.

F Miscellaneous refunds consist mainly of collections re sales made to and services performed on behalf of the Government of the United States and the Government of the United Kingdom during previous fiscal years.

Air Ministry dependents' allowance and assigned pay refunds recovered from the British Air Ministry in respect of R.C.A.F. personnel serving with the R.A.F. amounted to \$1,548,222.59.

COMMENTS

This allotment is for expenses in connection with the maintenance of Royal Canadian Air Force Overseas Squadrons, Royal Canadian Air Force Overseas Headquarters, as well as for that portion of the pay and allowances of Royal Canadian Air Force personnel attached to the Royal Air Force which was payable by the Dominion under agreement.

A Included in this expenditure are (a) salaries and wages of civilian employees; (b) pay and allowances including dependents' allowances of the Canadian Overseas Squadrons; (c) deferred pay of Royal Canadian Air Force personnel attached to the Royal Air Force; and (d) transportation and travelling expenses.

Personnel of the Royal Canadian Air Force attached to the Royal Air Force and the Canadian Overseas Squadrons received pay and allowances at Royal Air Force rates. In cases where Royal Canadian Air Force rates exceed those of the Royal Air Force, the deferred pay accounts of the officers and airmen are credited with the excess. Particulars of the rates of pay and allowances of Royal Canadian Air Force personnel are detailed in the comments on the expenditures of the Combined Training Organization. Recoveries from the British Air Ministry during the year on account of the dependents' allowance and assigned pay of Royal Canadian Air Force personnel attached to the Royal Air Force amounted to \$1,548,222.59. This refund has been credited to Special Receipts—War Appropriation Acts.

B This expenditure is comprised chiefly of maintenance and equipment costs of the Canadian Overseas Squadrons payable under the terms of an agreement between the Governments of Canada and the United Kingdom, authorized by P.C. 79/4417, of June 18, 1941, and P.C. 26/7123, of September 9, 1941.

C The main item under this heading is communication services, \$24,340.95.

COMMENTS

This allotment is to cover capital costs, maintenance and general operating expenses pertaining to the defence of Canada by the Royal Canadian Air Force as well as protective operations carried out adjacent to the coasts of the Dominion and joint operations with forces of the United States in Alaska and the Aleutians. Included is provision for thirty per cent of expenses of Air Force Headquarters, the remaining seventy per cent being provided under the Training Plans allotments.

A Salaries and wages (including cost of living bonus and war duties supplements) of civilians employed under the Home War Establishment, including engineers, clerks, stenographers, equipment assistants, cooks and messmen. The salaries and wages of civilians employed on construction work are included in the expenditure for Works and Buildings. A list of employees receiving annual salaries at a rate of \$2,400 or over will be found further on in this section.

B Pay and allowances of personnel on the strength of the Home War Establishment. The major items in addition to pay issued to personnel are: assigned pay, \$5,990,943.01; dependents' allowances, \$4,229,569.19; outfit allowances, \$105,923.33; rehabilitation grants, \$199,450.65; civilian clothing on discharge, \$18,165.20.

The rates of pay and particulars of the main allowances included in this amount are described under the Combined Training Organization allotment.

C Transportation of civilian and service personnel (including their subsistence while travelling), \$2,573,395.39, and the movement of equipment, stores and supplies, \$1,864,075.65, comprise this amount. Listed further on in this section are the travelling expenses of civilians who received over \$300 during the fiscal year.

D This amount represents the total cost, including maintenance, of aircraft and engines, motor vehicles, marine craft, clothing and necessities, barrack stores, bombs and ammunition, gasoline and oil, and miscellaneous stores. Publication of a classification of these expenditures is precluded for security reasons, but a list of payments to suppliers is shown further on in this section. Advance payments, totalling \$33,300,000, on account of materials and equipment received and on order, have been made to the Government of the United States, which amount is also included in expenditures under this heading.

E Although customary details of projects are omitted for reasons mentioned in the previous paragraph, a general classification of expenditures follows:

Construction and Improvements, \$69,866,958.46 consisting of: construction by contractors, \$30,148,566.24; construction by Works and Buildings Section, \$1,835,745.50; Department of Transport, \$37,572,187.34; purchases of land and buildings, \$310,459.38.

Alterations and Repairs, \$882,611.23: work performed by contract, \$186,476.10; work performed by Works and Building Section, \$696,135.13.

Operating Expenses of Properties, \$1,947,672.31, comprise: fuel, \$1,341,510.28; light, water and power, \$471,872.12; rents, \$134,289.91.

F In addition to administration and training expenses of Air Cadet Corps units, included in this amount is a grant of \$25,000, authorized by P.C. 1/4787, June 5, 1942, paid to the Air Cadet League of Canada for the purpose of advertising and promoting the Air Cadet movement. The following grants were paid to Air Cadet Squadrons; capitation grant of \$1 for each senior air cadet to graduate during the year; uniform maintenance grant of \$1.25 for each senior air cadet on parade at the annual inspection; band grant of \$2 per instrument. A nominal charge, payable in instalments, is levied for uniforms supplied.

G The main items of expense under this heading are: medical services, \$142,442.23; laundry, \$111,738.84.

H This Department's portion of expenditures in connection with the operation of an experimental station operated jointly with the Army Services and the United Kingdom. Of this amount, \$605,131.68 was paid to Army Services.

I The major portion of this expenditure was in connection with the construction of telephone and teletype facilities, a portion of which is recoverable from Army and Naval Services.

J Included in the above distribution are expenditures which have been charged to the United Kingdom in connection with Joint Services operation and overhead costs of Royal Air Force Schools in Canada.

COMMENTS

The British Commonwealth Air Training Plan agreement was terminated on June 30, 1942, by provisions contained in the Combined Training Organization agreement dated June 5, 1942, which went into effect on July 1, 1942. Certain financial adjustments between Canada and the other subscribing Governments arising as a result of this termination have not yet received the final approval of all concerned. However, the proposed adjustments as they affect the expenditures of the British Commonwealth Air Training Plan are reflected above.

- A A list of civilian employees receiving annual salaries at a rate of \$2,400 or over will be found further on in this section.
- B This represents pay and allowances of personnel for the period April 1, 1942, to termination of the agreement. Details in respect of rates of pay and allowances appear under the Combined Training Organization allotment.
- C D E H Expenditures from the commencement of the fiscal year to termination of the British Commonwealth Air Training Plan agreement are reflected under these headings. For further information as to types of expenditures made, see similar headings under the Combined Training Organization allotment.
- F This amount is made up of gross expenditures totalling \$5,510,409.09, comprised chiefly of payments to the privately owned companies which operate Elementary Flying Training Schools and Air Observer Schools under contracts with the Crown, less \$1,298,567.90, representing the return of that portion of savings on operation and maintenance due to the Crown under the terms of the above mentioned agreements.
- G Customs duties and sales taxes on purchases of stores and equipment are not included as shareable costs by the other subscribing governments under terms of the British Commonwealth Air Training Plan agreement.

COMMENTS

Under the terms of an agreement between the Governments of the United Kingdom, Canada, Australia and New Zealand, dated June 5, 1942, previous agreements, known as the British Commonwealth Air Training Plan agreements, were terminated on June 30, 1942, and a new agreement, generally referred to as the Combined Training Organization agreement, became operative on July 1, 1942.

The entire cost of all training in Canada of R.A.F., R.C.A.F., R.A.A.F. and R.N.Z.A.F. aircrew, including recruiting, manning and elementary training of R.C.A.F. aircrew previously borne exclusively by Canada and operational training previously borne exclusively by the United Kingdom, was estimated to cost \$1,446,000,000 from July 1, 1942, to March 31, 1945, and under the agreement the United Kingdom assumed a liability for one-half of this amount, \$723,000,000, with a proviso that if there were any major changes in the plan which would materially affect the cost of the plan the liability of the United Kingdom would be adjusted accordingly. The governments of Australia and New Zealand will pay for the training of their personnel in Canada on a per capita basis, as arranged between the governments of the United Kingdom, Australia and New Zealand, and the amounts received for such training will be credited to the United Kingdom against their liability to Canada.

The Government of the United Kingdom agreed to pay quarterly lump sums representing the estimated total of R.A.F. pay (but not allowances) of all R.A.F. personnel, both staff and pupils, in the Combined Training Organization, such lump sum payments to be also credited against their liability to Canada. So far as practicable, the share of the cost of the Combined Training Organization to be borne by the Government of the United Kingdom, less credits indicated above, will take the form of contributions in kind.

The above net expenditures represent Canada's share of the cost for the period from July 1, 1942, to the close of the fiscal year.

A Included in this amount are the salaries and wages of civilian clerks, stenographers, equipment assistants, and others employed under the Combined Training Organization. A list of those receiving annual salaries at a rate of \$2,400 or over will be found further on in this section. Salaries and wages of civilians employed on special construction projects are included in Works and Buildings expenditures.

B This consists of the pay and allowances charged to the Combined Training Organization for the period July 1, 1942, to March 31, 1943. In addition to pay issued to personnel, the major items included are as follows: assigned pay, \$19,680,945.56; dependents' allowances, \$14,662,623.11; outfit allowances, \$1,066,245.15; civilian clothing on discharge, \$75,690.95.

*Officers on the nonflying list receive \$2 per day less.

Staff rates of pay in lieu of ordinary rates for classified appointments of officers range from \$6 to \$24 per day.

Consolidated rates of \$10,000 per annum are paid to the Chief of the Air Staff and the Inspector General and \$8,500 to the Air Attache at Washington.

Special Group Pay: Airmen mustered to the Special Group are paid special rates ranging from \$2.95 per day for Sergeant Air Gunners to \$5.70 per day for Pilots, Navigators, Air Observers and Air Bombers holding rank of Warrant Officer, Class 1.

Flying Pay: Officers on the non-flying list are paid \$2 for each day of flying in the course of duty. Other ranks receive 75 cents a day. Airmen pilots and observers not on special rates are paid \$1 per day flying pay, while air gunners receive 75 cents.

Command Pay: Officers in command of operational or training units of 200 or over and non-operational units of 500 or over receive \$1 per day in addition to ordinary rates.

Adjutant's Pay: Officers appointed as adjutants receive 50 cents per day in addition to pay of rank.

Headquarters Pay: Officers detached from their units for service with headquarters of formations receive additional pay of 50 cents per day.

Diving Pay: Airmen qualified or undergoing training as divers are entitled to \$1.50 for every day they are ordered to dive in course of duty.

Nursing Services Rates of Pay: Members of the Nursing Service receive per diem rates of pay and allowances as follows: Matron-in-Chief, \$7.75; Matron, \$6.50; Nursing Sister, \$4.25 and, after six months' service, \$5. A Nursing Sister detailed as an Assistant to a Matron, or as a Nursing Sister-in-charge in a Casualty Clearing Station or Hospital of 100 or more beds, may receive additional pay of 50 cents per day.

Subsistence allowances: Officers and airmen serving in Canada receive \$1.70 and \$1.25 per day, respectively, in lieu of quarters and rations. Special rates for isolated points and other countries apply.

Permanent Force Rates: These rates are shown below.

Officers (per annum rates): Air Commodore, \$5,000 to \$5,500; Group Captain, \$4,300 to \$4,700; Wing Commander, \$3,700 to \$4,000; Squadron Leader, \$3,300 to \$3,600; Flight Lieutenant, \$2,850 to \$3,150; Flying Officer, \$2,350 to \$2,750; Pilot Officer, \$2,100 to \$2,200. Officers on the non-flying list receive \$800 less than the above rates.

Other ranks (daily rates): Warrant Officer, Class 1, \$4 to \$4.25; Warrant Officer, Class 2, \$3.40 to \$3.80; Flight Sergeant, \$3 to \$3.55; Sergeant, \$2.75 to \$3.10; Corporal, \$2.25 to \$2.65; Leading Aircraftman, \$2 to \$2.40; Aircraftman, Class 1, \$1.90 to \$2.30; Aircraftman, Class 2, \$1.70 to \$2.15; Aircraft Apprentice, \$1; Boy, 75 cents.

Permanent Force allowances in lieu of quarters are 35 cents per day for airmen, and range from \$250 to \$650 per annum for officers.

Permanent Force allowances in lieu of rations are \$200 per annum for officers and 75 cents per day for airmen.

Extra pay: Permanent Force officers on the non-flying list are entitled to \$2 per day additional pay while flying. Other ranks receive 75 cents per day extra. Officers stationed at headquarters of formations receive additional pay of \$200 per annum, while officers serving as adjutants receive \$100 per year additional pay.

Yearly allowances, ranging from \$200 to \$550, are payable as dependents' allowances for the benefit of the dependents of officers and airmen on the married roll.

NOTE.—Personnel who were appointed or enlisted prior to January 1, 1940, may retain the pay and allowances of their rank in issue at September 30, 1940, until such time as by promotion or a change in status, Active Service rates become more beneficial. All officers of the Force have elected Active Service rates of pay and the number of airmen who are still in receipt of Permanent Force rates of pay has been reduced to a figure which is insignificant in relation to the total strength of the Force.

Assigned Pay: An airman on whose account dependents' allowance is issuable must assign to the recipient not less than fifteen days' pay of rank per month. Officers are not required to assign pay to their wives or children, but must assign five days' pay of rank if dependents' allowance is issuable to a parent, brother or sister. The maximum amount assignable each month is twenty days' pay of rank, except assignments by prisoners of war and assignments for certain specified purposes.

In respect of the above the following is considered as fifteen days' pay of rank:—Warrant Officer, Class 1, \$60; Warrant Officer, Class 2, \$45; Flight Sergeant and Sergeant, \$35; Corporal and Leading Aircraftman, \$23; Aircraftman, Class 1 and Class 2, \$20; Boy, \$10. If dependents' allowance is issuable to a parent, brother or sister, as well as to a wife or to children, an additional five days' pay of rank must be assigned.

Dependents' Allowances: Only allowances as awarded by the Dependents' Allowance Board are included in this figure. As mentioned previously, married allowances of Permanent Force personnel are included with their pay.

Maximum monthly allowances for all ranks are set out in the preceding table, the lesser amount indicating the monthly allowance payable for a wife and no dependent children, and the greater amount that payable for a wife and six dependent children. A dependent female relative responsible for the care of dependent children may be awarded an allowance equal to that payable for a wife. Allowances may be paid in respect of dependent children, up to six in number, at the following rates: \$12 for the first such child, \$12 for the second, \$10 for the third, and \$8 for the fourth, fifth and sixth, provided that where there is no female relative responsible for the care of the children, the board may award up to \$20 for each child, not exceeding in total \$50 for three children, \$60 for four, \$70 for five, or \$80 for six.

For any other dependent relative of an officer or airman, who may qualify within the regulations, allowances as follows may be awarded by the Board: \$30 in respect of such dependents of officers above the rank of Squadron Leader and \$25 in respect of other officers and other ranks. Dependents' allowance is not payable to the wife of an officer or airman who marries subsequent to appointment or enlistment until such officer or airman has completed six months' continuous service.

Outfit allowances: An allowance of \$150 is granted to officers, Warrant Officers, Class 1, and Under Officers, Class 1, to provide themselves with the necessary uniforms and equipment. An officer promoted from the rank of Warrant Officer, Class 1, is only entitled to \$100 upon appointment to a commissioned rank, providing the allowance of \$150 had already been received. Officers of the Permanent Force on first appointment to commissioned rank receive a grant of \$250 for the same purpose. Nursing Sisters are granted an outfit allowance of \$150.

Under Officers, Class 2, Non-Commissioned Officers and Aircraftwomen may be paid an allowance of \$15, upon enlistment, for the purpose of purchasing underclothing, etc., and a quarterly allowance of \$3 is paid these personnel for replenishments.

In cases where Officers of the Women's Division, Under Officers, Class 1, and Nursing Sisters resign without completing six months' service, provision is made for the refunding of a portion of outfit allowances determined by length of service.

Civilian Clothing on Discharge: Officers cashiered or dismissed from the service, if without funds, may be paid an allowance of \$35 for the purpose of purchasing civilian clothing. Airmen discharged from the service are paid \$35, providing six months' continuous service has been completed; if less than six months has been served, the allowance is \$27 or \$17, depending upon the time of year discharge takes place.

Rehabilitation Grants: Members of the Force, who have served continuously on active service during the present war for a period of not less than one hundred and eighty-three days, are, with certain exceptions, entitled to a rehabilitation grant equal to thirty days' pay of rank plus married and/or dependents' allowance, upon discharge, retirement or ceasing to serve on active service.

C This amount represents transportation expenses in connection with the movement of both service and civilian personnel, including subsistence while travelling, and the transfer of stores and equipment.

Travelling expenses of civilians in excess of \$300 are listed further on in this section.

D To avoid divulgence of information which might be of use to the enemy, a detailed classification of these expenditures is not given. The amount relates to the cost, including maintenance, of: aircraft and engines; motor vehicles and marine craft; barrack stores and equipment; telephone, telegraph, wireless and teletype equipment; gasoline and oil; food, clothing and necessities; bombs and ammunition.

Apart from local purchase authority granted to certain departmental officials, the Department of Munitions and Supply purchases all material. In the section of the report pertaining to that Department will be found an outline of the various types of contracts utilized in its purchasing transactions and in carrying out defence projects.

A list of payments to suppliers appears further on in this section.

E Works and Buildings expenditures comprise construction costs, maintenance, repair and improvements of Combined Training Organization establishments. Details of the various projects are omitted for security reasons. A broad classification of the expenditures follows: construction by contract, \$22,831,601.48; construction by Department of Transport, \$12,476,287.91; construction by Works and Buildings Section, \$1,540,100.03; purchases of properties, \$403,018.71; alterations and repairs, \$1,370,727.14; operating costs, \$4,145,144.92 (comprising fuel, \$2,330,100.91, light, water and power, \$1,520,762.04, and rents, \$294,281.97).

F This is comprised chiefly of payments to privately owned companies which operate the majority of the Elementary Flying Training Schools and the Air Observer Schools under contract with the Crown. Amounts paid to cover operating costs and profit are subject to periodic review and adjustment of rates, based on actual operating costs. Payments in respect of elementary schools amount to \$9,732,652.56 and air observer schools, \$8,238,855.82, for the period July 1, 1942, to March 31, 1943.

Also included in this expenditure are payments, totalling \$327,394.54, made to Canadian universities in connection with preliminary aircrew training.

G These expenses comprise: medical services, \$1,166,538.34; communication services, \$1,072,961.92; laundry, \$526,291.07; miscellaneous, \$510,830.94.

Salary Rates and Travelling Expenses

As of March 31, 1943, there were 16,739 civilian employees paid from the war allotments of this Department. The following table shows those who were paid annual salaries of \$2,400 or over, inclusive of living, local and subsistence allowances (allowance portion shown in brackets), on that date, or at date of separation (shown in brackets), as well as travelling expenses (exclusive of transportation warrants) where the amount was in excess of \$300.

COMMENTS

Disbursements are made on a recoverable basis for the United Kingdom and other Allied Governments under authority of sec. 3 War Appropriation Act, 1942, and individual Orders in Council.

- A This account is operated in connection with recoverable expenditures made on behalf of the United Kingdom Government in respect of transportation, stores, equipment, temporary advances and miscellaneous services furnished the Royal Air Force in Canada. Cost of equipment furnished to the Atlantic Transport Group, \$561,925.29, is the main item making up this balance. Monthly accounts are submitted and as payments are received they are credited to the account.
- B C D Miscellaneous expenditures on account of personnel of the Royal Australian Air Force, the Royal New Zealand Air Force, and the Royal Norwegian Army Air Force serving in Canada, are debited to these accounts. Periodic billings are made against the Government concerned and, as payments are received, they are credited hereto.
- G The cost of equipment, supplies and services furnished to the United States Army Air Corps and to the United States Navy on a recoverable basis are charged to this account. It is credited with payments made by the Government of the United States of periodic accounts rendered.
- H I These Governments' portions of the costs incurred under the terms of the British Commonwealth Air Training Plan agreement and the Combined Training Organization agreement are charged to these accounts. The Governments concerned are billed monthly and payments received are credited hereto.
- J This account is operated under authority of P.C. 1956 of March 24, 1941 (as amended by P.C. 62/6954, of Sept. 6, 1941) and P.C. 1958, of March 24, 1941. It provides for purchase on a recoverable basis of aircraft and equipment on behalf of the United Kingdom Government in respect of that Government's contribution under the terms of the British Commonwealth Air Training Plan agreement. It also provides for expenditures on behalf of the United Kingdom Government for the construction, equipment, operation and maintenance of Royal Air Force Schools in Canada.

Although the Combined Training Organization agreement effective July 1, 1942, superseded the British Commonwealth Air Training Plan agreement and the agreement in respect of R.A.F. Schools under which this account was operated, a basis of the final financial settlement had not been completely agreed upon at the close of the fiscal year.

COMMENTS

- A Pensions deductions are made from the pay of certain categories of R.A.F. personnel on loan to the R.C.A.F. These deductions are credited temporarily to this account and eventually the funds will be used to partially offset per capita contributions which the Government of Canada is obliged to make to the Government of the United Kingdom, under the terms of the British Commonwealth Air Training Plan agreement, in connection with future non-effective benefits to loaned personnel.
- B All cheques, except those drawn against Trust and Special accounts, which remain undelivered after six months subsequent to the date of their issue, are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.

- C Under a Deed of Gift of the late Mr. J. Dazell McKee, securities to the value of \$1,000 are held in trust by the Department. Revenue derived therefrom is credited to this account and used to defray certain expenses in connection with the annual award of the McKee Trophy to the individual who is considered by the Minister, upon recommendation of the selection committee, as having made the most outstanding contribution towards the advancement of Canadian aviation. The above balance includes the value of the securities.
- D Deductions from the salaries of employees of the Department, who are not paid through Central Pay Office, and from the pay and allowances of enlisted personnel, are deposited in this account and cheques are drawn against it in favour of the Receiver General as the certificates become fully paid. The above balance represents the incomplete subscriptions at the close of the fiscal year 1942-43.
- E When this amount was received from the R.A.F. Benevolent Fund in 1939-40, it was intended that an account be operated for the convenience of members of the Royal Air Force stationed in Canada. It remained inactive, however, and in the present fiscal year a cheque for the same amount was issued in favour of the Honorary Treasurer of the R.A.F. Benevolent Fund in compliance with a request of that organization.

COMMENTS

- A A portion of the pay of certain categories of R.C.A.F. personnel serving overseas is withheld and credited to their deferred pay accounts. Such deferments are periodically charged to the proper War Allotment and credited to this trust account, pending release under stipulated conditions to the individuals concerned.
- B Balances of pay and allowances, etc., at the credit of deceased personnel as well as such amounts as are realized from other sources by the Administrator of Estates are credited to this account. Disbursements of estates are made to creditors and beneficiaries as directed by the Administrator. The closing balance shown above represents the value of undistributed estates at the close of the fiscal year.

COMMENTS

A(1) C(1) In order to expedite the release of perishable and other goods and as a guarantee of payment of customs duties and excise taxes thereon, certain importers and licensees maintain securities on deposit with the Department, which are placed with the Department of Finance for safe keeping. At March 31, 1943, the securities so deposited were \$1,085,200 for customs purposes and \$2,312,800 for excise purposes.

A(2) Drawbacks and Refunds, \$27,228,836.70. These consist of home consumption drawback claims, \$2,923,796.04, export drawback claims, \$20,384,754.25, and other refunds of customs duties, \$3,920,286.41.

B(2) C(2) Drawbacks and Refunds—Excise duties, \$3,283,497.60 and excise taxes, \$17,549,000.77. The excise duty drawbacks related chiefly to spirits sold and delivered to universities or scientific and research laboratories for scientific purposes only, or to bona fide public hospitals for medicinal purposes only. The excise tax drawbacks related chiefly to materials, both domestic and imported, used in the manufacture of goods exported.

C(1) The sum of \$506,261,425.82 was apportioned as follows: domestic, \$381,631,436.78; importations, \$124,629,989.04.

The Excise Taxes derived from (i) the sale of postage stamps used on cheques, bills of exchange, promissory notes, receipts to banks, money orders and travellers' cheques, and (ii) stamp duties on Post Office money orders, postal notes, letters and post cards, are not included among the "Excise Taxes" shown in the foregoing statement of revenues, but instead are treated and reported by the Post Office Department as Postal Revenues.

D Brokers' licences. Regulations issued under the provisions of Section 129(5) of the Customs Act provide for a graduated scale of fees to be paid annually by persons licensed to transact business as customs-house brokers.

Law stamps. All fees payable under the provisions of Section 80 of the Exchequer Court Act, c. 34, R.S., and Section 107 of the Supreme Court Act, c. 35, R.S., are settled by means of law stamps of which the issuance and sale is regulated by the Minister of National Revenue.

Rentals of buildings are received from port officers who occupy residential quarters in government-owned buildings operated by the Department.

E(1) Sundry sales. Sale of equipment, stores, or supplies, authorized by minutes of the Salvage Division of the Office of the Comptroller of the Treasury, in accordance with P.C. 6/989, of April 30, 1937.

F(1) Bonded factory and warehouse fees are assessed for services of port officers assigned to duties of a supervisory nature in such factories and warehouses.

Copyright fees. Fees collected from owners of copyrights for services in prohibiting importation of copyrighted works registered under the Copyright Act.

Extra or overtime services. Extra services during regular working hours, and overtime services on Sundays, holidays, and outside of regular working hours, were performed by departmental officers. The extra services and a large proportion of the overtime services were paid for by the persons served.

Storage charges are assessed against goods warehoused for examination and not cleared within the prescribed period.

I(1) (2) Customs and Excise Seizures. The revenues of \$190,619.75 and \$41,989.83 were derived mainly as a result of seizures under the provisions of the Customs Act and the Excise Act. The disbursements of \$114,789.52 were made under authority of the said Acts, and were in respect of (i) expenses incidental to the making of the seizures and for moiety payments to the seizing officers and informers, and (ii) repayments of deposits, in whole or in part, to persons accused of violations of the Customs and Excise Acts.

Payments of \$1,000 or over were made on account of legal services in connection with customs and excise seizures to the following: Burchell, Smith, Parker and Fogo, Halifax, \$1,247.40; and S. Hart Green, Winnipeg, \$5,363.43.

General—As at March 31, 1943, there were in operation 151 Ports of Customs and Excise, and under the survey of these ports, 174 Outposts, 61 Preventive Stations, and 48 Postal Collecting Stations. At the undermentioned ports of the Dominion the cost of operation exceeded the revenues collected in the fiscal year:—

	Revenues	Expenditures
McAdam, N. B.	\$21,417 15	\$29,353 39
Pigeon River, Ont.	2,542 96	6,157 92

I(1) The amount of \$403,939,950.54 is the net as the gross revenue was reduced by (a) transfer to a Trust and Special Account at the close of 1942-43 of \$50,000,000, as indicated, representing the estimated liability of the Dominion Government for the refundable portion of income tax in respect of 1942 personal incomes and (b) refunds of \$823,656.75, made during the year.

(2) (3) (4) (5) The gross revenues under these headings were similarly reduced by the following refunds: national defence tax, \$2,414,515.11; corporations, \$53,609.34; non-resident tax, \$475,900.58; rents and royalties, \$11,337.59.

J The amount of \$434,580,676.78 is the net as the gross revenue was reduced by (a) the transfer of \$20,000,000 at the close of 1942-43 to a Trust and Special Account, as indicated, to cover the estimated liability in respect of the refundable portion of collections to March 31, 1943, and (b) refunds of \$67,685.17 made during the year.

K This amount shows the net revenue after refunds of \$80,252.32 have been deducted.

M Cost of collections received in respect of Provincial income tax Administration.

O Law costs, \$4,885.18; fines and forfeitures, \$2,222.50.

The following employees, whose salary rates were under \$2,400, received travelling expenses in excess of \$300: D. E. Gallant, \$502.18; A. R. Hutchinson, \$1,608.34; P. P. Last, \$594.94; E. O'Connor, \$405.84; E. J. Reed, \$409.30; L. L. E. Rolston, \$1,087.88; H. M. Young, \$341.87.

A C Among the charges to these allotments, the salaries of the following employees have been repaid by organizations to which they were on loan: J. M. Fell, \$3,000; G. W. Jones, \$3,720 (repaid from Nov. 1); S. Jones, \$4,300 (repaid from Nov. 1); R. Lang, \$2,400; J. D. C. Mahaffy, \$3,000. The salaries and living allowances of certain officers stationed in the United States, whose time was occupied in servicing railway transportation companies, were repaid by these companies. Repayments were made by the Commodity Prices Stabilization Corporation, \$3,887.10; Foreign Exchange Control Board, \$4,512.90; Wartime Prices and Trade Board, \$3,366.65; and the railway transportation companies, \$15,762. Of these amounts \$24,162 is included under the heading "Services and Service Fees" in the "Details" of the departmental statement of revenues given on a previous page. The balance, \$3,366.65, was refunded to the vote.

War duties supplement of \$140 was paid to S. Jones in addition to his regular salary. This supplement was repaid by the Wartime Prices and Trade Board from November 1.

C Living allowances of \$500 or over were paid to the following officers stationed in the United States: W. J. Campbell, \$720; G. B. Dench, \$720; R. L. Needham, \$720.

D Distributed as follows: printing, \$4,339.63, and stationery, \$5,256.08.

E This allotment includes \$316.81 for living expenses of officers while acting in a relieving capacity away from their place of residence, also \$1,693.23 for removal expenses of officers.

G As of March 31, 1943, 410 officers were bonded for amounts ranging from \$1,000 to \$5,000, under the Government Officers Guarantee Fund. No claims were made on the fund during the fiscal year in respect of any of these officers.

H The charges to this allotment include: postage and post office box rents, \$2,991.39; compensation for loss, due to depreciation of the Canadian dollar, on cheques issued for salaries and expenses of officers stationed in the United States, \$37.43; office rentals and lighting, \$500.85.

COMMENTS

This vote was provided to meet salaries, cost of living bonus and other expenses of the staff of the Undervaluation Unit, whose duty is it to investigate infractions of the customs laws (except cases of smuggling) involving the importation and entry of goods under false invoices or declarations regarding values and duties payable.

A As of March 31, 1943, there were 20 permanent and 1 temporary employees paid from this allotment. The following were the rates paid to officers receiving annual salaries of \$2,400 or over on that date: H. E. Ball, \$2,760; H. L. Carson, \$3,720; C. S. Fisher, \$2,640;

C. E. Gress, \$2,640; L. H. Hall, \$2,760; G. E. M. Hunter, \$3,720; T. B. Hurson, \$2,640; R. C. Maxwell, \$2,760; B. A. Neville, \$2,640; U. A. Paquette, \$2,760; I. Savard, \$3,720; C. H. Tyers, \$2,640.

Among the charges to this allotment is the salary of C. S. Fisher, who from April 10 devoted half of his time, and of T. B. Hurson, who devotes his full time to work of the Commodity Prices Stabilization Corporation. This Corporation repaid the sum of \$3,905 for their services and the amount is included under the heading "Services and Service Fees" in the "Details" of the departmental statement of revenues given on a previous page.

Twelve of the officers who were paid from this allotment also received seizure awards of moieties payable under the Customs and Excise Acts. The payments were made from seizure revenue and amounted to \$5,674.22.

D In addition to the charges to this allotment, \$2,576.25 for travelling expenses of thirteen officers was paid from seizure revenue. Payments of \$300 or over, from the allotment and/or from seizure revenue were as follows: J. W. Brault, \$691.34; B. A. Neville, \$420.57; U. A. Paquette, \$559.54; I. Savard, \$606.31.

F As at March 31, 1943, 19 officers were bonded for amounts ranging from \$1,000 to \$5,000, under the Government Officers Guarantee Fund. No claims were made on the fund during the fiscal year in respect of any of these officers.

In addition to the payments from this allotment, salaries, etc., totalling \$68,118.50, were paid to 454 Customs and Excise officers by other departments.

The salary of officer E. J. Struthers of the Port of Rock Island, Que., which is among the charges to this allotment, was recovered from the Foreign Exchange Control Board, to which organization he is attached temporarily, and the salary of J. K. Maxwell of the

Port of Winnipeg, Man., for the period December 1, 1942, to March 31, 1943, was repaid by the Wartime Prices and Trade Board to which he is on loan. Of these repayments, \$2,640 is included under the heading "Services and Service Fees" in a statement on a previous page showing the revenues of the Department, and \$653.68 was refunded to the vote.

C Living allowances are paid to officers stationed in northern British Columbia and the Yukon. The following were paid at the rate of \$1,500 per annum: J. P. Begg, F. Cederberg, T. A. M. Haney, R. G. Lee, J. A. Simmons, G. F. S. Watson, J. O. Williams.

D Extra services were performed during regular hours for the accommodation of railway companies and business firms and overtime services were performed on Sundays, holidays and outside of regular hours. The cost of the extra services and a large proportion of the cost of the overtime services are paid for by the parties accommodated. As shown under the departmental statement of revenues given on a previous page, \$184,590.13 was recovered in this connection. In many instances the officers are allowed compensating time off in lieu of overtime pay.

E For the purpose of providing uniforms for distribution to customs officers, cloth is purchased by the Department for resale to clothing manufacturers who tailor the garments and bill the Department for the completed uniforms.

Cloth purchases were: Hield Brothers, Kingston, Ont., \$12,103.94; Paton Manufacturing Co., Ltd., Montreal, Que., \$1,775.12.

Cloth sales were: Walter Blue and Co., Ltd., Sherbrooke, \$1,837.69; Gordon Campbell, Ltd., Vancouver, \$1,580.02; Clayton and Sons, Ltd., Halifax, \$1,902.34; Hamilton Uniform Cap Co., \$356.25; Tip Top Tailors, Ltd., Toronto, \$4,549.90.

COMMENTS

A This comprises instalment payments in connection with the collection of Excise Tax Revenue on account of penalties imposed by the courts under the Special War Revenue Act and held by the Department until the full court penalty has been collected, or the alternative jail sentence imposed.

C Under authority of section 61 of the Income War Tax Act, c. 97, R.S., persons appealing to the Exchequer Court from a decision of the Minister of National Revenue as to their assessments are required to give security for the costs of the appeal, to the satisfaction of the Minister, in a sum not less than \$400. The decision of the Exchequer Court determines the final disposition of the deposit. If the appellant is successful, the amount is returned to him. If he fails, the amount or such part of it as is required to pay the taxed costs of the Crown, is transferred from this account as a revenue item. No interest is allowed on the deposit. The above balance represents the amount of cash on deposit.

D E F G Arrears of income tax were collected by the Dominion Government during the current fiscal year and paid to the Provinces in accordance with the provisions of the Dominion Provincial Taxation Agreement Act, 1942.

H Certain adjustments and arrears.

I J Estimated liability of the Dominion Government for the refundable portion of income tax in respect of 1942 personal incomes and excess profits tax collected to March 31, 1943.

COMMENTS

The following classes of expenditures were incurred: (a) salaries and expenses covering the cost of production and distribution of national films and still pictures used for the purpose of advertising Canada and promoting national unity; (b) expenditures of administration and direction in the production of films for the various departments of the Government, the actual production costs of which were recovered from such departments.

The above recoveries represent processing costs in connection with films produced for other departments.

It will be noted that the following lists of salaries, travelling expenses and vendors exceed in total the allotments authorized, the explanation being that this appropriation was credited with the costs recovered from other departments.

As of March 31, 1943, there were 375 employees paid from this vote. The following table shows those who were paid at the rate of \$2,400 per annum or over at that date, or at date of separation (shown in brackets), as well as travelling expenses where the amount was in excess of \$300.

COMMENTS

The Corps of (Civilian) Canadian Fire Fighters for Service in the United Kingdom was established to assist the National Fire Service in Great Britain in fighting fires resulting from enemy action.

The above expenditures do not include overseas charges for the period December 1, 1942, to March 31, 1943, the disbursing department (National Defence—Army) not having submitted covering billings to the close of the fiscal year.

- A The establishment of the Corps on March 31, 1943, was as follows: G. E. Huff, Commanding Officer, \$5,000; 3 Column Officers at \$6.50 per day, 6 Senior Company Officers at \$5 per day; 13 Company Officers at \$4.25 per day; 37 Section Leaders at \$3 per day; 181 Leading Firemen at \$2.70 per day; 36 Senior Firemen at \$2.20 per day; 126 Firemen at \$1.80 per day; 4 Junior Firemen at \$1.30 per day.
- C Quarters and ration allowances, when not received in kind, were paid to officers and men in Canada at the following rates: officers, \$1.70 per day; men, \$1 per day to September 30, and \$1.25 thereafter. Expenditures	39,561 69
Lapsed	\$ 438 31

COMMENTS

Expenditures were incurred in establishing a special war library in the National Film Board to anticipate the needs of various Government departments in the production of future films of wartime activities.

Of the above expenditure, Philip Ragan Associates, New York, received \$5,797.50.

Allotment: Revolving Fund for Purchase of Supplies for the Production of Films for War Departments (Recoverable).....	85,000 00
Expenditures	82,631 24
Lapsed	\$ 2,368 76

COMMENTS

The National Film Board was provided with a revolving fund of \$100,000 to permit the acquisition of supplies necessary for the production of war films—such expenditures to be recovered from the several War Departments. The expenditure of \$82,631.24 represents inventory of materials supplies, etc., on hand as certified to by the Comptroller and Secretary of the National Film Board.

Payments over \$5,000 in connection with the above were as follows: Canadian Kodak Sales, Ltd., Toronto, \$39,733.07; Dominion Sound Equipment, Ltd., Montreal, \$9,926.86; Canadian General Electric Co., Ottawa, \$5,939.82.

Allotment: Canadian Broadcasting Corporation—Short Wave Station....	10,000 00
Expenditures	nil
Lapsed	\$ 10,000 00

COMMENTS

This allotment was released in March, 1943. No accounts were received for payment in the fiscal year.

COMMENTS

These pensions are for the 1914-18 war. Pensions for the present war are paid from the War Appropriation. Pensions, gratuities, and grants awarded under the Pension Act in respect of:—

A Disabled and deceased ex-members of the Canadian Expeditionary Force....	37,833,104 38
B Disabled and deceased ex-members of the British Forces (Supplementary Pensions)	57,231 73
C Deceased ex-members of the Allied Forces	19,606 10
D Disabled and deceased members of the Militia whose disabilities or death occurred after the War	52,909 25
E New Zealand Pensions (Recoverable)	14,761 28
	\$37,977,612 74

- A On March 31, 1943, there were 94,174 active pension accounts, including 17,549 dependents' cases; this compares with 95,701 accounts, including 17,730 dependents' cases on March 31, 1942.
- B Officers and dependents of deceased officers who served with the British Forces and were domiciled in Canada at the outbreak of war, receive payments supplementary to British pensions to bring the sum of the two pensions up to the Canadian scale. Two hundred and thirty such cases were in payment on March 31, 1943; forty-two South African pensions were also similarly supplemented.
- C Dependents of members of the forces of His Majesty's Allies who died as a result of war and who were domiciled in Canada at the outbreak of war, receive supplementary pensions up to the Canadian scale: On March 31, 1943, such supplementary pensions in payment were Belgian 1, French 32, Italian 3.
- D One hundred and thirty-three cases were in payment on March 31, 1943.

Vote 207 War Veterans' Allowances	7,150,000 00
Expenditures	6,820,158 83
Lapsed	\$ 329,841 17

COMMENTS

On March 31, 1943, 24,666 allowances were in force as compared with 24,767 on March 31, 1942, a decrease of 101. Of the allowances in payment at the end of the year, 15,572 were to veterans over sixty years of age; 8,620 were granted the allowance on the grounds that their disabilities and economic handicaps are such that they are not likely to maintain themselves again, and 474 were to dependents of deceased veterans who are entitled to receive the allowance for a period of one year after the veteran dies.

This legislation is similar in character to the Old Age Pensions Act in so far as income is concerned. The maximum income, inclusive of veterans' allowances, that a single man may enjoy is \$365 a year and for a married man this figure is \$730. The maximum allowance issuable is \$20 a month for single persons and \$40 a month for married persons, except in cases of necessitous circumstances when a further amount of \$5 a month for single persons and \$10 a month for married persons may be granted. As of March 31, 1943, 4,110 supplementary payments were in issue of which 1,663 were in respect of married persons.

COMMENTS

On March 31, 1943, 1,355 patients in hospitals were receiving allowances. The rates of allowances are authorized in the treatment regulations of the Department (P.C. 91, January 16, 1936). Commencing at \$45 a month for single men, they increase according to rank and number of dependents of the ex-soldier. Pensions are suspended during periods of hospitalization.

The expenditure includes payments amounting to \$13,350.88 for clothing and comforts provided to patients who, although eligible to receive treatment, are limited to this form of allowance.

Vote 213—Employers' Liability Compensation	50,000 00
Expenditures	49,928 89
Lapsed	\$ 71 11

COMMENTS

Under this scheme of assistance, which is designed to remove from employers any added financial risk that might be involved by employing disabled veterans, the costs arising from industrial accidents are borne by the Government. The Workmen's Compensation Boards and employers are reimbursed for medical care and compensation, including capitalization of awards covering permanent disabilities and fatalities.

This expenditure covers 537 claims and payments were made as follows: Nova Scotia, \$5,303.85; Quebec, \$723.90; Ontario, \$21,032.55; Manitoba, \$4,254.51; Saskatchewan, \$758.89; Alberta, \$4,393.58; British Columbia, \$9,620.42; Canadian National Railways, \$3,412.43; Canadian Pacific Railway, \$428.76.

Vote 214	Grant to Last Post Fund	85,000 00
	Expenditures	50,049 66
	Lapsed	\$ 34,950 34

COMMENTS

The Last Post Fund, with Dominion Headquarters in Montreal, is a patriotic society to provide for the burial of honourably discharged ex-service men who were in destitute circumstances at the time of their decease. Payment is not made of the grant as such, but the Society is recouped from this vote for burial expenditures, plus administration charges, less contributions from municipalities for the cost that would otherwise have been incurred in the burial of these men as indigents.

Vote 215	Grant to Canadian Legion	9,000 00

POST OFFICE DEPARTMENT

Under authority of the Post Office Act, c. 161, R.S. (as amended), and the Savings Banks Act, c. 15, R.S., the Post Office Department, under the direction of the Postmaster General, is entrusted with the management and operation of the postal services of Canada and the Post Office Savings Bank. In addition, the Department also performs certain services of an agency nature for other departments (without remuneration in some instances), the more important of which are: postmasters are required to act as deputy registrars under the provisions of the National Registration regulations; payments on Dominion Government annuities are received; unemployment insurance stamps, radio licences, war savings stamps and certificates are sold; mail is examined for the Foreign Exchange Control Board; and supplies of forms, literature, etc., are distributed to the public on behalf of the Department of National Revenue, Income Tax Division, and the Wartime Prices and Trade Board.

Post Offices are divided into two main groups, namely, staff offices and revenue offices. The postmasters and staffs of staff offices are paid from parliamentary appropriations whereas the postmasters of revenue offices, and through them their staffs, except letter carriers, are paid on a commission basis by means of commission warrants issued from headquarters at Ottawa, and cashed out of Post Office funds in their hands. Letter carriers are paid from parliamentary appropriations in all cases. The various post offices are grouped according to postal districts, each district being under the superintendence of a District Director or Superintendent, controlled from departmental headquarters at Ottawa. District Offices are situated at Halifax, Charlottetown, Saint John, N.B., Quebec, Montreal, Ottawa, Toronto, London, North Bay, Winnipeg, Moose Jaw, Saskatoon, Edmonton, Calgary and Vancouver.

COMMENTS

G Miscellaneous revenue consists of: payments received from the Unemployment Insurance Commission as remuneration for distributing and selling unemployment insurance stamps, \$175,588.53; commissions received from the Department of Transport for radio licences sold, \$10,753.20; proceeds from the sale of mailing lists, \$3,183.50; net profit on personal messages mailed to enemy and enemy occupied countries, \$3,109.79; cash overages reported by postmasters, \$1,460.61; sundry items, \$2,946.72.

H Postmasters of revenue post offices are paid in accordance with the scales of remuneration set forth in the Civil Service Commission's classification of the Civil Service, and, with the exception of offices where the revenues do not exceed \$3,000 per annum (of which the postmasters are exempted from the provisions of the Civil Service Act, under the terms of Section 57A), appointments are made under the jurisdiction of the Civil Service Commission. During the year under review, 12,166 revenue postmasters were employed, of whom 12,074 were paid on a commission basis, and 92 were paid at fixed annual rates.

L Total payments during the fiscal year amounted to \$94,394.83 and collections of indemnities previously paid amounted to \$57,847.96, leaving a net balance of \$36,546.87, a portion of which may be recovered subsequently.

N Subsequent to the disbursement from Post Office Revenue of sums totalling \$13,963.26, there was being carried in suspense as at March 31, 1943, a sum of \$21,640.11, representing losses not yet adjusted. This amount included \$482.45, applicable to previous fiscal years.

Losses, including defalcations and burglaries, wherein a postmaster or other post office official has been found to be implicated, or is suspected of being implicated, are investigated by the Department with the object, among other things, of establishing responsibility. If criminal or personal responsibility of any postmaster or other post office employee is established, the loss, or as much of it as possible, is recovered from the person or persons found responsible; if for any reason recovery cannot be effected, a claim is made on the Post Office Guarantee Fund.

Other losses, through burglary, acts of God, etc., of \$50 and over, are charged against revenue under authority obtained by Order in Council; similar losses under \$50 are also charged to revenue, but without reference to Council or Treasury Board.

COMMENTS

These votes were provided to pay the cost of (i) the carriage of mails by air, rural mail delivery, mail stage services, movement of mails between post offices and railway stations, and collections from street letter boxes, and (ii) the salaries (including cost of living bonus) and other expenses of the administrative unit at Ottawa, which controls these services.

A As of March 31, 1943, there were 37 employees paid from this allotment. The following were receiving annual salaries at the rate of \$2,400 or over on that date: F. J. Colpman, \$3,000; G. Herring, \$5,700; J. E. Leclerc, \$2,400; A. H. B. Potts, \$3,840; J. St. Germain, \$3,840; R. F. Tubman, \$2,400.

Two employees were receiving annual war duties supplements on March 31, or at date of separation (shown in brackets) as follows: G. A. T. Chagnon, \$480 (military leave, May 9); M. W. Cooke, \$480 (loaned to National War Services Department, Feb. 1).

D Payments of \$1,000 or over were: British Yukon Navigation Co., \$10,506; Canadian Airways Ltd., \$74,155.46; Canadian Colonial Airways Ltd., \$28,517.50; Canadian Pacific Air Lines, Ltd., \$251,391.08; Leavens Brothers Air Services, Ltd., \$4,044.75; MacKenzie Air Services, Ltd., \$24,176; Maritime Central Airways, Ltd., \$102,467.65; Northern Airways, Ltd., \$2,276.40; Northwest Airlines, Inc., \$31,594.50; Prairie Airways, Ltd., \$146,795.25; Starratt Airways and Transportation Co., \$1,014.18; Trans-Canada Air Lines, \$3,342,185.58; Yukon Southern Air Transport, Ltd., \$278,408.32; Wings Ltd., \$7,155.96.

The mail contract entered into with Trans-Canada Air Lines, under the Trans-Canada Air Lines Act, 1937, provided for payment by the Department at the rate of 60 cents per mile flown with mails, during the initial period of operation ending December 31, 1939. The Act also empowered the Governor in Council to fix the rate for subsequent years, the rate to be increased in the event of the Corporation incurring a deficit in the preceding year, but to be decreased if a surplus were earned during such year. The rate for the fiscal year 1942-43 was set at 45.74 cents per mile under authority of P.C. 2249, dated March 23, 1942, and payments were made accordingly.

E The following is a statement by Districts of payments made under this allotment during the fiscal years 1942-43 and 1941-42. The item Headquarters, \$38,667.24, is for side services between certain airports and post offices on Trans-Canada air mail routes, and this amount was paid to Trans-Canada Air Lines.

*(See also Vote 201, Department of National War Services.)

D The entire amount was paid to the National Film Board. Theatrical and non-theatrical motion pictures and newsreels of wartime subjects were produced and distributed by the National Film Board throughout Canada and Overseas. Non-theatrical sixteen-millimetre reproductions were supplied for use in halls, churches, schools, and factories. To facilitate a monthly showing of these reproductions to communities not normally served with motion

pictures, circuits were established across Canada. In co-operation with Dominion Government departments and various industrial, labour, and educational groups, Industrial Film Circuits were also established across Canada.

- E Speeches and programs of an educational nature designed to (a) foster Canadian unity; (b) provide basic information about the Canadian war effort; and (c) answer questions in the public mind, were broadcast over various radio stations regionally and from coast to coast. Expenses in this connection include the following payments: Canadian Broadcasting Corporation, Ottawa, \$13,260.39; Beaudry-Harwood Radio Productions, Montreal, \$4,328.80.
- F Still photographs providing coverage of Canada's wartime activities were distributed in print and mat form to newspapers and periodicals in Canada, the United States, and Overseas. Window display pictures were made available for large department stores, libraries, and exhibitions. Payments over \$5,000 were made to the following: Bomac Electrotypes Co., Ltd., Toronto, \$5,784.31; The Gilliams Service, Inc., New York, \$35,975.03; National Film Board, Ottawa, \$16,078.32; Rapid Grip and Batten, Ltd., Montreal, \$25,572.48.
- G This expenditure covers the cost of producing and distributing booklets, leaflets, and folders designed to (a) describe various aspects of Canada's war activities; (b) encourage popular attachment to the democratic way of life; and (c) stimulate public morale. The King's Printer was paid \$126,856.48.
- H Artists were engaged and posters produced to intensify public participation in the war effort, and to discourage careless talk about topics of interest to the enemy. Distribution was made to service clubs, boards of trade, industrial plants, schools, etc. Small size miniatures suitable for insertion in ordinary correspondence envelopes were distributed to Government departments, insurance companies, banks, public utilities, etc. The King's Printer was paid \$79,504.12. Of this amount \$37,634.96 was refunded by the Department of National Defence. J. A. Lemay, artist, was paid \$4,348.75.
- I Payment of \$35,835.61 was made to the King's Printer for envelopes and letter heads, stationery and supplies, typewriters and equipment, etc.
- J Public speakers addressed local gatherings throughout Canada on a variety of topics pertaining to the war effort.
- K A grant of \$5,000 was made to the Canadian Council of Education for Citizenship to assist this organization in meeting its general administrative expenses.
- L This committee was established to act as a consultant body on problems affecting national morale, and to advise the Director of Public Information as to publicity needs and approaches. Since October 8, 1942, the functions of the committee have been carried on by Board employees.
- M This includes telegrams, \$2,682.04; telephones, \$6,886.19; postage, \$16,396.17; subscriptions, \$5,868.37; express and cartage, \$16,094.21.

GENERAL

Special activities of the Board, and costs thereof, follow: (a) tour by representatives of United States radio chains, \$2,751.38; (b) tour by Mexican and Bolivian editors, \$1,478.65; (c) luncheon for members of the National Editorial Association of the United States, \$363.89; (d) fees and travelling expenses of Father Thaddeus Kotowski, \$821.63; (e) tour by the Ministers of China, Czechoslovakia, Chile and Russia, \$750.05; (f) Argentine newspapermen's tour, \$749.96; (g) radio program "Town Meeting Of The Air", \$588.44; (h) tour by J. C. Viera, Brazilian journalist, \$514.12; and (i) tour by "Oakville" heroes to New York, \$473.76.

To facilitate distribution of Canadian war news and information in the United States, offices were opened in New York and Washington. These offices incurred expenditures as follows:

	New York	Washington
Salaries and Allowances.....	24,564 85	10,355 74

COMMENTS

Under authority of P.C. 2516 of April 10, 1941, the Chairman of the Military Museum Board and the Salvage Officer have charge of the disposal of sundry war trophies for the benefit of the war effort. These trophies were distributed to various municipalities, public and military museums throughout Canada, after the last war. The previous policy governing the distribution of such trophies provided that they should remain the property of the Dominion of Canada, and could not at any time be sold or otherwise disposed of by such municipalities or other bodies.

C Waste paper contract.....	36,000 00
D Sale of discarded equipment, etc.	1,892 39
	\$ 169,795 06

COMMENTS

The decrease in revenues of \$231,556.10 in 1942-43 as compared with those for 1941-42, is largely accounted for by the fact that the operations recorded in the King's Printer's Advance Account resulted in an excess of expenditures over revenues, whereas there was an excess of revenues over expenditures of \$257,257.12 for the previous year. Other fluctua-

tions were: increases of \$12,112.71 in sales of publications and \$14,000 in the contract for waste paper; and decreases of \$332.78 in revenue from the *Canada Gazette* and \$78.91 in sales of discarded equipment.

A The *Canada Gazette* is the official gazette of Canada, the printing of which is executed by the King's Printer under Section 28 of the Public Printing and Stationery Act; the rates for advertising, and for subscriptions and single copies, are established by the Governor in Council.

C The sale of waste paper was made to Sachs Bros. Ltd., Ottawa, under an annual contract with the approval of the Governor in Council.

Certified correct.

EDMOND CLOUTIER,
King's Printer.

COMMENTS

A B Section 38 of the Public Printing and Stationery Act was amended by chapter 5, 1928. It authorizes advances from Consolidated Revenue Fund to the King's Printer, not exceeding \$700,000, "to enable him to purchase material for the execution of orders given or requisitions made under the provisions of the Act, and to pay the wages of workmen engaged in the execution of such orders or requisitions." All moneys collected from the public service are treated as repayments.

It is the practice of the King's Printer to add a percentage to the cost of the stationery purchased to offset the cost of operation, and this charge is absorbed by the various departments in their purchases; in the Printing Branch the charge for work done is made on a unit price basis for the various classes of work executed. The cost of light, heat, power, telephone services, etc., paid by the Department of Public Works, is not taken into account.

From the closing balance of \$1,775,415.90 shown above must be deducted the sum of \$55,673.69, representing amounts due the King's Printer by other departments and other Governments at the close of the fiscal year, and which are allowed as deductions under

Section 38 of the Act, leaving the sum of \$1,019,742.21 in excess of the advances authorized (\$700,000). An allotment from the War Appropriation is being obtained in 1943-44 to cover such excess.

The following is a statement of the operations for the year as shown in the King's Printer's Advance Account:

Certified correct.

EDMOND CLOUTIER,
King's Printer.

The stock of stationery, printing materials and supplies in store, was checked, under my direction, with the quantities purchased and supplied, as required by Section 35 (2) of the Public Printing and Stationery Act, Chap. 162, R.S. 1927.

WATSON SELLAR,
Auditor General.

*Details of these items are shown at the end of this section.

At the close of the year, accounts totalling \$55,673.69 were due the King's Printer as follows: Agriculture, \$820.61; Finance, \$55.97; House of Commons, \$1,407.50; Labour, \$975.05; Mines and Resources, \$26.92; Munitions and Supply, \$36,542.98; National Gallery of Canada, \$3.77; National Research Council, \$2,945.71; National War Services, \$721.65;

Penitentiaries Branch, \$30.87; Public Printing and Stationery, \$226.55; Public Works, \$1.94; Secretary of State, \$438.59; Trade and Commerce, \$89.34; Transport Commissioners, \$47.48; Australian Air Liaison Office, \$186.22; United Kingdom Payments Office, \$2,747.02; National War Finance Committee, \$8,405.52. Of this amount, \$48,887.55 was due the Printing Branch and \$6,786.14 due the Stationery Branch.

- C This account was opened for the purpose of transferring amounts unpaid for printing and stationery by various departments at the close of the fiscal year 1941-42.

As this procedure is not now considered necessary, the amount of \$3,253.11 still uncollected at the end of 1942-43 was transferred back to King's Printer's Advance Account, and the account closed.

COMMENTS

- A Deductions from the salaries of employees of the Department, not paid by Central Pay Office, are deposited in this account and cheques are drawn against it in favour of the Bank of Canada as the Certificates are fully paid. The above balance represents the incomplete subscriptions at the close of 1942-43.
- B All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.

COMMENTS

- A Ferry licences are issued under authority of the Ferries Act, c. 68, R.S.
Rents are authorized by Order in Council with the exception of properties under lease at the time of purchase.
- B J. A. Auclair purchased departmental plant and equipment valued at \$12,000 on completion of his contract for the construction of the government section of an intercepting sewer at Quebec City.

C Commissions are a percentage of the tolls collected by the telephone companies.

Hire of dredges amounted to \$8,185.78, of scows, \$13,976.25, of tugs, \$13,774.88; sundry receipts were \$2,090.

Fees charged for services performed by the dry docks are regulated by Orders in Council as follows: Champlain and Lorne Docks, P.C. 1425, July 23, 1927; Selkirk Repair Slip, P.C. 1548, June 13, 1935; Esquimalt Dock, P.C. 1141, May 12, 1932.

Telegraph charges are approved by the Board of Transport Commissioners.

Proportion of staff salaries for North Vancouver and Ashcroft was received from Canadian National and Canadian Pacific Telegraphs.

The revenue of the Photographic Branch consists mainly of sales of blue prints and photographic work.

D The United Kingdom Payments Office refunded this amount for furniture and service from Nov. 1, 1939 to Sept. 30, 1941.

E The following amounts were collected for damages to government properties: Hull, \$26.45; Levis, \$5,000; St. Denis, \$5; Collingwood, \$183.50; Kingston, \$1,600; Ottawa, \$79.34.

COMMENTS

Payments of subsidies are based on a certificate of the Chief Engineer of the Department that the dock has been kept in a constant state of efficiency, that no discrimination has been used against any vessel wishing to use the dock, and that the rates charged have not exceeded the rates agreed upon between the Department and dry dock management.

The Act of 1910 and the amending Act of 1917 are consolidated in the Dry Docks Subsidies Act, c. 191, R.S.

- A This subsidy, authorized by c. 27, 1917, is $4\frac{1}{2}$ per cent of a cost of \$2,500,000 for a period of 35 years. Payments, made semi-annually, will continue until 1960. The amount of \$2,381.86 is retained from the subsidy each year and is deposited to the credit of a special account to provide for the renewal of pontoons, see Trust Funds under Trust and Special Accounts in this section.
- B Twenty-ninth annual subsidy payment, authorized by c. 17, 1910, is $3\frac{1}{2}$ per cent of the cost of \$3,000,000 for a period of 35 years.
- C Twenty-fourth annual subsidy payment, authorized by c. 17, 1910, is $3\frac{1}{2}$ per cent of the cost of \$2,199,168.02 for a period of 25 years.
- D This subsidy, authorized by c. 27, 1917, is $4\frac{1}{2}$ per cent on a cost of \$5,500,000 for a period of 35 years. Payments, made semi-annually, will continue until 1959.

The expenditures of the Gallery are governed by "An Act to incorporate the National Gallery of Canada", c. 33, 1913, and are controlled by a Board of three trustees who serve without remuneration and receive their reasonable travelling and other expenses. The moneys appropriated by Parliament for the work of the Board, or which the Board may receive by request, or in any other manner, are expended under the direction of the Board.

An open account under the title of "National Gallery of Canada—Special", which is shown under Trust and Special Accounts at the end of this section, is maintained to record monetary gifts and bequests to the National Gallery.

Under the Unemployment and Agricultural Assistance Act, 1940, P.C. 5828 of Oct. 22, 1940 authorized an agreement whereby the Dominion Government was to contribute a sum not exceeding \$875,000 towards the construction of the Civic Section of an intercepting sewer, etc., at Quebec City. The project, from its inception, has been carried on by this Department, but in former years the funds were provided by transfers from the Department of Labour under the authority of the Governor in Council. The 1942-43 expenditures are as follows: contributions by the Department of Public Works, \$440,794.54; J. A. Auclair, balance on account of contract, \$69,459.03; Arthur Surveyor & Co., engineers, fees and sundry expenses, \$12,336.51; legal services, \$661.56. The contract of J. A. Auclair for \$343,055.27 included extras amounting to \$10,207.32. He purchased from the Department plant and equipment valued at \$12,000 and this amount appears in the revenue section under Proceeds from Sales. The total amount paid to the engineers (Arthur Surveyor & Co.) was \$68,088.55. During the preceding fiscal years, the contributions of the Department of Labour totalled \$434,205.46.

B This account reflects the value of contractors' securities and earnings held pending the settlement of claims made by their creditors.

C By authority of P.C. 2965, October 4, 1939, the Department of Public Works took over from the Province of British Columbia for maintenance and operation the railway bridge at New Westminster, known as the Fraser River Bridge, the transfer being effective from December 1, 1939.

All tolls collected from the railways using this bridge are credited to this account. The cost of ordinary maintenance and operation is met from moneys voted by Parliament and the vote entitled "Maintenance and Operation of the New Westminster Bridge" is recouped at the end of each fiscal year from the revenues collected. Large repairs may be paid direct from this Account.

The balance remaining in the fund is to accumulate for the ten years specified in the agreement pending final settlement with the Province.

D Monetary gifts and bequests to the National Gallery are credited to this account. Expenditures from it are for lectures on Art, etc. The only amount credited during the year was \$30 interest on investment in bonds.

E All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.

D Miscellaneous.

D(1) Contributions from Royal Canadian Mounted Police Provincial Pensions Trust Fund—The Royal Canadian Mounted Police Act, c. 160, R.S. sec. 5, and amendments thereto recognize a constable's or officer's prior service with the Provincial Police Forces which have been taken over by the Royal Canadian Mounted Police. Payment for this prior service is collected from the Provinces and from members of the Force and credited to the Trust Fund. As the pensions of these men are a direct charge to Consolidated Fund, the amount to the credit of each man is transferred to Revenue when he is pensioned. The amount transferred in 1942-43 was \$2,763.82.

D(2) Officers' Pension Fund—This revenue consists of deductions from the pay of commissioned officers of the Force, and from the pensions of officers who have retired, in accordance with c. 160, R.S., sec. 49.

COMMENTS

In addition to the vote reported above, \$3,821,996 was allotted from the War appropriation to the Royal Canadian Mounted Police on account of increased activities of the Force due to the War, to be expended in accordance with the War Appropriation Act of 1942.

The combined expenditures, chargeable to votes 321 and 436 and to this Allotment from the War Appropriation, totalled \$9,316,440.95, of which \$3,718,883.48 was expended from the War Allotment referred to above. As these expenditures are for similar purposes, the comments that follow refer to the total expenditure with the exception of "personnel services such as extra clerical assistance, pay and allowances and construction programs, when required and authorized for war purposes" which are accounted for under the War Allotment—Land Services.

A As of March 31, 1943, there were 50 employees paid from this allotment. No employee was receiving an annual salary of \$2,400 or over on that date.

C This allotment provides for the pay and allowances at rates set by the Governor in Council of the commissioned officers appointed by the Governor in Council, and non-commissioned officers, constables and special constables appointed by the Commissioner. The following was the strength in the various commissioned and non-commissioned ranks at March 31, 1943: 6 assistant commissioners, 1 acting assistant commissioner, 12 superintendents, 1 acting superintendent, 45 inspectors, 9 sub-inspectors, 1 surgeon, 38 staff sergeants, 170 sergeants, 461 corporals, 1,456 constables, 108 special constables, 15 acting assistant surgeons. As at March 31, 1943, or at date of separation (shown in brackets), the officers were in receipt of the following rates of pay:

COMMENTS

The organization and duties of the Security Service directed in P.C. 85/6073 of July 14, 1942, necessary to the public security of the Dominion under extant war conditions, briefly comprise the following:

(a) Organization of a Security Service for the whole of Canada under the control of the Commissioner of the Royal Canadian Mounted Police.

(b) Security Service duties involve close relations with the public, such as the examination and interrogation of passengers and crews of airplanes, boats, trains, buses, etc., arriving at points of entry into the Dominion; also co-operation with local services and interests, such as police, immigration, customs, census, shipping firms, harbour masters, pilots, banks and other bodies.

A As at March 31, 1943, a strength of 18 special constables were especially employed in the Security Control Service, Maritime Provinces.

F Purchases of 71 new and 23 used cars and 1 new station wagon were made under the initial policy of Security Control Service in the Maritime Provinces. Subsequently, a greatly reduced organization was provided and the cars purchased were used for the general security service throughout the Force.

I Construction of a permanent pier, Halifax Harbour, for inspection of merchant seamen when proceeding to and from vessels in the harbour.

COMMENTS

- A A trust account authorized and administered by the Department under the provisions of the Royal Canadian Mounted Police Act, c. 160, R.S., sec. 21 and amendments thereto. All moneys received by personnel of the Force over and above their pay and allowances are deposited to this Fund and benefits are payable therefrom as directed in P.C. 7/1948 of August 1, 1936, and amendments thereto.
- B The Royal Canadian Mounted Police Act, c. 160, R.S., sec. 5 and amendments thereto directs that service of officers and constables of former provincial police forces taken over by the Royal Canadian Mounted Police may count for pension purposes, subject to payment therefor. Payment for this prior service was in some instances made by provinces concerned, and in others by the personnel, the proceeds of which contributions are credited to this trust fund. Payable pensions to these men are a direct charge to Consolidated Fund, the amount to the credit of each man in the Trust Fund being transferred to Revenue when he is pensioned. Also withdrawals are made and payable to time-expired personnel with uncompleted pensionable service.

COMMENTS

- A O Under the Bankruptcy Act the levy is determined by the Governor in Council and the licence fee by the Minister.
- B H Charges for services under the Companies Act are authorized by the Governor in Council. The cost of advertising in the *Canada Gazette*, notice of the granting of letters patent, supplementary letters patent and surrender of letters patent, required under the terms of the Companies Act, and the cost of the issues in which such notices appear are considered part costs of the services rendered and, as such, have been deducted from the revenue.
- C I This revenue is collected under the authority of section 41 of the Copyright Act, sections 49 and 50 of the Trade Mark and Design Act and Order in Council, P.C. 2198, March 31, 1941.
- D J The fees collected under the Naturalization Act are as indicated in section 39 of the Regulations of the said Act.
- E K The tariff of fees charged is set forth in the rules and regulations, sections 73 to 75 of the Patent Act.
- F M This revenue is collected as stated in the schedule of fees under section 57 of the Unfair Competition Act.
- L The fees charged under the Trade Union Act are prescribed by Statute.

COMMENTS

- A This account has its origin in the 1914-18 war. The balance remaining in the fund represents earnings of prisoners who died while interned, prisoners who escaped or were killed trying to escape, and of others who, for one reason or another, were not paid the balances to their credit on release.
- B This account is similar to Internment Operations Fund, except that the amount represents cash and valuables which were the property of the prisoners.
- C This amount has been deposited as security against any claim which may be put forward on behalf of the United States federal tax authorities for additional taxes against Maple Investments Limited prior to the 15th day of June, 1945, such security being tendered in connection with a petition for acceptance of surrender of the charter of the said Maple Investments Limited.
- D All cheques except those drawn against Trust and Special Accounts which remain undelivered after six months subsequent to the date of their issue are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.
- E The amount in this account represents declared but unpaid dividends of estates, paid to the Receiver General in accordance with the provisions of the Bankruptcy Act.

Vote 340	Payment to the Government of the United Kingdom on account of losses under the 3,000 British Family Agreement of August 20, 1924, and the New Brunswick 500 British Family Agreements of August 4, 1927, and August 27, 1935	20,000 00
	Expenditures	12,298 16
	Lapsed	\$ 7,701 84

COMMENTS

Under the agreement with the Government of the United Kingdom, losses resulting from the operation of the schemes are divided between the two governments in proportion to the advances made by each government. This vote is provided for payments to the Government of the United Kingdom for cases where that government's loss exceeds the agreed proportion.

Refunds of Previous Year's Revenue—Consolidated Revenue and Audit

Act, 1931, c. 27, sec. 22(2).....\$ 2 00

The above refund is to recoup the Canadian Bank of Commerce for payment of Replacement Warrant No. 5711 issued on November 26, 1934, the funds for which were held in a suspense account for a number of years and subsequently transferred to revenue.

GENERAL

Vote 67 Unforeseen expenses, \$80,000; transfer.....\$ 7,636 66

This was expenditure incurred by the Soldier Settlement staffs in connection with organization work for the administration of the Veterans' Land Act for which no appropriation had been provided. The expenditure is classified as follows: travelling expenses, \$4,494.40; printing and stationery, \$3,142.26.

COMMENTS

The expenditures are classified as follows: surveyor's fees, F. P. Burden, \$3,814.15; surveys costs, \$1,253.52; travelling expenses, \$2,995.53; fencing, \$17,406.14; damage claims, \$2,141.06; legal and sundry, \$280.25.

Sales agreements were obtained from the owners of the land crossed by the right-of-way, surveys made for plans for registration with the Land Registry Office, damage claims settled and fences erected. Due to unavoidable delays in obtaining deeds and completing the necessary legal requirements to obtain title, no payments were made to owners of the right-of-way, which accounts for the large lapse.

COMMENTS

Generally, in connection with the above accounts, there is a parliamentary appropriation provided, the expenditure from which is treated as Loans and Investments through the above accounts. The appropriation in the present year and the accounting therefor follow:

Loans and Investments

Vote 415 To provide for Soldier Land Settlement and British Family Settlement net advances	105,000 00
Expenditures	53,757 53
Lapsed	<u>\$ 51,242 47</u>

This expenditure is included as receipts in the above Trust and Special Accounts as follows:

Soldier Land Settlement	44,433 04
General Land Settlement	9,244 89
Purchased Lands	74 60
	<hr/>
	\$ 53,757 53
	<hr/>

These expenditures comprise: taxes, \$39,929.35 insurance, \$3,860.99; miscellaneous advances, \$9,910.86; Indian soldier settlers, \$56.33.

A This account relates to advances made to veterans of the 1914-18 war and further transactions with all purchasers of reverted properties.

The Soldier Settlement Balance Sheet shows gross loans as \$117,244,207.66 and Farmers' Creditors Arrangement Act reductions charged back from General Land Settlement as \$1,521,865.42, making a total of \$118,766,073.08. From this total is deducted the value of lands transferred to the British Family Settlement Scheme, \$8,449,532.67, legislative reductions of loans, \$25,299,908.25, and repayments of principal, \$41,345,901.94, resulting in a debit balance of \$43,670,730.22 at March 31, 1943.

Receipts consist of repayments of principal, \$1,490,067.17, and an amount of \$48,623.39 included in the item of \$50,706.81 under Write-Down of Assets written off under legislative authority. Disbursements are (a) payments of taxes, insurance and other charges, \$44,438.04; (b) a reduction under Farmers' Creditors Arrangement Act to British Family Settlers charged back to former soldier settler owners, \$6,069.59; and (c) sale of purchased lands sold on terms to civilian purchasers, \$150.

B The General Land Settlement account relates to the advances made by the Dominion to the British Family Settlement and the New Brunswick Settlement Schemes, to which schemes the United Kingdom Government contributed. Under the agreements with the United Kingdom Government, the accounts relating to these two schemes are audited annually under the direction of the Auditor General and copies of the audit report are transmitted to His Majesty's Secretary of State for Dominion Affairs. At March 31, 1943, the outstanding loans due the United Kingdom were shown as \$1,770,539.13 and overdue interest as \$38,935.54.

Receipts consist of (a) repayments of principal, \$218,589.71; (b) the reduction under the Farmers' Creditors Arrangement Act of \$6,069.59 debited in the above account; and (c) an amount of \$2,083.42 included in the item of \$50,706.81 under Write-Down of Assets written off under legislative authority. Disbursements include payment of taxes, insurance and other charges, \$9,244.89.

C When the Soldier Settlement Board was established, certain tracts of land were acquired by purchase or otherwise and the transactions herein are in connection with portions of this land in which the Dominion Government still has a financial interest. Receipts are derived from sales of land on cash or terms while disbursements represent payments for taxes.

D This is a clearing account for the United Kingdom's portion of advances, and repayments of same, under the 3,000 British Families Settlement Scheme and the New Brunswick 500 Families Settlement Scheme. Debit balances are paid by that Government while credit balances are remitted to it.

F As the title indicates, this account is for the deposit of moneys pending distribution to the proper account.

G This account accumulates the value of write-downs to the non-active category of the investment of the Dominion Government in soldier and general land settlement loans.

COMMENTS

A Electricity export duty: Duty is assessed for the export of electricity in accordance with the rates established by the Governor in Council under the Act for the export of electric power, natural gas, etc.

C Export-permits: Under authority of P.C. 2448 of April 8, 1941, and the War Measures Act, an Export Permit Branch was established in the Department of Trade and Commerce in order to centralize the control over the issuance of export permits for all products for which such permits are required. Regulations governing the granting of permits are issued by the Minister of Trade and Commerce.

Elevator licence fees: Under authority of the Canada Grain Act, all persons handling grain whether as dealers or as operators of elevators must secure annually, from the Board of Grain Commissioners, a licence to operate.

Elevator rental: The Port Arthur Elevator is leased under the authority of the Governor in Council to the McCabe Bros. Grain Company at an annual rental of \$45,000, with a further amount assessed for installation and use of certain machinery. Additional rentals are required if the quantity of grain elevated through the elevator exceeds 9,000,000 bushels; also if the storage rate of $\frac{1}{80}$ of 1 cent per bushel per day is maintained or increased.

D Sales of grain: The sales of grain consist of \$14,744.95 for grain samples of Board of Grain Commissioners; and \$314.90 at Calgary, \$395.24 at Lethbridge and \$6.41 at Moose Jaw for surplus grain.

E Board of Grain Commissioners: The Canada Grain Act provides authority for the collection of revenue for grain inspection, weighing, registration and cancellation of warehouse receipts, sampling, etc. The tariffs charged for services rendered are established by the Board of Grain Commissioners and published in the *Canada Gazette*.

Canadian Government Elevators: The elevators are operated by the Board of Grain Commissioners under the authority of the Canada Grain Act. The tariffs charged for services rendered are established by the Board of Grain Commissioners and published in the *Canada Gazette* under section 15 of the Act. The revenue was derived from charges for storage and elevation of grain, cleaning, drying, sale of screenings, etc.

Electricity inspection: The Electricity Inspection Act requires that meters used for the purpose of establishing the charge for electrical service shall be inspected, subject to regulations. The inspection fees are established by the Governor in Council under the authority of section 21 of the Act. The revenue is collected by the inspecting officer, who affixes stamps to the value of the cost of inspection to the certificate issued.

Gas inspection: The fees for testing gas and gas meters are established by the Governor in Council under section 11 of the Gas Inspection Act. The revenue is collected by the inspecting officer, who affixes stamps to the value of the cost of inspection to the certificate issued.

Weights and Measures inspection: Section 53 of the Weights and Measures Inspection Act provides that the Governor in Council may, from time to time, make a tariff of fees for inspecting and stamping weights and measures, balances, etc. The revenue is collected by the inspecting officer, who affixes stamps to the value of the cost of the inspection to the certificate issued.

H National Research Council: This revenue represents the return of empty containers, cylinders and other goods, payment for which was made in the previous year.

COMMENTS

P.C. 8795 of Sept. 30, 1942, authorized the purchase of the Steamer *Pelee*, and P.C. 9144 of Oct. 6, 1942, her sale to an approved buyer (D. L. Goodison, Blenheim, Ont.) for \$40,000, payable as follows: \$10,000 cash on October 31, 1942, and the balance of \$30,000 in six annual instalments of \$5,000, plus interest at four per cent per annum, by deduction from the Mail Subsidy beginning in 1943-44. The payment was made from the above appropriation and later transferred to Active Assets under Miscellaneous Current Accounts. The instalments are to be credited to this account, which bears the title of Steamer *Pelee*, and the interest charged to Revenue—Return on Investments.

COMMENTS

- A The account in the current year was used for the purpose of recording the matured interest earned on securities held as surety for licensees. An amount of \$735, being the interest received, was deposited to the credit of the account and subsequently cheques were issued to the licensees returning the interest on their surety deposits.
- B With respect to the annual weigh-up of grain in store in public terminal elevators as required by section 138 of the Canada Grain Act, it may be ascertained that an overage exists at the end of the Crop Year. Any excess above one-quarter of one per cent shall belong to the Crown and shall be disposed of as the Board may direct, but the same sections directs that the first charge on the excess is an adjustment with the manager of the elevator of any deficiency which may contemporaneously appear in any higher grade of grain of the same kind. After this is done, the proceeds from the residue are deposited in this account and from it allocations may be authorized by the Governor in Council.
- C The opening balance represents the residue of an amount which was deposited by the British War Office to cover shipments of dehydrated vegetables and grain products for the United Kingdom. During the current year, a payment of \$516.32 was made to the Department of National Defence, leaving a credit balance of 34 cents in this account.
- D Under authority of P.C. 10229, November 19, 1942, amended by P.C. 11161, December 8, 1942, a blanket insurance scheme was established for the insurance of grain in commercial storage in Canada and in transit. The premium is obtained by means of a levy, which levy is collected by the Board of Grain Commissioners from elevator operators. Out of this account may be paid interest at the rate of four per cent per annum to elevator managers in respect of outstanding advances of the foregoing levy made by such managers on behalf of owners of grain.
- E Pursuant to an Act Respecting Wheat, chapter 60, Statutes of 1931, the Governor in Council authorized the payment of five cents for every bushel of wheat grown in the Prairie Provinces in 1931 and delivered to the elevators. This Act expired on July 31, 1932, and unclaimed moneys due under this authority were later transferred to this account.
- F This account represents revenue of the National Research Council derived from laboratory fees, sale of publications, etc., which by authority of the National Research Council Act

may be spent by the Council. Disbursements include amounts transferred to parliamentary appropriations in reduction of expenditures therefrom, as well as amounts transferred to the Trust Fund.

- G Deposits represent patriotic donations from companies and individuals for the furtherance of specific proposals relating to Canada's war effort, while the disbursements are as directed by the War Technical and Scientific Development Committee.

- A To this Fund, which is for the furtherance of research work, are credited (a) contributions received from organizations and individuals, (b) incidental revenues arising from activities, (c) allotments made by the Council from Parliamentary Appropriations and (d) amounts transferred from the National Research Council Special Fund. Disbursements represent advances which have been made during the year to various associate committees and individuals, all of which, with the exception of \$38,202.40, have been accounted for as at March 31, 1943.

- B When money is received for royalties or patent rights in connection with an invention or process in the National Research Laboratories, the proceeds are placed in this account pending the decision of the National Research Council as to its disposal. Of the above balance, the amount of seventy-six thousand dollars is held in bonds which are in the custody of the Department of Finance.

COMMENTS

A Interest on railway subsidies is collected under the authority of the various Railway Subsidies Acts, the last of which was given assent to in 1913. The amount credited was received through the Post Office Department and represented earnings for mail transportation facilities provided over subsidized portions of certain railway lines.

B Canals revenue consists of \$561,833.17 from rentals derived under the leasing of land, water power and from house rentals, \$97,425 from linesmen's fees and the balance, \$253,353.36, from wharfage, wintering, lying up, etc.

C The remuneration and expenses of harbour masters, amounting to \$17,519.13, were paid from harbour dues revenue in accordance with the Canada Shipping Act. The rates of remuneration for harbour masters are determined by the Governor in Council.

D Wharves and piers revenue is collected by wharfingers appointed under authority of the Government Harbours and Piers Act. The remuneration of the wharfingers and certain expenses authorized for making the wharves serviceable, amounting to \$39,395.60, were paid from the revenue under authority of the Act. In certain instances, agreements are entered into by the Department for fixed yearly payments for the use of a wharf, pier or breakwater. These amounts are paid direct to the Department. The rates of remuneration for wharfingers are determined by the Governor in Council at 50 per cent of the first \$200 collected or any portion thereof and 15 per cent of all collections over \$200. In a few instances, special rates have been established with the approval of the Governor in Council.

E Steamship inspection fees are established by the Governor in Council under the authority of Section 477 of the Canada Shipping Act, the collections being made mainly through collectors of customs.

- F Costs of Collections of Radio Licence Fees.—It is provided under Section 14 (a) of the Canadian Broadcasting Act of 1936 that the moneys received from licence fees in respect of private receiving licences and private station broadcasting licences, less the cost of collection and administration as determined by the Minister, shall be deposited to the credit of the Canadian Broadcasting Corporation. The net revenue for the year, before deducting cost of collections, amounted to \$3,925,028.31. The cost of collection for the year 1942-43 as determined, amounting to \$223,338.07 which includes the total of the expenditures under Vote 373, was deposited to the credit of the Receiver General as revenue of the Department of Transport.
- G This account consists of \$11,175.70 previous years' War Expenditures and \$88,086.96 for payments received for materials and supplies purchased from War moneys.
- H Surplus Earnings of the Canadian National Railway system for the year 1942, amounted to \$25,063,268.32 and the Capital Gain on repatriation of securities to \$11,072,592.68, making a total of \$36,135,861.28.
- I The first amount represents reduction of National Harbours Board's indebtedness to the Dominion Government in connection with the Quebec Harbour.
The second amount represents the reduction in the capital stock of the Canadian National Railways Securities Trust due to line and property abandonments and is offset by a similar debit to Consolidated Fund.

COMMENTS

These votes were provided for replacement of structures and equipment which have become unstable, obsolete or beyond repair, the enlargement or re-alignment of navigation channels, substitution of more permanent construction on works where maintenance involves abnormal costs and general improvements for the proper protection of canal property.

After approval of the main Estimates, a supplementary vote was obtained for additional projects; later, certain projects provided for in the main Estimates were not undertaken which caused the lapse of funds shown above.

E The greater part of the materials and supplies was purchased through the Department of Transport Stores Account.

Payments of compensation respecting Government Employees.....\$ 547,763 69

COMMENTS

This amount covers compensation, medical aid, etc., when employees of His Majesty are killed or suffer injuries in the performance of their duties.

The claims of employees eligible for compensation are dealt with and paid by the Provincial Workmen's Compensation Boards except in the Provinces of Prince Edward Island and Quebec. Claims arising in the Province of Prince Edward Island are adjusted through the Canadian National Railways, while those in the Province of Quebec are arranged directly by the Department. Medical aid claims under \$25 in the Province of Ontario, when the accidents are of a minor nature and no compensation is paid to the injured employee, are paid directly by the Department. In the provinces where claims are paid by the Boards, the Dominion Government has advanced funds to meet such expenditures.

The following is a list of payments made and refunds received during the year:

Under the War Measures Act, P.C. 14/3550 of May 9, 1941, authorized the establishment of Seamen's Manning Pools, Instructional Schools, and the development and extension of existing Nautical Schools and Seamen's Welfare Institutes and facilities. In the Pools and Schools, it was provided that seamen and trainees would receive board and lodging accommodation, and pay at approved rates. Officers, seamen and trainees handled under this scheme are to hold themselves available for service on any ship controlled by the Allied Nations to which they may be assigned by the Director of Merchant Seamen.

Expenses for accommodation given in the Pools, incurred on behalf of other than Canadian merchant seamen will be collected from the respective Governments or shipping interests concerned.

P.C. 14/3550 of May 19, 1941, made provision for the appointment of a Director of Merchant Seamen to be charged with the administration and operation of Manning Pools, Training Schools and all attendant facilities, together with such regional directors and staff as required.

Manning Pools have been established at Montreal, Halifax, Vancouver and Saint John with a Reserve Pool at Sydney, Nova Scotia.

Instructional Schools have also been established at Prescott, Ontario, and at St. Margaret's Bay, Nova Scotia.

* Net advances under authority of the War Appropriation Act, 1942. The authorizations were for \$150,000 and \$16,549,266; respectively.

COMMENTS

- A Transactions in connection with advances made by the Government to the Canadian National Railways during the fiscal year ending March 31, 1943, for capital purposes, purchase of outstanding securities and retirement of maturing obligations under the authorities quoted, the net advances made amounting to \$127,631,608.55, which includes advances of \$61,321,885.88 to the Canadian National Railways under the War Appropriation (United Kingdom Financing) Act 1942 for the purchase of securities held by the Government of the United Kingdom.
- B These transactions represent advances to the Canadian National Railways for purchase of capital stock of the Trans-Canada Air Lines Corporation and repayments of the advances by the Railways.
- C Transactions in connection with advances made by the Government to the Canadian National Railways and the Canadian Pacific Railway Company under terms of hire-purchase agreements. During the current fiscal year the advances to the Canadian National Railways were increased by \$14,907,697.03, while the advances to the Canadian Pacific Railway Company were paid off.
- E Generally, in connection with these accounts, there is a parliamentary appropriation provided, the expenditure from which is treated as Loans and Investments through such accounts. The appropriation in the present year, and the accounting therefor, follow—

Vote 414 Advances to National Harbours Board, subject to the provisions of Section 29 of the National Harbours Board Act, to meet expenditures during the calendar year 1942 on any or all of the following accounts:

Reconstruction and Capital Expenditures—

	Appropriations	Expenditures	Lapsed
Montreal	545,630 00	296,006 58	249,623 42
Vancouver	40,000 00	40,000 00	
	585,630 00	336,006 58	249,623 42
Less amount to be expended from Replace- ment Funds	42,300 00		42,300 00
	\$ 543,330 00	\$ 336,006 58	\$ 207,323 42

In addition to the above, an amount of \$76,427.87 was transferred from the Generally—Unforeseen Item of Vote 409, listed as a Government Owned Enterprise Non-Active Account, to Loans and Investments as an Active Account and used for Capital Expenditures.

The following is a distribution of total advances:

	Montreal	Vancouver	Total
Vote 409	74,155 11	2,272 76	76,427 87
Vote 414	296,006 58	40,000 00	336,006 58
	<u>\$ 370,161 69</u>	<u>\$ 42,272 76</u>	<u>\$ 412,434 45</u>

In accordance with Section 29 of the National Harbours Board Act, certificates of indebtedness bearing interest at 3½ per cent per annum, totalling \$412,434.45, were issued to the Government.

ADVANCES FOR WORKING CAPITAL

Advances for working capital under authority of Section 28 of the National Harbours Board Act were also made in the amounts of \$90,000 to Churchill Harbour and \$5,000 to Prescott Elevator and repaid during the fiscal year.

COMMENTS

- A This account is credited with fees collected by the Department of Transport in respect of private receiving licences and private station broadcasting licences; it is debited with all moneys released to the Corporation from time to time by the Minister of Finance, and with the costs of collection of such fees. The balance on hand reflects the amount available to the Corporation at the close of the fiscal year.
- B By authority of P.C. 1594 dated April 22, 1940, pursuant to the provisions of the War Measures Act, c. 206, R.S., ships seized in prize and either requisitioned for use by the

Canadian Government or condemned by the Court as prize, are operated on behalf of the Government of Canada by the Canadian Government Merchant Marine Limited. The balance as at March 31, 1943, represents the amount on deposit with the Minister of Finance and is made up as follows: cargo sales, \$264,729.57; insurance, \$2,001,161.10; operating surpluses, \$1,210,922.03.

- C To this account are credited all moneys collected by the Department of Transport, East Coast Radio Service for radio messages. The charges collected are apportioned to the public utilities concerned and disbursements made accordingly from this account. At the close of each fiscal year, moneys earned by the Department of Transport are transferred to revenue; the balance remaining in the account represents the amounts that have not been apportioned.
- D To this account are credited moneys received by the Department of Transport for sundry purposes, such as, deposits to cover: cost of operating canal services after regular hours and after close of navigation; wharfage charges that might accrue; costs of damages to canal structures; and wages due seamen lost on board torpedoed vessels held pending direction as to payee. When bills covering costs have been prepared, or advice of beneficiaries is received, disbursements are made herefrom. The closing balance represents uncleared items at close of fiscal year.
- E The Employees' Compensation Clearing Account was established by P.C. 1913, April 22, 1941, under the authority of the War Appropriation Act, 1940, so that all moneys having to do with the costs of employees' compensation in connection with defence projects, may be controlled for accounting purposes. The various defence projects pay into this account amounts, based on a percentage of their payrolls, to meet the costs of compensation that will ultimately fall for payment in this regard. The account is charged with audited costs of compensation, and a fair and reasonable proportion of provincial Workmen's Compensation Board's costs of handling compensation matters relative to employees of His Majesty. The closing balance represents the amount available as at March 31, 1943, to meet compensation claims.
- F These accounts represent moneys received by the Board and deposited to the credit of the Receiver General in accordance with Section 23 of the National Harbours Board Act. They cover deposits of current revenue, security deposits and reserve funds which have been allocated for the replacement of fixed assets and other purposes.
- G All cheques, except those drawn against Trust and Special Accounts, which remain undelivered after six months subsequent to the date of their issue are credited to this account. The above balance represents the liability in respect of this Department at the close of 1942-43.
- H Deductions from the salaries of those employees of the Department of Transport who are not paid by Central Pay Office are deposited in this account and cheques are drawn against it in favour of the Bank of Canada as the certificates are fully paid. The closing balance represents the value of incomplete subscriptions at the close of the fiscal year.
- I The original deposit made on July 7, 1937, represents donations through the Department of Transport towards a trophy or trophies in connection with civil aviation, and is to be held until medals have been struck and the price has been ascertained. This year's receipts represent interest on principal. The closing balance includes bonds to the value of \$200.
- J In the pilotage districts of Halifax, Saint John and Sydney, the by-laws, made under the Canada Shipping Act and approved by the Governor in Council, provide that the general district expenses, including purchase, charter or hire of pilot boats and the maintenance, repair and operation of the same, shall be the first charge on the pilots' earnings. The transactions in these accounts represent the earnings and disbursements for the fiscal year.
- K L The net collections from the various pilotage districts are credited to the respective pilotage earnings funds, and, except for the salaries of the superintendent and his office staff and certain office expenses which are paid from the Administration of Pilotage appropriation, these funds absorb the cost of operating the service. If at the end of the year there is still a surplus of net earnings over expenses, such surplus is divided among the pilots pro rata. The pilotage committee of each district may reserve a portion of such surplus for future contingencies. There was no undivided surplus for the Sydney

Pilotage District for 1942-43; the amounts indicated represent adjustments of previous fiscal years. The closing balance represents the amount available at the close of the fiscal year.

The 1942-43 transactions in the Halifax account represent the temporary deposit and subsequent withdrawal of an amount in connection with the pilot boat *Camperdown*.

A The Intercolonial and Prince Edward Island Railway Employees' Provident Fund was established for the purpose of providing life allowances to be paid to employees on the staff of the railway who are retired on account of old age, physical or mental infirmity, etc., under authority of c. 22, Statutes of 1907 and amendments. The receipts consist of (a) employees' contributions (1½ per cent of their monthly salary or wage); (b) contributions by the Railways each year (\$100,000); (c) special contribution made by the Railway to offset the deficit as at December 31, 1942 and (d) Dominion Government contributions (see Vote 406) charged to the appropriations provided by parliament, all of the above moneys being deposited by the Canadian National Railways to the credit of this account. The disbursements which cover retiring allowances are made by the Canadian National Railways; the closing balance represents the unexpended balance of the fund as at that date.

B Under authority of the Canada Shipping Act, Part VI, each Pilotage Authority shall, within its district, have power from time to time, by by-law confirmed by the Governor in Council, to make certain regulations relative to the conducting of the pilotage business of the district, said regulations to provide for the establishment of a fund for the relief of superannuated or infirm licensed pilots, or of their wives, widows or children provided that the rate of contributions to such fund shall not be less than 5 per cent of the pilots' earnings. The rates of contribution at the present time are Halifax 5 per cent, Sydney 10 per cent, Saint John 7 per cent, Montreal 7 per cent and British Columbia 7 per cent. These accounts show the transactions of the various funds for the fiscal year and below is a statement showing a division of the opening and closing balances as between amounts invested in bonds and amounts held in cash.

1942-43

**Report of the Auditor General to the
House of Commons with respect to
accounts examined and audited in
accordance with the provisions of the
Consolidated Revenue and Audit Act,
1931, and other legislative enactments**

AUDITOR GENERAL'S REPORT

1. The Consolidated Revenue and Audit Act, 1931, requires that the Minister of Finance designate those who are to submit statements for audit certification. Accordingly, a Balance Sheet was submitted by the Deputy Minister of Finance and summarized statements of Revenues and Expenditures by the Comptroller of the Treasury. The certificates appearing in the Public Accounts were given subject to the reservations and observations made in this report.

2. The volume of transactions is currently such that the audit took the form of test examinations, the tests generally being regulated by the state of the particular account under examination. As a result of these examinations, I am of opinion that the accounts of the Minister of Finance and of the departments and divisions of the Public Service are being well maintained, although improvements in system might usefully be made. Administrative officers are currently taking such action as is practicable, but an acute shortage exists in the field of accounting personnel.

3. Section 50 of the Consolidated Revenue and Audit Act, 1931, directs that the Auditor General, in reporting the result of his examination and audit to the House of Commons, shall call attention to every case in which

- (a) a grant has been exceeded; or
- (b) moneys received from sources other than the grants for the year to which the account relates have not been applied or accounted for according to the direction of Parliament; or
- (c) a sum charged against a grant is not supported by proof of payment; or
- (d) a payment so charged did not occur within the period of the account, or was, for any other reason, not properly chargeable against the grant, or was in any way irregular; or
- (e) a special warrant authorized the payment of any money; or
- (f) an objection of the Auditor General was overruled by the Governor in Council or the Treasury Board; or
- (g) a refund or remission of any tax, duty or toll has been made on the authority of any Act of Parliament;

and also "to any other case which the Auditor General considers should be brought to the notice of Parliament." In this report attention is drawn to various matters which appear to come within the ambit of that direction.

THE BALANCE SHEET OF CANADA

4. The Balance Sheet at March 31, 1943, was presented for audit in the same form as has been followed since 1920. A summary is as follows:

Excess of Expenditure over Revenue for the	
fiscal year ended March 31, 1943.....	2,137,627,940 30

6,182,849,101 10

5. (a) *Gross Liabilities.* At March 31, 1943, these totalled \$9,228,252,012.03, an increase of \$2,579,428,587.67 over the amount at the end of the previous year.

(b) Liabilities include only those which have been ascertained and brought into the accounts. Items such as interest accrued but not due, and current obligations incurred for services and supplies not paid for at the end of the fiscal year are not included. Indirect liabilities under government guarantees are not reflected in the Balance Sheet but are set out in a special schedule in the Public Accounts.

(c) Obligations payable in other than Canadian currency, such as those portions of the Funded and Floating Debt payable in London and New York are recorded in the Balance Sheet at par of exchange.

6. Section 15 of the Government Annuities Act requires that in the statutory statement with respect to liabilities, "at the end of each fiscal year shall appear the present value of the prospective annuities contracted for up to the end

of such fiscal year." The present value of outstanding contracts is stated as \$190,298,479. Premium income and interest credits being insufficient to provide for this liability, the account was augmented by a further amount of \$497,790.26 which was charged to ordinary expenditure. In 1936 new mortality tables for the determination of annuity rates were adopted. These tables, reflecting a longer life expectancy, made necessary a general upward revision of annuity premium rates. The sum of \$190,298,479 shown as a liability in the Balance Sheet covers the present value of vested annuities based on the revised rates, which amounts to \$118,631,536, together with the sum of \$71,666,943 representing premiums received and interest accretions on account of deferred annuities. This latter liability holds, however, as a present value only for such annuities as were purchased subsequent to the adoption of the new mortality tables. There is a residue of approximately 13,000 deferred contracts sold prior to September, 1936, of which it is expected 82 per cent will eventually come into payment as annuities to persons who survive maturity dates. These contracts may involve a substantial loss (the loss involved in 538 such contracts maturing in 1942-43 was \$382,544) and since these losses have not been provided for in the above valuation, the liability may ultimately prove to be understated in the Balance Sheet.

7. (a) *Active Assets.* Assets classed as active totalled \$3,045,402,910.93 or \$441,800,647.37 more than the amount at the end of the previous fiscal year.

(b) Revenue in arrears, and stores, with the exception of the inventories of the Department of Public Printing and Stationery, and the Department of Transport, and the metals purchase accounts of the Royal Canadian Mint and Dominion of Canada Assay Office, are not included in the assets.

(c) Assets held in London and New York, such as cash, special deposits and bond holding account investments are shown in the records at par of exchange.

(d) The amount of \$3,045,402,910.93 was the total of active assets after deducting \$75,000,000 as a reserve for possible losses in the ultimate realization of certain active loans and advances. The increase in the reserve during the year was \$25,000,000, and a corresponding charge was included in the year's expenditure.

8. During 1942-43 active asset accounts were reduced and expenditure accounts charged with \$58,061.81 of which \$50,706.81 was in respect of the write down of Soldier and General Land Settlement Loans and \$7,355 on account of the cancellation of Canadian Farm Loan Board Capital Stock.

9. *Net Debt.* The gross liabilities being \$9,228,252,012.03 and the active assets \$3,045,402,910.93, the net debt of the Dominion was \$6,182,849,101.10 at March 31, 1943, and was represented by:

Non-Active Assets—

Balance, April 1, 1942.....	\$1,457,943,772 11
Net Increase during 1942-43.....	35,333,399 81

Balance, March 31, 1943.....	\$1,493,277,171 92
------------------------------	--------------------

Consolidated Fund—

Balance, April 1, 1942.....	2,587,277,388 69
Net Increase during 1942-43.....	2,102,294,540 49

Balance, March 31, 1943.....	4,689,571,929 18
------------------------------	------------------

Net debt	<u>6,182,849,101 10</u>
----------------	-------------------------

10. (a) *Non-Active Assets.* These were comprised of non-productive loans and advances, and expenditures classed as for capital purposes. The net increase of \$35,333,399.81 during the year was accounted for as follows:

Net increase in Capital Accounts.....	\$3,173,069 43
Net increase in Loans and Advances	
Non-Active—National Harbours Board.....	642,525 77
Increase in Canadian National Railways	
Securities Trust Stock.....	36,135,861 28
	<hr/> 39,951,456 48
Less:	
Decrease in Canadian National Railways Securities Trust Stock	\$4,575,998 43
Decrease in Seed Grain and Relief—Department of Mines and Resources.....	42,058 24
	<hr/> 4,618,056 67
	<hr/> <u>35,333,399 81</u>

(b) Capital expenditures totalled \$3,275,685.04, and refunds of previous years' capital expenditures, \$102,615.61, with a resulting net increase of \$3,173,069.43 in Capital Accounts during the year.

(c) Loans and advances during the year to the National Harbours Board, classed as non-active, totalled \$657,525.77. Repayments were \$15,000 representing a reduction in the National Harbours Board's indebtedness to the Dominion.

11. During the year non-active asset accounts were increased (by means of debits to expenditures) and Consolidated Fund Account correspondingly decreased (by means of credits to revenues) in order to give effect to:

- (a) a gain of \$11,072,592.96 by reason of the repatriation of Canadian National Railways sterling securities.
- (b) \$25,063,268.32 on account of surplus earnings of the Railway System during the calendar year 1942.

12. Also during the year non-active asset accounts were decreased (by crediting revenues) and the Consolidated Fund Account correspondingly increased (by debiting expenditures) to give effect to the following:

- (a) line abandonments of the Canadian National Railways during the calendar year 1942..... \$4,575,998 43
- (b) established loss in seed grain and relief accounts administered by the Department of Mines and Resources... 42,058 24

13. *Consolidated Fund.* This account records the accumulated deficits since Confederation, which at March 31, 1943, amounted to \$4,689,571,929.18. Expenditures chargeable to Consolidated Fund totalled \$4,347,055,045.50 and revenues \$2,244,760,505.01, with a resultant increase of \$2,102,294,540.49 in the balance of Consolidated Fund accumulation during the year. This amount added to the \$35,333,399.81 being the net increase of non-active assets gives the overall deficit and consequent increase in Net Debt of \$2,137,627,940.30 for the fiscal year.

14. *Contingent Liabilities.*—In addition to the direct debt recorded in the Balance Sheet, the Dominion Government has assumed, pursuant to parliamentary authority, various indirect liabilities which are listed in a separate schedule of the Public Accounts. Particulars are:

- (a) Outstanding bonds and debenture stocks, guaranteed as to the payment of principal and interest, amounted to \$706,404,178.43 on March 31,

1943, and consist of guaranteed obligations of the Canadian National Railways amounting to \$675,957,496.08; various harbour commissioners' securities amounting to \$21,046,682.35; and Canadian National (West Indies) Steamships Limited bonds amounting to \$9,400,000. In addition, there is perpetual railway debenture stock, guaranteed as to the payment of interest only, and which amounted to \$10,505,683.07 on March 31, 1943. In all cases, stocks and bonds which are payable optionally, or solely, in foreign currencies have been converted at par of exchange.

- (b) Guarantees at March 31, 1943, assumed by the Dominion pursuant to the several unemployment relief Acts, include bank advances with respect to the Province of Manitoba Savings Office, \$5,953,003.79; Province of British Columbia Treasury Bill, \$626,533.75; and Province of Manitoba Treasury Bill, \$4,805,722.62.
- (c) The chartered banks are guaranteed against loss with respect to deposits maintained with the Bank of Canada under section 27 of the Bank of Canada Act. The total of such deposits on March 31, 1943, was \$260,983,306.74.
- (d) Under the Home Improvement Loans Guarantee Act, 1937, approved lending institutions are guaranteed against loss on home improvement loans. The Dominion liability is limited to 15 per cent of the aggregate loans made by each lending institution, but as the balance of the loans outstanding on March 31, 1943, had been reduced to less than that amount, the contingent liability of the Government did not exceed the balance of the loans outstanding at that date, \$2,341,278.94.
- (e) The Home Extension Plan, as authorized by Vote 453 of the Appropriation Act, 1942, provides for loans, not exceeding a total of \$2,000,000, by approved lending institutions. The purpose is to further conversion of existing houses into multiple family houses in order to increase the supply of housing accommodation in congested urban areas. The Government's contingent liability is limited to 15 per cent of the aggregate of such loans, or \$8,555.29 as at March 31, 1943.
- (f) The Dominion Government has accepted obligations under the Dominion Housing Act, 1935, and the National Housing Act, 1938. On contracts with approved lending institutions, the Dominion agreed to assume a liability for a portion of whatever losses are sustained by the lending institutions. Although not expressed in the form of a guarantee, these obligations constitute indeterminate contingent liabilities.
- (g) Advances made by chartered banks to the Canadian Wheat Board on account of wheat are guaranteed by the Dominion under the authority of the Canadian Wheat Board Act, 1935. On March 31, 1943, the outstanding advances amounted to \$66,975,656.12.
- (h) The Canadian Wheat Board, during 1942-43, was empowered to deal in flaxseed, soy beans, oats and barley. In order to finance these operations, advances were obtained from chartered banks by means of guarantees. The amount outstanding on March 31, 1943, by categories, was: oats and barley, \$232,394.51; flaxseed, \$7,650,723.11; and soy beans, \$1,153.02.
- (i) The Dominion has guaranteed the repayment with interest of bank advances obtained by certain firms in connection with war production activities. At March 31, 1943, outstanding advances totalling \$1,854,403.86 were subject to guarantee, as follows:

	Guarantee Authorized	Amount Outstanding March 31, 1943
Brown Boggs Foundry and Machine Co. Ltd.	\$ 65,000 00	\$ 20,606 86
Clyde Aircraft Manufacturing Company Limited	200,000 00	200,000 00
Fairmont Company Limited.....	1,250,000 00	
Golden Manitou Mines Limited	375,000 00	375,000 00
Mareco Limited	100,000 00	35,500 00
Noorduyn Aviation Limited	2,000,000 00	1,000,000 00
White Canadian Aircraft Limited	85,000 00	20,000 00
A. C. Wickman (Canada) Limited.....	255,000 00	203,297 00
	<u>4,330,000 00</u>	<u>\$1,854,403 86</u>

- (j) Under the authority of the Seed Grain Loans Guarantee Act, 1938, a guarantee was given with respect to the principal and interest of seed grain loans made by chartered banks to municipalities in Western Canada during the crop year 1938. These were guaranteed in the first instance by the provincial governments. The amount of principal outstanding on which the guarantee was applicable had not been determined as of March 31, 1943. The maximum principal amount authorized to be guaranteed under the Act was \$1,900,000 for Alberta and \$14,500,000 for Saskatchewan. The Province of Alberta has paid to the interested banks all outstanding 1938 seed grain loans, and accordingly the Dominion's liability with respect thereto was cancelled. The guarantee with respect to Saskatchewan is still outstanding.
- (k) Pursuant to the Dominion-Provincial Taxation Agreement Act, 1942, provision was made for the payment to each province of the amount by which the actual receipts from the tax imposed by the province on the sale of gasoline are less than the net receipts from this source in the fiscal year of the province ended nearest to December 31, 1940. The gasoline tax revenues thus guaranteed aggregate \$56,734,905.96 and the undertaking constitutes an indeterminate contingent liability of the Dominion.
- (l) By Order in Council of July 10, 1942, the Commodity Prices Stabilization Corporation Limited, a government-owned corporation, was authorized to guarantee certain advances, and interest thereon, obtained by any person from a chartered bank in order to purchase coal, coke, or briquettes during the summer of 1942. The liability of the Corporation is limited to 20 per cent of the aggregate amount of advances made by such bank, but not exceeding \$5,000,000 in the aggregate. The contingent liability of the Corporation on March 31, 1943, was \$87,395.04.
- (m) The Commodity Prices Stabilization Corporation Limited, under the authority of an Order in Council of October 9, 1942, was authorized to guarantee certain advances, obtained by any person engaged in the production of logs or lumber, from a chartered bank. The liability of the Corporation is limited to 15 per cent of the aggregate amount of advances made by each bank, but not exceeding \$2,500,000 in the aggregate. The contingent liability of the Corporation at March 31, 1943, was \$67,543.05.

REVENUES

15. The revenues and credits of the Government of Canada for the fiscal year ended March 31, 1943, from all sources were \$2,249,496,177.29, an increase of \$760,959,834.32 over the corresponding total of the previous year. A comparison, by classifications, with those of 1941-42 is:

	1941-42	1942-43
Ordinary Account	\$1,463,824,202 71	\$2,182,798,758 83
Special Account	21,060,093 71	61,961,746 18
Credits to Non-Active Assets.....	2,630,393 52	4,633,056 67
Refunds on Capital Account.....	1,021,653 03	102,615 61
	\$1,488,536,342 97	\$2,249,496,177 29

16. *Special Account.*—This classification is used to record refunds of special and war expenditures of previous years, donations, and other non-recurring receipts which do not lend themselves to classification as ordinary revenue. The purpose is to permit fair comparison from year to year of revenue on Ordinary Account. Consequently, it is noted that in the fiscal year 1942-43, Ordinary Account was credited with certain receipts which in previous years were treated as credits to Special Account. The change in practice was a proper one to make. Special Account receipts and credits amounted to \$61,961,746.18. The items were:

Operating surplus of the Canadian National Railways for the calendar year 1942.....	\$25,063,268 32
Capital gain on the repatriation of Canadian National Railways securities	11,072,592 96
Reduction in the reserve account established to meet operating deficits of the Canadian Wheat Board, on a basis of calculations made as at July 31, 1942.....	6,660,143 33
War donations, \$274,771.17, and non-war donations, \$1,431.40..	276,202 57
Refunds of previous years' special and war expenditures.....	18,889,539 00

The receipts on Canadian National Railways' accounts were taken into the accounts as offsets to equivalent increases in the Canadian National Railways Securities Trust Stock, represented by a charge to Non-Active Accounts in the year's expenditure.

17. *Credits to Non-Active Assets.*—Amounts totalling \$4,633,056.67 were credited to Non-Active Accounts during the year, an increase of \$2,002,663.15 compared with the amount credited in the previous fiscal period. Of the total, \$4,618,056.67 was an offset to an equivalent amount included in the year's expenditures on account of non-active assets written down to Consolidated Fund. The balance of \$15,000 consisted of a reduction in the indebtedness of the National Harbours Board.

18. *Refunds on Capital Account.*—Refunds of previous years' expenditure and other credits to Capital Account during 1942-43 totalled \$102,615.61, a decrease of \$919,037.42 in comparison with the amount credited to this Account during the preceding year. Receipts were: on account of canals, \$42,164; railways, \$32,931.55, and miscellaneous public works, \$27,520.06.

ORDINARY REVENUES

19. Total revenues on Ordinary account amounted to \$2,182,798,758.83, an increase of \$228,349,000 over the revenue forecast by the Minister of Finance in his Budget Speech of June 23, 1942. A comparison between the Budget estimate and realized revenue for the year is:

	Estimated	Collected
Customs duties	\$ 135,000,000 00	\$ 118,962,839 45
Excise duties	134,610,000 00	138,720,722 89

20. *Fees of Department of Agriculture.*—Test audits were made of accounts in offices collecting fees from inspection, registration and licences and record of performance work. It was noted that, with respect to accounts concerning inspection work, while collections were not invariably made promptly, it was the opinion of administrative officers that there were no uncollectible arrears. In the audit of fruit dealers' licences accounts, it was revealed that between November, 1941, and January, 1943, \$175 in licence fees had not been deposited to the credit of the Receiver General. The sum was recovered by deduction from the salary of an employee. As a result of the examinations, various recommendations were made to the Department with a view to improving accounting procedures.

21. *Civil Service Act.*—Revenue of the Civil Service Commission amounted only to \$115.20. Practically the whole sum is represented by \$100 recovered as fines for false representation in soliciting students for a correspondence school in Montreal. On account of war conditions, fees are not levied in connection with competitions held for employment in the civil service.

22. *Passport Fees.*—The receipts from passport fees were \$346,889.16, a decrease of \$228,620.15 from the receipts of the previous year. The apparent reasons for the decrease are: (a) passports were made valid for two years instead of one, and (b) it was agreed with the United States of America that from February 15, 1943, Canadian citizens and British Nationals legally resident in Canada would not require passports for visits to the United States of not more

than 29 days. As a result of this agreement, branch offices at Moncton, Windsor and Vancouver were closed in February, 1943. The audit prompted the making of recommendations to the Department with a view to a simplification of system. The Department, effective August 1, 1943, adopted the proposals.

23. *Fines and Forfeitures Collections.*—Section 1036 of the Criminal Code makes provision for payment to the Minister of Finance of fines resulting from certain classes of prosecutions. The introduction of wartime controls has resulted in numerous prosecutions by public agencies, particularly the Wartime Prices and Trade Board. Inquiry into administrative practice results in the opinion being formed that the Board's Enforcement Section is making an effort to have fines collected and paid over to the Receiver General. The same observation applies to activities of the Royal Canadian Mounted Police. But it would be in the public interest were some administrative agency charged with the general duty of making certain that the Government receive all moneys from this source to which it is entitled. A suggestion to that end has been made to the Department of Justice. In the course of the examinations, it was established that the sum of \$7,102.32, collected through the R.C.M.P. and remitted to the Department of National War Services, was not deposited to Revenue in the fiscal year 1942-43. The cheques were deposited in September, 1943.

24. *Tax on Insurance Companies.*—In February, 1942, an agreement was made, under the Dominion-Provincial Taxation Agreement Act, 1942, with the Province of British Columbia. No provision was made in it with regard to the provincial tax levied under the British Columbia Insurance Act on reciprocal insurance exchanges, and in 1941 the Province levied and collected \$1,043.65. The Dominion Government, by amendment to the Special War Revenue Act, 1942, increased the tax on such reciprocal insurance exchanges for the calendar year 1941 and subsequent years by an amount equivalent to the tax levied under the British Columbia Insurance Act. As British Columbia reciprocal insurance exchanges thus paid a double levy for the year 1941, the Department of Finance refunded these taxes to an amount of \$970.30 during the fiscal year ended March 31, 1943, without obtaining, however, prior sanction of the Governor in Council. The required approval of the Governor in Council was given on August 13, 1943.

25. *War Exchange Conservation Act.*—Section 8 permits, on the advice of the Minister of Finance, the Governor in Council to enter into agreements granting assistance "by way of special tax credits and/or special allowances for depreciation or depletion under the Income War Tax Act and/or The Excess Profits Tax Act, if, in the opinion of the Governor in Council, such assistance is necessary in order that an expansion of the exports of any . . . corporation receiving such assistance may take place or that the exports of any such . . . corporation may be maintained at levels higher than would otherwise obtain . . ." For the most part, agreements implementing the foregoing provisions authorize the corporations concerned to make accelerated depreciation deductions from income that would otherwise be taxable under the Acts. These deductions generally consist of pro rata portions of the capital cost of relative plant extensions and additions, or development costs, spread over periods varying from one to several years. Some of the agreements provide that, under certain conditions, the corporations concerned be not subject to taxation liability under the Second Part of the Second Schedule of the Excess Profits Tax Act. Assuming the companies' profits are such as would otherwise bring them within the scope of the Second Part, it is necessary, in order to implement such agreements, to accept the view that section 8 of the Act vests in the Governor in Council the power to agree to exempt from a tax levy.

26. Section 33 of the Consolidated Revenue and Audit Act, 1931, provides that:

The Governor in Council, whenever he deems it right and conducive to the public good, may remit any duty or toll payable to His Maesty, imposed or authorized to be imposed by any Act of the Parliament of Canada, or any forfeiture or pecuniary penalty imposed or authorized to be imposed. . . .

This section does not appear to vest in the Governor in Council a power to authorize remissions of income and excess profits taxes in advance of levy. For that reason, attention is directed to Order in Council P.C. 1/1866 of March 8, 1943. This Order in Council, made under the authority of section 33, exempts the Telkoal Company Limited of Telkwa, B.C., from taxation at the 100 per cent rate provided in the Second Part of the Second Schedule of the Excess Profits Tax Act for a period of three years commencing January 1, 1943. The Order in Council also grants a special write-off of \$30,000 against profits, for purposes of taxation under the Income War Tax Act and the Excess Profits Tax Act, for pre-development expense. This write-off is to be at the rate of \$10,000 per annum for each of the three years.

27. *Pelagic Sealing Revenues.*—A shipment of one thousand skins received from the United States under the terms of the Treaty were lost at sea due to enemy action. They were being returned to Canada for marketing, after processing in England. The shipment was not insured.

28. *Fisheries, Fines and Forfeitures.*—Fines and forfeitures amounting to \$27,252.74 were collected for infractions of the various Fisheries statutes. Section 94 of the Fisheries Act authorizes the Minister to remit penalties and to restore forfeitures. During the year, no amounts were remitted under the authority of this section of the Act, although certain confiscated equipment was returned. Oyster lease rentals amounting to \$125 were cancelled under the authority of the Governor in Council.

29. *Remissions by Department of Insurance.*—Penalties amounting to \$4,180 were received during 1942-43 from companies for delay in filing certain statements within the time specified by the statutes under which they transacted business in Canada. Amounts totalling \$3,400 were subsequently refunded by the Governor in Council under the provisions of section 33 of the Consolidated Revenue and Audit Act, 1931.

30. *Penitentiaries Produce Sales.*—\$101,459.43 was the value of farm produce sold. In addition, vegetables valued at \$13,277 were transferred to the Departments of National Defence and Mines and Resources and to the R.C.M.P. without charge, and clover seed valued at \$860 was transferred free of charge to the Department of Agriculture. These gifts had the effect of reducing penitentiary receipts and possibly of making available to the departments goods over and above the sum provided for by the Appropriation Act.

31. *Telegraph Office Revenues.*—The Dawson Creek Telegraph office was destroyed on February 13, 1943, with the loss of all equipment and supplies. On May 3, the new switchboard was in service and the office open for business. An investigation was directed to be made locally to determine the amount of the loss sustained. A report had not been received as of the closing date of accounts for the fiscal year.

32. *Northwest Territories Mining Leases.*—Section 35 of the Dominion Lands Act authorizes the making of mining lands regulations to control leases. These stipulate royalty payments, based on annual profits after deducting stated items of cost from gross receipts. Should the output be not sold but is further treated by the producer, then actual market value or a value fixed by the mining

recorder is substituted for "gross receipts". It continued to be observed in the course of the audit that it was difficult to reconcile profits as shown on the Companies' annual statements with profits as shown for purposes of royalty. The Department has since taken steps to amend the royalty forms submitted by the mining companies so that such reconciliation may be shown.

33. *Northwest Territories Fur Tax.*—In the report for the fiscal year 1940-41 (page 544) attention was directed to the practice of depositing, to the credit of the revenues of Canada, the proceeds resulting from the fur tax levy made by ordinance enacted under the authority of section 10 (r) of the Northwest Territories Act. In the fiscal year 1942-43 the sum of \$102,367.16 was received from this source. In view of expanded activities in the Territories, the observation made two years ago is repeated: "In the Yukon, revenues from the sale of alcoholic beverages and from fur taxes are applied by the Yukon Commissioner in Council to territorial services. This procedure appears to be more in harmony with the intent of Parliament than are the practices followed with respect to the Northwest Territories. Further, from the viewpoint of control over expenditures in the Northwest Territories, much may be said in favour of appropriating . . . only such amount as is necessary to finance the deficiency between receipts and disbursements."

National Defence

34. *R.C.A.F. Rentals.*—At various R.C.A.F. stations, accommodation is leased for non-Service purposes. Examination of rental ledgers disclosed that accounts, covering rentals at various stations in Canada, were considerably in arrears. It was explained that this was due to dissatisfaction with the increased rates which were established by the R.C.A.F. on November 30, 1942. As a result of an audit observation, the accounts were referred to R.C.A.F. headquarters for decision, but as of August 1, 1943, no action had been taken with respect to eight of these accounts.

35. *Commonwealth Air Training Plan.*—Receipts from the sale of surplus construction material taken over from the contractor upon completion of the buildings at No. 31 Personnel Depot, Moncton, N.B., were deposited to the credit of the Receiver General as "revenue", although the cost of the materials was originally included as charges to the Plan. The receipts should have been recovered to that account. Action to that end has been taken.

36. *R.C.A.F. Salvage Accounts.*—The examination of salvage ledgers disclosed an unsatisfactory condition with regard to the collection of amounts of sales that had been made, and also with regard to approval of sales made being obtained from the Salvage Officer. Attention was drawn to the situation. As a result, all items which had been outstanding for an undue length of time were investigated and instructions issued that units secure approval from the Salvage Officer at time of sale.

37. *R.C.A.F. Collections.*—Examinations of Accounts Receivable Vouchers disclosed that many had been prepared to correct errors in billing. These generally originated in incorrect pricing by the Service. Many errors in pricing indicated carelessness. The Service pricing branch appears to take an undue length of time in pricing these vouchers after they are received from the units, with consequent delays in collecting. The matter was brought to administrative attention.

National Revenue

CUSTOMS AND EXCISE DIVISIONS

38. Excise taxes derived from (a) the sale of postage stamps used on cheques, bills of exchange, promissory notes, receipts to banks, money orders and travellers' cheques, and (b) stamp taxes on Post Office money orders, postal notes, letters and post cards are not included in the Department's statement of revenues, but are reported by the Post Office Department as Postal Revenue.

39. The Department issued instructions inconsistent with the provisions of section 142 (3) of the Special War Revenue Act by permitting jewellers to make weekly returns and pay Retail Purchase tax in cash instead of by means of excise tax stamps, attached to the daily statements of sales as required by the Act. The Department has advanced good reasons why it was necessary to depart from the prescribed procedure and has undertaken to seek a suitable amendment to the Act.

40. The use of excise tax stamp metering machine impressions in place of regular excise tax stamps, as required by the Special War Revenue Act, was questioned. The Act has since been suitably amended by legislation given Royal Assent on April 21, 1943.

41. *Customs Drawbacks.*—(a) Drawback claims having been allowed in respect of stores taken on board aircraft, under regulations established by Order in Council P.C. 32/185 of January 28, 1937, the attention of the Department was directed to the fact that the regulations do not refer to aircraft but deal only with goods delivered for ships' stores and repairs to ocean-going vessels. The regulations were suitably amended by Order in Council P.C. 215/6181 of August 4, 1943.

(b) Audit observations were raised with respect to the practice of paying a drawback of 99 per cent in respect of certain importations of bituminous coal converted into coke to be sold. The coal was imported prior to March 9, 1942, and consequently was not admissible under tariff item 1069; nor was it admissible under the item previously applicable (1049b), because the consumption of Canadian coal used in production, as covered by each claim, did not reach the required 35 per cent of the total used. For these reasons, it appeared that a drawback of only 50 per cent could be paid by relying on Item 1049a. Item 1069 (temp.) was approved by Order in Council P.C. 1737 of March 9, 1942, under the War Measures Act, and authorizes payment of drawback of 99 per cent on bituminous coal imported during the period March 9, 1942, to December 31, 1942, under certain specified circumstances. By Order in Council P.C. 7731 of October 7, 1943, it is directed that the word imported be construed to have meant "entered for consumption ex-warehouse" during the whole period the item remained in force.

(c) It was observed that it was not the practice to make pro-rata deductions from home consumption coke claims in respect of the relative merchantable by-products. On this being brought to the attention of the Department, a ruling was issued on May 8, 1943, requiring that on and after June 1, 1943, home consumption coke claims be reduced in respect of the merchantable by-products from the imported bituminous coal to which they refer. This, in view of the current fuel situation, was varied by Orders in Council P.C. 5/4225 of May 21 and P.C. 2/4434 of May 28, 1943, both made under the War Measures Act, with effect from June 1, 1943. By these it is directed:

That Customs Drawback claims under items 1019, 1049 and 1070, Schedule "B" of the Customs Tariff, covering imported bituminous coal converted into coke for home consumption, shall be certified for payment by the Customs Division of the Department

of National Revenue in respect of the whole quantity of coal processed in the production of the coke, as covered by each drawback claim, without pro-rata deductions for merchantable by-products recovered from such conversion process.

42. *Excise Duty Drawbacks.*—(a) The attention of the Department was directed to the fact that drawback claims, in respect of the excise duty collected on malt contained in malt beer exported, were paid without the beer being tested as required by section 179 (2) of the Excise Act. In explanation, the Department stated that "the instruction to dispense with testing of samples from beer exported was given because of the physical inability of our laboratory to keep up with the greatly increased volume, plus an appreciation that the test itself had proven to be of little or no value." The Act was amended and the requirement for testing was repealed by Chapter 9, assented to on April 21, 1943.

(b) The question was raised whether central and district Medical Stores of the Department of National Defence, military hospitals and Red Cross blood donor clinics qualified as "bona fide public hospitals" for drawback purposes under section 140 (2) of the Excise Act. The term "bona fide public hospital" was extended to include them, by Order in Council P.C. 3626 of May 17, 1943, made under the authority of the War Measures Act.

43. *Special War Revenue Act Refunds.*—It has been the practice to refund the purchase price of excise tax stamps when, for various reasons, taxpayers returned them to the Department with a request for refund. It was brought to the notice of the Department that this procedure did not appear to be supported by statutory authority. The Special War Revenue Act was suitably amended on April 21, 1943.

44. *Other Statutory Refunds and Remissions.*—(a) By departmental regulations, provision is made for the temporary importation of articles specified in Schedule One to the War Exchange Conservation Act, when the articles are imported solely for designing or copying purposes. The regulations authorize a refund of 90 per cent of customs duty and taxes to importers on compliance with specified conditions. While the Department states that it relies on sections 3 and 4 of the War Exchange Conservation Act as authority for the making of these regulations, it appears doubtful if these sections provide suitable authority.

(b) Various orders in council having been passed under the authority of section 33 of the Consolidated Revenue and Audit Act, 1931, granting permission, in advance, for refund or remission of customs duties and taxes, the attention of the Department was drawn to the fact that it does not appear that section 33 vests in the Governor in Council the power to remit before levy. The Department agreeing, has undertaken to act accordingly.

(c) By authority of Order in Council P.C. 330 of January 17, 1941, made under authority of the War Measures Act, the Minister of National Revenue is authorized to permit entry, under the British Preferential Tariff, of goods, otherwise entitled to the preference, which are transhipped at a port of a foreign country, in cases where he is satisfied that, due to war conditions, shipping facilities direct to Canada were not available. The Department has interpreted this Order in Council as applying to goods of Empire origin which were purchased from United States vendors, a considerable time after entry into that country.

(d) Order in Council P.C. 86/7474 of September 23, 1941, made under the authority of the War Measures Act, permits refunds or remissions of customs duty and taxes paid, or ordinarily payable, on articles brought into Canada for temporary use during the war. The duty and tax payments are, by the Order, directed to be payable monthly in advance on 1/120th of the value of the imported articles for each month or portion thereof during which they remain in Canada, but not less than \$25 in any event. In so far as the consequences

are to further the national war effort, the application of this Order presents no problem, but attention is directed to the question: May the provisions of section 3 of the War Measures Act be invoked where concessions are granted in respect of importations which are not directly associated with the prosecution of the War?

(e) Refunds reported in the departmental statement of Revenue include refunds of \$37,398.73, but do not include remissions of \$3,199,242.84 for customs duties, excise duties and excise taxes and \$32,153.85 for penalties, interest, Exchequer Court costs, etc., which were remitted during the year, under the authority of section 33 of the Consolidated Revenue and Audit Act, 1931, and section 3 of the War Measures Act. A summary of refunds or remissions of \$1,000 or more is:

Re items marked *

American Can Company Ltd.: This refers to plate imported from the United States, to keep tin can prices under the ceiling.

Imperial Oil Ltd.—This refers to gasoline imported in replacement of gasoline sold to the United Kingdom Pool Board.

Melbourne Merchandising Limited and G. Whitaker and Co. Ltd.—These items refer to wool, imported from countries under the intermediate tariff, to ensure the supply.

Department of Munitions and Supply.—This refers to steel ingots and billets.

Polymer Corporation Limited.—This refers to machinery and equipment, plans, drawings, etc., in connection with the synthetic rubber plant at Sarnia, Ontario.

Sugar Administrator.—This is associated with the retail prices of sugar.

45. The foregoing list does not include (1) refunds or remissions of customs duties and excise taxes on materials and plant equipment, etc., imported, or purchased in Canada, for the fulfilment of war orders and contracts of the United Kingdom or Allied Governments, including the British Dominions (except Canada), and for certain other activities associated with the war, or (2) reductions in revenue as a result of tariff changes by order in council under the provisions of section 284 of the Customs Act, or under the War Measures Act.

INCOME TAX DIVISION

46. Because of amendments to the Income War Tax Act whereby payments of income tax are made by deductions from salary and wage payments, etc., a large number of persons and corporations are now technically collectors of revenue. The changes in the Act have materially expanded the activities of the Income Tax Division. Due to the scarcity of trained audit personnel, my examination of collectors' accounts and of departmental procedures and records was not as comprehensive as would otherwise have been the case. For that reason, it cannot be certified that all moneys due and payable were fully and promptly brought to account; but examinations made satisfactorily establish that the revenues, as certified by the Department, have been fully accounted for.

47. *Security Bonds.*—The existing scales of income tax have had the effect of materially increasing the receipts of all offices and, in turn, the sums handled

by cashiers and other persons employed therein. Consequently, when it was observed in the course of examination that security bondings were, in some instances, apparently inadequate, it was suggested to the Department that consideration be given to the sufficiency of the security bonds furnished through the Government Officers' Guarantee Fund, in respect of cashiers, their assistants and others handling cash.

48. *Remissions.*—Taxes exigible under the Income and/or Excess Profits Tax Acts were refunded or remitted by authority of the Governor in Council under the provisions of section 33 of the Consolidated Revenue and Audit Act and section 3 of the War Measures Act. In accordance with the provisions of section 50 of the Consolidated Revenue and Audit Act, 1931, they are now listed:

- (a) Income tax of \$9,953.66 exigible in respect of rentals paid by the Canadian General Transit Company Limited to the General American Transportation Corporation and other American lessor companies, for the use of tank cars leased for operation in Canada. (Order in Council P.C. 55/5095 of June 15, 1942.)
- (b) Excess profits tax of \$128,206.83 exigible in connection with a dividend of \$324,574.25 received by the North American Cyanamid Limited, in 1941, from its subsidiary in South Africa where the dividend was already taxed. (Order in Council P.C. 50/10672 of November 23, 1942.)
- (c) Income tax exigible for 1942 on a lump sum payment of \$4,442.10 to G. V. W. Howard, an officer of the Royal Canadian Mint retired under the British Superannuation Act who, on retirement, received the payment in accordance with the British Act, as well as an award of an annual pension of \$1,600. (Order in Council P.C. 72/11348 of December 15, 1942.)
- (d) Income tax of \$1,853 collected in the years 1935 to 1941, inclusive, in respect of the proceeds of a Dominion Government annuity paid to Mrs. W. I. S. Hendrie, notwithstanding a written undertaking given by the Department of Labour to the effect that the annuity would be free of tax under the provisions of the Income War Tax Act. (Order in Council P.C. 64/275 of January 13, 1943.)
- (e) Income tax exigible in respect of indemnities of unstated amounts received by Mr. E. L. Maag, as a delegate in Canada of the International Red Cross Committee of Geneva, for the years 1941 and 1942. (Orders in Council P.C. 56/6073 of July 14, 1942, and P.C. 54/10001 of November 4, 1942.)
- (f) Excess profits tax exigible on a dividend of an unstated amount (excluding exchange premium thereon), received by the Canadian Car and Foundry Company Limited from its United States subsidiary, in connection with an award for damages under the United States War Claims Act, 1918. (Order in Council P.C. 3/8917 of September 30, 1942.)
- (g) Income tax of \$24,445.42 owing by Colonel F. H. Deacon, of Toronto, for the years 1929 to 1937, inclusive. (Order in Council P.C. 84/6755 of July 31, 1942.)

49. *Refundable Tax Collections.*—A liability of 70 million dollars appears in the Balance Sheet for the refundable portion of Income War Tax and Excess Profits Tax Acts' collections. \$50,000,000 is associated with Income Tax and \$20,000,000 with Excess Profits Tax. Information provided is to the effect that neither sum may be regarded as absolute, but rather as an indicative or symbolical estimate of the refundable savings portion of Income and Excess Profits Taxes collected during the fiscal year ended March 31, 1943. As yet no data is available from which the actual liability can be determined; and because the refundable saving depends, in each case, on the circumstances of the taxpayer concerned, it is not possible to estimate reliably the liability on the basis of experience statistics. Accurate figures will be available as and when assessments for the year are completed.

Post Office

50. The total postal revenues were \$59,232,848.28. Net Postal Revenue of \$4,184,485.41 remained after payment of \$44,741,987.13 from appropriations and \$10,306,375.74 from Postal Revenues.

51. The results of operations may be regarded as approximate only, because account is not taken of: (a) the value of work done and accommodation sup-

plied, without charge, by the Post Office to other departments, and vice versa; and (b) revenue pertaining to the Department of National Revenue (in respect of excise taxes under the Special War Revenue Act on letters, post cards, cheques, bills of exchange, promissory notes, receipts to banks for deposits withdrawn, travellers' cheques, money orders and postal notes) which are included as revenues from postage, money orders and postal notes. The amounts applicable to money orders and postal notes are \$558,808.26 and \$221,678.79, respectively. The amount included as postage is not known. Furthermore, advances for "postage on printed matter mailed under permit" and "postage meter and postage register machine impressions", also "advance payments and key deposits received from post office box and drawer holders" are incorrectly included as revenues. Conversely, deferred charges for postages on "parcels", "newspapers and periodicals" and on "gold bullion shipments" are not invariably brought to account in the fiscal year in which the service was rendered.

52. It is the Department's practice to credit to "profit in exchange on postal transactions with other countries" the premiums collected in respect of Canadian money orders payable in U.S. Funds. In consequence, "Profit in Exchange" includes approximately \$95,000 which is, in fact, a liability in respect of the Department's indebtedness for money orders payable.

53. *Perforated O.H.M.S. Stamps.*—Included in the postage revenue are the sums of \$27,381.55 for perforated stamps issued to various government departments and agencies, for which payment had not been received at March 31, 1943, and \$1,149.68 in respect of O.H.M.S. stamps on hand in Ottawa, Toronto and Vancouver district offices at March 31, 1943.

54. *Transit Charges.*—(a) Accounts with respect to transit mail relate only to moneys received or disbursed in current adjustments between countries for services rendered or received. In other words, the net results are recorded, not the gross earnings for foreign mail forwarded through Canada, or the gross expenditure for Canada mail forwarded through other countries. It is an inconsistency to charge the cost of transportation of foreign mail through Canada to appropriations, rather than to Postal Revenue.

(b) As a result of the war, the Department has found it necessary to improvise and adopt measures that are not strictly in keeping with established conventions and practices. In some cases it is not practicable to check completely the accounts rendered by foreign Postal Administrations because essential information is not available in the Department. In so far as accounts outstanding with the Postal Administrations of enemy and occupied countries are concerned, the Department has not established a suitable accounting record of either actual or estimated accounts receivable and payable in this connection.

(c) Compared with the preceding fiscal year, there is a decrease in the revenue from "Transit charges on foreign mail forwarded through Canada to other countries" of \$366,820.35, due to the fact that no settlement was made during the fiscal year for land and steamship transit charges recoverable from the United Kingdom Government. In the preceding fiscal year, \$359,349.68 was included for services rendered in the calendar years 1940 and 1941.

(d) Compared with the preceding fiscal year, there is a decrease of \$272,275.65 in the disbursements from revenue for "transit charges on Canadian mail forwarded through foreign countries". This is explained in part by the fact that an amount of \$242,935.76 owing to the United States on general account for the calendar year 1941 was not paid until after the close of the fiscal year and therefore was not included as a disbursement; whereas the corresponding item for 1940, amounting to \$248,610.81, was included in the previous year's figure.

55. *Money Orders and Postal Notes.*—Prior to the fiscal year 1941-42, money order and postal note revenues included lapsed orders and notes issued during the fiscal year next but one preceding, less previously lapsed notes paid during the fiscal year. The amount of lapsed orders and notes was not established since April 1, 1941. In consequence, no revenue from this source is reported. The Department has explained that the procedure was changed to meet war conditions and to conserve time and labour. Experience has shown that each year the value of redeemed notes and orders is less than the value of those issued, therefore it is apparent that the present procedure should result in the building up of a considerable liability, but one which it is unlikely will have to be met. The Treasury Board on June 2, 1938, directed that surpluses arising from lapsed money orders and postal notes are to be treated as "Miscellaneous Revenue" or "Casual Revenue" of the Department, rather than as "Post Office Revenue". The present practice with respect to lapsed money orders and notes does not permit of this being done.

56. *Discounts on Postage.*—Discounts were paid, in some cases, to postage stamp, postage meter and postage register machine users who were not engaged in selling postage stamps to the public. It appears questionable if such persons may properly be regarded as "agents" of the Department, within the terms of section 7 (o) of the Post Office Act.

57. *Commission on Postal Note Sales.*—Compared with the preceding fiscal year, there is a decrease of \$12,123.59 in the disbursements from revenue in this regard, partly because postal note commissions (\$22,259) paid to non-accounting postmasters are not included under this heading, as in the previous fiscal year, but appear as "Discounts on postage, allowed to sub-postmasters, stamp vendors and users of postage meter machines; and compensation, for special delivery letters and parcels, paid to messengers."

58. *Trans-Canada Air Lines.*—A refund of \$13,872.23 was made by Trans-Canada Air Lines. This arose out of payments in previous fiscal periods of \$50,083.85 to the Company for air mail service between Moncton and Prince Edward Island. The view was taken that a portion of the charges did not qualify within the words "a sum equivalent to the out-of-pocket expenses incurred during the temporary performance of air mail service" between the points mentioned, as provided by the Order in Council authorizing the service.

Munitions and Supply

59. The sum of \$800,000 was received from Park Steamship Company Limited. It represents the surplus funds derived by the Government-owned Company from the operation of Government-owned cargo vessels, after retiring advances made by the Department to the Company for working capital requirements.

60. Receipts of \$3,519,731.24 might have been, by reason of the provisions of the War Appropriation Act, re-credited to War Appropriation Account. The sum represents moneys arising from special discounts granted by suppliers, voluntary refunds and refunds of profits on account of cost audits, which were treated as revenues rather than reduction of expenditures, since the contracts to which they are applicable could be ascertained only by effort beyond the practical needs of the moment. In addition to this sum, special receipts of \$1,604,787.43, arising chiefly from refunds of profits disclosed by cost audits, were held in suspense as at March 31, 1943, pending investigation to ascertain the Government or allotment entitled to receive the benefit.

61. \$2,250 was received during the fiscal year from the St. John Dry Dock and Shipbuilding Company Limited, representing rental from July, 1942, at the rate of \$3,000 per annum for the use of certain dock facilities constructed by the Department. The rental paid is in accordance with an agreement with the Company dated May 30, 1941. Order in Council P.C. 3885 of May 31, 1941, as amended by Order in Council P.C. 6386 of August 19, 1941, contemplates an annual rental equal to 4 per cent of the cost of construction, estimated by the Order in Council as \$434,450. This cost, however, was later increased to approximately \$1,167,000 by reason of additional expenditure authorizations. As subsequent orders made no reference to the rental rate, an audit observation was addressed to the Department. Information provided is that a revision, based on the useful value, is in the course of negotiation.

Public Printing and Stationery

62. *Public Printing and Stationery Act.*—This Act contemplates that departments be charged the cost incurred in filling each requisition. As a rule, a small percentage of profit from total operations results and this is deposited to Revenue. In the fiscal year 1942-43, operating loss of \$35,163.22 was sustained in the printing division and one of \$70,879.01 in the stationery branch. In the previous fiscal year the profits were \$48,902.23 and \$208,354.89, respectively. The King's Printer advises that in the printing division "the deficit developed in the process of converting expenditures covering labour, overhead expense and material into selling rates. No increase was made in the rates for printing operations during the year as it was considered that the increase in volume of work would render this step unnecessary. Selling rates for paper and printing material were only increased as and when cost prices increased." He points out that in the stationery branch "percentages to cover overhead are added to the cost price of goods common to all departments and which would bear the increase and still maintain selling prices below wholesale prices. The percentages were sharply reduced for the year 1942-43 because of the somewhat large profit which accumulated during the prior fiscal year. Apparently the percentages were reduced too much with the result that the year's business resulted in a deficit." The demands on the King's Printer continue to be abnormally heavy, and he advises that "steps are being taken to endeavour to bring revenues closer to expenditures without undue profits in both accounts. With the uncontrollable volume of labour and goods taken into consideration, it will be appreciated that the task of balancing these accounts is a difficult operation." Based on observations made in the course of audit, it would appear desirable that these steps should include the introduction of control accounts to supplement and complete cost records. This would result in a more complete control of inventories and produce more reliable cost information, and minimize the risk of under-absorption of overhead costs. No action was taken to discharge the operating loss of \$106,042.23 and it is currently charged to the King's Printer's Advance Account, which is authorized by sec. 38 of the Act. Proper legislative action should be taken to write off this loss, because the advances made under the authority of section 38 have as their sole purpose that of providing a revolving fund to finance current operations. The account may not be supplemented by means of profits; neither may it be charged with operation losses. Further, to liquidate the loss by means of "loading" charges for 1943-44 production accounts is not in harmony with the intent of the legislation.

63. *Accounts Receivable.*—Arrears due the King's Printer for printing and stationery supplied to various government departments or offices amounted to \$55,673.69. An additional amount of \$10,609.75 was outstanding at the close of the fiscal year for publications. A substantial part of the latter consists of arrears of many years standing.

Royal Canadian Mounted Police

64. *Policing Agreements.*—(a) A clause in Provincial Policing Agreements which have been renewed since the beginning of the War reads: "If due to the present war or to any other uncontrollable cause an undue increase takes place in the costs of living and materials, the Government of the Province will pay to the Government of the Dominion of Canada to cover said increase such an amount as is mutually agreed to by the parties hereto." During the present War, pay and allowances of the Force have been increased, and comparisons demonstrate that costs of materials, equipment, supplies, etc., have likewise increased. No action towards increasing the agreed rate of \$1,000 per man has been taken as the Department has not considered that there has been an undue increase in costs.

(b) The agreement for policing services between the City of Portage la Prairie and the Royal Canadian Mounted Police established the service fee at the rate of \$7,000 per annum payable semi-annually. The amount reported as the first semi-annual payment in 1942-43 is \$2,700 rather than \$3,500, the Department allowing the City to deduct \$800 from the first semi-annual payment of \$3,500, representing the value of a motor car turned over by the City to the Police. The method of making payments of this nature from Revenues is open to question. The proper procedure would have been to have charged the car purchase to Vote 321, Land Services, and allowed the Revenue to remain intact at \$3,500.

Transport

65. *Railway Subsidies Set-Offs.*—Between the years 1899 and 1913, various Railway Subsidy Acts contained the following clause, with slight variations in text but without material change in the principle of application:

Every company receiving a subsidy under this Act, its successors or assigns, and any person or company controlling or operating the railway or portion of railway subsidized under this Act, shall each year furnish to the Government of Canada transportation for men, supplies, material and mails over the portion of its line in respect of which it has received such subsidy, and, whenever required, shall furnish mail cars, properly equipped, for such mail service; and such transportation and service shall be performed at such rates as are agreed upon between the Minister of the department of the Government for which such service is being performed and the company performing it, and in case of disagreement, then at such rates as are approved by the Governor in Council; and in or towards payment for such charges the Government of Canada shall be credited by the company with a sum equal to three per cent per annum on the amount of subsidy received by the company under this Act.

Examinations of accounts for the year 1942-43 disclosed that, as in past years, departments generally did not avail themselves of the benefits of this legislation, although the Post Office Department did collect \$133,685.22. No centralized control has been exercised over expenditures for traffic over subsidized lines, with the result that the losses to the Dominion arising out of the failure to apply the provisions of the transportation clause may be a considerable sum.

66. *Remissions.*—\$15,542.15 was collected in fines and forfeitures. The Department, with the approval of the Governor in Council, acting under the authority of section 33 of the Consolidated Revenue and Audit Act, 1931, remitted \$101.87, being radio licence, \$2.50, and rental, \$99.37.

APPROPRIATION GRANTS

67. *Appropriation Acts*.—\$263,423,096.18 was granted by the annual Appropriation Acts. Expenditures made under the authority of these Acts, including \$466,191.98 for Active Loans and Advances, amounted to \$243,850,502.85. Thus, \$19,572,593.33 lapsed at the year-end in accordance with the provisions of section 32 (1) of the Consolidated Revenue and Audit Act, 1931. Departments which had lapsing balances in excess of \$500,000 were: Agriculture, \$3,622,200.69; Finance, \$1,981,959.15; Labour, \$1,525,628.74; Mines and Resources, \$1,121,252.63; Pensions and National Health, \$1,359,861.96; Post Office, \$2,321,854.83; Public Works, \$1,510,052.03; Trade and Commerce, \$637,138.85; and Transport, \$2,785,429.97.

68. *Statutory Charges*.—In addition to expenditures incurred under the authority of terminating annual appropriations, payments totalling \$419,490,916.45 were made from Consolidated Revenue Fund, in conformity with the provisions of continuing statutory authorities. Expenditures for interest and other charges for servicing the public debt, old age pensions, provincial subsidies and compensation with respect to taxation agreements, and salaries of the Governor General, Lieutenant Governors and judges, comprised more than 70 per cent of the total.

69. *Loans and Advances* amounting to \$96,307,103.12 were made in the form of active loans and investments, various statutory authorizations being exercised to the following extent:—

Canadian National Railways Refunding Act, 1938.....	\$59,447,000 00
Canadian National Railways Financing and Guarantee Act, 1940.....	480,883 36
Canadian National Railways Financing and Guarantee Act, 1941....	9,889,898 41
Canadian National Railways Financing and Guarantee Act, 1942....	24,016,526 93
Municipal Improvements Assistance Act.....	296,299 50
National Housing Act	1,326,494 92
Trans-Canada Air Lines Act	850,000 00
	\$96,307,103 12

70. *War Appropriations*.—Parliament granted \$2,858,000,000 to meet the special expenditures necessitated by the state of war, and to make such advances and loans as the Governor in Council deemed necessary and advisable. It is a provision of each War Appropriation Act that any moneys received as refund or repayment of any advance, loan or expenditure, made under the authority of the Act or previous like Acts, might, with the approval of the Governor in Council, be re-expended advanced or loaned for the purposes enumerated in the Act. By virtue of this provision, \$18,650,868.97 became available as refunds of expenditure from the following departments:—

Agriculture	\$ 1,889,666 79
Auditor General's Office	38,627 99
Civil Service Commission	17 19
External Affairs	7,254 70
Finance	2,713 95
Fisheries	16,663 31
Justice	5 22
Labour	48,481 79
Mines and Resources	71,119 33
Munitions and Supply	3,519,731 24
National Defence	12,819,908 20
National War Services	226 12
Post Office	1 87
Public Works	134,503 27
Royal Canadian Mounted Police	124 64
Secretary of State	134 20
Trade and Commerce	2,426 50
Transport	99,262 66
	<hr/>
	\$18,650,868 97
	<hr/>

In addition, repayments of loans or advances to an amount of \$13,504,750.98 were available from the following departments: Finance, \$10,000; Transport, \$13,494,750.98.

71. The War Appropriation (United Kingdom Financing) Act, 1942, authorized: (a) a payment of \$1,000,000,000 to the Government of the United Kingdom: (b) a loan of \$700,000,000 to the same Government, and (c) loans to the Canadian National Railway Company to enable it to acquire certain of its securities. \$1,700,000,000 was paid to the United Kingdom Government and \$61,321,885.88 loaned to the Canadian National Railway Company.

72. War Appropriation Acts provide that allotments to departments be by the Treasury Board. In all, the total available for allotment was \$4,558,000,000, of which \$4,556,968,573.78 was allotted for expenditures, loans and advances, leaving an unallotted balance of \$1,031,426.22 at the end of the fiscal year. As departments did not exhaust all allotments made to them, \$67,488,061.29 was surrendered as unspent at the fiscal year-end. No re-expenditures of moneys received as refunds or repayments were authorized by the Governor in Council under the provisions of section 2 of the War Appropriation Acts, and \$32,155,619.95 available from these sources was unused at the end of the year. Thus, of the sum available under the several War Appropriation Acts, \$100,675,107.46 lapsed at the fiscal year-end.

EXPENDITURES

73. Total expenditures in the fiscal year 1942-43, exclusive of loans and advances, were \$4,387,124,117.59. A comparison by classifications with those of the previous year is:—

	1941-42	1942-43
Ordinary	\$ 444,777,695 70	\$ 561,251,063 00
Special	63,975,772 56	31,287,878 39
War Appropriation	1,339,674,152 42	2,724,248,890 27
War Appropriation (United Kingdom Financing) Act.....		1,000,000,000 00
Capital	3,430,446 59	3,275,685 04
Government-owned Enterprises	1,214,255 57	1,248,621 13
Write-down of Assets	2,878,131 46	4,676,118 48
Other charges	29,115,600 91	61,135,861 28
	<u>\$1,885,066,055 21</u>	<u>\$4,387,124,117 59</u>

74. Reference to expenditures charged under the last two headings has already been made in paragraphs 7 (d) 8, 11 and 12.

75. Although there has been a material expansion of Government-owned enterprises, the \$1,248,621.13 stated under the classification "Government-owned Enterprises" includes only \$591,095.36 paid by reason of the deficit on the Prince Edward Island Car Ferry and Terminals, and \$657,525.77 as non-active loans and advances to the National Harbours Board. These charges were made in accordance with past practice.

76. *Capital Expenditures* during the fiscal year amounted to \$3,275,685.04 and were distributed as follows:—

Authority	Purpose	Amount
Votes 365 and 496	Construction and Improvements of Civil Airways and Airports	\$1,425,077 81
Exchequer Court Act, C.34, R.S.	Exchequer Court award—expropriation of property—Montreal Airport (Dorval)	55,893 80
Vote 395	St. Lawrence River Ship Channel—Dredging ship channel and Montreal Harbour.....	1,692,084 72
Vote 407	St. Lawrence River Ship Channel—Extension and Improvement of Control Weirs.....	9,355 90
Vote 441	Payment to Department of National Revenue of sales tax on construction costs of ice breaker and service vessel	55,717 36
Votes 398 and 443	Hudson Bay Railway—Construction and Improvements	37,555 45
		<u>\$3,275,685 04</u>

77. It is the practice to charge to Capital Account only those expenditures in respect of items designated as Capital in the annual Appropriation Acts. The principle that only permanent works of a national character be charged to Capital Account was adopted in the early years of Confederation, and appears to have been accepted by the House of Commons in considering recommendations of Public Accounts Committees on the revision of the Balance Sheet in 1882 and 1908. In practice, the principle has not been consistently applied, and the record of the Capital investment of the Dominion

includes charges for works not properly classified as Capital. Conversely, many works of a Capital nature are charged annually to Consolidated Fund as Ordinary, Special or War expenditures. Since 1920, all expenditures, whether charged to Capital or to Consolidated Fund, have had the effect of increasing the Net Debt, and are, in fact, written off.

78. *Votes 365 and 496.*—Under an agreement authorized by Order in Council P.C. 6995 of August 12, 1942, the Department of Transport undertook construction of facilities at Dorval Airport on behalf of the British Air Ministry, at an estimated cost of \$187,300. The British Air Ministry agreed to pay an amount equal to the cost of the construction of the "additional facilities." By contract authorized by Order in Council P.C. 8619 of September 23, 1942, the Dibblee Construction Company, Limited, was authorized to proceed with certain construction work, including the facilities for the British Air Ministry. As of March 31, 1943, progress estimates covering work done to March 20, 1943, and totalling \$449,491.80, had been submitted and paid. Of this amount, \$149,131.61 was charged to the British Air Ministry and the balance, \$300,360.19, to Votes 365 and 496. An analysis of the total work completed, according to the distribution authorized in the contract, shows \$219,648.77 chargeable to the British Air Ministry and \$229,843.03 to Canada. Thus the two votes have been improperly charged with \$70,517.16.

ORDINARY EXPENDITURES

79. Ordinary expenditures were \$561,251,063, being a net increase of \$116,473,367.30 over the corresponding total in 1941-42. By departments, the more important increases were: Chief Electoral Officer, \$1,165,815.83; Finance, \$100,002,389.07; Labour, \$6,307,695.62; Munitions and Supply, \$4,965,434.53; National Revenue, \$1,762,526.28; and Post Office, \$3,240,118.09.

80. *Salary Payments.*—The majority of civil employees are engaged under the authority of the Civil Service Act or the War Appropriation Act. Although the latter Act vests in the Governor in Council the power, by Order or regulation, to

make provision for the appointment of temporary civil officers, clerks and employees and determine their rates of compensation and conditions of employment

relatively few establishment orders have issued. Appointments, as a rule, are substantiated by Civil Service Commission assignment certificates. In the case of those appointed by order in council, it was observed during the audit that orders in council do not state invariably the statutory authority relied upon to appoint. Since various statutes indicate limitations as to rates, tenure, etc., it is obviously desirable that appointing orders be explicit. For example, any appointment under the War Appropriation Act is necessarily a temporary one, but if certain sets of circumstances exist, it is conceivable that an appointment of indeterminate duration might be made under the authority of the War Measures Act. Administrative attention was drawn to the desirability of all such Orders stating the authority relied on, but many still are incomplete in that aspect.

81. The audit of salaries was made by means of comprehensive tests. The largest overpayment noted was \$401.73. It has been recovered. A high ratio of personnel turnover in temporary staffs was observed throughout the year. From 1,500 to 2,000 salary cheques are returned monthly to the principal issue office of the Treasury, mainly because of change in status of the employee during the period covered by the cheque. In turn, a corresponding number of adjustments of deductions for Retirement Fund Account, Unemployment Insurance, War

Savings Certificates, Victory Loan subscriptions, etc., have to be made. Consequently, the risk of error is present and a substantial number of errors were noted. During the year it was brought to the notice of the Treasury Board that cases were being noted where employees who had been overpaid salary were issued cheques, on resignation, for Retirement Fund account without salary overpayments to them being deducted. As a result, it is now necessary that an application for a return of contributions bear the statement that "no overpayment of any kind to this employee is outstanding."

82. By Executive regulation, the provisions of Part 2 of the Superannuation and Retirement Act are applicable to temporaries. A percentage of salary is withheld and is payable when the individual ceases to be employed in the Civil Service. Since the regulation was made, over 40,000 persons have been paid credits thus accumulated. The audit disclosed errors in payments. The sums individually are small. Collectively, overpayments not adjusted by June, 1943, amounted to \$144.48, while underpayments totalled \$102.08. The statute requires a separate account for each contributor. As a set-off of overages against shortages may not be made, the Department of Finance has undertaken to seek remedial legislation.

83. It was noted that delays in the issue of certificates of appointment were frequently so extended that individuals had resigned or been released before a certificate of appointment was on record. The audit of civilian staffs of National Defence (Navy) disclosed that four employees were paid salary increases which had not been authorized by the Treasury Board and the Civil Service Commission. Subsequently the Treasury Board approved the payments, and the Civil Service Commission issued a letter which stated that "the Civil Service Commission and the Treasury Board have approved of the reclassification of the following positions for the period indicated in order to legalize the over-payments which have already been made to these employees." Similar action was taken, on the same grounds, with respect to twelve positions in the establishment of National Defence (Army). Overpayments of salaries ranging from \$1 to \$88 were noted in some seventy cases, most of which were in the Halifax Dockyard. The majority of the employees concerned have been struck off strength, so recovery is doubtful. On March 12, 1943, the Civil Service Commission requested the Central Pay Office to release cheques to approximately five hundred employees of the Unemployment Insurance Commission who had been paid salary for periods of sixty days or more although no appointing authority had been issued. It was stated by the Civil Service Commission that all of the employees would be placed under formal certificate at as early a date as possible. Some of these employees had been paid since the preceding January on the strength of a similar undertaking by the Commission. On August 11, 1943, the number of employees of the Unemployment Insurance Commission who had been paid beyond sixty days without certificate stood at one hundred and seventy-five.

84. In view of the large numbers currently employed, and because of frequent changes in staff establishments, much may be said in favour of adopting departmental practices which definitely place on specific senior officers responsibility for staff pay certificates. Under existing practice, those who certify that a sum has been earned and that the rate has been authorized may not be regarded invariably as clothed with responsibilities which permit one to assume that the certificate given, for the purposes of section 30 of the Consolidated Revenue and Audit Act, 1931, complies with the true intent of that section. It would also be in the public interest were Treasury officers who service departments required to certify to the Central Pay Office of the Treasury that the payments requisitioned have been examined, are in order for payment and are properly chargeable to the vote or allotment concerned.

85. It has been the practice, since the fall of 1939, to defer reclassifications of positions. The practice is to award a war duties supplement when a civil servant currently is performing duties beyond the scope of his class. On its being observed that payments of such supplements were being continued when the recipient was not performing official duties, a test case was made of an Arsenal employee who was paid the supplement while on retiring leave. The practice now is to limit payments to leave periods not exceeding thirty days. In the case mentioned the sum paid was recovered in the fiscal year 1943-44.

86. Section 46 of the Civil Service Act provides that deputy heads may grant yearly vacation leave up to 18 days. By regulation, it is provided that vacation leave carried over must be taken in the succeeding year, together with the leave for the year to which it has been transferred; provided that if, in the opinion of the Civil Service Commission, certain cases merit more generous treatment, provision therefor may be made by the Governor in Council on the recommendation of the Commission. Pressure of work prohibits many employees being granted leave. As a result, substantial accumulations are taking place, but relatively few executive orders were noted with respect thereto. A test was therefore made when it was noted that leave credits were carried over from 1941-42 to 1942-43 and from 1942-43 to 1943-44 for several employees of the Civil Service Commission, without the approval of the Governor in Council. Treasury Board concurred in the view that a department is not empowered to carry leave forward.

87. Sections 46 and 47 of the Civil Service Act and regulations made thereunder regulate the grant of leave to those within the scope of that Act. Leave to employees, who are not subject to the Civil Service Act, is granted departmentally. There is no uniformity in departmental practices. The Deputy Minister of Justice in 1934 answered in the negative a question whether it is permissive to departments, in the absence of regulations approved by the Governor in Council, to direct that Civil Service Act leave regulations be made applicable to all employees. The Income Tax Division was, by Order in Council, brought under the leave regulations some time ago. In the interests of good administration, much may be said in favour of general regulations being applicable to all divisions of the public service. Currently, regulation 70 requires that all leaves of absence shall be reported monthly to the Civil Service Commission and the Auditor General. The direction is not being fully implemented. It would be an administrative improvement were the head offices of all departments required to maintain suitable records for all employees, at Ottawa and elsewhere. These records could be inspected by the Civil Service Commission, the Comptroller of the Treasury and the Auditor General.

88. Over a long period of years a practice has existed of granting compensating leave for overtime. It originated by reason of the fact that it is not the general practice to pay for overtime service. In application, the procedure is that the individual or branch keeps a record of overtime and, when the employee may be spared, allows him to be absent for half a day or more. The custom is not recognized by any regulation. On account of the war, accumulations of this form of leave credits are large, and under existing circumstances cannot often be liquidated. In view of the fact that employees on such leave are certified, for pay purposes, as on duty, neither the paying office nor the Audit Office is in a position to note the fact that an employee is absent. Two cases were observed where the application given goes far beyond ordinary departmental practice. In the Department of Labour a head clerk, salary \$3,000, was, in fact, on leave of absence with pay from March 1, 1942, to March 10, 1943. The Department, in reply to a query, stated the leave was granted "in view of the extra hours worked over a long period of years." Annual leave was granted the employee from March 10, to the fiscal year-end. Salary payments

were then resumed, on the compensating leave for overtime basis, and continued until August 1, 1943, when the employee was struck off strength for pay purposes. The risks of the practice are illustrated by the fact that, although the employee was in fact absent, by Order in Council P.C. 23/11348 of December 15, 1942, a war duties supplement of \$60, from August 15, 1942, was authorized and paid during the whole period. The other case is that of a temporary officer of the Wartime Prices and Trade Board. He was appointed by Order in Council dated December 5, 1941, at an annual salary of \$5,000. It was observed in the course of audit that, although paid full salary, the officer had been, in fact, absent from duty from October 19, 1942, to April 30, 1943, as a result of illness. Section 67 (c) of the Civil Service Act regulations provides that sick leave with pay may be granted by the deputy head of the department, but not continuously in excess of two months, and that any longer periods which are found to be necessary must be referred to the Civil Service Commission for approval. The matter became the subject of correspondence between the Comptroller of the Treasury, the Wartime Prices and Trade Board and the Civil Service Commission. The Board advised that the absence with pay was covered by sick leave for 23 days, statutory vacation leave for 33 days and overtime leave for 107 days. The Civil Service Commission reported that, as the officer in question was appointed by Order in Council, he did not come under the Civil Service Regulations, and consequently the matter was not one under the Commission's jurisdiction.

External Affairs

89. *Vote 38.*—(a) Payments amounting to \$485.75, made through an account of the High Commissioner's Office, London, on behalf of other departments, were not recovered in the fiscal year.

(b) £127-12-10 was advanced in December, 1942, to an individual proceeding to Canada to join the Department of Munitions and Supply. No refund was made to Vote 38.

(c) The High Commissioner, Canberra, receives a house allowance of \$1,500. It was explained that \$3,000, charged to this Vote for furnishings for his residence, was due to the fact that "owing to shipping conditions, it was not possible for the High Commissioner to have his own furniture sent out from Canada, and it did not seem reasonable to require him personally to purchase furnishings there which he would not want to bring back to Canada when he leaves that post." In view of the terms of the appointment, the action of the Department appears to lack authority.

(d) The Greenland Government was not repaid in the fiscal year an advance of 3,000 kronen for expenses of the Consulate.

(e) The Trade Commissioner at Cairo was advanced £600 to purchase office supplies for the legation at Kuibyshev. An accounting had not been made in the fiscal year. An advance of \$3,500 was authorized in December, 1942, to finance a staff mess at Kuibyshev. This advance was directed to be recovered by monthly deductions from salary before September 30, 1943.

Finance

90. *National War Finance Committee.*—To meet the urgent requirements incidental to war activities, a special organization, the National War Finance Committee, was set up within the Department of Finance, to arrange, promote and conduct the sale of victory and war loans and of war savings certificates. This Committee was also empowered to carry on campaigns to stimulate savings and investment in issues of Dominion obligations. The Order in Council setting

up the organization provided that "the expenses of the . . . Committee incurred or to be incurred in carrying out the powers and duties herein conferred . . . shall be paid out of unallotted moneys in the Consolidated Revenue Fund." Under this general authority, current expenses of the Committee were charged to the statutory provision for meeting the expenses of loan flotations and redemptions contained in section 7, subsection (d), of the Consolidated Revenue and Audit Act, 1931. On the view that this section sanctioned expenditures only when a loan was in flotation or redemption, objection was taken to applying the section mentioned to provide for all the current expenses of the Committee. The suggestion was advanced that these expenses should be provided for either by an allotment from the War Appropriation or by a vote in the general Appropriation Act, and that charges to the continuing statutory provision should be restricted to definitely ascertained expenses of a particular issue, such as salesmen's commission, remuneration to banks, advertising, printing, etc. The Department adhered to the view that section 7, subsection (d), of the Consolidated Revenue and Audit Act, 1931, gave authority for payment of expenses incurred in flotation of loans, including promotional activities carried on in anticipation of a loan campaign, and in order to have these divergent views resolved, submitted the point to the Department of Justice for a legal opinion. The matter is still under consideration.

Fisheries

91. *International Fisheries Commissions.*—Under various Treaties between Canada and the United States, each country appoints commissioners and pays their salaries and expenses. All other expenditures are shared jointly by the two countries. Under Votes 79, 80 and 455 provided for the purpose, the total expenditure amounted to \$178,583.50, of which the United States' share was \$89,306.05, the details being: Pacific Halibut, \$24,970.92; Pacific Salmon, \$41,740.63, and Hells Gate Salmon, \$22,594.50. As no collections were made during the year, these amounts were transferred from the respective votes and carried in Public Accounts as receivables from the United States.

92. *Vote 78.*—The status of the Fisheries Research Board, as an operating agency, has been the subject of correspondence with the Department. By the Fisheries Research Board Act, 1937, the Board is "under the control of the Minister." Section 6 declares that the Board shall have charge of all Dominion fishery research stations in Canada. The expression "shall have charge" appears to be intended to be given its ordinary application: the Board is not required to provide facilities, nor determine the policy under which they are to be operated; instead it has a responsibility for the administration necessary to implement the policy as determined by the Minister or other competent authority. The Audit view was stated in these words: "I am inclined to the view that the Minister of Fisheries is answerable to Parliament for the activities of the Board and that the real purpose of Chapter 31 of the Statutes of 1937 is to instruct with respect to the character of the organization to be utilized in administering one activity of the department of Fisheries. In other words, the Act modifies in no way the responsibilities resting on the Minister by reason of the Department of Fisheries Act. If I am right, then it follows that the Board is a branch or portion of the executive government, and that service under the Board is service for the purposes of the Superannuation Act. In turn, this would give rise to a question of the status of those appointed under the Act. While the Details in the Estimates use the words 'Temporary Assistance' and 'Wages', it is possible that if the power exists to appoint for indeterminate duration—for example, the secretary—and appointments are made, then I think the imperative requirement of section 4 of the Superannuation Act would be applicable. This opens a broad field as to the

capacity of the Board to contract and appoint, first with respect to fishery research stations and secondly with respect to investigations." The Department has the subject under consideration.

Labour

93. *Vote 100.*—By Order in Council of February 11, 1943, A. J. MacNamara was appointed Deputy Minister of Labour, as and from January 1, 1943, at a salary of \$10,000. By Order in Council P.C. 66/1950 of March 13, 1943, it is directed that the former Deputy Minister, Dr. Bryce M. Stewart, be paid "salary for the month of January, 1943, at the rate of \$10,000 per annum." Salary payments of \$833.33 were thus made to two persons as occupants of the same position during the month of January.

94. *Vote 101.*—(a) An annuity agent at Winnipeg was transferred to Ottawa to assume duties in the Fair Wages and Conciliation Branch. From April 1, 1942, to February 28, 1943, he was paid at the monthly rate of \$183.32, this being the monthly living allowance authorized to be paid him as an annuity agent at Winnipeg. Objection was taken to the practice, and on May 18, 1943, a refund of \$1,283.24 was made to the Annuities Vote (101), being for the period from August 1, 1942, to February 28, 1943. Payments from April 1 to July 31, 1942, amounting to \$733.28, remain as a charge to Vote 101. In the circumstances, the sum is not a proper charge to that vote.

(b) Regulations made under the authority of the Government Annuities Act authorize the Minister of Labour to employ, subject to the approval of the Governor in Council, permanent agents, and he may "employ such temporary assistance as in his opinion is required, and upon such terms as may be agreed upon." The practice is to make appointments under the latter provision. The agreements frequently provide for living allowances, either for a fixed period or until earnings attain a certain sum. In some instances it is noted that these living allowances are long continued, the recipient's commission earnings being negligible. In some of these cases, the individual is, in fact, an office clerk of an agent. In the course of audit, cases were noted where a cost of living bonus was paid. It would appear that a more desirable practice would be to assign office assistants by means of the machinery of the Civil Service Act.

95. *Vote 104.*—Section 52 of the Industrial Disputes Investigation Act authorizes payment of an allowance at the rate of \$20 for each day's sitting to the several members of Boards of Conciliation and Investigation. In the course of audit it was observed that, as sometimes happens, the same individual is simultaneously a member of more than one board, and that the practice is to pay him \$20 for each attendance although sittings of more than one board take place on the same day. One instance resulted in payment of \$180 to a member for a single day, due to nine boards, composed of the same three men, dealing simultaneously with disputes at Galt, Ontario.

96. *Vote 106.*—(a) This vote provided \$5,000,000 for the administration expenses of the Unemployment Insurance Commission. Expenditures charged thereto amounted to \$4,657,394.29. Additional expenditures of \$1,735,306.65, purporting to cover administration costs of National Selective Service, were charged to War Appropriation. Because of administrative difficulties in attempting to apportion accurately the cost of services common in many respects to both Unemployment Insurance and National Selective Service, Vote 106 was drawn upon until 93 per cent of the estimate was exhausted; from a date in January, 1943, all administrative expenses were charged to War Appropriation. The result is that approximately 75 per cent of the total administrative costs have been

borne by Vote 106. A change in accounting procedure for the year 1943-44 has been made, whereby administrative costs will fall equally on the appropriations for Unemployment Insurance and War. An unqualified certificate cannot be given that the entire expenditure of \$4,657,394.29 in the fiscal year 1942-43 is properly chargeable to Vote 106.

(b) The expense accounts of the manager of a local office in the Prairie Region were found to be unsatisfactory. They included fictitious hotel bills in support of travel claims for trips never made. Ascertainable overpayments have been recovered and the employee dismissed.

97. *Vote 107.*—\$11,487,057.90 was paid as the Government's contribution to the Unemployment Insurance Fund. A minor inconsistency in the Act is that section 77, by directing that the contribution of one-fifth by the Government shall be based on the aggregate credits, has the effect of requiring a public contribution of one-fifth of fines and penalties levied against employers. \$127.62 was contributed for that reason in the fiscal year. In view of the terms of the legislation, exception is not taken to the payment, but it cannot otherwise be justified.

Mines and Resources

98. *Vote 172.*—An Order in Council, P.C. 6/1450 of February 24, 1942, provides means to adjust losses due to the war of employees stationed in Europe. Awards totalling \$19,630.35 were made to seven Immigration employees who had been located in Belgium, France, Germany and Poland, and to E. S. Doughty, who was stationed at Hong Kong, China. As the awards take the form of ex gratia payments, a more desirable practice would have been to charge the expenditures to the War Appropriation, and not to a vote provided for Immigration field and inspectional services. The award in the case of Mr. Doughty is authorized by Treasury Board, although the Order in Council relied on is declared applicable only to employees who had been stationed on the Continent of Europe.

99. *Indian Annuities.*—In the fiscal year 1942-43, annuities amounting to \$14,555 were distributed in accordance with the provisions of section 162 of the Indian Act by the Lesser Slave Lake Indian Agency. A comparative three-year statement of annuities payments in the Agency is:—

Rank	Rate	1940	1941	1942
Chief	\$25	12	12	12
Headman ..	15	22	21	19
Indians	5	3,274	3,329	2,794
		<u>3,308</u>	<u>3,362</u>	<u>2,825</u>

The decrease of 537 during 1942 is the result of investigations by the Department into the status of Indian annuitants and the deletion of many names from Agency paylists on the ground that they were not Indians and consequently not eligible either to be paid annuities, to share in band funds, to live on reserves, or to attend Indian schools. Order in Council P.C. 42/4857 of June 15, 1943, directs an inquiry to be undertaken to establish correct Indian band lists in the Lesser Slave Lake Agency. Like investigations have not been extended, as yet, to other agencies to determine whether or not similar conditions prevail elsewhere.

National Film Board

100. *Vote 201.*—(a) The expansion of the Board's activities, by reason of the war, has demonstrated the need for revision and extension of its accounting and estimates procedures. A survey is being made to that end. In the fiscal year 1942-43, a schedule of film charges, based on an approximation to commercial rates, was used to recover to the Board outlays for materials, supplies and processing costs in developing, cutting, recording and printing film. On completion of a production, the charges were transferred to the vote of the department which had ordered the film. The corresponding amounts of these transfers were credited to the National Film Board vote. This procedure was regarded, administratively, as necessary in order to afford sufficient working capital for the Board to carry out its extensive film activities. The amounts so credited were duly apportioned between the allotments of the vote on a percentage basis, the percentage varying from time to time according to the need for funds in each particular allotment. The amounts so credited to the various allotments were: Short Term Employment, \$43,835.93; National Film Program, \$24,562.28; Supplies, Material, Printing and Stationery, \$62,166.74; Equipment, \$62,488.09 and Miscellaneous, \$30,310.81. Since credits to the vote were based on estimated costs, it cannot be certified that the net expenditures charged to Vote 201 were, in fact, within the amount voted. As any overcharging of the vote would be an error in accounting only—the gross total being within the amount provided for the general purpose—attention is being directed to the general plan of accounting.

(b) Processing costs of films produced by the Board and chargeable to its appropriation were computed in like manner. That is, arbitrary amounts were debited to the allotment, National Film Program, and credited on a percentage basis to the allotments for Supplies, Equipment and Short Term Employment. This procedure had the effect of transferring expenditure incurred under several allotments to a single allotment, thus permitting further expenditures under the allotments credited. In justification of this procedure, it was stated that processing costs were, in the first instance, temporarily charged to three allotments, but once the approximate cost was established, they were transferred to the proper allotment. Section 26 of the Consolidated Revenue and Audit Act, 1931, directs that once an allotment is established, it shall not be varied or amended except with the approval of the Treasury Board.

(c) Approvals were not obtained to allotment over-expenditures of:

Cost of living bonus	\$ 586 05
Travelling expenses	49 59
National Film Program	16,499 98

(d) Examinations of paylists for temporary employees engaged under the authority of the National Film Act disclosed that the provisions of paragraph 5 of Order in Council P.C. 1/1569 of April 19, 1940, were not being complied with. This paragraph directs that a 5 per cent Retirement Fund deduction be made from the salary of all persons appointed to temporary positions other than casual positions. The Board has now put the provisions of this section into effect.

(e) As a result of a \$1,219.79 defalcation, precautionary adjustments in routine and procedure have been instituted. Recovery of the amount of the defalcation was made from: Retirement Fund, \$122.02; Government Officers' Guarantee Fund, \$1,009.13; refund of salary cheque, \$88.64.

National Research Council

101. *Vote 360.*—In addition to the moneys appropriated for its use by Parliament, the National Research Council enjoys the right to expend moneys received through bequest, donation or otherwise. Receipts of this nature are credited to special funds and are used for general or special research work. A summary of such receipts and expenditures follows:

Receipts—

CUSTOMS AND EXCISE DIVISIONS

102. *Vote 195.*—(a) Four officers were employed during the year without the concurrence of the Civil Service Commission. These officers were originally appointed under the provisions of Order in Council P.C. 1053 of June 29, 1922, which exempts from the operation of the Civil Service Act all appointments where the salary does not exceed \$200 per annum. They were paid in excess of this amount in 1942-43. The Department has undertaken to correct the situation in so far as future payments are concerned.

(b) Expenditures incurred in maintaining relieving officers at the various ports, outports and preventive stations during the fiscal year amounted to \$58,355.60. Payments of relieving expenses of \$1,000 or over were as follows: Antigonish, N.S., \$1,602.93; North Sydney, N.S., \$1,586.63; Edmundston, N.B., \$2,919.12; Hillsboro, N.B., \$1,054.78; Moncton, N.B., \$2,261.01; Grand Mere, Que., \$1,631.03; La Tuque, Que., \$1,039.85; Stanhope, Que., \$1,200.39; Clinton, Ont., \$1,095.99; Galt, Ont., \$1,248.40; Leamington, Ont., \$1,079.36; Revelstoke,

B.C., \$1,485.60. The position of Collector at Antigonish (referred to in previous reports) has been vacant since 1939. The Department has operated the port by temporarily seconding officers from other places and paying their travelling and living expenses. As those who temporarily filled this position held positions of equal or higher rank than that of the vacant collectorship, the practice followed materially increased the cost of operating the port. Revenues of the port for the year were \$13,427.79. The Department has issued directions since the close of the fiscal year to proceed with permanent appointments at Antigonish, Hillsboro, Grand Mere and Revelstoke.

INCOME TAX DIVISION

103. *Vote 198.*—(a) The resignation of an employee was accepted by Order in Council of November 4, 1942, effective the first day of the same month. On February 24, 1943, the Civil Service Commission approved of retiring leave for sixty days commencing October 10, 1942, and salary was paid for the period, although the Order in Council accepting the resignation was neither rescinded nor amended.

(b) An executive order of April 19, 1932, has as a purpose that of requiring that all cheques issued by departments and which are payable to the Crown be drawn payable to the Receiver General. The object is to make certain of deposit to the credit of Consolidated Revenue Fund. In the course of audit it was observed that some cheques charged to Vote 198 had been made payable to postmasters. The payments were with respect to postage meter impression billings by the Post Office Department.

Pensions and National Health

104. *Vote 206.*—Test examinations extending to over five thousand European War (1914) Pensions files disclosed overpayments amounting to \$15,266.20, of which recoveries of \$3,459.83 are being made. The Act permits assessment errors to be corrected from current dates only. In the majority of the cases no refund was directed.

105. *Vote 210.*—A payment of \$475.30 to the University Hospital Board, Edmonton, Alberta, reimbursed the cost of fire insurance carried on an addition to the hospital erected by and paid for by the Department. The payment was provided for by the agreement between the Crown and this Board. Other agreements with the same body and with the Ottawa Civic Hospital call for repayment of insurance premiums on policies which may aggregate one million dollars. The policy of the Government, as enunciated by the Governor in Council in 1881, is that "it is a wise economy for the Government to underwrite its own risks . . . and . . . that all existing policies be suffered to lapse and no new one effected." The Department is presently considering whether steps should be taken to bring the agreements into harmony with the general policy.

106. *Vote 214.*—Of the \$85,000 provided for the Last Post Fund grant, payments were made amounting to \$50,049.60. As at March 31, 1942, the balance sheet, prepared by Geo. A. Touche and Company, auditors for the Last Post Fund, showed a surplus of \$53,068.22, practically all cash. This surplus had been built up over a period of years, annual grants having been more than sufficient to defray current commitments and to liquidate a deficit which existed in 1935. Payments to the Last Post Fund are now on an imprest basis. Working cash balances are retained by the central body in Montreal and in the various provincial commands, and at periodic intervals reimbursements for the amount of receipted accounts will be made to the Fund.

107. *Militia Pension Act.*—(a) The administration of this Act is under the Department of National Defence, but payments are made by the Department of Pensions and National Health. Service pensions are awarded on the basis of one-fiftieth of annual pay and allowances for each completed year of service in the Forces. In calculating pensions for retiring members of the Forces, account is taken of dependents' allowances paid in respect of children. That is to say, life awards are put into payment which will continue long after children become self-supporting or, if girls, they marry. A case observed concerns a Warrant Officer with four children, for whom dependents' allowances of \$42 a month were in payment. This Warrant Officer, retiring after twenty years' service, draws 40 per cent of these children's allowances for life. Members of the Forces, during the War, are entitled to receive Active Force Pay and Allowances, but the dependents' allowances for children expire at the ages of sixteen and seventeen for boys and girls, respectively—this also is the expiry age for allowances to children of Great War pensioners. There is no levy against these allowances for contributions towards pension. Attention is drawn to the practice because assumption by the Crown of this liability for children, without time limit, is not in harmony either with the principles of pension legislation generally, or even with specific provisions of the Militia Pension Act. The statute specifically provides that, when compassionate allowances are granted to children of deceased pensioners, the allowance shall cease when a son reaches the age of 18, and a daughter 21, unless she marries before that age.

(b) In certain circumstances the statute permits payments of pensions to officers to continue when such officers are employed in the Public Service of Canada, with the proviso (section 4, subsection 13) that:

In the event of the gross annual pension granted to such last-mentioned officer under the provisions of this Act, together with the annual rate of salary which such officer is receiving in the public service of Canada, making an annual amount greater than the annual rate of pay and allowances upon which such officer's pension was computed the payments of pension to such officer during the time he is in receipt of a salary in the public service of Canada shall be reduced so that the annual rate of emolument received by such officer by way of salary and pension shall not exceed the annual rate of pay and allowances upon which his pension was computed.

The audit opinion is that rate of pension and salary is the determining factor in calculating the amount of pension payable. The administrative officers take the view that the actual salary drawn in a twelve-month period is what governs. For example, in one case a pensioner was employed continuously for a period of eighteen months. Pension was adjusted for the first twelve-month period only. As to the other six months, the principle applied was that the salary earned during the succeeding six months, together with pension, did not exceed the annual pay and allowances on which pension was based. Reducing this to dollar terms means that an officer whose pension is \$2,000 a year and whose pay and allowances were \$4,000 could be employed in the public service at an annual rate of \$4,000 for six months in every twelve-month period and still draw full pension.

(c) By Order in Council P.C. 77/8785 of September 26, 1942, pensioners who have been reappointed to or have enlisted in the Active Force, or have been appointed to temporary positions in the Public Service of Canada may have their pensions augmented by an amount equal to one-fiftieth of the pay and allowance (or salary) received by them at the date of discharge or retirement, for each completed year of service; provided pension is suspended during this interval. This Order, made under authority of the War Measures Act, varies the Militia Pension Act in two respects:—

- (i) Officers and warrant officers are required to contribute only when the original pension was appropriate to officer or warrant officer rank;
- (ii) Pension to militia men (and to officers appointed to the Force and warrant officers appointed to that rank subsequent to 1929) is based on the average pay and allowances over a three year period.

The instrument used to give effect to an augmentation is a certified statement from the Department of National Defence as to periods of service, pay and allowances, etc. As the original awards were made by the Governor in Council, it would appear to be in the public interest that any increases should be granted by the same authority.

(d) Order in Council P.C. 54/2057 of March 16, 1942, made under the authority of the War Measures Act, has for its purpose that of permitting officers and men of the Permanent Active Air Force to count the rank, other than acting rank, which they hold in any part of the Royal Canadian Air Force during the state of war now existing, as substantive rank for the purposes of the Militia Pension Act. This Order thus extends to former non-commissioned officers and men of the Permanent Royal Canadian Air Force (who hold warrant or commissioned rank in the Royal Canadian Air Force during the present state of war) the status of officers for the purposes of the Militia Pension Act. However, no action was taken by the Royal Canadian Air Force to deduct the pension dues from these warrant and commissioned officers, which are required by section 10 of the Act. On this being brought to the attention of the Service, Air Force Routine Order No. 1309 was issued on July 9, 1943, requiring deductions to be made.

(e) Under the authority of the War Measures Act, two Orders in Council (P.C. 66/8817 of November 11, 1941, and P.C. 53/4430 of May 27, 1942) were passed authorizing the appointment to commissions in the Royal Canadian Air Force of two former Royal Air Force officers, with the proviso that their service in the Royal Air Force would count as service with respect to the Militia Pension Act on the payment of pension dues as required by subsection 2 of section 10 of the Militia Pension Act. The pension contributions were to be computed as if the ranks which these officers had held in the Royal Air Force had been held in the Royal Canadian Air Force. Audit queries were raised as to contributions, if any, by the United Kingdom Government towards pension for the Imperial period of service. Subsequently, by Order in Council P.C. 62/1280 of February 17, 1943, the contribution of one of these officers was increased from \$9,288.42, as required by P.C. 53/4430, to \$23,221.05, the contribution of the other officer remaining unchanged.

Post Office

108. *Votes 244, 245 and 246.*—Owing to the difficulties involved in the apportionment of charges for telegrams and telephones, all city and district office telegraph charges were paid from Vote 245 and all city and district office telephone rentals (with the exception of those at Ottawa) and tolls were paid from Vote 244. Therefore, in so far as the telegram and telephone allotments of these votes are concerned, the expenditures incurred are arbitrarily reflected.

109. *Vote 247.*—Among the expenditure charges are those for fares collected by Trans-Canada Air Lines from Post Office officials, notwithstanding the fact that the agreement under the Trans-Canada mail contract provides:—

that the corporation. . . . agrees to convey without charge at all times. . . . any duly accredited representative of the Post Office Department who may in the execution of his duties travel in aircraft used by the corporation in the transport of mails on any scheduled flight.

This provision is common to most contracts between the Department and mail carriers. Under it has developed the practice whereby various transportation systems grant annual passes to senior officials of the Post Office Department.

In the case of the Trans-Canada Air Lines, the Board of Transport Commissioners for Canada has taken exception to the granting of annual passes, stating in part that:—

Nothing has yet been advanced, however, to show that the officials for whom authority for annual passes is sought are in fact required to travel so extensively over the lines of your company on business primarily and directly concerned with your air mail contract that their needs could not satisfactorily and adequately be taken care of by the issuance of trip passes as required.

Generally speaking, the Board does not appreciate that, once an air mail contract is completed Post Office officials would have any real necessity for extensive travel in connection therewith, and if annual passes are to be sanctioned for these persons, it will be necessary that each case be very fully developed.

110. *Vote 248.*—Among the charges to this vote were payments for overtime rental of certain tabulating equipment. The propriety of these payments was questioned, for two reasons: (1) investigation revealed that, although rental for a double shift was claimed on some of the equipment, many machines on both the regular shift and the extra shift were not in continuous use; and (2) the rental previously paid was on a "per month" basis, in accordance with the terms of a contract (expired by effluxion of time on December 31, 1938) containing no provision for the payment of overtime rental. Departmental officials felt they were justified in passing the accounts, on the ground that according to their information it is customary to pay overtime when such machines are used beyond regular working hours. The subject is of concern to many departments and currently is under review by officers of the Department of Munitions and Supply.

Public Works

111. *Votes 261 and 487.*—(a) Taxes amounting to \$37,923.01 and \$3,936.25 were paid to the City of Ottawa and the Village of Rockcliffe Park for assessments on legation and other like properties. On April 2, 1943, the Supreme Court of Canada decided, in a reference made by the Governor in Council, that properties owned and occupied by His Majesty in right of the United Kingdom and in right of the Commonwealth of Australia were not subject to municipal taxation, they being properties coming within the exemption of Crown property in the Ontario Assessment Act. The majority of the Court also found that the municipalities did not have power to levy rates on the legations of the French State, the United States of America and of Brazil.

(b) On September 7, 1939, by Order made under the authority of the War Measures Act, it was directed that any person employed in the Public Service be granted leave of absence without pay from his civil position during the period he is a member of the Service Forces of Canada. In the course of audit it was observed that the Dominion Carillonneur, a member of the R.C.A.F., was paid for special programs. Authority for the payment made in connection with one forty-five minute concert was offered in the form of a Treasury Board Minute approving a rate of \$60 per performing hour. No like direction was tendered with respect to other payments involving three hours.

112. *Vote 262.*—(a) Order in Council P.C. 8480 of September 18, 1942, authorized the leasing of office space at 45 Blvd. Charest, Quebec, for the Unemployment Insurance Commission, and approved an expenditure by the Crown of \$2,300 for alterations and changes required to make the premises suitable. The cost of this work was \$2,100. The day before the work was completed, the Unemployment Insurance Commission authorized new alterations that practically called for pulling down the completed work. These new alterations, costing \$2,250, have been paid as charges to the fiscal year 1943-44.

(b) By Order in Council P.C. 2152 of March 18, 1943, direction is given to pay to the City of Three Rivers \$1,325.94 per annum for the years 1940 to 1947, for snow removal, street flushing, street cleaning, etc., in connection with the Public Building. This annual charge is assessed on 3,313 sq. yards at 40 cents per sq. yard. In the fiscal year a payment of \$3,977.82 was made for the period 1940-1942. Reference to like payments was made in the Audit report for the fiscal year 1940-41, page 542. Annually, the City of Hamilton is paid \$400.66 for street watering at the Public Building. This charge is based on 40 cents per \$1,000 of assessed value.

113. *Vote 315.*—The expenditures from the appropriation for the National Gallery of Canada amounted to \$43,082.44. The Gallery also has an Open Account, the funds originating in gifts to the Gallery. As of March 31, 1943, the cash balance in the account was \$13,490.45. In addition, a Dominion of Canada perpetual bond for \$1,000 is in the custody of the Finance Department.

114. *Vote 317.*—Cheque R.M. 48781 for \$53.70 was issued in favour of G. W. Ward instead of G. W. Rand. The cheque was negotiated by G. W. Ward at Dawson Creek. A new cheque was issued and sent to G. W. Rand in 1943-44. Efforts to recover the value of the first cheque were being made at the time of audit.

Royal Canadian Mounted Police

115. *Vote 321.*—(a) Categories of service personnel are granted general, or meal, allowances. It was observed during audit tests that in some instances individuals concerned were simultaneously allowed claims for meals when they were in travel status. Appropriate action was taken to effect recoveries. A standing order of the Commissioner, dated June 26, 1943, now directs that such personnel, when in travel status, shall continue to receive the allowance, but a fixed sum deduction is directed to be made with respect to each meal claim included in a travel expense account. It is anticipated that this order will suitably safeguard against duplication of allowances.

(b) The Rules and Regulations, as approved by the Governor in Council, permit payment of transportation to place of intended domicile of a member of the Force on his retirement. In recent years it has been the practice to construe the regulation as permitting payment of subsistence while en route. The Department has undertaken to recommend a suitable amendment for consideration by the Governor in Council.

116. *Pension Awards.*—Relying on section 66A of the Royal Canadian Mounted Police Act, the Governor in Council, on June 1, 1942, awarded an annuity of \$930 to a special constable. He had 13 years, 166 days service in the Civil Service and 12 years, 199 days service in the R.C.M.P. During his civil service he had contributed to Retirement Fund and upon leaving the Civil Service he was refunded his contributions with interest, and so was paid \$852.81. A constable is not required to contribute for pension. An officer does, both for current service and for any period during which he was subject to the Civil Service Retirement Fund provisions. The special constable had retired from the Civil Service in 1923 and was enlisted in the Police in 1929. Prior to the grant of pension, it was pointed out that as he had been fully provided for in 1923, to the extent permissive by law, to count the service again for Police pension purposes would have the effect of duplicating awards, besides being inconsistent with the practices applicable to officers. The award, however, was made.

Trade and Commerce

117. *Vote 342.*—(a) Enemy action caused certain departmental officials in the Commercial Intelligence Service to lose personal or household effects or both. The Department undertook, with executive sanction, to assist in the replacement of the goods over a period of years. Payments of \$700 in 1940-41, \$5,550 in 1941-42 and \$18,767.77 in 1942-43 were made. In addition, a balance of \$23,404.32 remains to be paid during the period April 1, 1943, to March 31, 1949. As the expenditure is not one clearly within the purpose of the vote to which charged, it would appear that a more desirable practice would have been to make the cost a charge to the War Appropriation. The payment appears to have all the characteristics of an *ex gratia* grant. The practice adopted of authorizing annual payments over a series of future fiscal years gives rise to questions such as: (a) the power of the Governor in Council to order an *ex gratia* charge beyond the grants currently at his command, and (b) the contractual relationship, if any, created by the orders in council.

(b) As a result of the occupation of countries by the enemy, \$5,446.76 in the hands of Trade Commissioners was lost. These funds were listed as outstanding advances and carried forward from year to year. However, the Department allowed the amounts in question to remain as a charge to the vote in 1942-43. As the prospects of recovery are remote, it would appear that proper authority might have been obtained to write off the charge finally to the appropriation.

Transport

118. *Votes 372 and 373.*—Section 14 of the Canadian Broadcasting Act, 1936, reads in part:

14. (1) The Minister of Finance shall deposit from time to time in the Bank of Canada or in a chartered bank to be designated by him, to the credit of the Corporation:—

(a) The monies received from licence fees in respect of private receiving licences and private station broadcasting licences after deducting from the gross receipts the cost of collection and administration, such costs being determined by the Minister from time to time.

In carrying out this provision of the Act, the Minister included in the cost of collection and administration, expenditures incurred under Vote 373 for the issue of radio receiving licences, but did not include the expenditures incurred in the suppression of local electrical interference under Vote 372. This is in harmony with statements made when the Bill was before the House. Experience since and the growth of the Canadian Broadcasting Corporation's facilities may justify further consideration being given to the policy of charging the cost of suppressing local electrical interference to taxpayers generally. The cost of collection for the fiscal year 1942-43 amounted to \$223,338.07 and was deposited as revenue of the Department of Transport.

119. *Vote 399.*—The Hudson Bay Railway is operated by the Canadian National Railways for the Crown. The railway was considered to be generally operative in 1935-36, and a parliamentary appropriation was provided each fiscal year since April 1, 1935, to take care of the difference between expenditures for operation and maintenance and the revenue accruing from operation. During the period April 1, 1935, to March 31, 1942, the railway was operated at a loss, the total being \$2,349,806.18. In the fiscal year 1942-43 the revenues exceeded the expenditures by \$112,120.75. As a result, the total of the Appropriation Vote 399 lapsed at March 31, 1943, and the excess revenue was deposited to the credit of the Receiver General.

SPECIAL EXPENDITURES

120. Special expenditures amounted to \$31,287,878.39, a decrease of \$32,687,894.17 as compared with the previous year. Particulars are:

Authority	Purpose	Amount
Vote 29	Prairie Farm Rehabilitation Act and Water storage..	\$ 1,729,344 77
Vote 30	Prairie Farm Assistance Act—Administration.....	157,013 32

121. *Prairie Farm Assistance Act.*—Award disbursements were \$2,293,429.41, but by reason of the 1 per cent statutory levy on the purchase price of grain producing \$2,044,432.10, the net cost to Consolidated Revenue Fund was \$248,997.31. Payments were almost exclusively with respect to the 1941 season. In all, \$15,-487,384.28 had been paid to March 31, 1943, with respect to the 1941 crop. The audit tests disclosed that administrative practice has not yet established an invariable distinction between a "farmer" and a "rancher". While the Board of Review has ruled that a person having more than 5,000 acres of grazing land is a "rancher" and not a "farmer" for the purposes of the Act, audit examination disclosed five claims paid where over 5,000 acres were operated. The explanation given was that the administrative view was that the competence of the Board of Review to define arbitrarily was open to question and that the administrative practice was to define the category of each claimant. A trend appears to exist to regard all who pay the 1 per cent levy as qualifying for the benefits of the Act. The regulations, however, clearly indicate that only those who meet defined qualifications as to residence and activity are to be regarded as farmers for the purposes of the Act.

122. *Wheat Acreage Reduction Payments.*—Costs arising out of the Wheat Acreage Reduction Act, 1942, were charged to the \$28,175,000 appropriated by Votes 31 and 449. Total expenditures were \$25,868,562.53, of which award payments amounted to \$24,526,332.47. The plan has now been in operation since 1941, total award disbursements from the adoption of the policy to March 31, 1943, being \$34,741,035.56. At the year-end it was estimated that \$936,361—apart

from July 1, 1943, payments maturing under section 4 (e) of the Act—remained unpaid on outstanding claims. It continued to be observed that information provided by applicants and inspectors' reports were frequently irreconcilable or lacked finality as to facts. One or more of the following reasons were often given by applicants when statements were questioned: (1) the award is on "total cultivated acreage", therefore individual crop acreage statements were not necessarily exact; (2) wheat was sown but the land was later converted to summer fallow; or (3) 400 acres is the statutory limit, therefore any excess was not reported in specific detail. The work of the field inspection staff appears to have suffered by reason of an inadequate number of men and the brief time period available in which to make real inspections. The audit examination of payments was made by means of tests. Errors noted were reported to administrative officers. In some instances overpayments were recovered; in other cases deductions are to be made from future payments.

WAR EXPENDITURES

123. The total war expenditures for the fiscal year 1942-43, exclusive of loans and advances and the \$1,000,000,000 authorized and paid under the War Appropriation (United Kingdom Financing) Act, were \$2,724,248,890.27, an increase of \$1,384,574,737.85 over like expenditures in the fiscal year 1941-42.

124. In addition, loans and advances were made under the authority of War Appropriation Acts. These amounted to \$65,231,622.22, exclusive of those made under the authority of the War Appropriation (United Kingdom Financing) Act. They were made to:—

Canadian Wool Board Limited.....	\$ 9,965,753 33
Commodity Prices Stabilization Corporation Limited	21,055,901 51
Wartime Salvage Limited	560,125 77
Munitions and Supply—Advances to Commodity Corporations and other Companies.....	17,198,003 19
Canadian National Railways—	
Development of Vermilion Oil Fields	35,000 00
Purchase of Railway Equipment	16,416,838 42

125. It is also a provision of War Appropriation Acts enacted since 1939 that from unappropriated moneys in Consolidated Revenue Fund, the Governor in Council may temporarily defray any obligation or costs incurred by reason of the Government of Canada acting as agent of any British or foreign country allied with His Majesty. At March 31, 1943, the amounts outstanding as repayable under this provision were: United Kingdom, \$154,594,221.14; Australia, \$17,111,220.07; Newfoundland, \$33,373.42; New Zealand, \$3,647,555.75; Union of South Africa, \$4,504.75; Belgium, \$1,703.14; Czechoslovakia, \$378.44; Greece, \$626.91; Netherlands, \$11,805.97; Norway, \$245,046.20; Poland, \$24,067.05; United States of America, \$2,514,268.01; Yugoslavia, \$72.43; Union of Socialist Soviet Republics, \$57,699.27; Department of Agriculture (Food), \$6,754,993.67; War Supplies Limited, \$83,042,204.84.

126. During the fiscal year 1942-43, amounts totalling \$297,000,000 were advanced to the Foreign Exchange Control Board under the provisions of section 3 of the War Appropriation Act, 1942. As repayments of \$622,000,000 were received in respect of the \$725,000,000 outstanding at April, 1942, the net result of the year's transactions was a reduction of \$325,000,000 in the Board's indebtedness. The amount outstanding at March 31, 1943, was \$400,000,000.

127. Pursuant to an agreement between the Government of Canada and the Government of the Union of Socialist Soviet Republics, \$917,159.16 was advanced

during the year under the provisions of section 3 of the War Appropriation Act, 1942, on a credit of \$10,000,000 established for the purchase by Russia of Canadian wheat and flour. The advance bears interest at 3 per cent per annum.

128. The War Appropriation (United Kingdom Financing) Act, 1942, authorized \$1,000,000,000 to be paid to the United Kingdom Government. This sum was paid. The same Act granted authority to make a loan of \$700,000,000 to the United Kingdom Government. The loan was made. Under the authority of section 5 (2) of the Act, \$61,321,885.88 was advanced to the Canadian National Railway Company to enable that Company to purchase, from the Government of Canada, Canadian National Railways securities repatriated from the United Kingdom under the provisions of section 5 (1) of the Act. The advance, which bears interest at the rate of 3½ per cent per annum, is in addition to the amount of \$191,602,582.22 advanced for securities' repatriation in the previous fiscal year.

129. The War Appropriation Act provides that the moneys shall be allotted by the Treasury Board:

Labour

130. A voucher covering an expenditure of \$77.75 to the Canadian National Railways for a return ticket, Winnipeg-Vancouver, was returned to the Department for particulars as to the person to whom the ticket was delivered. No reply has been received.

131. A Wartime Bureau of Technical Personnel was created by Order in Council P.C. 780 of February 12, 1941, the Engineering Institute of Canada, the Canadian Institute of Mining and Metallurgy, the Canadian Institute of Chemistry and the Technical Service Council having agreed to establish a body "to organize the placement of technical personnel in the war industries and to co-operate with the Civil Service Commission in arranging for the placement of technical personnel in the government service." The Bureau is financed by accountable advances to meet necessary operating expenses. In the fiscal year

1942-43 the Bureau disbursed \$151,776.23, of which \$119,513.66 was for salaries. The Department reports that "on behalf of the Government the Minister of Labour has approved all appointments and compensations made to employees since February, 1941." The Order in Council is silent as to authority relied on. The work of the Bureau is of a nature as to raise a question as to the regularity of the mode adopted in making appointments, for the activities appear to be of the nature of an administrative branch.

Munitions and Supply

132. The Department, in accordance with the provisions of the Department of Munitions and Supply Act, constructs defence projects and acquires or produces for the Department of National Defence munitions of war and supplies, as defined by the Act. The costs of these become charges to allotments made to the Department of National Defence. By the Act the Minister of Munitions and Supply is required to organize the resources of Canada, the agencies and facilities to supply the same, and generally to take such steps as are necessary to provide for the fulfilment of the war needs of Canada, present and prospective. Expenditures incurred in this phase of the war effort are charged to allotments made to the Department of Munitions and Supply. An interlocking condition necessarily exists, the selection of allotment to be charged involving the exercise of departmental discretion. An expenditure of \$31,238.74, charged to an allotment for the Department of Munitions and Supply, illustrates. On requisition of a Service department, the Department of Munitions and Supply acquired, overseas, a supply of stop watches and made payment in London in accordance with the contract agreement. Some were lost at sea. Strictly regarded, the charge should be recorded against an allotment to the Department of National Defence. In other cases the Department of National Defence accepted the liability and made payment, on the strength of acceptance of liability by the overseas office of the Department of Munitions and Supply. In these types of cases, the advice from overseas of shipment and official notice of loss at sea are accepted departmentally in lieu of vouchers ordinarily contemplated by section 30 of the Consolidated Revenue and Audit Act, 1931.

133. *Capital Assistance.*—A major activity of the Department was that of developing the industrial capacity of Canada in order that munitions of war might be produced for Canada and other countries. This program involved capital assistance policies of various types, but generally, the expression denotes assistance extended to contractors in order that they might expand existing, or provide new, facilities for the production of essential war needs. This type of capital assistance takes the form of financing costs incurred in making plant extensions and alterations, the construction of new buildings and the acquisition and installation of machinery, equipment and tools. As a rule, although there are exceptions, title is in the name of the Crown.

134. *Allotments for Capital Assistance.*—It was observed that some allotments from the War Appropriation to provide capital assistance were not reconcilable with capital assistance amounts authorized by order in council. Frequently this was due to the amount named in the order in council being an estimate only. In other cases, sales tax, customs duties and related charges, payable by the contractor, were not included in the capital assistance amount, thus requiring an estimated sum to be included in the formal allotment. The accounting procedure, to preserve the control contemplated by the legislation, was impeded throughout the year by reason of the fact that additions were made to capital assistance programs without uniformity existing in the treatment of sales tax and customs duties when supplementary allotments were made for projects. For example, part of the original capital assistance program with respect to

Ontario Forgings Limited was cancelled. Although suitable action was taken by Treasury Board, no amendment was made to the governing order in council. In the case of the Steel Company of Canada Limited, no amending order in council was issued, nor was the allotment reduced, although it was observed that the major portion of the initial capital assistance program had been cancelled by the Department. As a consequence, the Company received advances in excess of the requirements of the adjusted program, although it did not make disbursements beyond the revised arrangements.

135. Expenditures to March 31, 1943, in connection with certain projects exceeded amounts authorized by order in council. In many instances the projects were jointly financed by the United Kingdom and Canada. The last settlement of account between the two Governments, on the agreed proportion of costs to be borne by each, was made as of August 31, 1942. No further settlement was made pending completion of the agreement whereby the Dominion Government acquired United Kingdom interests. As a result, in the following instances expenditures borne by the Dominion Government exceeded the allotments secured to finance the Canadian interest:

- (a) Defence Industries Limited, Project No. 20: This was a joint project. Expenditures of \$1,770,180.35 exceed the estimated cost of \$1,106,975. In the audit it was noted that expenditures of \$1,165,300 reported for an all-Canadian project (also known as No. 20) are considerably less than the estimated cost of \$1,924,361.16. The possibility is that part of the expenditures presently recorded against the joint project may be applicable to the Canadian project. The monthly statements supplied by the Company in accounting for the advances do not contain information to enable an adjustment to be made, because the Company accounts for advances as a whole.
- (b) Dominion Engineering Works Limited: The estimated cost of \$5,195,570.84 for the joint project is based upon the allotments secured from Treasury Board, which are considerably less than the expenditures authorized by order in council. The accrued expenditures were \$5,250,117.93. The fact that no settlement between the interested Governments was made during the fiscal year with respect to this project would appear to have a bearing on the apparent excess of expenditure over allotments.
- (c) Electric Steels Limited: Ascertainable expenditures of \$1,600,772.09 to March 31, 1943, are recorded as having been made for a part of the capital assistance program for which existing order in council authorization amounts to \$1,538,027.65.
- (d) General Engineering Co. (Canada) Limited: The expenditures of \$682,304.58 are part of advances amounting to \$5,138,179.58 by the two Governments. In accounting for advances received, the Company records the sum of \$4,814,000 as having been advanced on a joint project and \$1,473,439.56 on an all-Canadian project. The Company has arbitrarily transferred the sum of \$124,179.58, mentioned on page 496 of the Auditor General's report for the fiscal year 1941-42, from the funds advanced up to March 31, 1942, for the joint project, and also the sum of \$200,000 received from the United Kingdom Government during the fiscal year 1942-43 for the joint project to the account maintained for advances for the project wholly financed by the Canadian Government. The expenditures to be borne by the Canadian Government with respect to the joint project as authorized by order in council amount to \$558,125, against which expenditures of \$682,304.58 have been recorded.
- (e) S. F. Bowser Company, Limited: \$93,028.42 expended for the joint project exceeds the estimated cost of \$85,328.16. The latter amount is

that allotted by Treasury Board and authorized by order in council. The excess of expenditures over authorization by order in council and allotment is due to the fact that settlement between the interested Governments was not made.

- (f) Canadian Locomotive Co. Limited (sub-contractor of the Canadian Pacific Railway Company): Expenditures of \$174,185.66 exceed the capital assistance of \$166,000 authorized by order in council. Investigations are proceeding to rectify the situation.
- (g) Modern Tool Works Limited: Included in the total expenditures of \$329,077.07 is the sum of \$177,233.75 which is recorded against an executive authorization of \$145,500. As several projects making up this capital assistance program are closely related, the apparent excess of expenditures over the amount authorized by order in council may be due to faulty distribution of items in the accounting.

136. It was also observed that there were a number of projects with respect to which expenditures exceeded, by relatively small amounts, the total of capital assistance authorized by order in council. For these, additional allotments were subsequently authorized, but not in all cases within the fiscal year in which the payments were made.

137. It is an executive practice, in order to preserve an over-all control in certain undertakings, to issue what is termed a commitment authorization, applicable to the succeeding fiscal year. In the audit it was observed that \$279,648.34 had been disbursed in excess of the allotments made for 1942-43, because greater progress was made than had been anticipated. Strictly regarded, the expenditures were irregularly made, as the allotments should have been first amended as required by the War Appropriation Act.

138. Expenditures reported as investments in plants of Government-owned companies ordinarily vary from the amounts of the capital assets acquired, as shown in the Balance Sheets of the companies concerned or as referred to in footnotes thereto, by reason of the fact that departmental accounts, recording the cash advances made for capital purposes, are not brought into year-end adjustment with the actual expenditures incurred on capital account by the various companies, nor are such accounts adjusted for inter-company transfers of Crown-owned machinery. A like situation exists with respect to working capital advances.

139. In many instances items of machinery and equipment have been declared surplus to contractors' needs, due to changes in the munitions program, or because of urgent need elsewhere. As a result, many machines have been transferred from one plant to another. The expenditures therefor are recorded under the project for which the machines were originally supplied. Departmental procedures relating to the transfer of machinery do not provide that transfers be authorized by order in council, the view taken being that authority for the expenditures exists in the capital assistance authorized for the project from which the machinery was transferred. When equipment transferred does not constitute delivery of equipment under an authorized capital assistance program, the equipment thus made available to a contractor is made the subject of formal contract. Records of the machinery and equipment transferred between plants are maintained by the Comptroller of the Treasury and the Central Inventory Records Division of the Department. Some items of equipment, considered surplus to the munitions program as a whole, have been sold. The proceeds of such sales to March 31, 1943, by Citadel Merchandising Co. Limited amount to \$674,585.60.

140. Working capital advanced to Canadian Pratt and Whitney Aircraft Limited of \$495,949.33 has been accounted for by the Company almost completely in the cost of goods shipped. A delay in the recovery of costs from the Department of National Defence (Air) has been due chiefly to contract procedures which have yet to be completed.

141. An allocation of the \$12,462,167.98 advanced to Canadian Car and Foundry Company Limited for Hurricane aircraft production has been made by \$7,726,433.81 becoming a charge to the Department of National Defence (Air), by reason of an Order in Council, P.C. 2610 of April 1, 1943. Similarly, recovery has been made of the greater portion of the advance payments of \$1,838,732.62 to Canadian Pratt and Whitney Aircraft Limited for the supply of Hamilton Standard propellers.

142. *Financial Practices.*—The Department of Munitions and Supply being a servicing department, certain phases of production are financed by means of revolving fund accounts. That is, initial working capital is provided by allotment from the War Appropriation, and payments for supplies produced are recredited to the account. Balances standing to the credit of these special accounts, as well as moneys in the hands of producers, were not redeposited to the credit of the War Appropriation at the fiscal year-end. In view of the fact that all unspent balances in the War Appropriation lapsed on March 31st, attention is directed to the fact that substantial sums were, in fact, thus carried forward into the fiscal year 1943-44, and that the amounts supplement the appropriation made by the War Appropriation Act for the year 1943-44. A state of national emergency existing, no administrative benefit would have resulted by the recovery and surrender of the sums at credit of these revolving fund accounts, as it would have been necessary to re-issue at once like amounts from the new appropriation for war. It has been suggested to administrative officers that appropriate legislation be sought to regularize the practice, if the policy of revolving fund accounts is to be continued.

143. *Production Operations.*—Commencing in 1940-41, working capital advances have been made by the Department of Munitions and Supply to plants engaged in the production of munitions and war supplies. On March 31, 1942, the amount outstanding was \$61,700,748.41. In many cases authorizing orders in council specified the total working capital advances to be made, and specific allotments were secured therefor. These allotments were combined and the total increased to \$100,000,000 through the creation of a fund known as the Munitions Production Allotment Fund, which was authorized by Order in Council P.C. 8318 of November 21, 1941. This Order directs that the Fund be credited with the proceeds of sales. Concurrently, working capital advances and materials were being supplied by the United Kingdom Government to companies whose production that Government was financing in whole or in part. Deliveries made by the plants for the account of the two Governments did not necessarily conform to the ratio of their respective contributions of fixed and working capital to the plants. Consequently, difficulties were experienced in the billing of shipments and the allocation of the proceeds realized from the plants' products between the two Governments. Many articles and materials produced consisted of components, which at various stages of manufacture or processing, were passed to other plants before they became completed articles. In some plants the Government of the United Kingdom or of Canada, severally or jointly, had a financial interest. Other plants were privately owned, producing articles and materials on contract for which payment was made by the United Kingdom and by the Dominion Government through allotments of the Departments of National Defence and of Munitions and Supply, the articles or materials becoming "free issue" on delivery. Shipments between plants in which the two Governments had a financial interest were

similarly treated. For these reasons, great difficulty arose in establishing, (a) the actual cost of completed articles, and (b) the accountability of plants for articles and material received, processed and shipped.

144. To simplify the problem and to obtain better financial control over working capital advances, a Munitions Production Revolving Fund was created by Order in Council P.C. 1/2064 of March 17, 1942. It was put into operation on April 1, 1942. Operations necessarily involving both United Kingdom and Canadian Government contracts, disbursements made by either Government prior to April 1, 1942, for working capital advances and for components supplied as free issue to plants were accepted as representing the equity of the Governments in the Fund, as at that date. Only pre-financed plants receiving working capital advances, which produce articles or materials requiring further processing into completed articles, or receive such further articles for assembly or further processing, are financed through the Fund.

145. The Revolving Fund received working capital contributions from time to time from the Governments of the United Kingdom and Canada. During the fiscal year under review, these amounted to \$293,821,074.72 and \$116,631,972.23, respectively. Of the latter amount, \$90,000,000 was provided by the Department of Munitions and Supply from the cash allotment of the 1942-43 fiscal year provided for the Munitions Production Allotment Fund and \$26,631,972.23 by the Department of National Defence (Army).

146. For the purposes of the Fund, the munitions plants in which the two Governments had a financial interest, joint or several, are regarded and operated as joint undertakings for accounting and financial purposes, without regard to the extent of the actual financial interest of either Government therein. Profits or losses arising out of the operation of the Fund are to be adjusted after the termination of the war on a basis to be mutually agreed upon by the respective Governments. All working capital advances to these plants from April 1, 1942, were made from the Fund. Similarly, from that date payment for all components or materials required for further processing or manufacture in the munitions plants were made from the Fund, regardless of the source or allotment originally provided or appropriated for that purpose.

147. The operations of this Revolving Fund are on a large scale. A comprehensive accounting system has been developed to record transactions, but the application of the system was not all-embracing at the end of the fiscal year. Attention to problems continues to be given by administrative officers and the effect scrutinized in the audit.

148. A value of free issues supplied to contractors prior to March 31, 1942, had to be obtained before the Fund could be adequately operated. A statement of the value of free issues supplied by the United Kingdom prior to that date was not available until late in the fiscal year; the value is an estimate only, because the actual cost of the stores has yet to be settled. Similarly, considerable time was required to ascertain the value of free issues supplied by the Department of National Defence to contractors. Only preliminary steps appear to have been taken to verify the quantity of all free issue to December 31, 1942, subsequent to which date contractors receiving working capital advances have been advised of the value of all free issues. Consequently, with respect to free issues, the records are complete only from January 1, 1943.

149. In addition to creating the Revolving Fund, Order in Council P.C. 1/2064 of March 17, 1942, provided for the formation of a Pricing Committee which was directed to establish the prices to be charged for the products of the plants whose working capital requirements are provided from the Fund. However, a valuation has yet to be placed on a large portion of the production

of the plants, due in part to the fact that the companies were not supplied with requisite information as to the value of the free issue supplied prior to December 31, 1942. In addition, some companies have failed to produce reliable information as to their production costs. Until such time as all deliveries have been valued at approved prices and recorded in the accounts of the Fund and the companies involved, adequate control over the value of goods shipped will not be obtained. Similarly, it will not be possible until then to value the materials received by the respective governments so that their real respective equities in the Fund may be arrived at. For example, an amount of \$6,534,879.56 was due by the Fund at the end of the fiscal year 1942-43 for payments made by the Department of National Defence (Army) on contracts for shell components, and for expenditures with respect to the plant operated by the John Inglis Company made prior to the assumption by the Fund of the financial responsibility thereof. This amount is to be settled by deductions from billings for completed shells and weapons.

150. A revolving fund account was provided for the acquisition of activated charcoal. While approximately one-half of the accrued expenditure reported in the amount of \$201,403.86 has been recovered in the first quarter of the fiscal year 1943-44, information provided as to the location of the stores representing the remainder of the reported expenditure is incomplete.

151. Expenditures of \$156,064.05 and \$44,949.44, respectively, made in 1942-43 for anti-freeze and coal, have been recovered since the close of the fiscal year.

152. Satisfactory confirmation, for audit purposes, of the quantities of chrome ore, valued at \$328,051.15, and of molybdenum, valued at \$167,266.21, both financed by means of a revolving fund, has yet to be provided. These reserve supplies were held by companies acting as storage agents for the Department.

153. Actual expenditures for tank cars in the fiscal year exceeded the \$135,135.15 reported expenditure, by reason of the recovery of \$10,306.46 for the depreciated cost of a car irreparably damaged in railway operations. Expenditures of the Department for tank cars are revenue producing, the tank cars being rented through the Consolidated Mining and Smelting Company of Canada to railway companies on a mileage basis. Rentals, less costs of repairs and maintenance, which have been received are accounted as revenue. Rentals amounted to \$113,634.06 in the period from December, 1940, to December 31, 1942.

154. *Contracts.*—Not as many contracts are now being made on the cost-plus or percentage-on-cost basis. The same observation is applicable to the practice of making fixed price contracts which extend over a prolonged period. Many contracts are, in fact, repeat orders; consequently it is practicable to establish cost scales and to regulate the profit by means of a fixed unit fee, which may be supplemented by bonuses or reduced by penalties. The percentage of profit allowed has varied by reason of the nature of the purchase; e.g. in the case of articles which require a lengthened period of time to produce, a higher percentage was allowed than in the case of large contracts where productive facilities and finance were provided by the Government, or where the article was of simple character and the manufacturing time cycle was short. Contractors frequently disagree with cost findings. The result is that expenditures made in the fiscal year may be subject to future adjustments.

155. Whenever contracts are on bases other than firm price, it is generally provided that they may be subject to cost audit. In the case of cost-plus contracts, and those providing for periodic audit under a master audit and profit agreement, the examination of contractors' records by the Treasury Cost

Accounting Division appears to be, on the whole, well maintained. Audits of contracts providing for target or trial run quantities are given preferred attention. But with respect to contracts where a cost audit is discretionary with the Department, it is observed that the volume of audit requests is on a scale beyond the availability of men to carry out the examinations.

156. The Department of Munitions and Supply took steps, just before the close of the fiscal year, to negotiate firm price settlements for contracts in the smaller denominations which were subject to audit—as a rule, contracts of \$50,000 or less. A plan to do without a cost audit merely because the contract is for a moderate amount is open to question. For example, a series of like contracts may, over a period of time, total a substantial amount. However, the plan was adopted rather than extend the practice of examining the whole of a contractor's orders on an annual profit determination basis. The decision appears to be governed by the fact that, with the limited number of cost accountants available, it was better that they should concentrate attention on the contracts which involve large sums of money.

157. Instances were observed where furnishings, such as kitchen ranges, portable ovens, vegetable peelers, washing machines and refrigerators, have been supplied through construction contractors under cost-plus contracts, rather than through the General Purchasing Branch of the Department of Munitions and Supply. In the early stages of the war, the general principle was laid down that such furnishings should be purchased by the General Purchasing Branch of that Department and supplied to the construction contractors as Government issue. An observation on the subject was directed to the Department of Munitions and Supply. As a result, the Department of National Defence has directed the elimination from contract specifications of all kitchen equipment and similar items which could be secured through the offices of the General Purchasing Branch.

158. Ceiling price contracts generally provide for a fair and reasonable profit being payable to the contractor. The determination of what is fair and reasonable is administratively regarded as a matter for settlement by the Department of Munitions and Supply. The percentage of profit allowed varies, because no two contracts may have been carried out under like conditions. As a rule, profit up to 5 per cent is accepted without question. It was noted in audit examinations that not infrequently a greater percentage was allowed on relatively small contracts than on large ones.

159. Certain types of contracts for the supply of cloth are of the ceiling price type. At the close of the fiscal year 1942-43 a large number of these contracts were still to be cost audited.

160. A ceiling price contract was entered into March 11, 1941, with the Pyrene Manufacturing Company of Canada Ltd., for the manufacture of 362 fire extinguishers, and in October, 1941, a profit of 8.342 per cent, which was administratively considered fair and reasonable, was established by the cost auditor. The Department was queried because consideration had not been given to a subsequent price amendment, nor to amounts paid on the basis of the original contract "on account." The Company was requested to make refund. None was obtained in the fiscal year. The estimated refund amounts to \$6,232.05; and refunds on subsequent contracts, let at the same price, may approximate \$16,000.

161. In some instances the Department of Munitions and Supply authorizes final settlement of contracts when based on cost statements provided by the supplier. The practice is, as a rule, restricted to contracts for relatively small amounts. During the audit it was observed that this procedure had been

applied in settling two contracts with Pyrene Manufacturing Company of Canada Ltd. One was for \$57,500 and the other for \$11,500. These statements provided for a refund of \$5,337.86, thus reducing the profit to 6 per cent. In reply to an inquiry as to why the procedure was applied to two contracts for substantial sums with a firm whose records had, in previous cost examinations, been found inadequate, it was stated that with respect to the two orders, direct labour charges were relatively small and it was not considered that any adjustment which might be made would warrant a special investigation of costs.

162. An over-all settlement of profit was made with Cordage Distributors Limited in respect of four orders. A loss had been incurred on one order and a profit of less than 5 per cent had been realized on another. The contractor was allowed 5 per cent on the total costs of the four orders. The Department of Munitions and Supply stated that this settlement was not in accordance with their policy, but that it would have been difficult to settle these orders otherwise.

163. The cost audit on a contract valued at \$16,735 with J. B. Harper & Company disclosed that a profit of 40 per cent on cost had been made. Adjustment or explanation of this apparently excessive profit has not been received.

164. Order in Council P.C. 4066 of June 6, 1941, authorized contracts to be entered into with three companies to maintain adequate stocks of certain types of aircraft steel, to be held available for the aircraft industry and sold to them at such prices as would result in the profit not being more than 5 per cent. Statements showing profits made on sales to the aircraft industry were to be submitted by the companies at the end of their respective fiscal periods. To June 5, 1943, the only company to submit such statements was Drummond McCall & Company Limited. It showed an amount due the Crown of \$373,025.43 for the years 1941 and 1942. An examination of these statements disclosed a discrepancy between the closing inventory shown as at December 31, 1941, and the opening inventory as at January 1, 1942, resulting in a further amount due of \$3,742.22. The other companies, Railway & Power Engineering Corp. Limited, and Thos. Firth & John Brown, have been directed to submit statements of their operations for the period covered by the contract, but these have not, as yet, come to hand.

165. *Stores Audit.*—Test audits of stores accounts at a number of the plants in which the Government has an interest disclosed that efforts are being made to establish adequate stores records; but at only a few are the records complete and satisfactory: In many instances, only certain sections of the stores are properly housed, recorded and periodically checked, and it is the exception, rather than the rule, to take stock, either at regular intervals or progressively, according to a co-ordinated plan. The urgent need of production, continual increases in production programs, accumulation of component parts for final assembly, shortage of competent accountants, and inadequate storage facilities due to deferred deliveries resulting from lack of shipping space to theatres of war are obstacles in the way of an ideal situation from the accounting viewpoint. Good administration demands the putting into effect and rigid observance of procedure calculated to secure sufficient control over the procuring, receiving, inspecting, housing, issuing, condemning and inventorying of stores.

166. *Audit of Sub-Contractors' Accounts.*—Orders in Council P.C. 9159 of November 26, 1941, and P.C. 455 of January 21, 1942, provide a plan whereby cost statements are to be delivered to the Department by auditors of sub-contractors. That is, sub-contractors' auditors were directed to make reports on work performed whenever required by the Minister. These reports include a statement of all billings by the contractor. The departmental Act

now provides that the Minister may demand production or may inspect every account, record or document of sub-contractors. Section 13 of the Act also vests in the Minister the power to re-negotiate both prime and sub-contractors' agreements. Information provided by administrative officers is to the effect that a number of audits have been or were being made of sub-contractors' records, that many cost statements certified to by the sub-contractors' own auditors had been accepted, and that refunds had been obtained from some sub-contractors. Due to the relatively small scale on which audits of sub-contracts have been conducted until recently, few were reviewed during the course of the 1942-43 audit. But to the extent covered by the audit, it appears that not infrequently sub-contractors were making substantially higher rates of profit than were prime contractors.

167. *Spoilage.*—The attention of the Department of Munitions and Supply was drawn to cases observed during the audit where spoilage and waste on war contracts amounted to figures such as appeared to justify explanations. As a result, instructions were issued to the Directors General of Production reiterating the necessity of watching the contractors closely and of taking such steps as to them might appear necessary, either to assist a contractor in the reduction of the amount of spoilage or alternatively to charge the contractor with the responsibility of absorbing any abnormal amount.

168. *Loans.*—A loan of \$3,485,360.78 made to the Dominion Steel and Coal Corporation represents payments in accordance with a contract authorized by Order in Council P.C. 3482 of May 16, 1941, whereby an amount not to exceed \$3,600,000 was to be contributed by the Department towards the cost of expanding the Company's facilities for producing ingots and rolled steel products. The Company contracted to repay the full amount contributed by the Department, without interest, in consecutive quarterly instalments of determinable amounts, dating from November 30, 1942, extending over a period of ten years. No repayments were made in the fiscal year.

169. A loan of \$1,100,000 was made to the Marine Industries Limited to enable the Company to recondition and equip five barges for salt water operation. The amount authorized was originally \$600,000, but was subsequently increased to \$1,100,000. Audited costs approximate \$1,400,000 but have not been finalized, due mainly to the fact that a settlement has not yet been reached with respect to the costs of a sub-contractor. The covering contract provides that, after allowing 5 per cent of gross earnings as operating fee, the loan is to be repaid out of earnings from operations of the barges (only four of which were reconditioned). Repayments are to be made within two months of the close of each quarter. Although the barges were put into operation at various times from August to December, 1942, no accounting has been made by the operating company. The term of the contract extends to six months after the termination of the present war, at which time the amount of any indebtedness of the Company with respect to the loan is to be cancelled.

170. *Acquisition of United Kingdom Capital Investments.*—Agreement having been reached whereby the Government of Canada would purchase the United Kingdom Government's war production interests in Canada, \$200,000,000 was paid on account to the United Kingdom Government under the authority of Order in Council P.C. 1569 of March 1, 1943. This payment was made pending determination of the amount payable to the United Kingdom Government for its capital investment in Canadian munitions plants. At March 31, 1943, negotiations between the two Governments had not been completed and the amount payable by the Canadian Government settled, but the effective date of the transfer of all property and assets representing the capital investment of the United Kingdom was authorized, by Order in Council P.C. 2644 of April 1,

1943, to be March 31. The assumption of all liabilities, obligations and commitments of the United Kingdom, estimated at \$30,000,000, outstanding as of March 31, 1943, with respect to the capital investment, was also authorized. Steps have since been taken to incorporate into the public records the requisite details with respect to the assets acquired by reason of the payment of \$200,000,000 and subsequent advances during the fiscal year 1943-44.

171. *Skilled Workmen from Overseas.*—For purposes of war production, skilled workmen were brought from the United Kingdom. It is a condition of the individual agreements that should the workman elect to return to the United Kingdom at the end of the period of employment, which may extend to six months after the termination of the present war, the Department will pay the expenses of the return journey and insurance for the sum of £1,000 for the duration of the ocean voyage. Dominion of Canada income tax on the wages earned by the workmen in Canada is paid by the Department.

172. *Miscellaneous.*—In my report for 1941-42, it was stated that a sum of \$20,990.19 was recoverable by the Department, mainly from the United Kingdom Technical Mission. The sum was recovered in the fiscal year 1942-43.

National Defence

173 (a) At the close of the fiscal year a payment on account was made to the United States Government. \$19,980,000 was made a charge to Army allotments and \$33,300,000 to allotments for Air. Substantial orders had been placed with the United States Government for a varied range of Service requirements. As in the previous years, the orders had been accepted by the United States' authorities subject to an understanding that deliveries would be made as and when it was practicable to do so and that prices would be ultimately finalized. Deliveries, as valued by shipping statements, exceeded the payment on account, but no formal statement of account was delivered in the fiscal year by the United States Government, nor was any demand for payment received. No audit exception is taken to the payments. The sum was owing and the effect of making a payment is to record more truly the actual war costs of the fiscal year. But the practice of making lump sum payments without a formal statement of account being presented is open to the objection that it neither closes the record with respect to any specific order, nor does it clarify the situation as to the effect of re-negotiated contracts which involve deliveries to the Canadian Government.

(b) Contracts for munitions, supplies and construction work are made by the Department of Munitions and Supply, therefore, audit observations with respect to such contracts appear under the name of that Department.

ARMY

174. In some instances it was observed that contracts were formally cancelled even after substantial deliveries had been made. The cancellations were, in the main, due to changes in specifications. The practice was applicable to tire manufacturers to a greater extent than to any other class of contractors. When a general cancellation is made, technically no contract exists to support payments already made. As a consequence of audit observations, the Department of Munitions and Supply, in February, 1943, advised that, in the future, only the balance undelivered on any contract would be cancelled. This practice is now being followed. For audit purposes, the payments prior to the change have been correlated with the contracts under which the articles were produced, although subsequent action by the Department might be construed as declaring the contract void.

175. To establish whether the accounting and physical control of Army stores and equipment was adequate, test examinations were conducted at Ordnance Depots in seven Military Districts. It was found that generally the accounting instructions with respect to stores and equipment issued for the guidance of the Ordnance Corps provided adequate control, but that in some instances the instructions had not been effectively carried out. The Department instituted inquiries, with the result that acceptable explanations have been given with respect to specific observations and remedial action has been taken to clear up unsatisfactory conditions reported and to prevent their recurrence. Appropriate write-off action has not been taken on a number of deficiencies in stores accounts, as the amount of the deficiencies, due to faulty stores accounting methods, has not yet been definitely established.

176. Quantity discounts are offered by some suppliers of materials, such as cement, wallboard, etc. It was observed in the audit that advantage was not invariably taken of the discount provision, due to the fact that different interpretations were being given to the arrangements. Steps were taken to effect recoveries and have discount agreements clarified. It was also noted that, in some instances, the practice existed of ordering less than carload shipments of wallboard. Had carload orders been placed, a saving in freight and in price would have resulted.

177. The practice of paying suppliers in the United States in advance of the shipment of goods has been continued notwithstanding the fact that the Neutrality Act is no longer effective. Balances unsupported by properly certified vouchers as at the close of the fiscal year included amounts paid in the 1940-41 and 1941-42 fiscal years. Approximately \$7,344,214 is involved.

178. Payments for extras, amounting to \$57,232.88, for such items as kitchen units and additional huts, were made without authority to the Prefabricated Buildings, Limited, Vancouver. Suitable action to regularize the payments was taken subsequent to the close of the fiscal year.

179. Examination of military personnel, seconded to the Inspection Board of the United Kingdom and Canada, disclosed that pay and allowances were not always recovered and, conversely, that charges were being made to the Inspection Board for some personnel not reported as seconded. Certain cases were suitably explained, while investigation is being made with respect to the others.

180. From the examination of the pay accounts for the Reserve Army, it was noted, particularly with regard to local headquarters training, that the accounting for annual training pay advances has not been carried out in accordance with pay instructions issued by National Defence Headquarters. Due to delay in completing and submitting Reserve Army paylists and supporting vouchers, it was necessary to carry forward advances totalling \$716,463.99, which were unaccounted for in 1942-43, into the 1943-44 fiscal year's accounts. Instructions are specific with regard to obtaining the signatures of personnel for pay issues; despite this, it is apparent that personnel were required to sign for pay before the amounts due were actually issued or computed.

181. The governing order in council provides that payments to universities on Canadian Officers' Training Corps accommodation account shall, if less than 75 per cent but more than 50 per cent of the establishment is trained, be reduced by 50 per cent. Loyola College, which was paid \$2,206.35, trained only 73.5 per cent of its establishment without any reduction being made. This overpayment of \$1,103.17 was not recovered. An overpayment of \$27.20 to Mont St. Louis College Contingent was adjusted by deduction from the following year's payment. Payments to universities for C.O.T.C. accommodation are charged by the Department of National Defence to the Department of Public Works. A number

of the vouchers supporting these payments by the Military Districts were incomplete or faulty. As a result, a modification has been made in the form on which the universities' claims are submitted, which will tend to eliminate the possibility of incorrect interpretation of the governing regulations.

182. Payments on account of dependents' allowances, Army, Navy and Air, from the declaration of war to March 31, 1943, total \$498,083,011.62. In the year 1942-43, total payments were \$248,354,949.64. Net overpayments of dependents' allowances since the declaration of war amounted to \$446,939.20 at the fiscal year-end. These overpayments are due to adjustments or cancellations in cases where it was disclosed that recipients were not entitled to the allowances issued. A classification of the balances making up this amount is:

Recoverable overpayments:

Balances being recovered by means of monthly deductions from persons still in receipt of allowance or assigned pay.....	\$135,461 20	
Overpayments with respect to deceased personnel, recoverable from pensions.....	40,287 40	
Overpayments due from persons who are not now in receipt of dependents' allowance or assigned pay, but which are believed to be recoverable	119,372 42	
		<u>\$295,121 02</u>

Overpayments not recoverable:

Ruled not recoverable by the Board.....	\$ 86,587 74	
With respect to battle casualties.....	55,418 65	
Sundry	9,811 79	
		<u>151,818 18</u>

Total overpayments		<u><u>\$446,939 20</u></u>

NAVY

183. Contract payments for ship construction, when based on a fixed price, are made by means of progress payments in accordance with the practices of the trade. In the course of audit it was observed that in many instances changes in specifications or in contractual obligations had the effect of creating a recoverable credit to the Crown. It was further noted that the administrative practice was not such as had the effect of invariably resulting in these credits being recovered promptly. On the matter being brought to the notice of the proper administrative authorities, steps were taken to effect recoveries to the Crown. Duplicate payments were observed in the course of audit of shipbuilding contracts. The cause of error was incomplete recording of extras or changes to contracts as authorized from time to time by the Department of Munitions and Supply. New records incorporating all shipbuilding contracts entered into since the beginning of the war were written up. This, it is anticipated, will have beneficial effect.

184. Order in Council P.C. 36/7723 of December 31, 1940, authorized that "an amount of \$4,000,000 be allotted from the War Appropriation for the purpose of establishing a Revolving Fund to be known as the Naval Services Equipment Division Account". It directs that the Fund be depleted by expenditures for procurement of components and by operation expenses and be replenished by proceeds of sales; the balance to be carried forward on open account from year to year. The Equipment Division financial transactions, during the fiscal years 1941-42 and 1942-43, were not operated on the basis of what is usually regarded as a revolving fund but rather as a Treasury Board allotment of the War

Appropriation, with expenditures for the procurement of and credits from the sales of equipment being respectively charged and credited to the allotment. Details of 1941-42 and 1942-43 transactions were:

1941-42—Treasury Board allotment \$2,029,488.18; gross expenditure \$4,448,794.83; sales \$3,398,495.95; lapsed \$979,189.30.

1942-43—Treasury Board allotment \$2,877,709; gross expenditure \$5,365,946.54; sales \$9,587,698.38; leaving a credit balance of \$4,221,751.84 which was transferred to Special Receipts—War Appropriation Acts.

185. In the case of a ship construction contract with Chantier Maritime de St. Laurent, the first authorization, as issued by the Department of Munitions and Supply, stated that payments shall be made "subject to formal contract being executed before the third progress payment is made." It was brought to the notice of administrative officers that payment of the third, fourth and fifth progress claims had been made contrary to the above provision. The payments in question were subsequently regularized by the receipt of the formal contract.

186. In accordance with the terms of section 7 of the Department of Munitions and Supply Act, local purchase authority is granted to the Department of National Defence (Navy). The orders under the above authority are usually placed by the naval establishment by means of a local purchase order. While payments are generally made by Treasury officers, in some cases they were made by the establishment concerned and accounted for through the monthly "Cash Account". Due to the number of duplicate payments observed, enquiries were made as to the reasons. It was found that they were usually the result of the disbursing officer not having on hand, at the time of cheque issue, the departmental authority—the "local purchase order". Corrective instructions have been issued.

187. Many expenditures were not supported by certificates as to prices, due to the absence of copies of "acceptance of tender" issued by the local purchasing agents of the Department of Munitions and Supply at Esquimalt, B.C., and Halifax, N.S., during the fiscal year. Corrective action was taken and the necessary papers are now attached to the records.

188. Attention was drawn to the fact that payments of \$31,217.45 and \$65,623.97 were made to Canada Packers Limited, St. John's, Newfoundland, without the prior approval of the Governor in Council having been obtained. It was explained that the Department of Munitions and Supply had no representative at the naval base at the time it began to function, and as the supplies were urgently needed for both our own and Admiralty ships using the base, the purchases and payments were treated as made under local purchase authority. The situation has been remedied and the officers at St. John's now operate under proper authority.

189. Audit examinations were made of the Naval stores accounting system during the 1941-42 fiscal year, at the request of the Department. In the Auditor General's report for 1941-42 it was observed that the stores accounting system lacked certain audit and accounting requirements. The Department states that changes in the system have been made.

190. \$41,534.18, in the form of accountable advances, was not accounted for within the time prescribed by section 32 (2) of the Consolidated Revenue and Audit Act, 1931. The sum was transferred to the accounts for the fiscal year 1943-44.

191. Section 30 of the Consolidated Revenue and Audit Act, 1931, requires that vouchers support every payment, and section 50 of the Act directs that the Auditor General call attention to any sum charged against a grant which is not

supported by proof of payment. The Navy, in common with other Services, has from time to time received supplies or services from United States contractors which were, and which still remain, incompletely vouched. The sums involved are: \$81,904.56 with respect to the fiscal year 1940-41; \$1,046,296.12 for 1941-42, and \$228,026.95 in 1942-43.

AIR

192. The situation with respect to the pay accounts of personnel who have service in the Royal Air Force is not entirely satisfactory. At the time of examination, some 400 personal accounts of individuals repatriated to Canada had not been received at the Repatriation Centre at Rockcliffe, because the United Kingdom Air Ministry were unable to release them until they were sure that all charges had been recorded and the accounts in order. The personnel involved had been discharged in some instances as long as two years ago; in the meantime, any debit balances in the pay accounts remained uncollected. While efforts are being made to establish the exact position of the accounts of personnel who have been paid by the R.A.F., records are still incomplete. In order to bring the Pay and Allowance records of personnel serving in Canada up to date, changes in the Treasury procedure are being considered.

193. An examination of the system employed to recover United Kingdom Government charges from the pay accounts of R.A.F. personnel in Canada disclosed that adequate controls were not being applied to verify that the amounts paid over were in agreement with the sums actually deducted from individual pay accounts. Steps have been taken to provide effective control, thus eliminating the possibility of over- or under-payments being made.

194. Examinations of the progress payments to the Marwell Construction Company, Limited, Vancouver, in connection with a construction project, disclosed that paylists included names of R.C.A.F. personnel who were at the same time receiving R.C.A.F. pay. Inquiry disclosed a practice existing of civilian contractors hiring Service personnel during off duty hours and during leave periods. As a rule these engagements were made with the consent of Commanding Officers, because of acute labour conditions existing. At another project, Service personnel were used during hours off duty with the Air Force, but in this instance reimbursement for the services was made to the Crown. The practice now is that assistance may be given to contractors when, in the opinion of the Air Officer Commanding, an emergency exists. He may then loan Service personnel to the contractors, provided this can be done without detriment to the Service. In the case of cost-plus contracts, contractors are not charged for the services of the men, but in the case of fixed price contracts, contractors are required to reimburse the Crown at prevailing labour rates.

195. Stores' accounts of numerous R.C.A.F. units, depots, civilian operated training schools and overhaul contractors' plants were examined during the fiscal year. A marked improvement was noted in the accounting for and the physical control exercised over stores and equipment. In the case of overhaul contractors' plants, the audit examinations disclosed the existence of unsatisfactory conditions. After discussion, Service Stocktaking groups have been organized and control instructions promulgated.

196. Examinations were made of accounts and records of several companies operating elementary flying training and air observers' schools under agreements with the Crown. The purpose of the examinations was to determine whether equipment of various kinds, which had been loaned to the schools by the Service, was being adequately accounted for, and that provisions of operating agreements were being observed by the companies. As a result of these examinations, reports

were made to the Department indicating unsatisfactory conditions at various schools, particularly in connection with accounting for loaned equipment, accounting for company-owned stores, the compiling of claims for messing and flying hours, control of aviation and motor transport gasoline, and rentals received for the accommodation of civilians at the schools. Appropriate departmental action was initiated.

197. Authority was provided by Orders in Council P.C. 54/8346 of September 15, 1942, and P.C. 11/10576 of November 19, 1942, for advances to an amount of \$7,500,000 to various oil companies supplying oil products to the British Commonwealth Air Training Plan until arrangements were completed for payment of their accounts. From September, 1942, to March 31, 1943, advances to an amount of \$11,359,500 were made, of which \$1,616,500 was recovered, leaving balances outstanding at the close of the fiscal year amounting to \$9,743,000.

198. From time to time the Department of Munitions and Supply has entered into contracts with various firms for the repair and overhaul of R.C.A.F. equipment. Many of these firms are repairing Home War, British Commonwealth Air Training Plan and R.A.F. Ferry Command equipment. In many cases progress claims submitted by the contractors for payment do not indicate the accounts to be charged. It has been the practice to charge the Plan with the whole, pending a determination of the proper distribution by a cost audit to be made by the Treasury Cost Accounting Division. Although cost audits have been made on several contracts, only in a few instances has the division of cost been given in the cost audit report, with the result that, at the present time, the larger part of the cost of repair and overhaul is charged to the British Commonwealth Air Training Plan. Until a segregation is made, the Commonwealth Air Training Plan's accounts have been overcharged by an amount which, though undetermined, may be substantial.

199. Order in Council P.C. 1727 of July 21, 1937, authorized the Department of National Defence to enter into a contract with Armstrong Siddeley Motors (later Ottawa Car and Aircraft Limited) for the manufacture of nine Avro 626 aircraft. Five of the nine aircraft were not accepted on delivery because of mechanical faults. During the manufacturing period, progress payments totalling \$150,672.97 were made. This amount was \$67,955.76 in excess of the value of the four aircraft accepted on delivery. The excess has not yet been refunded to the Crown pending a settlement with the Company as to the disposal of the aircraft not accepted.

200. Audit examination of a contract with the Standard Paving Maritime Limited at R.C.A.F. Station, Sydney, N.S., disclosed that whereas the total authorized expenditure was \$825,113.09, actual expenditure amounted to \$828,803.09. The payment of \$3,690 beyond the authorized expenditure was due to the fact that a cancellation of part of the contract by the Department of Munitions and Supply on July 8, 1941, had not been taken into consideration when payment was made. Information provided is to the effect that the work had been completed prior to the cancellation order being issued by the Department.

201. The Dominion Aeronautical Association was created in 1941 to assist the R.C.A.F. in securing trained pilots for duty as instructors, for transport service and for the Ferry Command. An advance of \$75,000 was authorized by Orders in Council of January 31 and May 1, 1941, for expenses incurred by the association in the fulfilment of its undertakings. It was planned as a non-profit venture. As of March 31, 1943, the entire advance of \$75,000 was still outstanding in departmental records. The affairs of the Association are now being wound up.

202. Under an agreement with the United Kingdom Government authorized by Orders in Council P.C. 79/4417 of June 18, 1941, and P.C. 26/7123 of September 9, 1941, the sum of £1,994,300 was paid to the United Kingdom Government on account of maintenance and equipment costs of R.C.A.F. Overseas Squadrons. Of this amount, £462,650 is considered as a progress advance covering the period from January 1 to March 31, 1943, because no claim from the Air Ministry for that period had been received.

203. At the end of the fiscal year 1942-43 a balance of \$31,234.61, remaining in the High Commissioner's suspense account pending receipt of the covering expenditure vouchers from England, was transferred to the new year 1943-44. Of this amount, \$7,740.15 represented expenditures which were incurred during the fiscal year 1941-42.

National War Services

204. Amendments to the Income War Tax Act made provision in the first instance for the collection of National Defence tax by means of salary deduction, and, after the abolition of that tax, for the collection of Income Tax by the same means. Acting on instructions from the Minister of National War Services, the Comptroller of the Treasury has not collected these taxes from members of the Fire Fighters Corps. Presumably the view is that the personnel of the Corps should be considered as members of the armed services and not as civilians and, accordingly, entitled to the exemption enjoyed by naval, military and air force personnel. Authority to support this view was not presented during the audit.

205. Regulations approved by Order in Council P.C. 76/1656 of March 3, 1942, provide that "a suitably equipped automobile shall be supplied, operated and maintained at public expense for the use of the Corps in the United Kingdom." The vehicle was purchased in Canada and payment made on September 14, 1942. Shipment of the vehicle to the United Kingdom had not been made by September 1, 1943.

206. Section 5 of the Public Printing and Stationery Act imposes the duty of auditing all accounts for advertising on the Department of Public Printing and Stationery. Three accounts for billboard advertising were received, totalling \$11,751.85, with respect to publicity programs of the Salvage Division. When the first account was received it was submitted to the Department of Public Printing and Stationery for audit, but that Department returned it without any audit certificate, stating that the King's Printer was not prepared to audit such work. Thereupon all accounts were paid without his certificate.

207. Accountable grants for the purpose of financing war auxiliary programs in camp, barrack and special defence areas in Canada and overseas were made to the following organizations: Canadian Legion, Knights of Columbus, Navy League of Canada, Salvation Army, Young Men's Christian Association and Young Women's Christian Association. The programs of these organizations entailed substantial expenditures for land, buildings, motor vehicles, furniture, equipment, etc., and were financed both from these accountable grants and also from moneys received from public subscriptions. All purchases of motor vehicles, furniture, equipment, etc., were made in the name of the respective organizations. Although latterly purchases of land and buildings have been made in the name of the Crown, ownership of much of the real estate that has been purchased has been vested in the organizations. In certain cases, land and buildings in urban areas have been acquired entirely from the accountable grants. It was not observed during the audit that any policy had been adopted regarding the disposal of these properties when hostilities cease.

208. Under the authority of a Treasury Board Minute of July 3, 1941, cash allotments up to \$50,000 were approved for use as a revolving fund to cover expenditures made by the Department on behalf of the Civilian Technical Corps, such expenditures to be recovered from the Government of the United Kingdom. At the close of the fiscal year 1941-42, \$27,077.93 remained unrecovered. Recovery of this balance was not effected during 1942-43, and further expenditures amounting to \$7,833 were made.

NATIONAL FILM BOARD

209. Because of the lack of sufficient funds in the National Film Board vote with which to finance film production, a revolving fund of \$100,000 was authorized from the War Appropriation to permit the acquisition of further supplies necessary for the production of war films. The cost of such supplies, when used, was directed to be recovered from the several departments ordering the films. In order to do so, the departments concerned were, in the first instance, charged arbitrary rates for the fully processed film. Resulting credits were then duly apportioned between the revolving fund allotment and the regular vote on a percentage basis, the object being an attempt to credit the vote with the various costs (other than for supplies) incurred in processing, and the revolving fund with the cost of the supplies. Since both the schedule of rates used and the percentages credited were arbitrary estimates, it was impracticable to establish in the audit whether credits placed back into the revolving fund agreed with the actual cost of the supplies used in processing the various films.

Pensions and National Health

210. Test examinations of employment records in the files of the Unemployment Insurance Commission disclose a high percentage of overpayments involving beneficiaries who were fully employed during periods for which they drew benefits under the Post Discharge Re-establishment Order (P.C. 7633 of October 1, 1941). The periods covered by these overpayments varied from one day to seven weeks and related to several classes of re-establishment benefits, including those provided for discharged persons, (1) capable of and available for work but unable to obtain suitable employment, (2) following a course of training, and (3) temporarily incapacitated from obtaining work. In a recent test of some one hundred cases in one region, employment records were located in thirty-eight instances. These records indicated overpayments in sixteen cases, the average period of overpayment being just under two weeks. Earlier examinations in other regions disclosed a not dissimilar over-all picture. It is probable that overpayments might be substantially avoided were claims received by local offices of the Unemployment Insurance Commission and paid in accordance with procedures applicable to unemployment insurance benefit claims. Such procedure would not affect the final approval of re-establishment benefits, which would continue to be vested in boards created by the Department of Pensions and National Health. The Unemployment Insurance Act provides severe penalties for fraudulent practices, whereas P.C. 7633 is not only silent in this respect but a regulation promulgated under the Order is in striking contrast. This regulation reads: "The procuring of out-of-work benefits by false representation or by concealment of or non-disclosure of facts may be sufficient reason for cancellation of any further benefits."

Public Archives

211. In the fiscal year 1941-42, the sum of \$2,600 was directed to be paid to four former employees of the Paris, France, office, as compensation for loss of effects by reason of German occupation of Paris. In the fiscal year 1942-43,

further interim payments of compensation totalling \$3,567.60 were authorized, it being directed that all be made in annual instalments. In the case of one, the final payment on an award of \$1,800 is to be made on March 31, 1947; another is to receive final payment on an award of \$867.60 on March 31, 1946; the third is to receive final payment on March 31, 1945, on an award of \$1,400, and the other, who is awarded \$500, is to receive the final instalment on March 31, 1946. These awards were made in accordance with regulations made by Order in Council P.C. 6/1450 of February 24, 1942, and provide for the payment of annual compensation until the belongings are recovered or permanent loss is established. The annual grant "shall be the difference in cost of rental between a furnished and unfurnished home, reasonably suitable for the person in question in the place where he is stationed each year."

Trade and Commerce

212. Order in Council P.C. 5653 of July 2, 1942, sets aside \$500,000 out of the War Appropriation for the purpose of paying additional subsidies to steamship companies operating services in Canadian coastal waters. Payment is conditional on freight and passenger rates not being increased above those charged during the period September 15, 1940, to October 1, 1941. The purpose is to assist in paying increased expenditures resulting from war bonuses paid to crews, war risk insurance on vessels and additional expenditures for fuel, marine insurance, etc. Payments may be made during the period in which, in the opinion of the Minister, such expenditures were caused by the existence of a state of war. The Order in Council provides that every claim be certified by a firm of chartered accountants. Sixteen firms qualified for the subsidy and were paid in total \$319,603.09.

213. In order to alleviate famine and starvation in Greece, the Governor in Council authorized that 15,000 tons of wheat per month be provided as a free gift from the Canadian Government to Greece. The Swedish Government agreed to establish and finance a commission to administer the relief, and further, to charter Swedish vessels. Charter costs are to be reimbursed by the Greek Government. It was estimated that \$6,384,000 would be required to provide for this gift to the end of the fiscal year. During the period, 3,871,028 bushels of wheat were purchased at a total cost of \$3,835,486.35, which was charged to War Appropriation. Assistance was continued in the fiscal year 1943-44.

214. Authority of the Governor in Council was obtained to establish from the War Appropriation a revolving fund of \$500,000 to be used for the chartering of vessels as may be found necessary and advisable in any essential Canadian export or import trade. In 1942-43 \$350,000 was set aside for this purpose. Payments amounting to \$131,750 were made from the fund and it was credited with \$116,750 as earnings, leaving a balance of \$15,000 as net expenditure charged to War Appropriation. From an accounting standpoint, this fund was treated as an ordinary war allotment, with the exception that revenue was credited back to expenditure.

Transport

215. This Department is charged with the administration of various construction works associated with the development of air fields. The majority of the contracts are based on "unit prices", but some are on "cost-plus" basis. In the case of a contract with H. J. O'Connell, Ltd., Montreal, the first contract was at a firm price of \$75,000. Shortly after, it was varied and made on a cost-plus basis, the estimated cost being stated as \$250,000. During examination of records it was observed that no cost accounting was currently being made. Action to this end was subsequently taken.

216. Net payments of \$3,178,000 were made, as of March 31, 1943, to the Coast Construction Company, Ltd., Vancouver, for airport construction. After work commenced, the original agreement was converted to a cost-plus contract. A further sum of \$469,000 was paid for roadwork. Replies to audit inquiries are of a nature as to make it appear necessary that the accounts and claims in connection with this Company be further examined before final settlement is made.

Wartime Information Board

217. Press club initiation fees were paid from a War allotment for three employees stationed in the United States. Donations to staff Christmas funds were also charged to the allotment. The payments illustrate a situation which exists in several departments. That is, charges to votes are made for professional and technical annual memberships assessed on their members by law societies, institutes and learned societies. The British North America Act provides that Consolidated Revenue Fund shall be appropriated for the "public services". It has long been constitutional practice to regard the Governor in Council, subject to his being answerable to Parliament, as clothed with power to declare what is for public services purposes. In the class of cases now noted, decision is departmental, and therefore gives rise to a question as to the extent of departments' powers to authorize an expenditure, as a result of which personal benefit accrues to an employee.

218. During the year departmental officials summoned a number of persons to Ottawa for interviews in regard to their possible assignment to positions under the Board. Such persons were informed that their travelling expenses would be met by the Board. Treasury Board approval was obtained for the payment of the expenses of such persons as were subsequently employed, but not for payment of the expenses of those who were not taken on the staff.

Wartime Prices and Trade Board

219. A payment of \$254.45 was charged to the Wartime Prices and Trade Board allotment of the War Appropriation, being reimbursement of legal costs incurred by the accused in successfully defending charges under the Wartime Prices and Trade Board Regulations. Prior to payment, the claim was submitted to the Department of Justice, which advised that "the general rule is that costs may not be awarded against the Crown and the Crown is not liable to pay these costs." While recognizing that the Board has authority to pay expenses necessary for carrying out the duties with which it is charged, this Office raised the question as to whether that authority extended to making what was, in effect, an *ex gratia* payment, which, in the past, was made only when specially approved by the Governor in Council. Accepting the view of this Office, the Board applied for and obtained the approval of the Governor in Council for the payment.

WAR APPROPRIATION (UNITED KINGDOM FINANCING) ACT, 1942

220. Section 3 of the War Appropriation (United Kingdom Financing) Act, Chapter 8, 1942, provided for the payment to the United Kingdom Government of amounts not exceeding in the aggregate \$1,000,000,000 to finance the purchase in Canada of munitions of war, foodstuffs, raw materials and other commodities and supplies essential to the conduct of the war and the maintenance of the people of the United Kingdom, and to defray other expenses incurred in Canada for war purposes. The full amount of \$1,000,000,000 was paid to the Bank of Canada for the account of the Government of the United Kingdom. This includes \$76,428,633.80 expended in acquiring surplus sterling balances not required for the purposes of sections 4 and 5 of the Act.

221. Section 4 of the Act authorized the Minister of Finance to acquire from the Foreign Exchange Control Board sterling balances equivalent, at the rate of \$4.45 to the pound sterling, to \$700,000,000, and to advance such balances to the Government of the United Kingdom, subject to such terms and conditions as the Governor in Council might approve, provided that no interest be paid under such obligation in respect of any period prior to the termination of the war. Under this authority, the full amount of \$700,000,000 was advanced.

222. Under the provisions of section 5 of the Act, Dominion and Canadian National Railways' securities were repatriated during the year. In accordance with the terms of the Act, the Canadian National Railways' securities were turned over to the Railway Company and temporary loans for the amount of \$61,321,885.88 were made to the Company to enable to it acquire them.

WAR CORPORATIONS

223. Under the authority of section 6 of the Department of Munitions and Supply Act, twenty-one companies with share capital, as of March 31, 1943, had been incorporated by the Minister of Munitions and Supply under Part I of the Companies Act, 1934, and two without share capital under Part II. In addition to the companies so incorporated, the shares of the Dufferin Shipbuilding Company Limited, which was incorporated under the provisions of the Ontario Companies Act, were acquired by the Crown under the authority of Order in Council P.C. 8027 of October 17, 1941, the name of the Company at the same time being changed to Toronto Shipbuilding Company Limited.

224. In the case of the companies with share capital, the outstanding shares, other than directors' qualifying shares, are in the name of the Minister of Munitions and Supply in trust for His Majesty the King in the right of Canada.

225. Agreements authorized by the Governor in Council have been entered into by the Minister with the various companies. An exception is the case of Trafalgar Shipbuilding Company Limited, which, up to the present time, has acted only in obtaining priorities for the supply of materials required for ship construction, and has not entered into transactions involving the expenditure of public moneys, other than those in respect of its incorporation fee and annual filing fees. These agreements contain the following or a similar clause:

It is understood and agreed that the Minister shall at all times have the right to exercise such control over the affairs and operations of the Company as he may in his absolute discretion think fit, and that the Company shall do or refrain from doing, as the case may be, all such things as the Minister may from time to time direct, and that all obligations of His Majesty under this agreement are conditional upon the Company acting accordingly.

226. The Department of Munitions and Supply Act requires that the accounts of corporate bodies created for its purposes be audited by the Auditor General; in the case of Toronto Shipbuilding Company Limited, the audit is made by reason of a resolution of the shareholders. Reports were issued on the audit of the accounts of each of the companies for the period ended March 31, 1943, the fiscal year-end. Exceptions were North West Purchasing Limited, which was incorporated only in February, 1943, and Veneer Log Supply Limited, which has a fiscal year-end of August 31 (the close of the "Log Year"). The audit reports issued were:

Aero Timber Products Limited—June 10, 1942, the date of incorporation, to March 31, 1943.

Allied War Supplies Corporation—Year ended March 31, 1943.

Atlas Plant Extension Limited—Year ended March 31, 1943.

Citadel Merchandising Co. Limited—Year ended March 31, 1943.

Cutting Tools and Gauges Limited—Year ended March 31, 1943.

Fairmont Company Limited—Year ended March 31, 1943.

Federal Aircraft Limited—Year ended March 31, 1943.

Machinery Service Limited—Year ended March 31, 1943.

Melbourne Merchandising Limited—Year ended March 31, 1943.

National Railways Munitions Limited—Year ended March 31, 1943.

Park Steamship Company Limited—April 8, 1942, the date of incorporation, to March 31, 1943.

Plateau Company Limited—Year ended March 31, 1943.

Polymer Corporation Limited—February 13, 1942, the date of incorporation, to March 31, 1943.

Research Enterprises Limited—Year ended March 31, 1943.

Small Arms Limited—Year ended March 31, 1943.

Trafalgar Shipbuilding Company Limited—August 7, 1941, the date of incorporation, to March 31, 1943.

Toronto Shipbuilding Company Limited—Year ended March 31, 1943.

Victory Aircraft Limited—November 6, 1942, the date of incorporation, to March 31, 1943.

War Supplies Limited—Year ended March 31, 1943.

Wartime Housing Limited—Year ended March 31, 1943.

Wartime Merchant Shipping Limited—Year ended March 31, 1943.

Wartime Metals Corporation—March 17, 1942, the date of incorporation, to March 31, 1943.

Copies of the above-mentioned audit reports were in all cases delivered to the Minister of Munitions and Supply as the principal shareholder.

227. Advances outstanding as at March 31, 1943, for the several companies dealing in commodities, viz., Fairmont Company Limited, Melbourne Merchandising Limited and Plateau Company Limited, are included as assets in the Dominion Balance Sheet. The advances outstanding for Atlas Plant Extension Limited, substantially represented by loans made by that Company to Atlas Steels Limited, are similarly treated. Expenditures incurred by the Department for the purpose of enabling War Supplies Limited to fulfil its obligations under orders received by it from the United States Government are charged to a special open account, the balance of which, after crediting the relative collections, is also included as an asset in the Dominion Balance Sheet as at March 31, 1943. In all other cases the advances made to the various companies during the year have been treated as expenditure, the view being taken that inventories of raw materials and work in process, together with sundry assets carried by the companies other than those referred to above, may not be readily disposed of or realized upon on the cessation of hostilities.

228. The assets of the various companies as at March 31, 1943, totalled \$500,979,303.67, including those relating to the special activities of the following companies where special agency relationships, as noted, exist with the Department:

Atlas Plant Extension Limited—The making of payments in connection with "capital assistance" granted to Atlas Steels Limited.

Wartime Housing Limited—The construction of housing accommodation for war workers, as authorized by order in council, together with other special construction projects to be made available to other departments or respecting which the cost is to be recovered.

Wartime Merchant Shipping Limited—The making of payments in connection with the construction of cargo vessels, including the acquisition and distribution of certain component parts.

Wartime Metals Corporation—The development of certain marginal and submarginal mining properties.

Comments respecting certain of the items in the Balance Sheets of several of the companies as at March 31, 1943, are given in the following paragraphs.

229. *Aero Timber Products Limited.*—The net loss for the period from June 10, 1942, the date of incorporation, to March 31, 1943, was \$945,088.40. It was due to the carrying on of a selective logging operation, in which logging costs are unavoidably high; while at the same time sales were made at prices which, according to information provided, were in conformity with the sale prices of similar logs produced in the course of normal logging operations, with the closing inventories valued at estimated realizable values, based on such sale prices. Order in Council P.C. 7394 of October 5, 1943, provides that the Company will receive the benefit of surcharges to be established by the Timber Controller on the selling prices of the aero grade lumber manufactured from its logs.

230. *Allied War Supplies Corporation.*—The functions of this Company are supervisory, and the expenditures incurred in connection with the munitions plants under its supervision are consequently not recorded in its accounts.

231. *Atlas Plant Extension Limited.*—Advances received from the Department to enable this Company to make payments, on the Department's behalf, in connection with "capital assistance" granted to Atlas Steels Limited, as author-

ized by the Governor in Council, totalled \$8,151,000 as at March 31, 1943, and of this amount, \$7,912,776.27 had been disbursed by the Company by the year-end. Of the total expenditures of \$8,325,480.93, including \$412,704.66 for outstanding accounts payable, expenditures for immovable equipment items and building additions totalled \$6,530,920.90. Title for these is vested in Atlas Steels Limited by reason of the provisions of the agreement between that Company, the Minister and Atlas Plant Extension Limited.

232. *Citadel Merchandising Co. Limited.*—A liability of \$51,621.30 was recorded in the Company's accounts as at March 31, 1943, for customs duty and import taxes. This represents the liability, as at that date for customs duty and import taxes payable in respect of machine tools which were entered free of duty under Order in Council P.C. 1/8255 of October 24, 1941, and which were subsequently sold by the Company. A similar liability in connection with other machine tools imported under this Order, and subsequently allocated, by way of capital assistance, to authorized Government of Canada munitions projects, had not been computed as at March 31, 1943. However, the Company is engaged in computing the customs duty and import taxes applicable to such machines, in order that the liability therefor might be properly established.

233. *Fairmont Company Limited.*—A net loss of \$127,431.03 for the year ended March 31, 1943, was shown as a deduction from Surplus account in this Company's Balance Sheet and resulted from increased costs during the year, while sales continued to be made at not higher than established ceiling prices.

234. The Fairmont Company anticipates that a similar loss will be avoided in the current fiscal year under the procedure established by Order in Council P.C. 5750 of July 20, 1943, which authorizes the Company:

- (a) to purchase rubber at current market prices and to sell rubber at prices less than the laid-down cost to it established in accordance with the provisions of Order in Council P.C. 7191 of September 12, 1941, as amended, and to incur any resulting trading loss;
- (b) to charge to and collect from Commodity Prices Stabilization Corporation Limited the amount or amounts from time to time estimated by it, with the concurrence of the Rubber Controller, representing the said loss incurred on the proportion of rubber going into the production of civilian goods;
- (c) to establish surcharges with the concurrence of the Rubber Controller from time to time for various types and sizes of tires supplied from Canadian manufacturers and processors at rates sufficient to enable the company to recover the amount or amounts established from time to time estimated as the portion of the said loss for rubber going into the production of munitions of war and supplies, and to charge to and collect from the Department of National Defence (Army), the Department of National Defence, Naval Services, the Department of National Defence for Air, Crown companies, Government agencies and other organizations, which are entitled to the benefit of prices extended to the Department of Munitions and Supply, the said surcharges for tires supplied from Canadian Manufacturers and processors.

235. *Federal Aircraft Limited.*—Aircraft parts and materials purchased by this Company under the Anson Central Purchasing Plan and the Anson Spares Program are supplied, respectively, to aircraft manufacturers and R.C.A.F. Equipment Depots, at cost; and fuselages manufactured by the Company are also billed at the cost of completed batches. Therefore, no Surplus Account balance appears in the Company's Balance Sheet as at March 31, 1943. The Company's administrative expenses, including those relating to the general supervision of the Avro Anson aircraft production program, totalled \$779,857.61 for the year ended March 31, 1943. After deducting an amount of \$7,200 which was included in fuselage manufacturing costs and a further amount of \$84,226 for cash discounts earned, the balance of \$688,431.61 was charged against the advances received from the Department.

236. *National Railways Munitions Limited.*—The following observations were included in the audit certificate entered on the Balance Sheet of this Company:

- (1) The amount of \$1,432,894.67 shown for the cost of the completed contract not yet billed, includes a total of \$40,092.03 for management fees paid or payable to the Canadian National Railways, being \$9,971.20 in excess of the amount payable under the contract dated November 21, 1941, between the Minister of Munitions and Supply, the Canadian National Railways and the Company.
- (2) The amount of \$2,951,496.32 shown for the inventory of work in process does not include additional charges totalling \$94,344.50, applicable to materials and components transferred to the Company, at the direction of the Department of Munitions and Supply, from the Montreal Locomotive Works Limited.
- (3) Included in the amount shown for the inventory of work in process is a capital loss of \$2,302.46 resulting from the transfer of certain Crown-owned capital assets to other munitions plants.

The total of \$40,092.03 for management fees, as referred to in (1) above, was computed by the Company on the basis of an anticipated revision of the contract, which revision was, however, not completed. It is understood that an adjustment of the fees has now been made in the Company's accounts, in accordance with the terms of the existing contract. It has also been ascertained that suitable adjustments have been made with respect to the matters referred to in (2) and (3) above.

237. *Research Enterprises Limited.*—The greater part of this Company's production consisted of articles which it was directed to supply, on the Department's behalf, to enable War Supplies Limited to fulfil its obligations under certain of its contracts with United States Government departments. In the absence of ascertained costs, the equivalents of the unit prices provided for in these contracts were used by the Company in billing the Department for articles shipped, on its behalf, for the purpose of the contracts, and billings for other articles were made at unit prices based on estimates of anticipated costs—this procedure continuing throughout the period ended March 31, 1943. On determination of actual production costs, it became apparent that costs had been lower than the billing prices which had been used, and the billings made are regarded as interim only, the excess of deliveries invoiced over the relative costs being carried in the Company's Balance Sheet, as "Reserve for Adjustment of Interim Billings".

238. *Small Arms Limited.*—Shipments of this Company's principal article of production were, during the early production period, invoiced at a unit price arbitrarily established prior to the commencement of production. This practice was continued for some time after the actual cost was established to be lower than the price arbitrarily established. A substantial reduction in the unit billing price was in effect during the closing months of the fiscal year, and a further reduction therein became effective as from the beginning of the year 1943-44. The billings made are regarded as interim only and the excess of amounts invoiced over the relative cost are carried in the Company's Balance Sheet as "Reserve for Adjustment of Interim Billings".

239. *Toronto Shipbuilding Company Limited.*—As at October 20, 1941, the date on which the outstanding shares of this Company, formerly the Dufferin Shipbuilding Company Limited, were acquired by the Crown, the Company held Dominion of Canada bonds to a total of \$256,125. Sales since that date reduced the holdings to \$134,250 as at March 31, 1943. Capital assets shown as \$2,496,491.75 on March 31, 1943, include the book value of such assets held as at October 20, 1941, the date referred to above, together with the appraised value of certain additional assets acquired for the Company at that date from the Dufferin Paving & Crushed Stone Limited and paid for direct by the Crown, and also the further capital expenditures incurred by the Company to March 31, 1943. Title to the capital assets is vested in the Company, and municipal taxes are paid thereon.

240. *Victory Aircraft Limited.*—This Company was incorporated for the purpose of operating the plant previously operated by National Steel Car Corporation Limited at Malton, Ontario, that plant having been expropriated

by the Crown in accordance with the terms of Order in Council P.C. 10011 of November 3, 1942. By P.C. 690 of January 26, 1943, the compensation paid to the National Steel Car Corporation Limited was \$4,000,000, of which, as set forth in that Order, \$3,299,376 was for fixed assets, \$549,939 for the equity in inventory and other current assets, and \$150,685 by way of profit on all work performed or in process by the Company (National Steel Car Corporation Limited) in the plant since the commencement of operations.

241. *War Supplies Limited.*—The amount of \$4,030,056 shown for refunds payable to the United States Government, in this Company's Balance Sheet as at March 31, 1943, was the amount agreed upon as refundable as at that date in connection with several specific orders. It was recognized that additional amounts would become refundable, or adjustments required of amounts receivable by the Company. Since the close of the fiscal year a large payment has been made by way of an interim refund to be considered as applicable to all orders.

242. *Wartime Metals Corporation.*—In addition to the development and operation of the mining properties under its administration, this Company also acts in a supervisory capacity in connection with the development and operation of certain other mining properties which are financed directly by the Department, and the transactions relating to the latter group of properties are, therefore, not recorded in the Company's accounts. The audit certificate entered on the Company Balance Sheet as at March 31, 1943, includes the following observation:

The stores records maintained for general supplies, at the several mining projects, were inadequate. Physical inventories of such supplies taken by two of the projects, revealed comparatively large variations from the relative book values in each case; and if similar variations are found when physical inventories are taken at other projects, further adjustments of the accounts maintained for Capital Expenditures and/or Development and Pre-Production Expenses will become necessary.

A communication recently received from the Company in this connection states that "adequate stores records were installed on all projects as soon as it was physically possible to do so, and these discrepancies occurred when the operations were started and speed in getting into production was of major importance."

243. *Crown-owned Capital Assets.*—With the exception of Toronto Ship-building Company Limited, where title to the capital assets is vested in the Company, title to the capital assets used by the various manufacturing companies is vested in His Majesty the King in the right of Canada. For this reason, such assets are not reflected in the Balance Sheets of the companies concerned, although footnotes to the various Balance Sheets give the cost valuations of the Crown-owned capital assets in the companies' charge as at March 31, 1943, the total of such assets being \$58,009,686.75 as of that date.

CONTROL BODIES

COMMODITY PRICES STABILIZATION CORPORATION LIMITED

244. Order in Council P.C. 9870 of December 17, 1941, provides that the Auditor General of Canada shall be the auditor of the Corporation. The accounts for the year ended March 31, 1943, have been audited and the report thereon transmitted to the Minister of Finance.

245. The Corporation was authorized by Order in Council P.C. 9242 of October 9, 1942, to guarantee payment of promissory notes representing advances by any bank to any person, firm or corporation engaged in the production of logs or lumber during the season 1942-43, provided that the liability

of the Corporation under the guarantee should not exceed an aggregate amount of \$2,500,000. Agreements were entered into with the chartered banks, whereby the Corporation's liability in the case of each guaranteed credit in excess of \$10,000 was limited to an amount equal to 15 per cent of the maximum amount of indebtedness outstanding at any one time. In respect of credits not exceeding \$10,000, the Corporation's liability was limited to an amount equal to 15 per cent of the total sum determined by ascertaining the maximum amount of guaranteed indebtedness outstanding at any time on each credit respectively, and adding together all the said maximum amounts. The Corporation's contingent liability at March 31, 1943, in respect of two loans appeared to be understated. The original notification of credit placed the amount granted to each borrower at \$5,000. The amounts actually advanced were \$6,700 and \$5,810, respectively. The provisions of the agreement with the bank permitted the bank to increase the amount loaned beyond the original credit up to but not exceeding \$10,000. As the Corporation reported its contingent liability on the basis of \$5,000 for each loan, it was pointed out that the bank might reasonably consider the guarantee as applicable to the full amount loaned in each case. This was subsequently ascertained to be the case and the contingent liability of the Corporation at March 31, 1943, was adjusted accordingly.

WARTIME FOOD CORPORATION LIMITED

246. A by-law of Wartime Food Corporation Limited, a subsidiary of Commodity Prices Stabilization Corporation Limited, provides that the Auditor General of Canada shall be auditor of the Company. The accounts of the Corporation for the year ended March 31, 1943, have been audited and a report thereon transmitted to the Minister of Finance.

WARTIME SALVAGE LIMITED

247. Order in Council P.C. 2530 of March 30, 1942, authorizing the Minister of Finance to enter into an agreement with this Company, directs that the Auditor General shall be the auditor of the Company. In accordance with this direction, the accounts were audited for the period from April 24, 1942, the date of incorporation, to March 31, 1943.

CANADIAN WOOL BOARD LIMITED

248. By Order in Council P.C. 1835 of March 10, 1942, authorizing the Minister of Finance to enter into an agreement with this Company, it was directed that the Auditor General be the auditor of the Company, and in accordance with this direction the accounts were audited for the period from March 18, 1942, the date of incorporation, to March 31, 1943.

SUGAR ADMINISTRATOR

249. The Order in Council, P.C. 3223 of October 21, 1939, making regulations respecting sugar, directs that the accounts of the Sugar Administrator be audited by the Auditor General. For the purposes of the activity, the fiscal year ends August 31. Apart from administrative expenses, which are charged to the allotment made from the War Appropriation for the administrative costs of the Wartime Prices and Trade Board, no expenditures chargeable to Consolidated Revenue Fund were incurred by the Sugar Administrator. The accounts of the Administrator have been audited for the fiscal years ended August 31, 1942 and 1943, and certificates given to the Wartime Prices and Trade Board that the Balance Sheets presented by the Sugar Administrator exhibit a true and correct view of the state of his accounts at the close of the respective years.

MISCELLANEOUS AUDITS

Balance Sheet Accounts

The following are comments on certain accounts included in the Dominion Balance Sheet:

ASSISTANCE TO INDIANS

250. Section 94B of the Indian Act authorizes the granting of loans for co-operative projects. These loans are made subject to such terms and conditions as the Governor in Council may direct. One of the stipulations is that loans are repayable in five annual instalments. The principal outstanding as of March 31, 1943, was \$16,799.57; interest was \$5,119.94. Of these amounts, \$15,366.63 is arrears.

EMPIRE SETTLEMENT SCHEME

251. From the date of inception of this Scheme, loans totalled \$1,022,867.59, of which \$790,805.12 has been repaid or rebated, leaving a balance of \$232,062.47. Of this amount, \$117,981.44 is owing to the Dominion of Canada and is included in the Balance Sheet under Miscellaneous Current Accounts, and \$114,081.03 is the equity of the Government of the United Kingdom. In the year 1942-43 collections amounted to \$68.97. The outstanding balances are considered by the Department to be uncollectible.

KING'S PRINTER'S ADVANCE

252. This account is limited by the Act to \$700,000 plus amounts due to the King's Printer by the Houses of Parliament and the departments. At the close of the fiscal year 1942-43, the \$700,000 had been exceeded by the sum of \$1,019,742.21. The excess was advanced without statutory authority but, by application of the War Measures Act and the War Appropriation Act, authority has since been granted to increase the statutory limit of \$700,000 to \$2,000,000.

SEED GRAIN AND RELIEF ADVANCES, DEPARTMENT OF MINES AND RESOURCES

253. This account is maintained in connection with seed grain and other advances made over a long period of years. The balance of principal outstanding as shown on the Dominion Balance Sheet at March 31, 1943, is \$2,701,129.68, of which \$303,881.43 has been transferred to Non-Active account. Interest amounted to \$3,558,395.49, making a total of \$6,259,525.17. There does not appear to be any systematic collection policy, no demands for payments being sent debtors. Collections in 1942-43 amounted to only \$23,746.10.

TRANSPORT DEPARTMENT STORES

254. At the close of the fiscal year 1942-43, the ledger balances of the stores inventories totalled \$1,403,236.34. This amount exceeded the actual inventory by approximately \$18,200, which was the value of stores issued to various services for which repayment was not made until 1943-44. In one instance the appropriation for the service would have been over-expended by approximately \$1,200 if the stores had been paid for in 1942-43.

GOVERNMENT OFFICERS' GUARANTEE FUND

255. Pursuant to the regulations governing this Fund, Treasury Board approved payments from the Fund during 1942-43 of amounts totalling \$12,964.26 in respect of seven defalcations. Payments were applicable to the following departments: Finance, \$29.30; National Defence (Army), \$7,092.17;

National Defence (Air), \$5,000; and National War Services, \$842.79. An additional amount of \$166.34 in connection with the defalcation in the last-named Department was paid in 1943-44. The total standing to the credit of the Fund at March 31, 1943, was \$238,640.73.

MILITARY ESTATES

256. There remain in the records of National Defence (Army) a number of estates associated with the casualties of the 1914-18 war, mainly by reason of the fact that next of kin cannot be located. Much can be said in favour of these files being closed and the moneys transferred to the general credit of Consolidated Revenue Fund, especially where a pre-enlistment place of permanent domicile in a province of Canada cannot be established. A survey disclosed that there is no adequate internal audit of the distribution of estates' funds. The Department has undertaken to provide this safeguard. The balance appearing in the Dominion Balance Sheet at March 31, 1943, was \$122,268.53.

POST OFFICE SAVINGS BANK

257. The balance at credit of the Post Office Savings Bank account at March 31, 1943, was \$24,373,991.48. Examinations of the accounting system resulted in the opinion that, while the system includes adequate safeguards against irregularities and loss, it has features that are antiquated and inefficient. The introduction of up-to-date accounting methods would promote efficiency and should result in labour savings. The defects of the accounting procedure were referred to as early as June 24, 1921, and again in 1933. They were again noted to the Department during the past year.

258. Section 2 of the regulations approved by Order in Council P.C. 311 of February 22, 1911, provides that:—

Deposits will be received, provided the deposits by such depositor in any year ending the 31st of March do not exceed \$1,500, and provided the total amount standing in such depositor's name in his ordinary deposit account in the books of the Postmaster General does not exceed \$5,000, exclusive of interest.

This rule has not always been strictly enforced.

R.C.M.P. DEPENDENTS' PENSION FUND

259. Section 86 (5) of the R.C.M.P. Act requires the account to be audited annually by the Auditor General and a report made to Parliament. The operations for the year were as follows:—

260. The legislation, as enacted in 1934, provides for awards being made by the Minister. In 1940 the R.C.M.P. Act was amended and it is now directed by section 27 that: "Notwithstanding anything in this Act, any pension, gratuity or allowance provided for by this Act shall be granted only with the approval of the Governor in Council." If the intent of this amendment is to extend the direction to the Dependents' Pension Fund, it is not being observed. In the course of audit it was noted that a ministerial award was made. The Department was queried as to authority. Departmental opinion is that the 1940 amendment was not intended to be applicable to such awards.

UNEMPLOYMENT INSURANCE FUND

261. The balance at the credit of this Fund at March 31, 1943, was \$114,-011,083.08, of which \$5,639,004.90 was cash and \$108,372,078.18 the value of Dominion of Canada securities at book value (plus accrued interest) held by the Bank of Canada. The Auditors of the Bank of Canada furnished a certificate to the effect that securities held by the Bank of Canada as at December 31, 1942, had been inspected and found to be in order.

262. Many thousands of temporary employees of the Government of Canada were brought within the Unemployment Insurance scheme subsequent to July, 1941, the date on which the Act became operative. One large group, Dominion Arsenal employees, were insured as from September, 1941; the largest group came in in the summer of 1942, and a further group as late as 1943. Representations were made to the Governor in Council to the effect that several persons who were employed in the Public Service of Canada had become unemployed, but were ineligible for Unemployment Insurance benefits for the reason that, although they were in insurable employment since July 1, 1941, they had not contributed to the Fund from that date, and thus failed to meet the qualification requiring at least one hundred and eighty days' contributions. To protect such employees, Order in Council P.C. 104/4860 of June 9, 1942, directs that:—

if any person establishes to the satisfaction of the Unemployment Insurance Commission on a claim for benefit that he was, during any period subsequent to June 30, 1941, employed in the Public Service of Canada and was an insured person under the provisions of the Unemployment Insurance Act and that contributions, under the provisions of the said Act, were not made in respect of his employment during any period of the said employment, the department, branch or agency of the Public Service of Canada by which such person was employed shall on the request of the Unemployment Insurance Commission forthwith pay to the said Commission the amount of the employer's and employee's contributions under the said Act, for the period during which contributions have not been paid.

This direction departs from a principle of unemployment insurance schemes, in that provision is made to pay premiums only in cases where benefits will be paid. In other words this is insurance for a selected group against a certainty. In all insurance of this character, contribution rates are based on the principle that contributions from the entire insured population will provide only for the percentage of the whole group who, it is expected, will become unemployed and be entitled to benefits. There has thus been established by an executive order an unforeseen and substantial potential contingent liability against the Unemployment Insurance Fund.

263. The Act provides (section 72) that where an employer fails to make contributions, thus depriving an employee of the statutory rights to benefits, such benefits may be paid and the Commission may recover from the employer as a civil debt an amount equal to such benefits so lost by the employee. As the statute expressly denies an employer the right to deduct contributions from an employee's wages other than those covering the current wage period, it would seem that when doubt exists as to the insurability of groups of employees, such persons should be insured as from the date that this doubt is removed by resolution of the Commission and formally incorporated in regulations.

WAR DAMAGE INSURANCE

264. Receipts and disbursements for the year ended March 31, 1943, were audited. Under the provisions of section 21 (2) of the War Risk Insurance Act, Chapter 35, 1942, the sum of \$100,000 was credited to the account from the Consolidated Revenue Fund. The total insurance to March 31, 1943, excluding grain insurance, Dominion Government property and transit policies, was \$1,942,528,424.75. Gross premium receipts, excluding those from grain and Dominion Government-owned property, were \$4,586,507.40, from which agents' policy fees totalling \$136,411.41 were deducted, leaving a net premium income of \$4,450,095.99 which was credited to the Receiver-General. Disbursements for administration expenses totalled \$62,581.17, leaving a balance of \$4,487,514.82 at March 31, 1943. The Supervisor of War Damage Insurance reported that amounts of \$46,438.06 and \$18,990.10 had been set up as reserves for the payment of remuneration to insurance companies, and of policy fees to direct writing mutual insurance companies and reciprocal insurance exchanges in respect of business underwritten to March 31, 1943. Two claims, estimated at \$235, were reported to be outstanding at March 31, 1943.

265. In addition to the above, premiums received from the Dominion Government in respect of Dominion Government-owned property totalled \$809,132.18, and premiums in respect of grain under the special scheme instituted under the provisions of section 4 of the Act totalled \$404,382.49. The Act does not bring property held in the right of Canada within the scheme. That has been done by Order in Council P.C. 2/8917 of September 30, 1942, which was made under the authority of the War Risk Insurance Act, 1942, and the War Measures Act. The preamble of the Order in Council among other things states "that the adoption of the policy of insuring all Government property against war risk would constitute a sound budgetary procedure against a possible destruction of large and valuable public assets". The Order directs that "all property of His Majesty in right of the Dominion of Canada", with certain exceptions, "be insured against war damage under the War Risk Insurance Act, 1942", with the proviso that no commission be paid under any policies issued or contracts of insurance entered upon. It is a provision of section 5 of the Act that a contract of insurance is binding only after payment of premium and execution of the policy, and by regulation it is provided that no coverage is in effect until two days after insurance is made. Despite these provisions, policies have been issued to departments as from October 1, 1942, although application for insurance, execution of policies and payment of premiums were made months subsequent to October 1. The action taken is open to objection because: (1) department votes were charged with an expenditure without any benefit accruing; and (2) departmental votes were employed to strengthen, or fortify, the credit of the War Damage Insurance Special Account, although Parliament had specifically directed, by section 21 of the Act, that this be done by the Minister of Finance, with the approval of the Governor in Council, drawing on unappropriated moneys in Consolidated Revenue Fund to a maximum of \$5,000,000; also, that should any deficiency arise in the Special Account, it shall be liquidated by means of "moneys provided by Parliament to meet any deficiencies in the Special Account".

Departmental Accounts

The following comments are on certain accounts which are kept only departmentally. They are not included in the Dominion Balance Sheet.

POST OFFICE GUARANTEE FUND

266. The fund was established under authority of section 7 (g) of the Post Office Act, and was built up in the first instance from compulsory contributions made by Post Office employees, during the period from inception (March 14, 1898) to April, 1919, but since that date the interest credited on the capital amount of the fund has been more than sufficient to meet all known losses. At the commencement of the fiscal year 1942-43, the fund amounted to \$372,356.36; during the year the interest increment was \$13,901.14 and the net amount of claims paid \$4,369.40. At the close of the fiscal year the fund amounted to \$381,888.10. Of this amount, \$275,290.72 was invested in Dominion of Canada bonds (par value \$294,000) and the remainder held on deposit in the Post Office Saving Bank.

SUPREME COURT OF CANADA

267. A statement of the Registrar of the Court, certified by the Bank of Montreal, shows an amount of \$21,856.81 as outstanding deposits in the Supreme Court Security for Costs Trust Account on March 31, 1943. Some deposits date from 1891.

Other Accounts

CANADIAN BROADCASTING CORPORATION

268. The accounts of the Canadian Broadcasting Corporation for the fiscal year ended March 31, 1943, were audited in accordance with section 20 of the Canadian Broadcasting Act, 1936.

269. The \$4,970,269.59 revenue of the Corporation was derived from licence fees, \$3,701,690.24; commercial broadcasting, \$1,243,553.08, and miscellaneous, \$25,026.27. The expenditures for the year amounted to \$4,740,008.03, made up of: programs, \$2,329,648.94; station network (wire lines), \$777,307.60; engineering, \$809,610.41; reserve for depreciation, \$411,244.83; administration, \$207,890.64; and commercial, press and information, and interest on loans, \$204,305.61. The excess of revenue over expenditures, \$230,261.56, was credited to the operating surplus.

271. The Corporation expended \$4,070.41 in connection with the International Short Wave Station at Sackville, N.B. This expenditure was incurred on behalf of the Dominion Government and the account receivable is included in current assets.

FEDERAL DISTRICT COMMISSION

272. Section 18 of the Federal District Commission Act, Chapter 55, 1927, provides that all expenditures by the Commission be subject to the audit of the Auditor General in the same manner as other public moneys. Pursuant to this direction, receipts and disbursements of the Commission for the fiscal year ended March 31, 1943, were audited. Recommendations were made that, as soon as practicable, the present system and records be revised to facilitate the production of comprehensive and accurate statements of the operations and affairs of the Commission.

FOREIGN EXCHANGE CONTROL BOARD

273. The fiscal year of the Foreign Exchange Control Board is the calendar year. It is directed by Order in Council P.C. 7378 of December 13, 1940, that "an annual audit of the transactions of the Board shall be made by the Auditor General in such manner as he thinks proper and he shall certify to the House of Commons that in his opinion, having regard to such examination, the transactions of the Board have or have not been in accordance with the provisions of this Order and that the records of the Board do or do not show truly and clearly such transactions." From the information and the explanations received in the course of the audit, I am of the opinion, having regard to such examinations, that the transactions of the Board have been in accordance with the provisions of the Order in Council and that the records maintained show truly and clearly such transactions.

NATIONAL BATTLEFIELDS COMMISSION

274. Section 14 of the National Battlefields at Quebec Act, Chapter 57, 1908, provides that all accounts, receipts and expenditures of the Commission shall be subject to the audit of the Auditor General of Canada as in the case of public moneys, and subject to the provisions, so far as applicable, of the Consolidated Revenue and Audit Act. Pursuant to this direction, the receipts and disbursements of the Commission for the year ended March 31, 1943, have been audited.

275. Section 11 of the Act, as amended, provides that before entering upon any work of improvement or construction or any other work involving the expenditure of money, the Commission shall have plans prepared of the proposed works, and submit them to the Governor in Council, with such additional information as may be required, and shall not proceed with any such work until approved by the Governor in Council. Since 1939-40 the estimates of the Commission have not been submitted for the approval of the Governor in Council, as contemplated by this section of the Act.

276. As a result of the audit, recommendations have been made to the Commission to the effect that, as soon as practicable, the present system of accounting be revised to permit the production of comprehensive statements of the assets and liabilities and of the operations of the Commission.

NATIONAL HARBOURS BOARD

277. The accounts of the National Harbours Board for the year ended December 31, 1942, were audited in accordance with section 34 of the National Harbours Board Act, 1936.

278. The revenue of the Board totalled \$11,319,106.74, which included \$150,000 from the City of Montreal and \$150,000 from the Province of Quebec towards the deficit of the Jacques Cartier Bridge.

279. Expenditures amounted to \$15,867,041.65, being operating expenses, \$5,219,781.05; interest to private holders, \$1,025,796.26, and \$7,001,760.39 for interest due the Dominion Government; \$1,964,301.25 for reserve for replacements and depreciation, and \$655,402.70 for miscellaneous charges to income. The net income deficit for the year was \$4,547,934.91 and a further amount of \$269,494.14 was charged to surplus and deficit account as a result of capital asset write-offs and other adjustments.

280. A condensed summary of the balance sheets for all harbours and elevators operated by the National Harbours Board, including Jacques Cartier Bridge, at the close of the years 1942 and 1941, is:

INSPECTION BOARD OF UNITED KINGDOM AND CANADA

286. In addition to performing inspectional duties in Canada and the United States, the Board conducts research and experimental work as required, and acts as a liaison agent between various technical departments in Canada, the United Kingdom and the United States. The Board was formed under authority of an agreement dated November 6, 1940 (authorized by Order in Council P.C. 5995 of October 26, 1940) between His Majesty's Governments of the United Kingdom and of Canada, respectively. The Board consists of eight members, four being appointed by each Government. Financial control is exercised through two members of the Board (one representing each Government) who are designated as financial members.

287. Among other things, the agreement provides that the Board inspect and certify such classes of munitions and supplies as is directed by either or both Governments, and also act as agent of the Governments in performing such duties. The Governments undertake to place at the Board's disposal,

without charge, all buildings and lands in Canada held for inspection purposes, as well as all inspection tools, gauges, apparatus, drawings and specifications and other equipment owned by either of them in Canada or in the United States.

288. Funds for the operation of the Board are provided in the first instance by the United Kingdom Government. Such matters as the Board's financial policy, methods of accounting to the two governments, the distribution of running costs and capital expenditures, and the disposal of assets on cessation of hostilities are governed by regulations issued under authority of the agreement.

289. Expenditures of the Board from January 1, 1941, to March 31, 1943, amounted to \$50,832,142.23, and were provisionally assessed against the two Governments as follows:—

	Running Costs		Capital	
	in Canada	in U.S.A.	Expenditures	Total
Canada's share	\$17,564,170 64	\$ 211,343 33	\$ 594,753 51	\$18,370,267 48
United Kingdom's share.	25,033,693 29	6,833,427 96	594,753 50	32,461,874 75
	<u>\$42,597,863 93</u>	<u>\$7,044,771 29</u>	<u>\$1,189,507 01</u>	<u>\$50,832,142 23</u>

It is anticipated that this division of costs may be revised in the light of future experience, as the method of division is still under review by the representatives of the respective governments.

WATSON SELLAR,
Auditor General.

November, 1943.
